

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

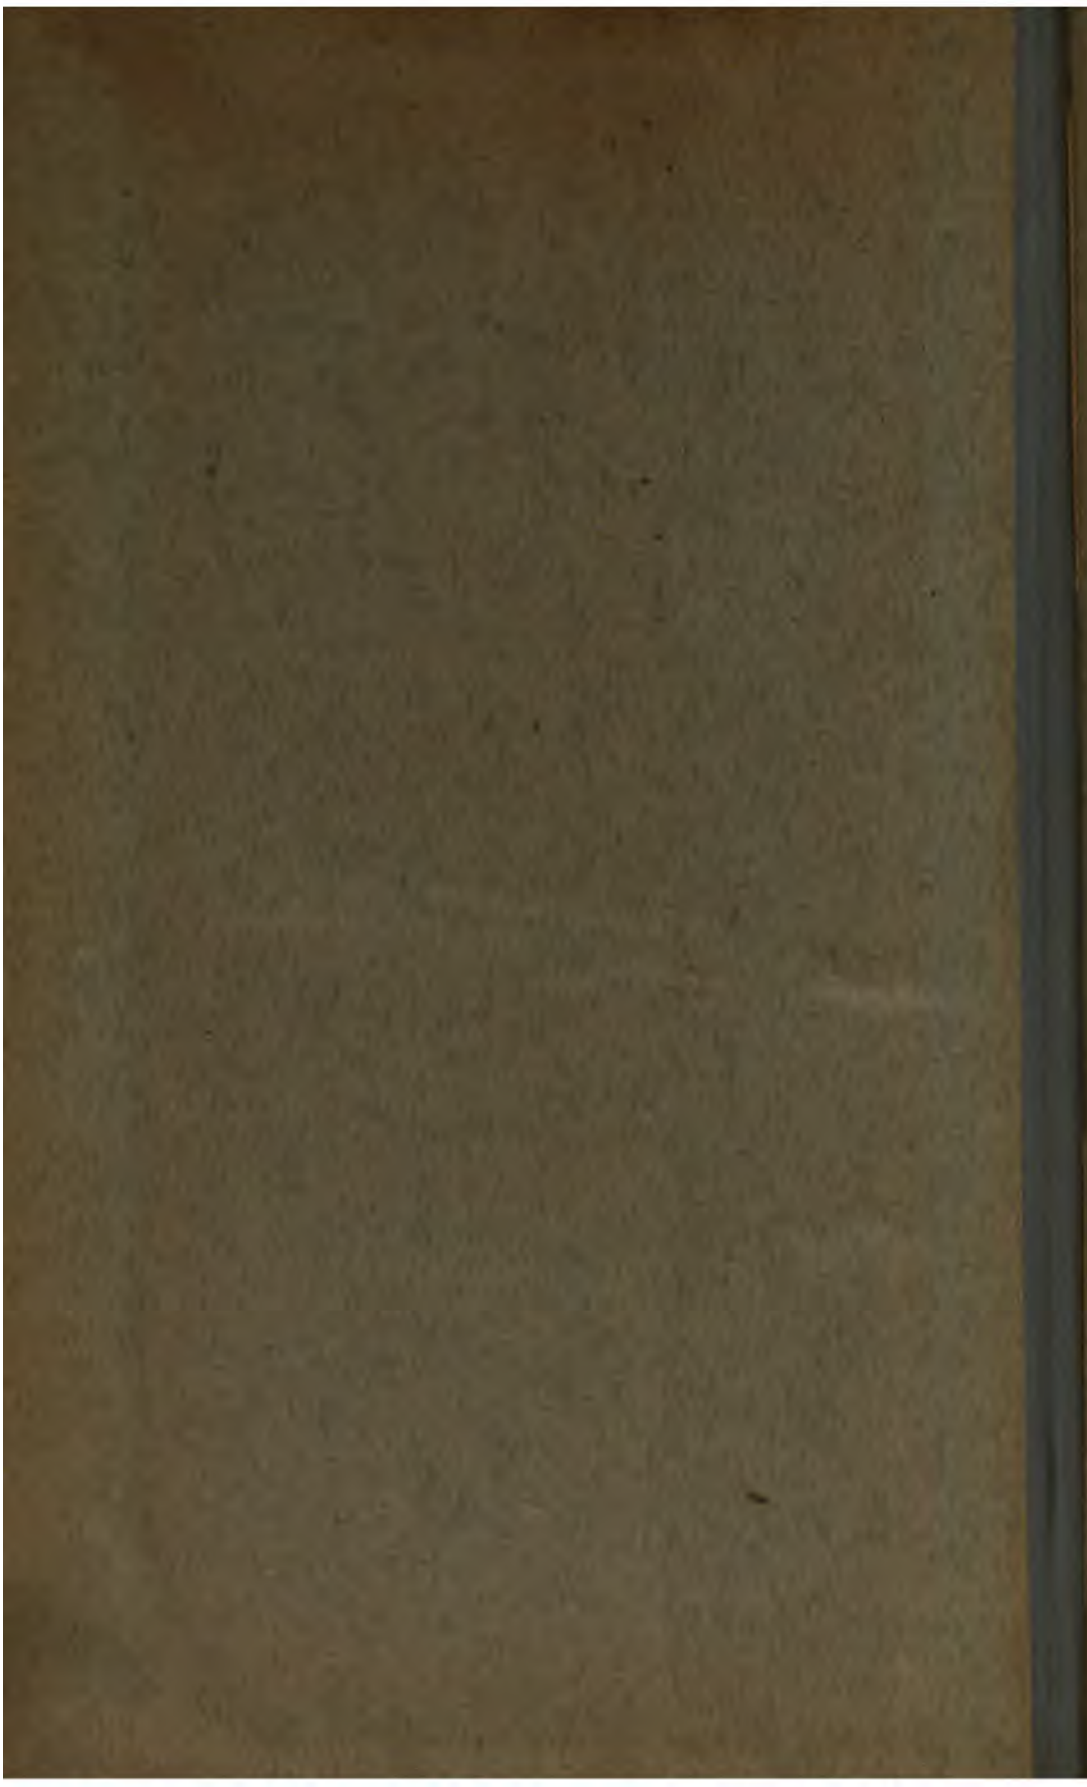

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

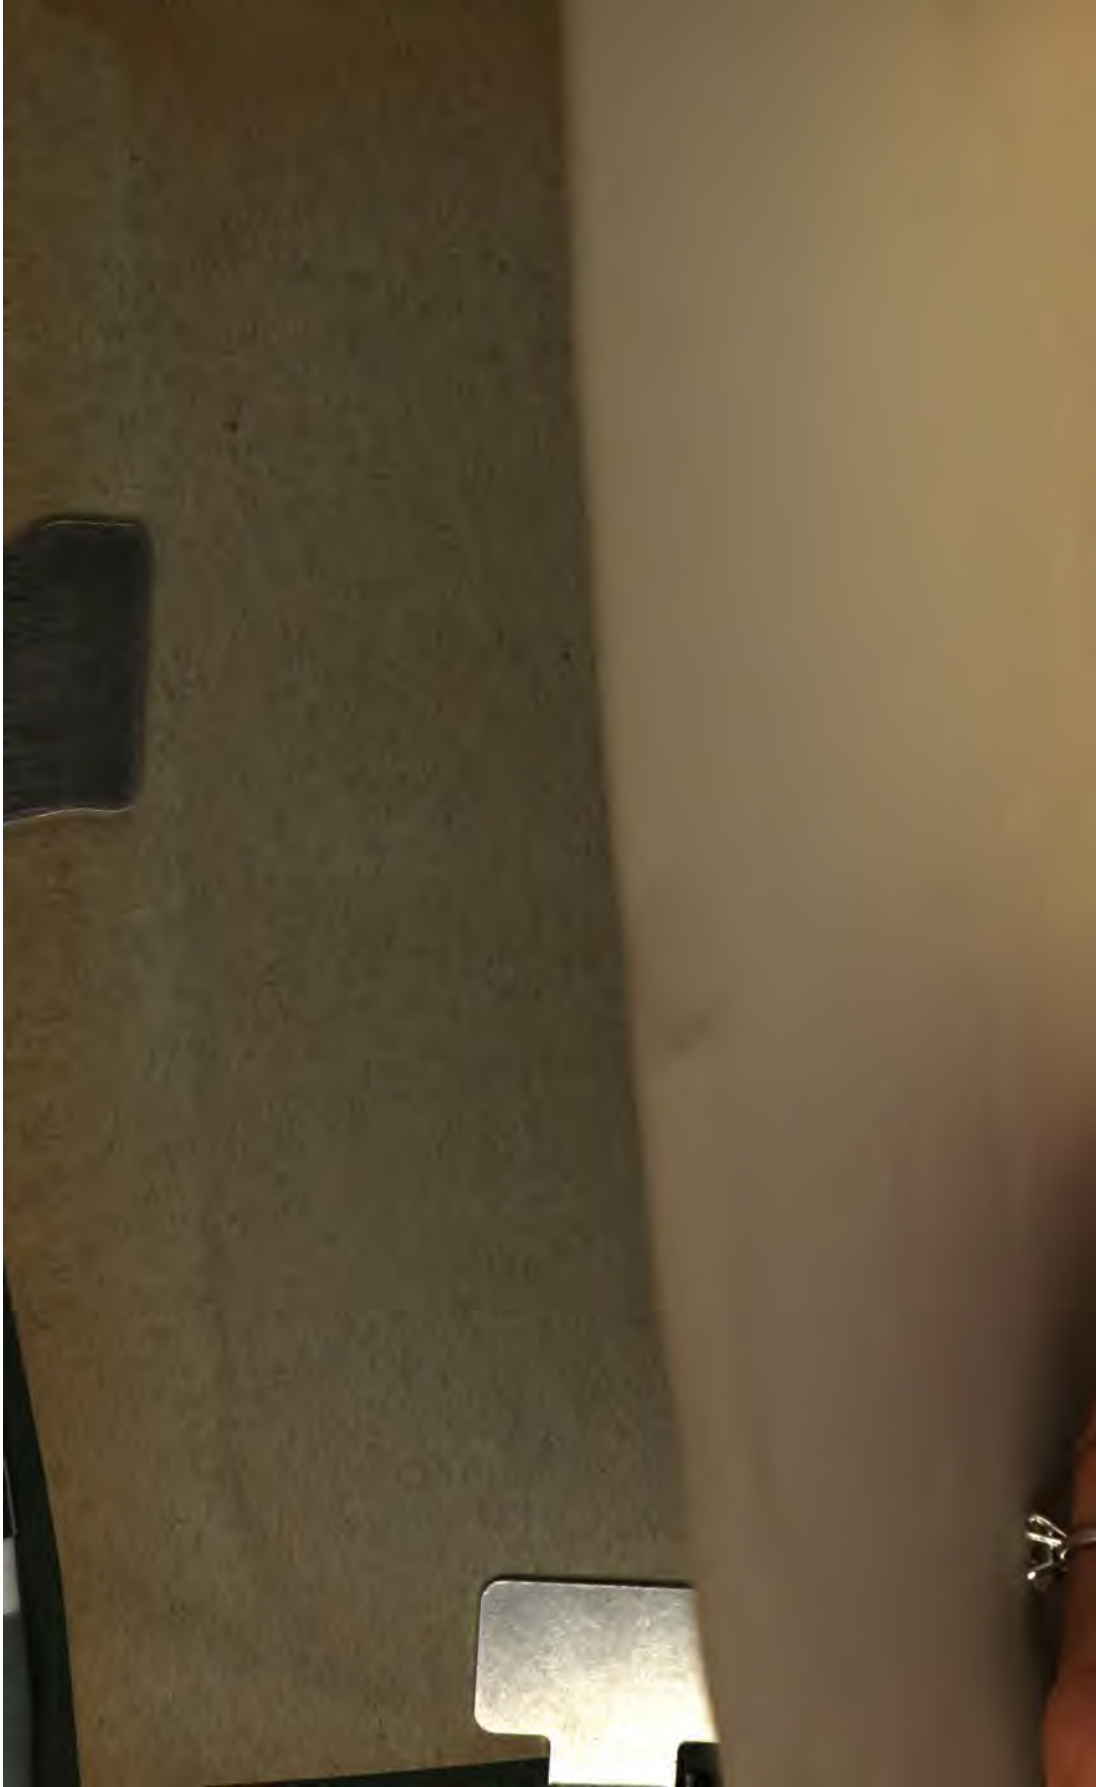

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

1905

Poor Law.

Of the Ordinary Poor (88,823) there were—

		per cent.
Receiving Outdoor relief,	76,974 or	86·66
Receiving relief in Poorhouses,	11,711 „	13·18
Vagrants,	138 „	0·16

App. (B.)
No. 7.

The Lunatic Poor (14,193) were distributed as follows:—

		per cent.
In Asylums and Institutions for Imbeciles, 10,383 or	73·16	
In Licensed Wards of Poorhouses,	1,151 „	8·11
In Private Dwellings,	2,659 „	18·73

Of the 103,016 poor persons relieved, 66,703 were Paupers (or separate individuals), and 36,313 were their Dependants.

A classification of the 66,703 separate individuals (Paupers) relieved shows that on 15th May last the Sane Poor numbered 52,510 or 78·72 per cent., and the Lunatic Poor 14,193 or 21·28 per cent.

Classifying the Sane Poor according to age it is found that of *individuals* relieved—

22,139 or 42·16 per cent. were 65 years of age and upwards,
4,190 or 7·98 per cent. were orphan and deserted Children, and
26,181 or 49·86 per cent. were between the ages of (say) 14
and 65.

Of the 4190 orphan and deserted Children relieved at 15th May, 2891 were orphans, and 1299 were deserted.

6195 children were boarded out during the year. Of these, 3791 were orphan and deserted Children (included above as paupers), and the remainder—2404—were children separated from their parents, and treated as dependants in the returns.

It is found that 1800 or 29·06 per cent. of these Children were placed with relatives, and 4395 or 70·94 per cent. were under the care of strangers.

The total number of Children separated from their parents by action of the Parish Council or of law was 2920.

App. (B.)
No. 8.

Fully 11 per cent. of the Poor relieved chargeable to Scotland were natives of England and Ireland, the total of that class at 15th May being 11,369, of whom 9697 were born in Ireland.

App. (B.)
No. 9.

We have prepared a Table showing for each parish in Scotland the ratio of poor at 15th May 1903 per 1000 of population according to the Census of 1901.

(b) COMPARISON BETWEEN NUMBER OF POOR IN 1903 AND
PREVIOUS YEARS.

Poor Law.

Paupers of All Classes.

The subjoined Table shows the number of Poor, and their Dependants, at 15th May, as returned to us for the past twenty years, and the ratio per 1000 of persons in receipt of Parochial Relief to population:—

Years.	Number of Poor at 15th May.*	Their Dependants.	Total.	Estimated Population.	Ratio of persons in receipt of Parochial Relief per 1000 of Population.
1884	60,665	33,977	94,642	3,822,594	25
1885	60,873	34,643	95,516	3,851,601	25
1886	61,563	35,941	97,504	3,880,608	25
1887	61,286	35,250	96,536	3,908,615	25
1888	61,073	35,153	96,226	3,938,622	24
1889	60,544	34,292	94,836	3,967,629	24
1890	60,020	32,804	92,824	3,996,636	23
1891	59,063	32,000	91,063	4,025,647	23
1892	58,855	31,937	90,792	4,070,282	22
1893	59,826	32,178	92,004	4,114,917	22
1894	61,015	32,667	93,682	4,159,553	23
1895	62,052	33,816	95,868	4,204,188	23
1896	63,694	34,308	98,002	4,248,823	23
1897	64,646	34,857	99,503	4,293,459	23
1898	65,000	34,578	99,578	4,338,094	23
1899	64,513	33,434	97,947	4,382,729	22
1900	64,626	34,390	99,016	4,427,365	22
1901	64,680	34,343	99,023	4,472,103	22
1902	65,387	35,461	100,848	4,531,299	22
1903	66,703	36,313	103,016	4,579,223	22

* Prior to 1896, 14th May.

It will be observed that during the past year there has been a total increase of Pauperism of 2168,—an increase of 1316 Paupers and 852 Dependants. Allowing, however, for the estimated increase of population, there has been no appreciable increase of Pauperism per thousand of population.

Compared with 1868, the year of highest recorded Pauperism, the number of Poor per thousand of population has fallen from 41 to 22—a decrease of 19 per thousand of the population.

The following Table exhibits the results obtained from Returns of the number of Poor relieved on the 15th of January, the 15th of May, and the 15th of September, during each of the last ten years:—

[TABLE.]

Ninth Annual Report of the

Poor Law.

POOR RELIEVED.

Year.	On 15th January.*				On 15th May.*				On 15th September.*				Average of the three Periods.

* Prior to 1896, 14th January, 14th May, and 14th September.

Ordinary and Lunatic Poor.

Poor Law.

The number of Ordinary Poor and of Lunatic Poor at 15th May* in each year since 1868; the ratio which the Ordinary Poor and Lunatic Poor respectively bear to each thousand of the estimated population; and the ratio of Lunatic Poor per thousand of Poor of all classes are shown in the following statement:—

Year.	Number of Poor at 15th May.*		Ratio per 1000 of Estimated Population.		Ratio of Lunatic Poor per 1000 of Poor of all Classes.
	Ordinary.	Lunatic.	Ordinary Poor.	Lunatic Poor.	
1868	130,441	5,790	40	1·8	42
1869	130,008	6,062	39	1·8	45
1870	126,239	6,227	38	1·9	47
1871	122,909	6,348	37	1·9	49
1872	116,356	6,381	34	1·9	52
1873	109,634	6,473	32	1·9	56
1874	103,688	6,551	30	1·9	59
1875	98,868	6,737	28	1·9	64
1876	95,682	6,976	27	2·0	68
1877	93,380	7,260	26	2·0	72
1878	91,795	7,603	25	2·1	76
1879	95,138	7,761	26	2·1	75
1880	95,089	8,067	26	2·2	78
1881	93,958	8,348	25	2·2	82
1882	90,624	8,717	24	2·3	88
1883	88,216	8,981	23	2·3	91
1884	85,608	9,084	22	2·4	96
1885	86,362	9,154	22	2·4	96
1886	88,070	9,434	23	2·4	97
1887	86,984	9,552	22	2·4	99
1888	86,394	9,832	22	2·5	102
1889	84,766	10,070	21	2·5	106
1890	82,454	10,370	21	2·6	112
1891	80,454	10,609	20	2·6	117
1892	80,014	10,778	20	2·6	119
1893	81,002	11,002	20	2·7	120
1894	82,320	11,362	20	2·7	121
1895	84,317	11,551	20	2·7	120
1896	86,063	11,939	20	2·8	121
1897	87,221	12,282	20	2·9	123
1898	86,941	12,637	20	2·9	127
1899	84,969	12,978	19	3·0	131
1900	85,850	13,166	19	3·0	133
1901	85,432	13,596	19	3·0	137
1902	86,999	13,849	19	3·1	137
1903	88,823	14,193	19	3·1	138

* Prior to 1896, 14th May.

This Table shows that there has been an increase of 1824 Ordinary Paupers and an increase of 344 Lunatic Paupers in 1902-1903 compared with the previous year.

It is seen that since 1868 the Ordinary Poor have decreased from 130,441 to 88,823—a diminution from 40 per thousand to 19 per thousand of the estimated populations in these years,—that is, taking the increase of population into account, there has been a relative decrease in the Ordinary Poor, in round numbers, of more than 50 per cent.

During the same period the number of Lunatic Poor has increased from 5790 to 14,193, an increase from 1·8 to 3·1 per thousand of the estimated population, or, allowing for the increased population, more than 70 per cent.

The Table also shows that the ratio of Lunatic Poor to the Poor of all classes has more than trebled since 1868, having risen from 42 per thousand to 138 per thousand.

Poor Law.

Ordinary Poor—Outdoor and Indoor.

Ordinary
Poor.

A further classification of the Ordinary Poor showing the number of Indoor Poor and Outdoor Poor respectively on the 15th May† in each year since 1868 is given in the following Table:—

Year.	Ordinary Poor.		
	Indoor.	Outdoor.	
		Resident.	Vagrants.
1868	8,794	121,647	*
1869	8,846	121,657	*
1870	7,928	118,811	*
1871	7,749	115,160	*
1872	7,402	108,954	*
1873	7,898	101,786	*
1874	7,769	95,919	*
1875	7,673	91,195	*
1876	7,586	88,096	*
1877	8,046	85,334	*

† Prior to 1896, 14th May.

II. POOR LAW FINANCE.

Poor Law.

(a) ORDINARY RECEIPTS IN 1902-1903.

The Ordinary Receipts of the various Parish Councils for the Revenue.
 year ended 15th May 1903, according to the Returns made to us by App. (B.)
 Inspectors of Poor (duplicate entries in transactions between Parish No. 5.
 Councils being deducted), amounted to £1,225,160.

Of this sum there was derived from—

Rates,	£919,767
Local Taxation Contributions, and Treasury Grants in lieu of Rates,	244,085
Other Sources:—	
Interest, &c., on Mortifications,	£4,111
Relatives of Paupers,	31,840
All other Ordinary Receipts,	25,357
	<hr/> 61,308
Total,	<hr/> £1,225,160 <hr/>

These Ordinary Receipts were raised in the following proportion:—

	Per cent.
Rates,	75·07
Local Taxation Contributions, &c.,	19·92
Other Sources,	5·01
	<hr/> 100·00 <hr/>

(b) COMPARISON BETWEEN ORDINARY RECEIPTS IN 1902-1903
AND PREVIOUS YEARS.

The following Table presents a comparative statement of the amounts received from Assessment, Grants, and Other Sources (excluding Loans and other Capital Receipts) for the last ten years, together with the rate of assessment and the amount of Grants in Aid per £ of valuation and per head of the estimated population:—

[TABLE.]

Year ended 15th May.†	ORDINARY RECEIPTS.							
	Assessment.	Grants in Aid.	Relatives of Paupers, Northcotes, Voluntary Contributions, and other sources (exclusive of Loans and other Capital Receipts).	Total.	Rate of Assessment per £ of Gross Valuation in Assessed Parishes.	Rate of Assessment per head of estimated Population.	Grants in Aid per £ of Gross Valuation of Scotland.	Grants in Aid per head of estimated Population.

* Contributions in Aid of Local Rates, under the Education and Local Taxation Account (Scotland) Act, 1892, for two years, were paid to Parochial Boards during this year.

† Prior to 1896, 14th May.

‡ Prior to 1902 the Returns did not distinguish Receipts from Sale of Property, and it is possible that Capital Receipts from that source may be included in the figures applicable to the years 1894 to 1901.

Expenditure.

(c) EXPENDITURE OUT OF ORDINARY RECEIPTS IN 1902-1903.

App. (B.)
No. 5.

The Expenditure of Parish Councils during the year, so far as it was not defrayed out of Loans and other Capital Receipts, amounted to £1,235,053.

Of this sum there was spent on

		Per cent.
Relief and Maintenance of the Poor,	£933,025 =	75·55
Medical Relief,	58,902 =	4·77
Management,*	166,253 =	13·46
Election Expenses,	622 =	0·05
Law Expenses,	5,712 =	0·46
Repayment of Debt,	20,710 =	1·68
Interest on Debt,	12,835 =	1·04
Buildings,	25,343 =	2·05
All other Expenditure,	11,651 =	0·94

£1,235,053 = 100·00

App. (B.)
No. 6.

The Expenditure during the year on Buildings, met out of Loans and other Capital Receipts, was £250,135.

Of the total cost of *Maintenance* (£933,025)—

£495,404 was expended on *Maintenance* of Ordinary Poor receiving Outdoor Relief,

£106,714 on *Maintenance* of Ordinary Poor in Poorhouses, and
£330,907 on *Maintenance* of Pauper Lunatics.

* Includes salaries of Inspectors and Collectors, Office Expenses, and Poorhouse Establishment Charges.

The average cost per head for *Maintenance* during the year was as follows :—

Poor Law.
Expenditure.

Ordinary Poor (including Vagrants) receiving

Outdoor Relief,	£6 8 5½
Ordinary Poor in Poorhouses,	9 2 3
Lunatic Poor (<i>Indoor and Outdoor</i>),	23 6 3½

(d) COMPARISON BETWEEN EXPENDITURE IN 1902-1903 AND PREVIOUS YEARS.

The following Table shows, in detail, the current Expenditure in each of the past ten years, together with the increase or decrease under each head :—

Year ended 15th May.†	Main- tenance.	Medical Relief.	Manage- ment.	Law.	Repay- ment of Debt.	Interest on Debt.	Build- ings.	Election Ex- penses.	Miscel- laneous.	Total.
	£	£	£	£	£	£	£	£	£	£
1894,	706,913	47,011	135,586	4,990	21,191	12,001	18,239	.	10,884	856,815

Decrease,	(Net Incr'ase)

† Prior to 1896, 14th May.

‡ In 1898-99 the debt on the Barony Parochial Asylum, amounting to £151,308, was transferred to the District Board of Lunacy for Glasgow, a body created in that year.

There has thus been a net increase of Poor Law Expenditure of £41,402 during the year 1902-1903.

In 1901-1902 the Expenditure on Maintenance of

Ordinary Poor was	£578,900
In 1902-1903 it was	602,118

Being an increase of £23,218

In 1901-1902 the Expenditure on Maintenance of

Lunatic Poor was	£323,429
In 1902-1903 it was	330,907

Being an increase of £7,478

(e) CAPITAL RECEIPTS IN 1902-1903, AND EXPENDITURE OUT OF SAME.

The Capital Receipts during the year amounted to £156,400, of which £144,400 was obtained from Loans and £12,000 from Sale of Property. The Expenditure during the year out of Capital Receipts amounted to £250,135.

App. (B.
No 6.

Poor Law.

Church
Collections.
App. (B.)
No. 10.

The whole sum derived from Church Collections in Assessed Parishes during the year ended 15th May 1903, as returned to us, was £48,590, of which £6105 is stated to have been expended on Relief of the Poor. Of this sum £15 was handed over to Parish Councils to be expended. It would appear, therefore, that the sum of £6090 derived from Church Collections was actually applied by the Kirk-Sessions to the relief of persons in their respective parishes who required assistance. But these funds are generally employed to afford aid to persons who have fallen into temporary difficulties, with a view to prevent them from becoming chargeable to the parish as paupers; and it is probable that few of the persons so assisted have also been chargeable to the funds raised by assessment.

III. VALUATION AND INDEBTEDNESS.

The Gross Rental in Assessed and in Unassessed Parishes, the Net Assessable Rental in Assessed Parishes, and the Amount of Parish Indebtedness in each of the last ten years are shown in the following Table :—

Year ended 15th May.*	Gross Rental		Total.	Net Assessable Rental in Assessed Parishes.	Bonded or Mortgage or Funded Loans at the close of the year.
	In Assessed Parishes.	In Unassessed Parishes.			
	£	£	£	£	£
1894	24,386,723	255,069	24,641,792	20,213,915	314,757
1895	24,693,690	235,025	24,928,715	20,479,408	325,411
1896	24,919,198	144,477	25,063,675	20,691,086	305,663
1897	25,463,964	107,452	25,571,416	21,153,000	310,536
1898	26,442,647	70,811	26,513,458	Owner 21,845,068 Occupiers 18,994,327	300,938
1899	27,079,882	27,163	27,107,045	22,313,430	19,408,281
1900	27,756,971	27,082	27,784,053	22,848,464	19,935,236
1901	28,464,046	26,810	28,490,856	23,426,170	20,476,051
1902	28,862,464	26,597	28,889,061	23,752,076	20,827,371
1903	28,914,826	24,455	28,939,281	23,635,702	20,921,486

* Prior to 1896, 14th May.

† The difference between Owners' and Occupiers' Assessable Rental is due to deductions to occupiers of agricultural subjects under the Agricultural Rates, &c. (Scotland), Act, 1896. ‡ In 1898-99 the debt on the Barony Parochial Asylum, amounting to £151,308, was transferred to the District Board of Lunacy for Glasgow, a body created in that year.

Poorhouse
Debt.
App. (B.)
No. 11.

Of the £426,934 of Bonded Loans outstanding at 15th May last, it would appear that £408,520 has been incurred for the erection or enlargement of Poorhouse Buildings.

IV. MISCELLANEOUS.

Poor Law.
—
Poorhouses.

The number of Parishes having Poorhouses, either singly or in combination, is 489, with an aggregate population of 3,685,711 according to the Census of 1901. There are 67 Poorhouses at present in operation, the accommodation in which is sufficient for 16,235 inmates. The population of the Parishes that possess a right, in terms of the 65th section of the Act of 1845, to send paupers to the Poorhouses belonging to other Parishes is 745,368. The total population of the Parishes to which Poorhouse accommodation is thus at present available amounts to 4,431,079. The total population of the Parishes to which Poorhouse accommodation is still not available is 41,024.

The Tables showing the number of Poorhouses in operation, and the Parishes forming the various Poorhouse Combinations in Scotland, are printed in the Appendix. These Tables indicate the number of inmates of Poorhouses as at 1st January and 1st July 1903; the number who were receiving indoor relief during the half-years ended 31st December 1902 and 30th June 1903; the number of those on the Sick-List, and of those who died; the number who were Lunatic; and the number of Children who were at School. These Tables also exhibit the average weekly cost per head of inmates actually in the Poorhouse during the year ended 15th May 1903 for maintenance and education; and the average weekly expenditure per head of inmates for whom there is accommodation in the Poorhouse for the same period, under the following heads, viz :—Management, including salaries, wages, rations and estimated value of lodging of officials; House Accommodation; and Medical Relief. App. (B.)
No. 12.

We have approved and signed plans of alterations on, or additions to, the Poorhouses of Kyle Combination, Edinburgh (Craiglockhart), Forfar, Govan Combination, Leith, Stirling Combination, Omoa Combination, Greenock, Lanark, Dumfries, Paisley, Lorn Combination, Dunfermline Combination, Glasgow Stobhill Hospital, Glasgow (Barnhill), and Wigtownshire Combination.

We approved and signed the plans of the new Renfrewshire Combination Poorhouse and of the new Poorhouse to be erected at Dalziel.

We continued the practice of remitting the more important sets of plans submitted to us for approval to an architectural expert Commissioner for criticism and report in the first instance, and we were thus enabled to make suggestions which, in many cases, led to alterations of more or less importance.

In Upper Strathearn Combination Poorhouse we approved the proposal to convert into a bathroom a room presently used as a storeroom, and of the use of another room as a storeroom in place of the one thus appropriated.

We sanctioned, in Wigtownshire Combination Poorhouse, the transference of the girls to the adult female wards as a temporary arrangement, thereby enabling the girls' wards to be used by males during pressure on the wards of the latter.

We sanctioned the occupation of (1) the new block at Glasgow

Poor Law.
—

(Barnhill) Poorhouse by a number of inmates not exceeding 200; (2) of the new probationary wards in Stirling Combination Poorhouse by 12; (3) of the new probationary block at Barnhill Poorhouse by 80; (4) of the new Children's Homes at Govan Combination Poorhouse by 150; and (5) of Pavilions Nos. 5, 6, and 7 of the Stobhill General Hospital (Glasgow) by 168, of Pavilions Nos. 8, 9, and 10 by 170, and of Pavilions Nos. 11, 12, 13, and 14 by 208. For the temporary Poorhouse of Busby Combination we renewed our sanction to 140 inmates being accommodated therein—till Whitsunday 1905—on the understanding that we reserved to ourselves the right to withdraw our sanction at any time, should circumstances render this advisable.

We approved the Rules framed for the management of the Glasgow Poorhouse (Eastern and Western District Hospitals).

In Perth Poorhouse we approved experimentally a suggested Rule in regard to the tenure of office of the house porter, &c.

We further approved Rules suggested for the treatment of the Test Class in Edinburgh (Craiglockhart) Poorhouse.

We sanctioned the Parish of Dalziel obtaining the use of the old Police Buildings during the winter months for the accommodation of cases requiring removal and immediate medical attention, the Hospital in Motherwell Poorhouse being unable to accommodate more cases from the parish.

Owing to alterations and extensions in progress in Glasgow (Barnhill) Poorhouse, we approved of the treatment temporarily, with the same precautions as exist in Barnhill, of observation cases in special wards in the City Poorhouse.

We approved resolutions of the Parish Councils of Morham and Longformacus to join the East Lothian Poorhouse Combination by purchasing one share each from the Parishes of Innerwick and Dunbar respectively, and concurred in the agreement of the House Committee to admit these parishes into the Combination. Similarly we approved of the Parish of Hume joining the Kelso Poorhouse Combination by purchasing one share from the Parish of Stichel, and of the Parish of Ardoch joining the Upper Strathearn Poorhouse Combination by purchasing three shares from the Parish of Auchterarder.

In Hamilton Combination Poorhouse we sanctioned the transference of five shares from the Parish of East Kilbride to the Parish of Dalserf, of five shares from the Parish of Stonehouse to the Parish of Hamilton, of five shares from the Parish of Glassford to the Parish of Hamilton, and of six shares from the Parish of Avondale to the Parish of Blantyre.

The following Table presents an abstract of the total existing Poorhouse Accommodation, and of the number of Poor (exclusive of Lunatics) receiving Relief in Poorhouses, at the dates specified respectively, for the past twenty years :—

Poor Law.

Years.	Poorhouse Accommodation at 1st July.	Number of Ordinary Poor (and their Dependents) receiving Relief in Poorhouses at		
		1st January.	15th May.*	1st July.

1903	16,199	12,485	11,711	11,254

* Prior to 1896, 14th May.

The number of applicants who were refused relief by Parish Councils during the year was 2932. The number of applicants for parochial aid who were offered relief in the Poorhouse only, who declined to accept that offer, and who thus did not become chargeable to the Poor's funds, was 5904.

Applications and Refusals.
App. (B.)
No. 8.

The number of applications complaining of Inadequate Relief before us from 1st January to 31st December 1903 was 110. In the immediately preceding year the number of such complaints was 114.

Complaints of Inadequate Relief.
App. (B.)
No. 2.

The total number of applications which have been received since the Board of Supervision was formed is 21,466, and these were disposed of as follows :—

Dismissed on information contained in Schedule, . . .	12,012
Dismissed after being remitted,	3,635
Refused—not in receipt of parochial relief,	810
Refused as informal or incompetent,	138
Withdrawn, or stopped by death,	134
Ground of complaint removed,	4,702
Minutes issued declaring that applicant had just cause of action,	34
Undisposed of,	1

Poor Law.

The subjoined Table exhibits the average annual number of such applications in each quinquennial period since the Board of Supervision was formed, and the manner in which they have been disposed of; also the actual number for the last five years:—

Quinquennial per od.	Applica- tions.	Dismissed on infor- mation contained in Schedule.	Dismissed after being remitted.	Refused not in receipt of Paro- chial Relief.	Refused as infor- mal or incom- petent.	With- drawn or stop- ped by death.	Ground of Com- plaint removed.	Minute issued declaring that applicant had just cause of action.

Appeals
against Inter-
Parochial
Removal.
App. (B.)
No. 3.

The number of Appeals under the Poor Law (Scotland) Act, 1898, against removal from one parish to another in Scotland, received and considered by us during the year ended 31st December 1903, was 5. In the immediately preceding year the number of such Appeals was 12.

The total number of such Appeals received since the commencement of the Act (1st October 1898) is 89, and these were disposed of as follows:—

Dismissed on information contained in Schedule, &c.,	46
Dismissed as informal or incompetent,	11
Withdrawn by appellant, or stopped by death,	3
Order for removal withdrawn,	18
Sustained,	11
Undisposed of,	0

Appeals
against
Removal to
England or
Ireland.
App. (B.)
No. 4.

During the year ended 31st December 1903 the number of Appeals received and considered by us under Section 5 of the Poor Law (Scotland) Act, 1898, against removal to England or Ireland, was 10, of which number 2 were from the Paupers. The numbers for the immediately preceding year were 8 and 4 respectively. The total number of such Appeals received since the commencement of the Act (1st October 1898) is 57, and these were disposed of as follows:—

Dismissed,	20
Dismissed as informal or incompetent,	27
Withdrawn by appellant, or stopped by death,	1
Order for removal withdrawn,	6
Sustained,	3
Undisposed of,	0

The number of Arbitrations decided by us under Section 2 of the above-quoted Act, from 1st January to 31st December 1903, was 26. A summary of these will be found in the Appendix. The number for the immediately preceding year was 23. The total number of such Arbitrations decided by us since the commencement of the Act (1st October 1898) is 106. Several parishes likewise wrote requesting our opinion on questions of settlement, but as the terms of Section 2 had not been complied with, and as we might afterwards have been called upon to adjudicate upon the cases as required by that Section, we were obliged to decline to express any opinion upon the questions submitted.

During the year we also arbitrated at the request of the Parish Councils in one case connected with Poor Law administration. The following Table shows the number of Removals to England and Ireland, and the number of Poor refused Relief, during the past twenty years:—

Years.	Number of Persons removed to England either Voluntarily or by Warrant of Sheriff or Justices.		Number of Persons removed to Ireland either Voluntarily or by Warrant of Sheriff or Justices.		Number of Poor refused Relief during the Year.
	Paupers.	Dependants.	Paupers.	Dependants.	
1884	67	50	166	46	3,601
1885	59	17	201	86	3,801
1886	49	13	177	81	4,084

Relief Grant is 798. Of these, three failed to establish a claim, the expenditure on Medical Relief not having amounted to the fixed minimum. Last year 795 Parishes established their claims; this year 795 also. The detailed account of the distribution, showing the amount expended on Medical Relief to the poor in each Parish for which vouchers have been produced and the sum apportioned to it from the Grant, will be found in the Appendix, the total amount distributed being £20,018 7s. 4d., including £3711 3s. 8d. in respect of Trained Sick Nursing in Poorhouses. The Grant other than that for Trained Sick Nursing was distributed at the rate of 6s. 10½d. per £ of vouched expenditure.

The whole sum expended on Medical Relief to the Poor in all Parishes in Scotland, whether participating in the Grant or not, during the year ended 15th May 1903, according to the annual returns of the Inspectors, was £58,902, which is equal to 3d. per head of the estimated population, and 11s. 5½d. per head of persons on the roll of paupers at 15th May last.

Pauper Lunacy.
App. (B.)
No. 13.

A detailed account of the distribution of the Grant in aid of the Cost of Maintenance of Pauper Lunatics will be found in the Appendix, showing the Parishes participating, the total cost of maintenance, the cost of maintenance in accordance with the scheme of participation, and the amount due to each Parish from the Grant. The Grant was distributed at the rate of 8s. 8d. per £ of admissible expenditure.

Applica-
tions to
Sheriffs.
App. (B.)
No. 1.

Returns of legal proceedings under the Statute in the Sheriff Courts have again been furnished to us by the courtesy of the Sheriffs-Substitute, and an abstract is inserted in the Appendix.

The total number of applications to Sheriffs on the ground that relief had been improperly refused, as returned by the Sheriffs-Substitute, was during the past year 316. These numbers, however, fall short of the actual number of applications, as in several Sheriff Courts no complete record is kept of them. The number of applications in which Sheriffs felt called upon to grant *interim* orders of relief during the past year was, as stated to us by them, 166. The number of applicants admitted to the roll of paupers by final order of the Sheriffs during the past year was 4.

The number of prosecutions under the 79th and 80th sections of the Statute during the past year has been 380, and of convictions 161.

Assessments.
App. (B.)
No. 44.

The number of Parishes and Combinations now assessed is 870, and the number still raising the funds by voluntary contributions is 4.

In 800 of the Assessed Parishes the assessment is raised in terms of Section 34 of the Poor Law Act, 1845, and the Agricultural Rates (Scotland) Act, 1896, and in 70 there is a certified classification of occupants under Section 36 of the Poor Law Act and Section 1 of the Agricultural Rates Act.

Many questions relating to Poor Law Administration have been submitted to us during the year.

English and
Irish Removal
Cases.
Detention in
Poorhouse.

We were asked as to the right of a pauper, for whom a warrant of removal had been obtained, to leave the Poorhouse at any time during the period of fourteen days named in the Act, pending a possible appeal from the Irish Guardians. We replied that, in our

opinion, a pauper could not be forcibly detained in the Poorhouse but might leave, should he choose to do so, at any time prior to the warrant for removal being put into execution. Poor Law.

An enquiry was addressed to us as to the legality of two or more parishes combining with a view to providing a place for the isolation and treatment of consumptives, even although such parishes might possess Poorhouses for the reception of the ordinary type of pauper. We intimated our opinion that any provision of the kind indicated would require to be brought within the scope of Section 60 of the Poor Law Act of 1845, and, that being so, it was impossible to give any definite answer on the general legal question. We stated that any proposal brought before us would require to be considered on its merits, having regard, *e.g.*, to the existing Poorhouse accommodation in the parishes concerned, to the number of consumptive cases likely to require treatment, and to the nature of the provision which it was proposed to make. But we added that we appreciated the motives which prompted the enquiry, and that we should be glad to afford every assistance in our power.

Legality of Parishes combining to provide for the Isolation and Treatment of Consumptives, although such Parishes may already have Poorhouse Accommodation.

The Parish Council of Govan wrote to us enquiring as to the advisability of providing accommodation outwith the grounds of the Poorhouse for the treatment of consumptive poor chargeable to the parish. We replied that, in our view, it would be competent for the Parish Council to erect a building outside the Poorhouse grounds for the reception of phthisical cases. We pointed out that such building would be regarded as an extension of the Poorhouse, and that it would be justified on the footing that the existing accommodation was inadequate.

Competency of the Parish Council of Govan providing Accommodation outwith the Poorhouse Grounds for the Treatment of Consumptives.

In connection with the recently issued Report of the Royal Commission on Physical Training in Scotland, we received an enquiry as to the competency of a Parish Council expending a considerable sum in procuring a medical examination of each child on the outdoor roll, with the object of, where necessary, providing better treatment and nourishment. We stated that the proposed expenditure would appear to be quite competent.

Competency of a Parish Council incurring Expenditure in having each Child on the Outdoor Roll Medically Examined.

In connection with a proposal to dissolve a Poorhouse Combination and dispose of the Poorhouse, we stated in our Second Annual Report that we were advised that no sufficient powers existed for dissolving a Combination and selling the Poorhouse. Circumstances having arisen, however, the matter was again carefully considered by our Legal Advisers, who were now of opinion that we might sanction the disuse of the Poorhouse provided all the parishes in the Combination arranged to join other Combinations, and if the Poorhouse was purchased at a sum named by all the parishes interested, and provided these parishes agreed as to how the price was to be allocated and applied.

Dissolution of a Poorhouse Combination.

We received from the Secretary, Office of Lunatic Asylums, Dublin, a letter enquiring whether we could arrange that Inspectors of Poor, when removing lunatics to Ireland, should send a copy of the notice in each case to the Resident Medical Superintendent of the Asylum as well as to the Clerk of the Board of Guardians, before the removal was effected.

Request that Intimation be sent by the Inspectors of Poor to Asylum Authorities in Ireland when Lunatics are proposed to be Removed.

We replied that we would take steps to make this request

Poor Law.

known to the Inspectors of Poor, and would recommend them to comply with it in every case.

We explained, however, that, as the procedure in removals is defined by Statute, we might find it difficult to enforce the suggestion, but we trusted that it would be very generally adopted.

We added that it would probably facilitate administration if the Irish Board of Guardians would in every case inform the Asylum Authorities of any proposed removal to Ireland of a lunatic from a Scottish parish on receiving the usual notice.

We sent a copy of the correspondence to the *Poor Law Magazine* and to the *Municipal Record* for the information of Inspectors of Poor.

Sending a Pauper to a Hospital for Incurables.

We intimated to a Parish Council that it was competent for them to send a pauper to a hospital for incurables and to pay any sum that might be necessary.

Cases sent from other parishes to Charitable Institutions in Glasgow, who ultimately become chargeable as Paupers in Glasgow.

A communication was addressed to us by the Parish Council of Glasgow requesting our assistance in the matter of cases sent from other parishes to charitable institutions in that city who ultimately became chargeable as paupers to the Parish of Glasgow. We replied expressing regret that we were unable to suggest any way of dealing with this question on a general complaint. We stated, however, that if the Inspector of Poor would, at any time, furnish us with specific details of any case in which the Parish Council had a title to interfere, we would endeavour to deal with it, and we pointed out that it might be suggested to the institutions receiving such cases that they should, as far as possible, record the history of the cases received by them, with a view to enabling Inspectors of Poor to ascertain the parish of settlement when this became necessary. We added that the principle of our Circular of 3rd April 1857 seemed to apply to removals to charitable institutions such as were specified, and that, if these institutions did not already preserve some record of the previous history of the cases in question, it seemed to us that the Inspector of Poor should himself bring the grievance under notice of the parishes which were responsible for sending the cases to Glasgow.

Withdrawal of Minute of Board of Supervision of 17th November 1864—Indoor Relief to Paupers in the Highlands and Islands.

In consequence of information received, and after correspondence, we intimated to the various parishes in the Poorhouse of Mull Combination that, in our opinion, the Minute of the Board of Supervision dated 17th November 1864, having reference to the offer of indoor relief to paupers in the Highlands and Islands, might now be withdrawn. We accordingly cancelled the Minute in question. We further, however, pointed out to the Parish Councils concerned that there was still difficulty at certain seasons in reaching the Poorhouse, and that any course involving undue hardship in removing any pauper must be avoided.

Tuberculous Diseases in Poorhouses.

In accordance with our instructions, our General Superintendent, Mr. Barclay, in the course of his inspections of the Poorhouses, has continued his enquiries into the methods adopted in dealing with tuberculous disease, and has reported in each case to us. In several cases where accommodation in the Poorhouse was available, isolation and special treatment were afforded. In two Poorhouses

(Craiglockhart and Leith) temporary open shelters have been erected in the grounds for the accommodation and treatment of phthisical patients. The patients treated therein express themselves as feeling benefited and more comfortable. In several Poorhouses in course of erection special wards are provided for tuberculous diseases. In consequence of our representations special precautions have been taken to prevent the spread of the disease, in cases where isolation wards were not available, by the use of separate feeding utensils, and disinfection of clothing, &c.

Poor Law.

During the year our attention was directed to three cases where outdoor relief seemed to us to be most improperly granted.

Cases
improperly
receiving
Outdoor Relief.

In one case an able-bodied widow, aged 34 years, with two dependants of 11 and 6, was granted an allowance of 4s. a week—afterwards reduced to 3s. a week in respect that she had taken a cheaper house. It was stated that this woman had gone temporarily to live with her mother, and further, that she had a pension of 10s. a week. It appeared to us that, with children of the ages of the dependants in this case, who were medically certified as suffering from no disability, there was nothing to prevent the pauper from earning at least 5s. weekly and so bringing the amount of her income up to that of many labouring men who have to support wives and families and pay rates in addition.

In another case, in spite of our protest, a Parish Council persisted in granting an outdoor aliment to a woman, aged 43, the mother, as we were informed, of five illegitimate children.

The third case we considered a particularly discreditable one. It was that of a woman, the stepmother of one of the members of the Parish Council which granted outdoor relief. This Councillor, we were informed, also held the position of Provost of the burgh.

The subject of Poorhouse dietary having again engaged our attention we deemed it necessary to withdraw our approval of the diet scale prescribed in Rule LXVII. of our Rules for the Management of Poorhouses. In intimating this to the Governors of the various Poorhouses we stated that we withdrew the scale meanwhile, in favour of the scale which was issued as an alternative for the consideration of House Committees on 2nd February 1898. Copies of our Circular and of the alternative scale referred to will be found in the Appendix.

Diet for Poor-
house Inmates.

App. (A.)
No. 5.

There will also be found in the Appendix a copy of the same Circular which was addressed to some of the larger Poorhouses, but which contained an additional paragraph in regard to the weighing on admission and at regular intervals thereafter of such a number of the inmates as might afford the means of estimating the nutritive effect of the approved diets. We regard our diet scale of 1898 as a minimum, and have required all Poorhouses either to adopt it or a scale of at least equal nutritive value.

App. (A.)
No. 6.

We issued to all Parish Councils a Circular letter urging upon those parishes where the practice was not already followed, the expediency of printing and circulating annually among the rate-payers a list of the paupers with their allowances. We pointed out that the probable benefit to the parish arising from such a

Printing of
Lists of
Paupers with
their
Allowances.

Poor Law.

App. (A.)
No. 7.Complaints
against
Inspectors of
Poor.

practice would more than likely compensate for the trifling cost entailed in producing the list. A copy of the Circular will be found in the Appendix.

We have investigated eleven allegations of a more or less serious nature against Inspectors of Poor (including two instances where the Inspector held office for two parishes), and we have been under the necessity of dismissing one Inspector as unfit for his office. In two cases where the Inspectors held the office of Collector of Rates for the parish, we required the resignation of that office as a condition of the Inspectorship being retained; three Inspectors we allowed to resign, two were warned as to their future conduct, and in one instance we intimated that the Inspectorship must be considered to be held on probation only. We also, in one of the previous cases, informed the Inspector that he must consider himself as merely continuing to hold his office on probation.

Complaint
against a
Medical Officer.

We also investigated a complaint made against a Medical Officer, and we found it necessary to censure the official in question.

AUDIT.

Audit.

Since the date of our last Report the seventh Audit of Parish Council Accounts has been completed, the two payments reported on in the Interim Reports then undisposed of being held not to be illegal and passed in the Accounts; and the eighth Audit, which has been in progress since May last, has been carried through in all the Poorhouses, and in all the Parishes with six exceptions.

Interim
Reports.

Twenty-nine Interim Reports have been submitted to us by Parish Auditors during the past year. Of these, twenty-seven have been dealt with, and two are still in dependence. The twenty-seven Interim Reports dealt with involved thirty-two payments, all of which were reported on as being illegal in the opinion of the Auditor. In regard to twenty-six of the payments that opinion was upheld, and the same were decided by us to be illegal; three payments were held not to be illegal, and passed in the Accounts; one payment was determined to be partly legal and partly illegal; in one case we were of opinion that the payment was such as might be allowed in the Accounts; and in the case of the remaining payment the Interim Report was withdrawn. A surcharge was made in respect of two of the twenty-six payments held to be illegal; in the other cases we exercised our power of abstaining from making a surcharge, but warned the Parish Councils that, if any similar expenditure appeared in the Accounts in future, we would have no alternative but to enforce a surcharge.

Preparation of
Assessment
Roll.

The question of the preparation of the Assessment Roll received our careful consideration, and we issued a Circular expressing the opinion that the Roll should be prepared from a copy of the Valuation Roll bearing the Certificate of the County Clerk or Town Clerk and showing the total Valuation of the Parish or portion of the Parish in the County or Burgh. We urged that Parish Councils should, before the commencement of the collection, satisfy themselves with regard to the mode in which the Roll had been made up and that the particulars entered in it were correct.

We furnished an explanation of the heading "Payments for Suspense Poor" forming an item of "Maintenance" in the prescribed form of Abstract of Accounts. Audit.
Explanation
of term
"Suspense
Poor."
Illegal
Payments.
App. (A.)
Nos. 10 & 11.

We further intimated to Parish Councils and to Auditors a number of payments not previously dealt with by us at Audit and which had been held by us to be illegal during the progress of the seventh Audit of Accounts. A copy of the Circular dealing with these matters is printed in the Appendix.

The enquiries addressed to us in connection with the Audit have again been numerous, and we have rendered all the assistance in our power to Parish Councils and to Auditors both by correspondence and by personal interview with an officer of the Board.

We reappointed those Auditors who had conducted the Audit of the Accounts of Parish Councils for the year ended 15th May 1902, to audit the Accounts for the year 1902-1903. In the course of the year six vacancies have occurred. Four of these were caused by death, one by resignation, and in one case we have been under the necessity of informing the Auditor that we have decided not to reappoint him. Appointment
of Auditors.

In one or two instances during the year we have been asked to consider the question of the fees charged by Auditors, but we are glad to say that, on our advice, any dispute has been satisfactorily arranged by the parties without the necessity of our formally approving a fee in terms of the Statute. Auditors' Fees.

Our opinion was asked as to whether, in calculating the expenditure of a Parish Council for the purpose of fixing the Auditor's fee, *capital* expenditure fell to be included. We replied that, in our view, the Auditor was entitled to include capital expenditure when calculating his fee. Capital
Expenditure to
be included
when calculat-
ing Auditor's
Fee.

In reply to a Parish Council who desired to employ their Auditor to advise them in regard to certain legal proceedings with which they were threatened, we stated that we could not sanction the employment by a Parish Council of their Auditor to act as their Solicitor for any purpose. Proposal of a
Parish Council
to employ
their Auditor
as their
Legal Advisor.

LOCAL GOVERNMENT.

Our duties under the Local Government (Scotland) Act, 1894, continue to occupy a considerable amount of time and attention, and we receive numerous applications for advice and assistance in connection with the duties and procedure of Parish Councils. Many of the questions submitted to us are not such as we have authority to determine, but we afford help where we can usefully do so. Local
Government.

We are frequently asked to advise Parish Councils as to their powers under Section 30 of the Act. Parish Trusts

In one case which came under our notice, a testator had bequeathed £200 for the benefit of the inmates of a certain poor-house, and directed "that the entire interest be appropriated at the proper time in each year for the purpose of giving to the inmates of said poorhouse an extra good Christmas dinner." It appeared that the testator bequeathed various sums to a number of charitable institutions. He was on two occasions confined in Power of
Parish Council
to defend an
Action of
Reduction of
a Will.

Local
Government.

an asylum, and on this ground his relatives sought to set aside the will by an action of reduction in the Court of Session. The Parish Council desired us to advise them (1) whether they had power to take over and administer the Trust, and (2) whether they could legally appear as defenders and pay out of the rates their share of the expenses of the action of reduction. We replied that if the Parish Council considered it expedient to defend the action of reduction they might competently do so, seeing they had been called as defenders, but that probably the most efficient and economical course would be to take concerted action, if so advised, along with the other beneficiaries. The matter appeared to us to be one entirely for the discretion of the Parish Council and on which they ought to take legal advice, keeping in view that their interest in the estate was not of much magnitude. If the action of reduction were unsuccessful, we expressed the opinion that it would be the duty of the Parish Council to take over the Trust and administer it in terms of the will.

Difficulty in
meeting Legal
Expenses
incurred in
connection
with a Parish
Trust.

A Parish Council having been engaged in an expensive though successful litigation in connection with their claim for representation on a Parish Trust, sought our advice as to the manner in which their expenses were to be met. The bank were willing to advance the money to the Parish Council provided that they obtained our sanction. There is no provision authorising the Parish Council to borrow for such a purpose, but we intimated that we would not be disposed to raise objection to an arrangement for spreading the payment over two or three years, which, in the circumstances, seemed to us a proper and reasonable course to take.

Investment of
Mortification
Funds.

Another question was put to us by a Parish Council who, having a considerable mortification for the benefit of the poor, were desirous of investing a portion of their funds. They had entered into negotiations with the School Board, who were to borrow a certain sum at $3\frac{1}{4}$ per cent. We were asked as to the competency of the proposal and especially whether, in the circumstances, the Parish Council would be sufficiently protected by the acceptance of an ordinary receipt from the School Board for the money. We stated that there could be no objection to the Parish Council, as trustees of the mortification, investing a portion of their funds with the School Board, but that, in our opinion, there ought to be a formal document of loan. We further advised the Parish Council to see that the requirements of the Education Acts were complied with by the School Board.

Transfer of
Property.

In two cases we have been asked to give our consent, in terms of Section 48 (2) of the Act, to the alienation of property vested in Parish Councils. In each case we made enquiries with a view to satisfying ourselves that the proposal of the Parish Council was not prejudicial to the interests of the parish or the ratepayers. In one case we gave our consent, but in the other we found that the circumstances were not such as to require our consent in terms of the statute.

We had also one application for our consent to the letting of Parish Council property, in terms of Section 24 (2) of the Act, but, on enquiry, we found that the property had not been acquired

under Part IV. of the Act, consequently our consent was unnecessary. Local Government.

We have had under consideration five applications for our consent to loans under Section 28 (1) of the Local Government Act, 1894. Two were for buildings for offices under Section 24 (1) (a); one was for the repair of property under Section 24 (1) (e); one was for the fencing of a recreation ground under Section 24 (1) (b); and one was for the rebuilding of a bridge forming part of a public way under Section 29. In each case we were able to give our consent to the borrowing of the sum desired, after having satisfied ourselves by enquiry that the purposes to which the loan was to be applied were covered by the terms of the statute and were of such a nature as to justify the cost being spread over a series of years. Loans.

There is a tendency, however, among Parish Councils to extend the time over which loans are repaid to the maximum period allowed by the statute without considering the nature of the work which the loan is intended to cover and the small amount borrowed. In two instances we found it necessary to suggest a reduction in the number of years over which the repayment was to be spread, the amount borrowed being such as could be repaid in a comparatively short period without imposing an undue hardship on the ratepayers. Period of Repayment.

We have occasionally to remind Parish Councils that Section 24 (1) (a) of the Local Government Act does not authorise them to provide a hall for public meetings. Our opinion on this matter will be found on page xii. of our first Report. It sometimes happens, however, that the opinion then expressed admits of modification. For instance, in a case which recently came before us, a Parish Council were offered as a gift the local Town Hall. The building consisted of a large hall capable of accommodating about 400 people, and several smaller halls suitable for meetings, &c. The total cost of the building was about £1500, but there was a debt on it of some £360. We were asked to give our consent in terms of Section 28 of the Local Government Act to a loan for the purpose, among other things, of clearing off the debt. We have no power to consent to a Parish Council borrowing to clear off a debt, but the gain to the parish was so obvious that we approved a proposal to acquire the hall under Section 24 (1) (a) on the understanding that the Parish Council would occupy the building or a portion of it for the purpose of their Parish Council business and meetings, and accordingly gave our consent to a loan. Buildings.

In another case of a Parish Council having accepted a hall as a gift in terms of Section 24 (1) (d) of the Act, we were asked whether in appointing a Committee for its management they were entitled to appoint persons who were not members of the Parish Council. We pointed out that the power to appoint Committees was conferred by Section 33 of the Local Government (Scotland) Act, 1894, and it seemed clear that any Committee appointed under that section must consist of Parish Councillors only. Acquisition of a Town Hall under Section 24 (1) (a).
Constitution of Committee of Management of Hall acquired under Section 24 (1) (d).

The difficulty experienced by Parish Councils in providing suitable houses for their medical officers frequently comes under our notice. In reply to all enquiries we have only been able to Medical Officers' Houses.

**Local
Government.**

repeat our view that, as the law stands at present, Parish Councils have no power to provide such accommodation. In one case the medical officer himself offered to build a house, but the only available site was some 200 yards beyond the boundary line of the special drainage and water-supply district, and the cost of making the necessary connections with the main pipes of the special district would have reached about £40. The Parish Council were requested to defray the expense of the connections, and were willing to do so if they had the power, but we were obliged to inform them that such charges could not be legitimately defrayed out of the rates.

Allotments.**Parliamentary
Return.**

In compliance with the instructions of the Secretary for Scotland, we procured information and prepared a Return for Parliament showing what had been done under the provisions of the Local Government Act in regard to Allotments since the date of the last Return on the 8th August 1902. This Return has been published as a Parliamentary Paper (*see* Allotments (Scotland) House of Commons Paper, No. 257, Session 1903).

**Order of
County Council
under
Section 25 (4).**

We have had occasion during the year to deal with an Order made by a County Council in pursuance of their powers under Section 25 (4) of the Local Government Act for the purpose of enabling a Parish Council to take on lease compulsorily land for allotments. A memorial having been presented to us against the said Order, considerable correspondence ensued. We were anxious to avoid the expense and trouble which would be entailed by holding a local public enquiry in terms of Section 25 (7) (b), and we accordingly invited the representatives of the County Council and the agents for the objectors to meet us and discuss the matter. Our efforts towards a settlement of the points in dispute were successful. The terms of the Order were modified, the memorials were withdrawn, and we were eventually able to confirm the Order without further enquiry in terms of Section 25 (7) (a).

**Special
Districts.****App. (B.)
No. 22.**

We have again issued a Return to the Clerks to the District Committees asking for particulars relating to the Special Districts which have been formed under the Public Health and Local Government Acts during the year 1903. We print in the Appendix a Table showing all the Special Districts under the above mentioned Acts and also those formed under the Orkney and Zetland Small Pier and Harbours Act, 1896, down to 31st December 1903.

**Erection of
Lamp Brackets
on Private
Property.**

The Committee in charge of a Special Lighting District had erected lamp brackets on the walls of several of the houses within the Special District. The proprietors of a certain property had recently restored the house, and, after it was partly rebuilt, they, without the consent or concurrence of the Committee, removed the lamp bracket and its connections. The Committee asked for an explanation, and were informed that the proprietors claimed the right to remove any appliances attached to their property unless special agreement had been made therefor. The Committee applied to us for advice, and we drew their attention to the terms of Section 99 of the Burgh Police (Scotland) Act, 1892, which empowers them to erect lamp holders, &c., "in or upon the walls or buildings on the sides of the streets, as they shall think proper, without being liable to any claim for compensation thereanent." We further

pointed out that Section 100 imposed a penalty on any person convicted of breaking or throwing down any lamp or appurtenances thereof. Both the sections referred to had, of course, been adopted within the Special District. Local
Government.

In reply to an enquiry by the Clerk to a District Committee whether the District Committee were entitled, on a requisition from a Parish Council, to recall their resolution approving the formation of a Special Lighting District, we stated that in our opinion there was no power to dissolve a Special Lighting District when once formed. Power to dis-
solve a Special
Lighting
District.

In connection with a proposal to form a certain area into (a) a Special Lighting District and (b) a Special Scavenging District, the question arose as to whether it was permissible under Section 44 (6) of the Local Government Act to levy a 9d. rate for each purpose, i.e. 1s. 6d. in all. We thought the question one of some difficulty, but we formed the opinion that for all purposes a rate of 9d. in the £ and no more was authorised by the section above referred to. Special
District
Rate.

A Parish Council proposed to acquire, in terms of Section 24 (1) (c) of the Act, a right of way which they considered would be beneficial to the inhabitants of the parish and to give in exchange an existing right of way which was not so convenient. It was to become the property of the proprietor and be closed. The proposal amounted to an excambion, to which both the proprietor and tenant had agreed. Some doubts, however, were expressed regarding the legality of this exchange, especially as to the closing of the existing right of way, and our opinion was asked. We stated that in our view the Parish Council had no power to close an existing right of way. Rights of Way.

Parish Council
have no power
to close an
existing
Right of Way.

Among a number of questions as to the powers of Parish Councils and, in parishes partly landward and partly burghal, Landward Committees, under Section 29 of the Act, our opinion was asked as to the competency of contributing to the erection of a bridge on the line of a public way. On enquiry, we found that the bridge was to take the place of a ford across a river, and that no previous bridge had ever existed at this place. It appeared to us that this was not a case which could be held to come within the powers conferred on Parish Councils and Landward Committees by Section 29. Moreover it was ascertained that the proposed bridge would not, if erected, be actually within the parish which desired to contribute, though it would be on the confines of the parish and of great benefit to its inhabitants. Public Ways.

Contribution
towards
erection of a
Bridge.

The Parish Councils of A and B, two neighbouring parishes, were considering as to their powers to repair a bridge over a river in terms of Section 29. Some difficulty was experienced owing to the river, which at one time formed the boundary between the two parishes, having altered its course. The recent Ordnance Survey map of the district still marked the river as the boundary, and if this were accepted one end of the bridge would be in the parish of A and the other in the parish of B, and the two bodies might combine and renew the bridge. On the other hand, if the old course of the river were followed, both ends of the bridge would be in A, and the whole expense of renewal would probably fall on Proposed joint
repair of a
Bridge by
Parish Councils
of two
adjoining
Parishes.
Disputed
Boundaries.
Ordnance
Survey Map
not conclusive
as to boundary.

Local
Government.

that parish. We were asked whether the Parish Council of B would, in the circumstances, be justified in following the boundary indicated on the Ordnance Survey map, but on the slender information before us we could not offer a definite opinion. We referred, however, to the case of Knox, Inspector of Buittle, *v.* Hewat, Inspector of Kelton, 12th January, 1870, 8 Macpherson 397, which did not appear to support the view that the Ordnance Survey map was conclusive as to boundary.

Showmen
encamping on
Public Ways.

Difficulty is sometimes experienced by Parish Councils in determining the scope of their powers under Section 29 of the Act. We were consulted in one case as to the powers of a Parish Council to prevent showmen encamping with their vans and booths on the public streets of a village. These showmen had practically taken possession of the village square, which was maintained by the Parish Council as a "public way" in terms of Section 29. They had blocked the square to such an extent that an ordinary horse and cart could not pass along to deliver coal and other necessities to the inhabitants residing in the square. The showmen were also in the habit of driving iron rods into the ground for fixing guy ropes, &c. It was pointed out by the Parish Council that the showmen were receiving all the local benefits in common with the inhabitants while contributing in no way to the rates, and the Parish Council desired to know whether, in the event of their having no power to prevent the encamping of these men, they could compel them to pay charges for the privileges they enjoyed. It appeared to us that so long as the Parish Council had not acquired any rights in the square they were not entitled to exercise jurisdiction over it of the nature contemplated. But if they were satisfied that the showmen were obstructing what was a public thoroughfare, and were preventing the reasonable access of vehicular traffic to the houses in the neighbourhood of the square, we thought they might bring the matter under the notice of the police. Should the police refuse to interfere, we suggested that the Parish Council should consider whether the circumstances would justify a representation to the District Committee in terms of Section 42 of the Act.

We further suggested that an application might be made to the proprietors and others who had rights in the square, with the view of inducing them to transfer these rights to the Parish Council, who would then probably be in a position to deal effectively with the showmen.

Churchyards.
Returns.

We continue to procure Returns showing the number of cases in which burial grounds have been provided by Parish Councils under the Burial Grounds Act of 1855, and in which churchyards have been transferred from the Heritors to the Parish Council in virtue of the powers given by Section 30 (6) of the Local Government Act, 1894. In all cases where no registers of interments are kept we have put ourselves in communication with the Parish Councils, and we are gratified to be able to report that almost without exception steps have been taken to comply with our suggestions.

Proposed
Transfer of a
Churchyard

Under Section 30 (6) of the Local Government (Scotland) Act 1894, the Heritors are empowered to transfer churchyards to the

Parish Council if the latter are prepared to accept them. Numerous transfers of this kind have taken place, but in one case the churchyard proposed to be transferred did not belong to the Heritors but to the Trustees of the Parish Church. We entertained some doubt whether the sub-section above referred to could be so read as to cover a transference of this kind. It may be that it would be competent for the Trustees to transfer the churchyard and for the Parish Council to accept the transfer under Sub-section 1 of Section 30, but in that case it would not be competent for the Parish Council to expend the rates on it. Accordingly, it appeared to us that the more satisfactory course, and one to which no objection could be taken, would be for the Parish Council to resolve, in terms of the Burial Grounds (Scotland) Act, 1855, to provide additional burial ground accommodation, and in part fulfilment of that resolution to acquire or accept the churchyard from the Trustees. The maintenance of the churchyard would then fall on the Burial Ground Rate, and the Parish Council would be entitled either to extend it or to provide additional accommodation elsewhere, if they found such necessary for the requirements of the district.

We are frequently consulted as to the obligation of the Heritors to provide burial ground accommodation. There is an impression abroad that under the present state of the law the Heritors are freed from their obligations to provide burial ground accommodation. The question usually put to us is whether the Parish Council or the Heritors are the proper party to enlarge existing churchyards, and on several occasions we have had to remind Parish Councils that under Section 30 (6) of the Local Government Act the duty of enlarging or extending churchyards transferred in terms of that section still remains with the Heritors. But, in practice, Parish Councils do what is tantamount to enlarging such churchyards by virtue of their powers under the Burial Grounds (Scotland) Act, 1855. Under Section 9 of that Act, they may provide ground for burial purposes, and there is no reason, of course, why such ground should not be contiguous to the old. In these circumstances, however, the old ground, after transfer to the Parish Council, falls to be maintained out of the Poor-rate in terms of Section 30 (6) of the Local Government Act, and the new ground out of the assessment authorised to be levied under the Burial Grounds Act, i.e. the Burial Ground Rate.

The Heritors are not relieved of their duty to provide burial ground accommodation, but, where a churchyard or burial ground is closed by Order in Council, the Parish Council are bound to proceed in terms of Section 10 of the Burial Grounds Act, and provide a suitable and convenient burial ground for the parish. Unless the churchyards or burial grounds are closed by Order in Council, there is no obligation on the Parish Council to take action, though they may be called on to consider the question of providing additional accommodation on receiving a requisition from the persons referred to in Section 9 of the Burial Grounds Act.

A Parish Council enquired of us whether the cost of digging trial pits to test the suitability of certain ground for burial

purposes would form a competent charge against the Poor-rate. The information before us was hardly sufficient to enable us to form an opinion, but it did not appear to us that such expenses could be met out of the Poor-rate. If the Parish Council were acting in virtue of their powers under the Burial Grounds Act, the expense would no doubt fall on the assessment authorised by that Act.

Power of
Parish Council
to maintain
Churchyard
Grounds prior
to transfer.

In another case we were asked by a Parish Council whether they would be justified in drawing money from the Poor-rate to meet the expense of keeping the churchyard grounds in order prior to the actual transfer of same, or whether they must wait until an assessment is imposed subsequent to the transfer before any money is spent. We explained that Section 30 (6) of the Local Government Act only entitled the Parish Council to incur expense *after* the transfer had taken place. But, when the transfer is complete, the Parish Council may apply any Poor-rate funds towards the expense of the maintenance or management of the ground without waiting until the next assessment is available.

Mode of
Paying Sexton.

Prior to the transfer of a certain churchyard from the Heritors to the Parish Council, it was the practice for the sexton to be paid by the parties who employed him. The Parish Council, after the transfer, desired to pay the sexton out of the rates, and asked our opinion on the matter. We replied that there did not seem to be any illegality in the course proposed, but we advised them to make a charge on the persons burying sufficient to cover the sexton's fee and any other expenses. We recommended that all charges should be paid to the Clerk, and that he should keep an accurate account of all such receipts.

Assessment.

Joint Collec-
tion of Burgh
and Parish
Rates.

In the Parish of Wick a proposal was made that the Parish Council should collect not only the assessments levied and imposed by themselves, but also the assessments levied and imposed by the Burghs of Wick and Pulteneytown, situated within the parish. Before entering into an agreement the Parish Council sought our advice as to whether they could legally undertake such work, and also whether, if legal, the assessments imposed by the different bodies could be included in the same demand note. We explained that the proposed arrangement was expressly authorised by Section 39 (1) of the Local Government Act, and that we should welcome such a course, which, in our opinion, was eminently desirable and in the interests of the ratepayers as well as of efficient administration. We further stated that we saw no objection to the use of one demand note for all the rates provided that the amount for each rate was clearly shown. It occurred to us that it might be an advantage to have the demand and receipt notes perforated so that if a ratepayer objected to pay all the rates at once, payments could be accepted one at a time. We anticipated, however, that the ratepayer would soon appreciate the boon and pay all his rates together.

One Demand
Note for all
Rates.

The matter fell into abeyance at the time, in respect that proposals were being made and negotiations taking place which seemed likely to result in the amalgamation of the Burghs of Wick and Pulteneytown. These negotiations were ultimately brought to a successful termination and legal effect given to them by the Wick Burgh Extension Order Confirmation Act, 1902.

The question of the joint collection of rates was then revived and eventually settled by the Town Council of the united Burghs unanimously agreeing to request the Parish Council to collect the Burgh assessments. The latter body acceded to the proposal of the Town Council, and we are glad to learn that the joint collection of rates is now in full operation. In a letter, dated 12th June 1903, the Clerk to the Parish Council states:—

Local
Government.

"I may be permitted to add that the collection, both of parish and burgh rates, for the year just ended has been unusually satisfactory—the percentage collected being very high indeed. It may be of interest to the Board to learn that more than 95 per cent. of the ratepayers paid their parish and burgh rates at the same time, and many of them voluntarily stated that they considered it a convenience and a saving of time to have the opportunity of doing so. Rate-payers resident outwith the parish appreciated the boon very greatly, as it enabled them to pay both rates by means of the same cheque."

We accordingly recommend this course to other burghs and parishes similarly situated.

It is provided by Section 79 (1) of the Licensing (Scotland) Act, 1903, that in the event of an application being made for the registration of a Club, notice of such application shall forthwith be given, where the Club is situated outwith a burgh, to the Parish Council of the parish, and under Sub-section 2 of the same section it is competent for the Parish Council to lodge objections to the grant or renewal of the certificate. Sub-section 4 gives power to the Sheriff to award expenses against the unsuccessful party, and in the case of the Parish Council these are to be paid out of the Special Parish Rate. We were consulted by a Parish Council of a parish partly landward and partly burghal as to the effect of these provisions in such a parish, and we replied that it seemed to us to be clear that in a parish partly landward and partly burghal it was the Parish Council as a whole and not the Landward Committee that would be entitled to object under Section 79. If expenses were awarded against the Parish Council, it would be the duty of the Landward Committee to pay them out of the Special Parish Rate.

Special Parish
Rate.

Licensing
(Scotland) Act,
1903.

A proposal to adopt the Public Libraries Act in a certain parish was carried in the month of July, but no mention of imposing a Library Rate was made till after the Budget meeting of the Parish Council had been held, and we were asked whether it would be legal to resolve to impose the rate after the statutory period for doing so was past. We saw no incompetency in the Parish Council proceeding to impose the assessment in the circumstances. Some difficulty was also anticipated in levying the Library Rate owing to the Agricultural Rates Grant and to the parish having a certified classification. We pointed out, however, that the Library Rate fell to be levied in the same manner as the Poor-rate, consequently, if there was a certified classification, the Library Rate must be levied in accordance with that classification, irrespective of any claim on the Agricultural Rates Grant.

Constitution
of Library
Committee.

It is provided by Section 18 of the Public Libraries Consolidation (Scotland) Act, 1887, as amended by Section 23 (2) of the Local Government (Scotland) Act, 1894, that, within one month after the adoption of the Act, the Landward Committee in a parish partly landward and partly burghal shall appoint a Committee consisting of not less than ten nor more than twenty members, half of whom shall be chosen from amongst their own number and the remaining half from amongst the householders of the burgh or parish other than the members of the Landward Committee. In one parish the Landward Committee consisted of only three members, who elected seven householders to act with them on the Committee, but having doubts as to the legality of the course they had taken, our opinion was asked. It appeared to us that the only way in which the provisions of the Libraries Act could be complied with was for us to increase the number of members of the Landward Committee to five, which we are empowered to do by Section 23 (2) of the Local Government Act. The increase, however, could not be effected till the next election, and in the meantime, if no objection was taken, the course the Landward Committee had followed appeared to us to be the best in the circumstances, although it may be open to question.

Proposal to
alter the
number of
Parish Coun-
cillors for a
Parish in the
middle of the
Triennial Elec-
tion period.

We had likewise to consider a proposal from a Parish Council to increase the number of Parish Councillors for the parish in the middle of the triennial election period. It seemed to us to be quite unnecessary to consider the request at the time it was made, as any alteration could not become operative until the general Parish Council election in 1904. The circumstances, however, had been duly considered by the County and Town Councils in terms of Section 9 (1) (d) of the Act, and all parties were anxious that we should give immediate effect to the increase. In support of the proposal it was pointed out that the Secretary for Scotland had issued an Order dividing the landward part of the parish into two electoral divisions, and it was suggested that we might signify our approval to the increased number of Councillors at once, and under Section 18 of the Local Government Act provide for a new election by the Parish Council. We could not, however, accept this view. Even assuming that Section 18 did apply, the suggested procedure did not appear to us to be competent. Under that section we have to order a *new election*. That means, in our opinion, a new election by the ratepayers, and does not authorise us to order the Parish Council to appoint Councillors to the newly created seats as if they were casual vacancies.

Disqualifica-
tion of Parish
Councillors.

We print in the Appendix a List of Parishes, arranged according to Counties, showing the Number of Parish Councillors and the Proportion for the Burghal and Landward Parts respectively; also a List of those Landward Committees which have been increased in terms of Section 23 (2) of the Local Government Act.

We are frequently consulted by Parish Councils and others as to the scope of the provisions of Section 20 of the Local Government Act relating to the disqualification of Parish Councillors. We have no power or duty to determine questions of disqualification, but we endeavour to advise in the cases which come before us.

We were asked by a minister, who was a Parish Councillor of one of the parishes forming a Poorhouse Combination, whether he was eligible for the salaried office of Chaplain to the Poorhouse, and also whether in the event of his having to resign his councillorship he must do so before his appointment of Chaplain. To the first question we directed attention to paragraph (b) of our Circular of 16th March 1895 (First Annual Report, page 53), in which we stated that the position of Chaplain to a Combination Poorhouse was, in our opinion, one of the disqualifying offices. In regard to the second question we took the view that a Parish Councillor must resign before he becomes a candidate for an office of profit under a Parish Council or the House Committee of a Combination Poorhouse.

Our opinion above mentioned gave rise to a question whether in the event of a Parish Councillor desiring to apply for the post of Auditor it was equally necessary that he should resign his seat on the Council prior to making application. On consideration we stated that we saw no reason why a Parish Councillor should have to resign before he became an applicant for the office of Auditor. He would, of course, have to demit the office of Councillor if he were appointed to the post of Auditor.

In another case we were asked whether an insurance agent, who was also a Parish Councillor, was disqualified as a Councillor by the fact that the Parish Council insured their officials under a fidelity guarantee policy through him. We saw no reason to suppose that the transaction referred to would involve disqualification.

We regret to say that from time to time cases are brought to our notice in which Parish Councillors have relatives in receipt of relief from the Parish Council of which they are members. One of the worst of such cases has been already referred to on p. xxv. In another instance the Councillor's father and step-mother were on the roll, and we were asked whether, under such circumstances, it was competent for the Councillor in question to hold office. We pointed out that there was a legal obligation on a son to support his father, if able, and the Parish Council were not entitled to alimient the father unless they were satisfied that the son was unable to maintain him. But the question whether the case came within the disqualifying provisions of Section 20 of the Local Government (Scotland) Act, 1894, was one which we had no power or duty to determine and on which we could not undertake to express an opinion further than to say that in our view it was most inexpedient that a son whose father was maintained by the Parish Council should be a Parish Councillor.

To show the extraordinary view taken in some parishes as to the class of men who may be entrusted with the guidance of the affairs of a Parish Council we may quote the following instance. The question was put to us whether a person who had failed to pay the past year's Poor and School Rates was disqualified from acting as Chairman of a Parish Council. We stated in reply that the non-payment of last year's rates did not *in terms* appear to involve a statutory disqualification, but we expressed our surprise that a person who had failed to pay his rates should be found

Local
Government.

acting as a Parish Councillor, much less as Chairman of a Parish Council.

Officials.

Respective
duties of
Inspector and
Clerk.

In parishes where the offices of Inspector of Poor and Clerk to the Parish Council are held by different persons we are often asked to define the duties of the two officers. We have expressed the opinion that the Inspector should keep all books relating to the relief of the poor, as, *e.g.*, the Record of Applications, General Register, Children's Separate Register, Pay Roll, &c., &c. It is also necessary for the Inspector to keep a Cash Book showing the sums he receives from the Clerk or other source, and his disbursements.

The Clerk should keep the Parish Council's Cash Book, Ledger, Intimation of Payments Book, and all other accounting books.

It is for the Parish Council to say which official is to keep the Minute Book, but, if it is kept by the Clerk, it must be accessible to the Inspector at all reasonable times.

In one instance a Parish Council proposed to put the duty of paying paupers' allowances on the Clerk. We could not, however, favour this proposal. The Inspector is the statutory officer responsible to us, and to put the duty of paying the paupers on the Clerk would, in our opinion, be at variance with the provisions of Section 55 of the Poor Law Act and with paragraph 5 of our Circular of 27th February 1879 (p. 12 of our Rules and Instructions to Parochial Authorities).

Cost of
Qualifying as
an *ex officio*
Justice of
the Peace.

Our opinion has more than once been asked as to whether the Clerk of the Peace is entitled to demand a fee from Chairmen of Parish Councils who desire to exercise the privilege conferred on them by Section 40 of the Act and qualify as Justices of the Peace. We have, of course, no power or duty to determine questions of this nature, and we have declined to express an opinion further than to say that if a Chairman of a Parish Council desires to act as a Justice of the Peace he must qualify by taking the oath, and, although there is no statutory provision which empowers a Clerk of the Peace in Scotland to demand a fee for administering such oath, it appears to be the custom for them to do so.

Postal and
Telegraph
Facilities.

Questions under the Post Office Acts, 1891-1897, frequently engage our attention, and these mainly relate to the application of Section 8 of the Post Office Act of 1891 to particular cases. A Money Order Office and Post Office Savings Bank were opened in one parish on the Parish Council undertaking to become guarantors. The Postmistress was asked by the Postmaster-General to pay the sum of 9s. annually on a policy insuring him against loss through the Postmistress's intromissions, and the Parish Council desired to know whether they would be justified under the Statute in paying this amount. We stated that in our view the Parish Council did not appear to have power to make such a payment out of the rates.

Guarantee for
Intromissions
of Post-
mistress.Legality of
Annual
Payment by
Parish Council
for Telegraph
Facilities at
Night.

A Parish Council of a somewhat remote country parish had entered into correspondence with the Postal Authorities with a view to ascertaining the conditions on which the local Telegraph Office could, on an emergency, be able to obtain communication at night with the head Post Office of the nearest town. It was represented that such communication might be of great importance if medical assistance were wanted in case of sudden illness or where

fires required the attendance of a fire brigade. It appeared that the charge for the provision of the necessary apparatus at the Post Office of the nearest town would be 10s. per annum, and the ordinary telegraph charge and late fee of 6s. would be payable on each message. Some doubt was entertained as to whether the charge of 10s. per annum was such as could be defrayed by the Parish Council out of the Special Parish Rate. On consideration we formed the opinion that the charge was covered by the terms of the Post Office Acts of 1891 and 1895 as amended by the Post Office Act of 1897.

Local
Government.

There was a proposal in one parish that the mail route should be changed. The Post Office Authorities were quite willing to make the change on condition that the local people would guarantee an annual payment of £10. It was impossible to guarantee this sum being paid by the inhabitants of the place every year, and we were asked whether it would be legal for the Parish Council to make the payment. We took the view that the charge in question could competently be defrayed by the Parish Council out of the Special Parish Rate in terms of Section 1 of the Post Office Act, 1895, as amended by the Act of 1897.

Legality of
Annual
Payment by
Parish Council
for change of
Mail Route.

In another case the Parish Council had undertaken a guarantee in terms of the Statute, but found it unnecessary to levy a Special Parish Rate owing to several private parties offering to pay the amount of the guarantee to the Parish Council. The Clerk to the Parish Council had some doubts as to how he should act in the circumstances, and whether he should keep a separate account of the sums received apart from the books of the Parish Council. We pointed out that it would be his duty as Clerk to collect and disburse the sums offered by the private guarantors, and enter them in the usual way in the Special Parish Rate Account, even though it might be unnecessary to levy a Special Parish Rate.

Method of
Dealing with
Sums from
Private
Guarantors.

In reply to an enquiry whether it would be competent for a Parish Council to pay the expenses of three delegates who had been appointed to represent the Council at a Conference on Accommodation for Consumptive Poor, we stated that the general rule was that a Parish Council was entitled to incur reasonable expenditure in obtaining information or advice as to the method of carrying out their statutory duties towards the poor under their charge.

Expenses of
Delegates at
Conference on
Accommodation
for
Consumptive
Poor.

While we could not undertake to determine beforehand a question which might hereafter come before us at the Audit, we did not think that any objection could be taken to the reasonable expenses of the delegates, but it appeared to us that one or two delegates ought to be sufficient at a conference of the kind.

In another case we were asked whether in the event of a Visiting Committee of a Parish Council going to the Poorhouse or Asylum, or visiting boarded-out children, the Parish Council might defray their travelling expenses. We replied that we did not think that any objection could be taken to the reasonable expenses of the Committee when visiting boarded-out children, but we did not think that there was the same need for visits to the Poorhouse and Asylum. The Inspector of Poor, if so directed, can visit his non-resident paupers wherever they may be, and this is much more useful, also cheaper.

Travelling
Expenses of
Visiting
Committees.

Public Health.

PUBLIC HEALTH.

Public Health
(Scotland) Act,
1897.

During the past year, in addition to the discharge of our numerous statutory duties under the Public Health (Scotland) Act, 1897, we have continued to advise Local Authorities and to afford them assistance, more especially with reference to legal questions affecting the interpretation of the Statute which have been submitted for our consideration.

Complaints
regarding
Nuisances.

We have also received numerous complaints from individuals regarding nuisances which it was alleged the Local Authorities had failed to remove. In the great majority of cases in which the complaint was ascertained to be well founded, the Local Authority, on our calling attention to it, at once took steps to remove the nuisance.

Plague
Precautions.

We are again glad to be able to report that there has been no recurrence of Plague in Scotland during the past year in man. The sampling and bacterioscopic examination of rats, which last year led to the discovery of plague-infection in Glasgow, has been maintained, but without such result, in 1903.

The Supply of
Plague Serum.

In 1901, at the time of the outbreak of Plague in Glasgow, our Medical Inspector drew attention to the fact that the cases had been treated with Yersin's Serum procured from the Pasteur Institute, Paris. Hitherto, the Pasteur Institute had been able to supply all the serum required in Great Britain or elsewhere; but enquiries made in Paris by the Glasgow authorities revealed the necessity for arrangements being made whereby Plague Serum might be manufactured at home in order that, in the event of Plague spreading, the supply might be commensurate with the demand.

We at once put ourselves into communication with the English Local Government Board with a view to concerted action, and also approached Lord Lister as representing the Jenner (now the Lister) Institute of Preventive Medicine.

Although the outbreak was fortunately stamped out the matter was not lost sight of. Both Lord Balfour of Burleigh, as Secretary for Scotland, and Mr. Joseph Chamberlain, as Secretary of State for the Colonies, moved in the matter, with the result that in conjunction with the English Local Government Board and the Colonial Office the Scottish Office approached the Treasury on our behalf for a subsidy to be paid to the Lister Institute for the preparation of a supply of Plague Serum.

Arrangements
with the
Lister
Institute.

In February 1903 we had the satisfaction of learning that the Lords Commissioners of His Majesty's Treasury had sanctioned the inclusion in our estimates of a sum of £1000 as a Grant-in-Aid to the Lister Institute, under certain specified conditions, and that a similar provision had been made in the estimates of the English Local Government Board, which, with a contribution from the Colonies of £1000, made up a total contribution of £3000. We believe that this scheme will add to the resources of the United Kingdom and the Colonies against the spread of Plague and for the saving of life in the case of persons who may become infected.

While alive to the necessity for the utmost vigilance in the measures to be taken to prevent the importation of epidemic disease from abroad, we are at the same time anxious not to prescribe or enforce measures that would delay the discharge of cargoes and thus embarrass the great shipping interests of the country. In a letter, dated 27th March 1903, received from the Commissioners of His Majesty's Customs, that Board observed that "unnecessary delays are to be deprecated; the increasing size of modern ships, the keen competition in the shipping trade, and the urgent demand for facilities enabling vessels to arrive quickly at their discharging berths make it incumbent that official stoppages and restrictions shall be confined within the narrowest possible limits consistent with the interests of the Revenue and the safety of the general community." With a view, therefore, to greater expedition in carrying out the procedure under the Regulations for Cholera, Yellow Fever, and Plague, and in order to enable all vessels not "infected" to proceed direct to their various places of discharge, the Commissioners of His Majesty's Customs proposed to provide at ports two Boarding Stations, one for "infected" ships and another for ships not "infected," and they asked us whether we saw any objections to this proposal. In reply we informed the Commissioners that we saw no reason to object to the proposal.

Public Health.
Arrangements
made by H.M.
Customs with
regard to
Boarding
Stations.

During the year we took an important step towards the limitation of the restrictions placed on "infected" ships by giving greater latitude to Local Authorities in the selection of Mooring Stations. It has long been within our knowledge that certain Local Authorities were in the position of "having no place where a ship can be moored or anchored safely or suitably for the purposes of Article 10" of the Regulations as to Cholera, Yellow Fever, and Plague embodied in our Order of 1st January 1898, and consequently the mooring stations or anchorages for these Local Authorities were fixed within the district of another Local Authority. This arrangement was more or less open to the objection that it placed the "infected" ship beyond the jurisdiction of the Local Authority whose duty it was to carry out the obligations of the Regulations with respect to the same. The fixing of a mooring place cannot be dissociated from those other duties imposed upon Local Authorities by the Order, such as the provision of hospital accommodation, and if a distant anchorage outwith the jurisdiction of the Local Authority is retained, that Local Authority must make the necessary provision and arrangements for dealing with the cases at the mooring place. In addition, the Regulations in force contained no provision for intimating to us the place fixed unless in cases of dispute where the matter was referred to us for final decision.

Amending
Order as to
Mooring Sta-
tions in con-
nection with
the Board's
Regulations for
Cholera, &c.

To afford greater latitude to Local Authorities in the choice of a place for mooring or anchoring, and after considering the matter in the light of our fuller knowledge of the habits of the diseases to which our Order of 1st January 1898 applies, we resolved to issue an Amending Order (1) providing that, subject always to our consent and to any conditions that we may impose in the interests of public health, the place where an "infected" ship may be

Public Health. moored or anchored shall include any quay, wharf, pier, or landing-place within the jurisdiction of the Local Authority, and (2) directing that in future when a Local Authority fixed a place where a ship may be moored or anchored for the purposes of the Order of 1st January 1898 the Local Authority shall intimate to us the place so fixed. A copy of this Amending Order, which is dated 18th August 1903, and of the covering Circular, will be found in the Appendix.

App. (A.)
No. 26.

Plague
Quarantine
Regulations.

In our last Report we referred to a representation made to the Egyptian Government by the Alexandria Import Trade Association, which had been forwarded by Lord Cromer to the Foreign Office and afterwards referred to us. The memorialists *inter alia* suggested that another international conference should be held to amend the agreement of the Venice Convention, and we recorded our concurrence in the view that such an amendment was desirable.

Proposed
Revision of
the Venice
Convention.

The question of the revision of the Venice Convention was again raised in connection with a Memorandum communicated to the Foreign Office by the French Ambassador on behalf of his Government.

We were asked for our observations on this Memorandum and on the draft reply and relative Memorandum on behalf of the Foreign Office. These were given in a letter, dated 16th April 1903, addressed to the Under-Secretary for Scotland, in which *inter alia* we referred (1) to the views that we had expressed in a Memorandum in connection with changes suggested by the Alexandria Import Trade Association in the present system of quarantine, which will be found summarised in pages xxxiii. and xxxiv. of our Eighth Annual Report, and (2) to our Order of 21st January 1902 requiring Local Authorities, "if Plague is found or "suspected to exist among rats in the district or in any neighbouring district, or in any ship lying in any river, harbour, or "other water, &c., &c., to adopt all necessary precautions to prevent "the dissemination of the disease." We also expressed ourselves in favour of the appointment of an International Technical Commission, which should prepare and submit a draft Convention embodying the measures prescribed by existing Conventions in harmonised and codified form; thinking that such a codification would greatly simplify revision and modification if this should be found to be desirable.

We afterwards learned that the Foreign Office had intimated the willingness of His Majesty's Government to take part in an International Sanitary Conference at Paris in October 1903, and we have reason to know that the terms of a revised Convention are now under consideration.

Port Local
Authorities.

For the first time since the passing of the Public Health (Scotland) Act, 1897, we had to consider a proposal to constitute a Port Local Authority under Part X. of the said Act. On 23rd January 1901 the Clerk to the Local Authority of Glasgow informed us that, in view of the outbreaks of Plague and Smallpox in the city, the Corporation had considered the question of the necessity of constituting a Port Local Authority for the Port of Glasgow, and had unanimously resolved to apply to us to issue, in terms of our powers under Section 172 of the aforesaid Act an Order constituting the Corporation the Local Authority of the whole of the Port of Glasgow.

On receiving this application we, in the first place, procured the observations of all the Local Authorities interested in the proposal. Thereafter, we appointed Sheriff Jameson, K.C., a Commissioner to hold a public inquiry. This inquiry took place in Glasgow on 2nd October 1901 and following days. As a result of full and careful consideration of our Commissioner's Report and of the whole circumstances of the case, we decided to constitute the Local Authority of the Burgh of Glasgow the Port Local Authority for the Port of Glasgow.

We reached this conclusion early in 1902, but looking to the position of matters then existing in the public health administration of Glasgow, and the provisions of Section 15 of the Act, we deemed it expedient to delay the issue of our Order until regulations for the duties of the Medical Officer and Sanitary Inspector of the burgh had been approved by us. These were submitted on 19th August 1902, but it was not until 13th June 1903 that they were so adjusted as to enable us to give our approval.

Immediately thereafter we issued our Order in draft, accompanied by an explanatory Circular. A copy of the Circular will be found in the Appendix. The final Order was issued on 7th August 1903. App. (A.) Nos. 24 & 25. A copy will also be found in the Appendix.

The total number of cases of Smallpox intimated to us during 1903 was 550, as compared with 915 in 1902, and 1990 in 1901. The districts and burghs of Lanarkshire contribute 410 cases, or 74·5 per cent. of the total cases in Scotland, as compared with 74·3 per cent. in 1902. There has again been a marked decrease in the number of cases in Glasgow, 290 cases, or 52·7 per cent. of the total cases, as compared with 452, or 50 per cent., last year, and 1383 cases, or 70 per cent., in 1901. It must be observed, however, that most of the Glasgow cases were intimated during the last month of the year, and that at the close of the year the number of daily intimations was on the increase. The same remark applies to Govan, where 50 cases have occurred during the year, all of them since October. Coatbridge was also seriously affected, 12 cases having been intimated during December. The threatening aspect of the outbreak at the end of the year will appear from the fact that intimations of Smallpox cases were received by us during December 1903 from 7 rural districts and 18 burghs.

A Table showing the monthly distribution of Smallpox cases during 1903 in the burghal and landward districts of Scotland will be found in the Appendix. App. (B.) No. 21.

In May 1903 we published, through His Majesty's Stationery Office, in a volume under the title of "Instructions, Forms, and Recommendations," the series of Circulars, Orders, Memoranda, Model Byelaws, Forms, &c., that we have issued from time to time since the passing of the Public Health (Scotland) Act, 1897, including also the more important opinions that have appeared in preceding Annual Reports. The book is classified according to subjects and fully indexed. Copies were sent to all Clerks to Local Authorities, Medical Officers of Health, and Sanitary Inspectors, and we were glad to learn that as a book of reference it has been much appreciated by Public Health officials.

During the Parliamentary Session of 1903 we were frequently consulted with regard to the Burgh Police (Scotland) Bill which

Burgh Police
(Scotland)
Act, 1903

Public Health. was passed through Parliament and received the Royal assent on the 14th August 1903. That Act amends the Burgh Police (Scotland) Act, 1892, and supplements its provisions in regard to a number of matters where it has been found by experience to be defective. The Act is divided into three parts, Part I. being applicable to all burghs to which the Act of 1892 is applicable, Part II. being adoptive, and Part III. being miscellaneous and supplemental.

In Part I. the leading sanitary provisions relate to the paving of private courts, provision of water-closets, buildings for noxious trades, and the regulation of the manufacture and sale of ice-cream with a view to the protection of this commodity from infection or contamination. Certain sections also contain amendments of the law as to the rating and borrowing powers of Town Councils.

Among the adoptive clauses constituting Part II. are (1) the further regulation of dwelling-houses by byelaws and otherwise so as *inter alia* to ensure greater air-space both internally and externally and to prevent overcrowding, (2) the inspection of ice-cream shops by Sanitary Officers, and (3) very important provisions for dealing with the supply of milk from diseased cows.

In Part III. power is given to County Councils to adopt the sections dealing with the ice-cream trade.

The Schedule to the new Act contains important amendments of Sections 278 and 284 of the Burgh Police (Scotland) Act, 1892, in connection with the erection and licensing of slaughter-houses.

Bills in
Parliament.

In addition to considering the Act above referred to, we were consulted as to the Sale of Butterine Bill, the Congested Districts Bill, and Bills proposing amendments of the Housing of the Working Classes Act.

Provisional
Orders.

We also had under consideration Provisional Orders for additional powers lodged with us in pursuance of General Order No. 33 under the Private Legislation Procedure (Scotland) Act, 1899, by the Corporations of the Burghs of Glasgow, Grangemouth, Kilmarnock, Rothesay, and Wishaw respectively, the County Council of Dumbarton, the Melrose District Committee, the North British Railway Company, the Scottish Central Electric Power Company, and the Hamilton, Motherwell, and Wishaw Tramways Company.

Factory and
Workshop Act,
1901, and
Regulations for
Medical
Officers.

We remind you that on 18th January 1900 we issued Draft Regulations for Medical Officers and Sanitary Inspectors as a guide to Local Authorities. We have had to consider the effect of the passing of the Factory and Workshop Act, 1901, Section 132 of which requires the Medical Officer of Health to report specifically on the administration of the Act in workshops and workplaces. This duty was referred to *inter alia* in a revised Memorandum dated February 1903 issued by the Home Office. In a letter from that Department drawing attention to the Memorandum the Under-Secretary of State intimated that it was being sent by the English Local Government Board to every Medical Officer in England and Wales, and added that the Home Secretary would be happy to supply us with copies for the same purpose. We were glad to accept this offer, and on 12th November 1903 we issued a Circular enclosing copies of the Home Office

Memorandum, reminding Medical Officers of Health of this new Public Health duty, and explaining that they are required to report on the administration of the Factory and Workshop Act, 1901, only in so far as this administration is in the hands of the Local Authority. In reporting on the sanitary administration of workshops and workplaces we advised Medical Officers to include an account of the action with respect to factories, workshops, and workplaces taken under the Public Health Acts as well as under the Factory and Workshop Act.

In view of the terms of Section 132 of the Factory and Workshop Act, we also deemed it advisable to revise the headings of the instructions as to the contents of the Medical Officers' annual reports, which we had issued in January 1900. No change was necessary as regards Sanitary Inspectors, but it was more convenient to revoke entirely the Instructions contained in our former Circular and substitute amended Instructions, which we did on 12th November 1903. A copy of our Circulars of the latter date addressed to County and Burgh Local Authorities respectively, and a copy of the relative Home Office Circular, will be found in the Appendix.

Revised Instructions as to Annual Reports of Medical Officers.

App. (A.) Nos. 16 & 17.

We may add here that while considering the annual reports for 1901 and 1902 we observed that sufficient attention was not given by some Sanitary Officers to the order and arrangement of the subject-matter of annual reports as prescribed by us in our Instructions, and we found it necessary to address a Circular to such officers requesting that the sequence of headings set forth in our Circular of 18th January 1900 (now superseded by our Circular of 12th November 1903) be carefully adhered to. A copy of the Circular, dated 10th February 1903, will be found in the Appendix.

Order and Arrangement of Annual Reports of Sanitary Officers.

App. (A.) Nos. 14 & 15.

A Medical Officer of Health, referring us to Regulation 11 of our Model Regulations, enquired which diseases should be included in the expression "dangerous infectious disease." In our opinion the infectious diseases that have been considered of sufficient gravity to be expressly named in the Infectious Disease (Notification) Act, indicate those which are most likely on occasion to become dangerous, but the occasion is for the Medical Officer of Health to decide. Diseases regarding which Orders are issued by us must be considered as in all circumstances dangerous.

Regulations for Medical Officers of Health: Interpretation of Expression "any Dangerous Infectious Disease."

A Medical Officer of Health asked our advice as to the powers and duties of a Sanitary Inspector in relation to infectious disease, objection having been taken by a medical practitioner to the presence of a Sanitary Inspector in the sickroom.

Sanitary Inspectors and Infectious Disease.

In reply we pointed out that under the Local Authority's own regulations for the guidance of the Sanitary Inspector (which corresponded to Nos. 16, 17, and 18 of our Model Regulations) the Medical Officer was responsible for the Sanitary Inspector's actions relative to infectious disease, and that the discretion as to their nature lay with the Medical Officer of Health and not with the Sanitary Inspector.

Further, with reference to his request for guidance in the exercise of this discretion, we reminded the Medical Officer of Health of the delicacy of his position as being a practitioner as well as an officer of health. Such a position called for the utmost caution in his

Public Health. personal interference, still more in the use of the Sanitary Inspector as his deputy.

Arbitration : A question having arisen between two Local Authorities, proprietors of a joint hospital, as to the keep of one of the nurses when suffering from scarlet fever contracted in the hospital while in the execution of her duties, the matter was referred to us for decision in terms of the deed of agreement between the two Local Authorities. The hospital is outside the burgh boundaries, and the Burgh Authorities claimed that the nurse while under treatment was not so treated as an employee but as a patient sent in to the hospital, and that she was therefore a county patient, and the cost of her keep, while a patient, was payable by the county. The County Authorities, on the other hand, maintained that the situation of the hospital had nothing whatever to do with the matter, and that the expense of this nurse's keep during illness contracted while attending to her duties at the hospital was simply part of the general administration expenses of the hospital, the same as if it had been the Matron who had contracted the disease, and that this case was not at all in the same position as if the nurse had contracted the disease in another part of the county and had been conveyed to the hospital as an ordinary patient.

In reply to the joint reference we gave our opinion that when a nurse contracts infectious disease in the performance of her duties in the hospital, the equitable course is to charge the cost of her maintenance and treatment as part of the expenses of the management of the hospital.

Arbitration : In another case we undertook to arbitrate between a Burghal and a District Local Authority as to which body was liable for the expenses incurred in removing a patient to the Fever Hospital belonging to the District Committee (there being no such hospital for the burgh) and for her maintenance therein. The girl's residence was outwith the burgh, but for the purpose of undergoing a surgical operation she had been removed to a private Cottage Hospital in the burgh, where she developed scarlet fever, and from which she was transferred to the District Committee's Hospital for Infectious Disease.

Having considered the statement of facts, on which the parties were agreed, and the pleas and arguments submitted by both, we were of opinion that the Burgh Local Authority was liable for the expenses in this case.

The grounds on which we based our opinion are as follows:—The Local Authority of the burgh are responsible for all cases of infectious disease occurring within the burgh, and their responsibility is not affected by the fact that the patient's domicile is elsewhere or that the disease may have been contracted elsewhere. The duty of the Local Authority is to protect and preserve the public health within the burgh, and for this purpose they are bound to see to the isolation and treatment of all cases of infectious disease in the burgh, whether among the ordinary inhabitants or among temporary residents, and whether originating within the burgh or not.

We were unable to sustain the plea of the Burgh Local Authority that the removal was carried out at the instance of the medical

attendants and without the knowledge and consent of the Local Public Health Authority or their Medical Officer of Health. The Depute Medical Officer of Health for the burgh stated that in removing the patient he was acting on behalf of the Burgh Medical Officer of Health but, although he did not appear to have been formally nominated as the substitute for the Medical Officer of Health of the burgh, we could not regard this informality as a sufficient ground for holding that the burgh should be relieved of their liability for the expenses of the case.

A question that is raised from time to time both by Local Authorities and private individuals is that of the liability of Local Authorities when, owing to their failure to provide hospital accommodation, persons suffering from infectious disease have to be isolated and treated in their own homes. When a Local Authority has not provided hospital accommodation, or where, owing to the insufficiency of the provisions made, cases are treated at home which in the circumstances provided for in Section 54 of the Public Health Act would be or ought to have been removed to hospital, it appeared to us that it would be fair and equitable that the expense involved and any loss thereby caused should be borne by the Local Authority.

Liability of
Local
Authority
where no
Hospital
provided.

In terms of Section 66 (3) of the Public Health Act, we approved the sites of hospitals for the Deer District of Aberdeen, at Strichen; the Ayr District, near Ayr; and the Burghs of Dumfries (Smallpox), Musselburgh, and Perth, at Friarton. We also approved the site of a Joint Smallpox Hospital near Kilwinning for the Northern District of Ayrshire and the Burghs of Ardrossan, Irvine, Kilwinning, Largs, Saltcoats, and Stewarton. We refused to approve the site first submitted for the proposed Smallpox Hospital for the Burgh of Dumfries, and we also refused to approve the sites submitted by the Calder District of Edinburgh and the Burgh of Forfar. Our approval was also given to the extension of the sites of the following hospitals to allow additions to be made:—Annan District and Burgh Joint Hospital; Kinross County and Burgh Joint Hospital; Penicuik Burgh; and Wishaw Burgh.

Hospital Sites
and Plans
approved.

We approved the plans of a hospital for the Burgh of Ayr and of a joint hospital for the Melrose District and Burgh.

We further approved the sites and plans of hospitals for the Mull District of Argyll, at Tiree; the South Uist District of Inverness, at Daliburgh, Breaig, and Eriskay; the County of Sutherland, near Mound Station; also of a Joint Smallpox Hospital at Newton-Stewart for the Lower District of Wigtown, the Western District of Kirkcudbright, and the Burgh of Newton-Stewart; and of a Joint Cholera Hospital for the Black Isle, Easter Ross, and Mid Ross Districts of the County of Ross and the Burghs of Cromarty, Dingwall, and Invergordon; the last-mentioned to be erected in terms of our Order of 24th November 1898, authorising a combination of these Local Authorities for the purpose of enforcing the provisions of Part IV. of the Public Health Act (*see* our Fourth Annual Report, 1898, page xxxvii.).

Amended plans in connection with the following hospitals were approved, viz.:—The Kirkcudbright County Combination Hospital

Public Health. at Castle-Douglas and the joint hospital at Belhaven for the Eastern District of Haddington and the Burgh of Dunbar.

The plans of additions to the following hospitals were also approved:—Annan District and Burgh, Peebles County and Burgh (Smallpox), and Penicuik Burgh.

We further approved the plan of the Sewage Purification Works in connection with the Thornhill District Hospital, and the drainage plan of the Combination Hospital for the County and Burgh of Kinross.

In terms of Section 66 (3) we consented to the agreement between the Cupar District of Fife and the Burgh of Newburgh for the use by the burgh of the District Hospital at Auchtermuchty, and we also approved the renewal of the lease of cottages at Old Pentland for a year from 5th March to be used as a temporary emergency hospital for smallpox for the Gala Water and Lasswade Districts of Midlothian.

Legal
Proceedings:
Local Govern-
ment Board
v. The Burgh
of Kelso.

In the case of the Burgh of Kelso we found it necessary to petition the Court of Session to compel the Local Authority to provide Hospital Accommodation. The delay had been excessive and it was only after the Petition had been presented that an agreement with the Kelso District Committee was arrived at. After hearing parties on 7th July 1903 the Court found that it was unnecessary to proceed further with the Petition and also found the Burgh liable in expenses.

Decisions
under
Section 66 (2).

In terms of Section 66 (2) of the Act, we determined the allocation of expenses of erection and maintenance of the proposed joint hospital for the Upper District of Wigtown and the Burgh of Stranraer, and we also determined the representation of each Local Authority on the Joint Committee of Management. During the year we also settled differences that had arisen with regard to certain clauses in the Draft Deed of Constitution of the proposed joint hospital for the Lower District of Renfrew and the Burghs of Gourock, Greenock, and Port-Glasgow.

Expert
Commissioner
on Plans, &c.

We have as usual remitted the more important sets of plans of hospitals submitted to us for approval, in the first place, to an architectural expert Commissioner for criticism and report, and have thus been enabled to embody in our observations transmitted to Local Authorities many technical suggestions of value.

Cost of
Disinfection of
Clothing, &c.

A Local Authority having asked whether they would be justified in charging the actual cost incurred in disinfecting articles of clothing in cases where the parties were quite able to pay, we replied that the Public Health (Scotland) Act, 1897, empowers the Local Authority in all cases and requires them in the majority of cases to carry out disinfection at the cost of the rates. It gives no authority to recover the cost of disinfection from the owners of the articles. It does not appear, therefore, that the Local Authority are entitled in any case to make a charge for disinfection.

Fever-infected
Blankets.

On the 26th of May 1903, the English Local Government Board intimated that they had received information, in connection with an outbreak of enteric fever on board the Training Ship *Cornwall*, that a large quantity of blankets received in this country from South Africa had been disposed of by certain firms to persons in various parts of the country, including the following localities in Scotland, viz.:—Glasgow, Edinburgh, Dundee, Aberdeen, Perth, Monifieth, Helensburgh, Inverbervie, Midlothian (Lasswade

District), and Perthshire (Highland District). On the same date Public Health. —
intimation was received from the Medical Officer of Health of Midlothian of the dissemination of these blankets in Midlothian. We immediately addressed a Circular-letter to the Local Authorities of these burghs and districts (1) advising the thorough disinfection and subsequent cleansing or, alternatively, the destruction of the implicated blankets, and (2) requesting to be informed of the steps taken to secure this object. A copy of the Circular-letter will be found in the Appendix.

App. (A.)
No. 27.

Satisfactory replies as to action taken were received almost by return of post, and we desire therefore to express generally our appreciation of the promptitude and success with which the Local Authorities and their officials followed up the information imparted.

A Local Authority explained to us that claims had been made to them in respect of unnecessary damage to articles through disinfection, such as stains on clothing or the discolouration of some of the articles. Hitherto claims on these grounds had been rejected, the Local Authority being of opinion that the damage was unavoidable. Our view of the matter was that, under Section 47 of the Public Health Act, the owner is to be paid "any unnecessary damage thereby caused to such house, part of a house, "or article," that is, any damage done in the course of the disinfecting process which might have been or ought with reasonable care to have been avoided. There is no provision in the Act for compensation for necessary or unavoidable damage. What is necessary, or what is unnecessary, must be matter of evidence.

Liability for
Articles
Damaged
during
Disinfection.

We were asked by the Local Authority of a burgh whether we considered that under the Public Health Act they had power to provide a Bacteriological Laboratory, and in reply we stated that we could not venture to give a categorical answer to a question that might be raised at Audit; but we were prepared to assent to the view that bacteriological investigation is often indispensable in matters of public health, and that it was for the Local Authority to determine, in view of the subsequent Audit, how such investigation may be most efficiently and economically conducted.

As to the
Provision of a
Bacterio-
logical
Laboratory by
a Local
Authority.

A Special Water and Drainage District Committee having proposed to erect urinals within their Special District, we were asked whether it was competent to charge the expense to the Water and Drainage Assessments in the Special District, or whether it must be charged against the general Public Health Assessment for the whole district of the Local Authority. In reply we stated that we concurred in the view expressed by the Clerk to the Local Authority that the expense must be charged against the latter assessment. In our opinion, as advised, the Special Sewer Assessment and Special Water Assessment authorised by Sections 133 and 134 of the Public Health Act can be applied only to the purposes specified in these sections, and the expenses of providing urinals cannot therefore be charged against them.

Cost of the
Erection of
Urinals in a
Special
District.

In reply to a further question by another Local Authority, we expressed the view that it was competent for a Local Authority to provide hydrants, and that the cost of these in a Special Water Supply District is chargeable to the Special Water Assessment.

Cost of the
Erection of
Hydrants in
a Special
District.

Public Health.

As to the
Maintenance
of a Water
Supply for a
Drinking
Fountain and
Trough.

A request having been made to a Local Authority that they should take over and in future maintain a drinking fountain and also a drinking trough for horses erected by a private individual, our advice was asked as to the competency of maintaining such a supply. The Local Authority was inclined to hold that Section 126 of the Public Health Act would cover a case of this kind, but we stated that there may be some doubt whether Section 126 (3), which deals with cisterns, &c., "for the gratuitous supply of water *"to the inhabitants,"* covers the maintenance of a supply for *horses*, especially horses belonging to persons who simply use the road and are not *inhabitants*. We expressed the opinion, however, as advised, that taking Section 126 (3) along with Section 126 (1), which authorises the Local Authority to provide a supply of water "for sanitary and *other purposes*," it was within the power of the Local Authority to do what was contemplated.

Interpretation
of Section 181
of the Public
Health Act as
to Water
Supply and
Drainage, &c.,
of New
Dwelling-
houses.

In connection with the erection of miners' rows of houses, we were asked whether the Local Authority have power to prevent the erection of any dwelling-house within their district unless and until they are satisfied (1) that there is a proper water supply and (2) that proper provision is made for the disposal of the sewage.

In reply, we stated that there is no express provision in the Statute giving such powers to the Local Authority, and we are of opinion that under the existing law the Local Authority are not authorised to forbid the erection of a house until they are satisfied that provision has been made for a proper water supply.

The position with regard to the disposal of sewage is somewhat different. Section 181 of the Public Health Act authorises the Local Authority of any district other than a burgh to make byelaws "for regulating the building or rebuilding of houses or "buildings, or the use for human habitation of any building not "previously so used, or any alteration in the mode of occupancy of "any existing house in such a manner as will increase the number "of separate houses in respect to the following matters"—

“(e) The construction and arrangement of the drainage of "houses and buildings, and of soil-pipes and waste-pipes," &c. It appears to us that this provision, while it does not authorise a byelaw requiring that every house in the district shall be provided with a drain, entitles the Local Authority to require that, where in any house that is newly built (or rebuilt, or altered in use as described in the section) there is a drain or soil-pipe or waste-pipe, provision shall be made for the proper disposal of the sewage and soil or waste-water coming therefrom, and that the Local Authority would be entitled to prevent the erection of a house until such provision should be made. We explained, however, that we had no power to determine questions of this nature; an authoritative decision can only be given by a Court of Law.

As to Dissolu-
tion of Special
Drainage
District.

A requisition having been lodged by the requisite number of ratepayers within the district of a certain Local Authority requiring the latter to meet and consider the propriety of determining that a Special Drainage District should cease to exist as such, we were asked our opinion on the matter. We replied

that the question whether the requisition for the extinction of Public Health. the Special Drainage District was in order or not was one for the Local Authority, and we could not undertake to express an opinion; but we pointed out that the formation of a special drainage district in any locality was an indication that in the opinion of the Local Authority there was need for drainage. Consequently the dissolution of a special drainage district should not be resolved on unless the Local Authority are satisfied that the drainage requirements of the place have been met, and that there is no further need for a special district. On this point the Local Authority should be guided by their Medical Officer of Health.

We were similarly asked to advise as to the proposed dissolution of a Special Water Supply District owing to the very serious financial condition of the district notwithstanding the increase, with our sanction, of the rate beyond the statutory limit. After giving the matter careful consideration, we were unable to suggest any way out of the difficulty other than that which the Local Authority proposed to adopt. Under Section 131 (1) (e) of the Public Health Act, it is competent for the Local Authority to determine that the Special Water Supply District shall cease to exist as such. In the event of an appeal being taken against the resolution of the Local Authority, they may be called on to satisfy the Sheriff that the proposal is reasonable and equitable. It appeared to us that objection might be taken on the ground that it would be inequitable to put the Special District, which derived benefit from the works, in the same favourable position as regards assessment as the remainder of the District of the Local Authority which derives no benefit. We accordingly suggested that the Local Authority should consider whether some arrangement might not be made under which the Special District should continue to be specially assessed for a portion of the expense of the works. It will be noted that in Section 6 of the Public Health Act of 1891 it is provided that a Special Water Supply District may be abolished, but that such area may continue to be rated and assessed separately from the district for the purpose of the payment of any debt. The 1891 Act does not take effect unless and until it has been adopted, and it may be that difficulty might be experienced in adopting it in this district. But the Local Authority might consider whether they are not authorised by Section 131 of the Public Health Act, 1897, to adopt a similar course. That section provides that "the resolution of the Local Authority shall determine all questions regarding the payment of any debt which may affect any district or Special Water Supply District, and the right to impose and the obligation to pay any assessment affected by such determination." Possibly this provision may assist the Local Authority in meeting the difficult circumstances that have arisen.

In terms of Section 145 (11) (a) of the Public Health Act, we appointed Sir John Cheyne, K.C., on 11th March 1903 as Sole Arbitrator to determine the compensation payable under Section 164 of the said Act to the East Kilbride Gas Company by the Local Authority of the Middle Ward District Committee of Lanarkshire

As to Dissolu-
tion of a
Special Water
Supply
District.

Appointment
of an Arbitrator.

Public Health. for damages sustained by the aforesaid Company in connection with the carrying out of the scheme of drainage in the East Kilbride Special Drainage District. On 22nd July 1903 we again appointed him as Sole Arbiter to determine the compensation payable to Lord Hamilton of Dalzell by the same Local Authority for damages sustained in connection with the laying of a sewer through certain parts of his estate.

As regards the first-mentioned case, we afterwards learned that the matter had been extra-judicially arranged, and in the latter case the Local Authority agreed to pay compensation to Lord Hamilton of Dalzell together with a sum in full of expenses.

Water
Supplies :
Afforestation
of Catchment
Areas.

In connection with the enquiry by a Departmental Committee of the Board of Agriculture on British Forestry, that Committee were much interested in the valuable evidence as to the work undertaken by the Corporation of Liverpool to afforest the catchment area of the water supply of that city around Lake Vyrnwy, and they were of opinion that this is a direction in which a considerable amount of afforestation might usefully be done. Accordingly, the Committee *inter alia* recommended that the attention of Corporations and Municipalities be drawn to the desirability of planting with trees the catchment areas of their water supply.

On 3rd August 1903 the Board of Agriculture wrote asking if we could furnish them with a list of Municipalities in Scotland that had acquired the freehold or long leasehold of the catchment areas from which their water supplies are derived, with a statement of the acreage and altitude of the respective areas. As this information was not available we prepared a form of Return to be issued to all Scottish Local Authorities, and after further consulting the Board of Agriculture issued the Return on 5th September 1903. It was not until December that we received replies from all the Local Authorities in Scotland with the exception of the Burghs of Armadale, Cockenzie, Prestonpans, and Sanquhar, and on 24th December 1903 duplicate copies of the Schedules showing the particulars submitted by the Local Authorities were forwarded to the Board of Agriculture. A great amount of interesting information was received, but the Returns, as a whole, showed that it was the exception for Scottish Municipalities to hold land which could be utilised in the interests of British forestry. Copies of (1) the letter from the Board of Agriculture, (2) an extract from the Report of the Departmental Committee, (3) the form of Return and covering Circular will all be found in the Appendix.

App. (A.)
No. 23.

As to the Administration of the provisions as to Unsound Food.

In our last Report we urged the great importance, in the interests of the consumer, of seeing that the provisions of Section 43 of the Public Health Act are rigidly enforced by Local Authorities. During the year 1903 we had again occasion to give the subject considerable attention.

Uniform
Standard of
Meat Inspection.

In January 1903 we received a deputation of a Local Authority who desired to represent the expediency of having a uniform and authoritative standard of inspection of animals and carcasses adopted by the various Local Authorities in Scotland. The main contention of the deputation was that, consequent on the high standard of meat inspection applied in the burgh which they represented,

animals which had hitherto been slaughtered there were being forwarded to other centres where the system of inspection is not so strict, and the meat is afterwards sent direct to the retailers. Public Health.

We gave very careful consideration to the statements made and to the documents afterwards submitted by the Local Authority. It appeared to us that there were in reality two desiderata involved in the question of a uniform standard, which ought to be explicitly distinguished and separately discussed—(1) The expediency of meat inspection being practised by all Local Authorities through the agency of competent inspectors, and (2) the expediency of having a uniform and authoritative standard of inspection adopted and applied by all Local Authorities through these inspectors.

(1) There could be no question that it is expedient that meat inspection should be so practised. If this could be secured, much would be accomplished without a uniform standard, whereas, if it is not secured, a uniform standard would be of little use.

The Act of 1897 effected a radical improvement in the conditions of meat inspection in Scotland, more especially (a) by extending the licensing and regulation of slaughter-houses to County Local Authorities and empowering them to provide public slaughter-houses; (b) by putting into the hands of Local Authorities by means of Section 43 most complete powers, not merely for the detection of unsound food, and dealing with offenders, but to institute for the use of the meat trade a system of meat inspection which premiates the honest dealer and penalises the dishonest.

In our Circular of 16th November 1897, we had called the attention of Local Authorities *inter alia* to those provisions of the Public Health Act, and on 28th February 1898 we had specially directed the attention of the Local Authorities of Landward Districts to the provision as to the licensing of slaughter-houses, and issued draft byelaws for the regulation of the same. Subsequently we had issued a Form of Annual Statement of Proceedings by the Veterinary Surgeon approved by the Local Authority for the purposes of Section 43 of the Public Health Act.

On the whole, we had no reason to be dissatisfied with the progress made by Local Authorities in exercising their powers under Section 43 during the five years for which they have been available. It might therefore be assumed that facilities had been provided for conducting the meat trade in a legitimate way, and if these facilities were not used and carcasses were seized and found to be unfit for human food the inference was obvious and the Act provided a remedy.

As to the qualifications of subordinate Meat Inspectors, we had brought under the notice of Local Authorities in our Circular of 19th October 1899 the recommendations of the Royal Commission on Tuberculosis which reported in 1898, and we had no power to do more.

(2) With regard to the second question—viz., the expediency of having a uniform and authoritative standard of inspection adopted and applied by all Local Authorities—we pointed out that no such suggestion had been made excepting with regard to the vexed question what “degree of tubercular disease . . . should cause a carcase or part thereof to be seized.” The aforesaid Royal

Public Health. Commission had made certain recommendations relative to the practice of meat inspection in this regard. To these we had directed the attention of Local Authorities in the Circular referred to above, and had no authority to do more. Further, the recommendations of the Royal Commission, even if endorsed by us, could not absolutely control the judgment of the Court or of the Veterinary Surgeon approved under Section 43.

We advised the Local Authority to persevere in their own system of inspection and seizure followed by prosecution. If in this course they obtained evidence of laxity on the part of any Local Authority in providing for the inspection of animals slaughtered within their jurisdiction, we would be glad to have our attention directed to such cases. As to the standard, the opinion of the competent officials who advised the Local Authority could not fail, if supported by the decision of the Court, to have an important reflex effect within the wide area from which the supply which passes under their review is drawn.

Veterinary Surgeons.

On 22nd December 1903 we issued Circulars to District and Burghal Local Authorities respectively who had not approved Veterinary Surgeons, (1) pointing out that in our opinion it was of the utmost importance, in the interests both of the public and of those engaged in the meat or milk traffic, that the provisions of Sections 43 and 60 of the Public Health (Scotland) Act should be carried out in their entirety by all Local Authorities, and (2) reminding Local Authorities of the provision which enables them to appoint places for the purposes of inspection. In the case of District Local Authorities we also added that, with a view to greater efficiency and convenience in extensive districts, it would be of advantage to farmers, butchers, and others if more than one Veterinary Surgeon were approved. Copies of these Circulars will be found in the Appendix.

App. (A.)
Nos. 21 & 22.

We also print in the Appendix a List of Local Authorities who have appointed Veterinary Surgeons approved for the purposes of Sections 43 and 60 of the Public Health (Scotland) Act, 1897. The Table shows that 67 County and District Local Authorities and 91 Burghal Local Authorities have specially appointed Veterinary Surgeons to inspect living animals intended for the food of man, or cows in dairies, and carcasses at the place of slaughter or at appointed places within their district.

App. (B.)
No. 37.

Contamination of Shell-fish by Sewage.

On 9th February 1903 we received a communication from the Royal Commission on Sewage Disposal stating that they would be glad to learn the general distribution of shell-fish in Scotland, whether any layings, "floats," or storage ponds are so situated as to be liable to pollution, and generally what steps are taken to secure that no shell-fish are placed on the market in a contaminated condition. The Commission also desired to obtain information as to the extent of the importation of shell-fish into Scotland and of the exportation from Scotland into England.

App. (A.)
No. 18.

As the Fishery Board for Scotland was the only Department that could supply this information we referred the matter to that Board, and on 26th February received from them an interesting statement which was duly forwarded to the Royal Commission. A copy of the Fishery Board's letter will be found in the Appendix.

It appeared that oysters were landed in practically only three of the fishery districts in Scotland, and in none of the districts is it believed that contamination occurs. Mussels are found in greater or less abundance all round the Scottish coasts. They are used very largely for bait, only a small quantity contributing to the food supply. The other molluscs referred to in the Fishery Board's letter were clams, cockles, periwinkles, and limpets. The only shell-fish imported into Scotland are oysters and mussels, the former for use partly as food and partly for breeding purposes, and the latter for bait. The quantity of mussels imported, chiefly from Holland, has steadily decreased in recent years coincident with the decline of the line fisheries.

For the year 1902 the number of Annual Reports received from Sanitary Officers was as follows:—

County Medical Officers' Reports,	33
County Sanitary Inspectors' Reports,	27
District Medical Officers' Reports,	94
District Sanitary Inspectors' Reports,	105
Local Medical Officers' and Sanitary Inspectors' Reports,	52
Burgh Medical Officers' Reports,	201
Burgh Sanitary Inspectors' Reports,	204
Total,	716

Annual
Reports of
Sanitary
Officers.

It is our practice to carefully read and annotate these reports, of which those for Counties and Districts alone amount to over 2400 printed pages, generally octavo size, exclusive of tabular matter. In the majority of instances they are the subject of communications with Local Authorities as to the action required with regard to drainage, water-supply, systematic scavenging, the abatement of nuisances, the provision of means of isolation for infectious cases, and other kindred matters. We have found that Local Authorities are generally ready to give effective consideration to matters thus brought under their notice. We again quote a few extracts from these reports on subjects of general interest and importance.

App. (A.)
No. 28.

In addition to the Annual Reports, we received for the year 1902 the following Returns:—

1. *Returns under the Infectious Disease (Notification) Act, 1889.*

From County and District Medical Officers,	109
From Burgh Medical Officers,	206
2. *Tabular Statements of Sickness and Mortality.*

From County, District, and Local District Medical Officers,	130
From Burgh Medical Officers,	206
3. *Sanitary Inspectors' Statements of Proceedings under the Public Health (Scotland) Act, 1897.*

From County and District Sanitary Inspectors,	115
From Burgh Sanitary Inspectors,	206

Tabular State-
ments and
Notification
Returns.

Public Health. 4. *Statements of Proceedings by Veterinary Surgeons approved for the purposes of Section 43 of the Public Health (Scotland) Act, 1897.*

From County and District Veterinary Surgeons, . . . 156
From Burgh Veterinary Surgeons, . . . 89

App. (B.)
Nos. 16, 19,
and 20.

These Returns of Notifications and the Sickness and Mortality Returns, which have been tabulated and printed in the Appendix, are useful as an index to the sanitary condition of the districts of the various Local Authorities and a record of the movements of public health in relation to sanitary administration.

App. (B.)
No. 17.

Including diseases to which the Infectious Disease (Notification) Act has been extended, the Returns show a grand total of 39,954 cases notified and 15,894 treated in hospital by the Local Authorities in 1902. These figures only include notifiable diseases, in addition to which large numbers of cases of measles, whooping-cough, chicken-pox, etc., etc., are treated by Local Authorities.

The following summary shows, in respect of each disease, the total number of cases notified in Counties (Landward) and in Burghs respectively, and the number and percentage of such treated in hospital.

Diseases Specified in Act.	Notified.		Treated in Hospital.		Percentage of Cases treated in Hospital.	
	Counties.	Burghs.	Counties.	Burghs.	Counties.	Burghs.

* In addition, 72 cases of doubtful Fever were intimated in the Middle Ward of Lanark, 59 of which were treated in hospital.

Smallpox in Districts of Counties.—Lorn District of Argyll, 4; Ayr District of Ayr, 1; Northern District of Ayr, 1; Eastern

District of Dumbarton, 2; Langholm District of Dumfries, 1; Public Health. —
 Thornhill District of Dumfries, 1; Calder District of Edinburgh,
 3; Lasswade District of Edinburgh, 4; Suburban District of Edinburgh,
 4; Cupar District of Fife, 1; Dunfermline District of Fife,
 1; Kirkcaldy District of Fife, 12; St. Andrews District of Fife, 4;
 Dundee District of Forfar, 5; South Uist District of Inverness, 8;
 Lower Ward District of Lanark, 21; Middle Ward District of
 Lanark, 35; Upper Ward District of Lanark, 10; Linlithgow
 District of Linlithgow, 1; County of Peebles, 4; Western District
 of Perth, 2; Upper District of Renfrew, 6; South-Western District
 of Ross and Cromarty, 9; Western District of Stirling, 2. All
 were treated in hospital excepting 25, viz.:—1 in each of the
 Districts of Lasswade, Kirkcaldy, Dundee, and Middle Ward
 District of Lanark; 2 in each of the Districts of Lorn and Upper
 Ward District of Lanark; 8 in South Uist District; and 9 in the
 South-Western District of Ross and Cromarty.

Smallpox in Burghs.—Peterhead, 1; Dunoon, 5; Oban, 11; Ayr,
 3; Ardrossan, 1; Saltcoats, 1; Coldstream, 5; Rothesay, 1; Clyde-
 bank, 1; Kirkintilloch, 1; Dumbarton, 4; Dumfries, 1; Sanguhar,
 2; Penicuik, 2; Edinburgh, 7; Leith, 2; Kirkcaldy, 13; Leslie, 2;
 Markinch, 2; Kilrenny, 1; St. Andrews, 3; Arbroath, 12; Mon-
 trose, 2; Dundee, 57; Glasgow, 460; Govan, 110; Kinning Park,
 2; Partick, 8; Rutherglen, 3; Airdrie, 13; Coatbridge, 4; Hamil-
 ton, 2; Motherwell, 17; Wishaw, 7; Linlithgow, 3; Peebles, 6;
 Perth, 7; Johnstone, 1; Pollokshaws, 4; Greenock, 2; Hawick, 1;
 Galashiels, 1. All were treated in hospital excepting 5, viz.:—
 Kirkcaldy, 1; Dundee, 1; Glasgow, 2; and Govan, 1.

Typhus in Districts of Counties.—Calder District of Edinburgh,
 1; Suburban District of Edinburgh, 1; Skye District of Inverness,
 4; Lewis District of Ross and Cromarty, 15. The cases in Skye
 District of Inverness and 11 of the cases in Lewis District of Ross
 and Cromarty were not treated in hospital.

Typhus in Burghs.—Edinburgh, 10; Leith, 1; Dundee, 9;
 Glasgow, 36; Govan, 4; Wishaw, 1; Paisley, 3; Greenock, 6;
 Port-Glasgow, 1. All were treated in hospital excepting 1 case in
 Govan.

Diphtheria, Scarlet Fever, and Enteric Fever.—In the Appendix App. (B.)
 will be found a Table showing the number of cases of each of those No. 18.
 diseases notified and the percentage treated in hospital in each of
 the Counties (Landward) in 1902.

We have tabulated the same facts regarding the Burghs and
 arranged them in three groups. I. The Principal Towns, being
 the towns with a population of over 30,000 (Census 1901), viz.:—
 Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock,
 Coatbridge, Kilmarnock, Kirkcaldy, Perth, Hamilton, and Mother-
 well, and the three suburban Burghs of Glasgow. II. The Large
 Towns, viz.:—all Burghs not included in preceding having a
 population over 10,000 (Census 1901). III. All Burghs not App. (B.)
 included in preceding. These Tables will be found in the Appendix. No. 18.

The following Table shows summarily the number of cases
 of each of these diseases notified per 10,000 of the estimated
 population and the percentages treated in hospital by the Local
 Authorities in 1902 in each of these groups:—

Public Health.

	Case-Rate per 10,000 of Estimated Population.			Percentage treated in Hospital.		
	Diphtheria.	Scarlet Fever.	Enteric Fever.	Diphtheria.	Scarlet Fever.	Enteric Fever.
Counties (Landward), . . .	8·03	34·88	7·37	26	51	49
Principal Towns,	8·49	32·18	7·36	61	77	82
Large Towns,	11·06	38·69	9·63	22	53	65
Burghs under 10,000, . . .	9·74	37·86	7·32	21	49	48

App. (B.)
Nos. 19 and 20.

We have compiled from the Returns of Sickness and Mortality made annually at our request by Medical Officers of Health a Table for the year 1902, showing for each Landward and Burghal area (1) population, (2) acreage, (3) number of births, (4) number of deaths (*a*) within certain age-periods, (*b*) from certain causes, under five years and five years and upwards; also a further Table showing (1) number of persons per acre, (2) birth-rate per 1000 of population, (3) deaths under one year per 1000 births, and (4) death-rates per 1000 from certain causes. The Tables are printed in the Appendix.

As 1902 was the year after the Census, we have taken the average number of births and deaths during the three years 1900-02 inclusive, and have ascertained the average birth-rates and death-rates in Landward and Burghal areas respectively during that period, based upon the Census figures, which show the population at the middle of the period.

The average birth-rates are shown in the following Table:—

COUNTIES.	Average Birth-Rate per 1000 of Population. (Years 1900-02.)		COUNTIES.	Average Birth-Rate per 1000 of Population. (Years 1900-02.)	
	Landward.	Burghal.		Landward.	Burghal.
Aberdeen,	26·7	31·8	Kinross,	26·6	24·3
Argyll,	19·8	23·8	Kirkcudbright, . . .	21·1	24·3
Ayr,	32·7	30·8	Lanark,	38·0	33·6
Banff,	28·2	29·3	Linlithgow,	36·3	36·9
Berwick,	20·5	23·8	Nairn,	21·0	23·6
Bute,	16·3	22·7	Orkney,	19·5	18·3
Caithness,	23·0	29·0	Peebles,	21·4	19·7
Clackmannan,	28·1	25·1	Perth,	21·8	23·0
Dumbarton,	29·0	33·7	Renfrew,	25·0	32·0
Dumfries,	24·4	25·1	Ross & Cromarty, . .	23·7	20·5
Edinburgh,	30·2	26·5	Roxburgh,	19·4	20·4
Elgin,	25·2	28·4	Selkirk,	19·5	20·3
Fife,	29·3	27·8	Stirling,	34·3	31·7
Forfar,	24·5	27·3	Sutherland,	20·9	12·8
Haddington,	25·6	26·8	Wigtown,	25·2	24·3
Inverness,	21·1	26·9	Zetland,	20·1	21·7
Kincardine,	25·3	23·5	All Scotland, . . .	28·3	30·3

It will thus be seen that the average birth-rate in Scotland (Landward) during the last three years was 28·3, and in Scotland (Burghal) 30·3 per 1000 of their respective populations. Public Health.

The average birth-rate was higher in the Burghal than in the Landward areas of all the Counties excepting in Ayr, Clackmannan, Edinburgh, Fife, Kincardine, Kinross, Lanark, Orkney, Peebles, Ross and Cromarty, Stirling, Sutherland, and Wigtown.

The average death-rates are shown in the following Table:—

COUNTIES.	Average Death-Rate per 1000 of Population. (Years 1900-02.)		COUNTIES.	Average Death-Rate per 1000 of Population. (Years 1900-02.)	
	Land-ward.	Burghal.		Land-ward.	Burghal.
Aberdeen, . . .	13·0	17·8	Kinross, . . .	18·2	13·1
Argyll, . . .	15·5	17·2	Kirkcudbright, . . .	14·0	18·1
Ayr, . . .	15·2	17·3	Lanark, . . .	17·1	19·9
Banff, . . .	14·3	17·2	Linlithgow, . . .	15·4	16·7
Berwick, . . .	14·3	17·5	Nairn, . . .	14·6	15·6
Bute, . . .	15·5	20·1	Orkney, . . .	15·1	17·5
Caithness, . . .	16·4	20·9	Peebles, . . .	12·9	14·8
Clackmannan, . . .	14·1	15·3	Perth, . . .	14·5	18·0
Dumbarton, . . .	15·2	16·7	Renfrew, . . .	12·8	18·9
Dumfries, . . .	15·9	17·9	Ross & Cromarty, . . .	17·3	15·8
Edinburgh, . . .	15·2	16·9	Roxburgh, . . .	13·8	16·2
Elgin, . . .	14·8	17·9	Selkirk, . . .	11·3	14·3
Fife, . . .	15·7	15·3	Stirling, . . .	16·2	16·5
Forfar, . . .	12·2	19·6	Sutherland, . . .	17·4	16·0
Haddington, . . .	14·2	16·0	Wigtown, . . .	15·0	21·4
Inverness, . . .	16·2	20·5	Zetland, . . .	17·0	18·2
Kincardine, . . .	12·9	17·2	All Scotland, .	15·3	18·4

The average death-rate in Scotland (Landward) was thus 15·3, and in Scotland (Burghal) 18·4 per 1000 of their respective populations.

The average death-rate was higher in the Burghal than in the Landward areas of all the Counties excepting in Fife, Kinross, Ross and Cromarty, and Sutherland.

The average number of deaths exceeded that of births in Sutherland (Burghal).

The infantile death-rates during the year 1902, founded upon the proportion of deaths under one year of age to the total births, in the Landward and Burghal areas of each County, are shown in the following Table:—

Public Health.

COUNTIES.	Death-Rate under One Year per 1000 Born.		COUNTIES.	Death-Rate under One Year per 1000 Born.	
	Landward.	Burghal.		Landward.	Burghal.
Aberdeen, . . .	81·8	135·2	Kinross, . . .	87·0	63·8
Argyll, . . .	41·7	100·2	Kirkcudbright, . . .	45·7	82·7
Ayr, . . .	94·7	102·4	Lanark, . . .	109·5	127·0
Banff, . . .	100·8	134·0	Linlithgow, . . .	122·0	115·8
Berwick, . . .	104·9	79·5	Nairn, . . .	102·0	172·7
Bute, . . .	56·5	117·2	Orkney, . . .	75·7	70·8
Caithness, . . .	70·9	174·5	Peebles, . . .	123·3	74·8
Clackmannan, . . .	102·1	65·4	Perth, . . .	69·2	111·5
Dumbarton, . . .	106·3	115·5	Renfrew, . . .	93·0	116·4
Dumfries, . . .	103·1	114·0	Ross & Cromarty, . . .	92·5	136·7
Edinburgh, . . .	93·9	119·8	Roxburgh, . . .	89·4	89·5
Elgin, . . .	87·9	118·3	Selkirk, . . .	123·5	113·2
Fife, . . .	95·9	99·5	Stirling, . . .	92·4	107·1
Forfar, . . .	74·6	139·6	Sutherland, . . .	82·1	166·7
Haddington, . . .	103·4	124·5	Wigtown, . . .	84·4	112·0
Inverness, . . .	81·5	139·1	Zetland, . . .	70·4	109·8
Kincardine, . . .	93·3	61·8	All Scotland, .	94·1	122·1

The infantile death-rate in Scotland (Landward) was 94·1; in Scotland (Burghal) 122·1 per 1000 born.

The infantile death-rate was higher in the Burghal than in the Landward areas of all Counties except Berwick, Clackmannan, Kincardine, Kinross, Linlithgow, Orkney, Peebles, and Selkirk.

Of the total children born in Scotland in 1902, 67·2 per cent. were born under the conditions of life in Burghal areas, and 32·8 per cent. under those in Landward areas.

The following Table shows the average birth-rates and death-rates of the three years 1900, 1901, and 1902, calculated upon the Census population, and the infantile death-rates in the year 1902 in the Counties (Landward) as a whole, and in the three groups of Burghs described above:—

	Average Birth-Rate per 1000 of Population.	Average Death-Rate per 1000 of Population.	Death-Rate under One Year per 1000 Born.
Counties (Landward), . . .	28·3	15·3	94·1
Principal Towns, . . .	31·0	19·1	127·0
Large Towns, . . .	30·7	17·5	116·8
Burghs under 10,000, . . .	27·4	16·7	106·7
All Scotland, . . .	29·6	17·3	112·9

Appointment of Medical Officers and Sanitary Inspectors.

During the year there were intimated to us the appointments of 19 Medical Officers and of 14 Sanitary Inspectors, these appointments being rendered necessary by vacancies through the resignation, death, &c., of the previous officers. After being satisfied as to the qualifications of the officers so appointed, we sanctioned, in terms of the Sanitary Officers' Grant Regulations,

the salaries paid to these officers, viz.:—£748 8s. to the Medical Officers, and £557 10s. to the Sanitary Inspectors, a total of £1305 18s. The salaries of the previous officers amounted to £1555 17s., being £249 19s. more than the sum paid to their successors. This difference is principally accounted for by the fact that the Counties of Caithness and Sutherland have appointed a joint Medical Officer of Health. A Table showing these appointments will be found in the Appendix.

Public Health.
App. (B.)
No. 24.

In terms of the Regulations for the distribution of the Sanitary Officers' Grant, no alteration of the *approved* salary of a Medical Officer or Sanitary Inspector can be made without our consent. During the year we consented to the alteration in the salaries of 19 Medical Officers of Health and of 53 Sanitary Inspectors. The total increase in the case of the Medical Officers of Health amounted to £412 16s., and in the case of the Sanitary Inspectors to £717 3s. 5d., a total of £1129 19s. 5d. A Table showing these increases is printed in the Appendix.

Increases of
Salaries of
Sanitary
Officers.
App. (B.)
No. 25.

During the year we recommended the Secretary for Scotland, in terms of the Regulations for the distribution of the Sanitary Officers' Grant, to approve the salaries to be paid in the case of the appointment of 5 new Sanitary Inspectors. The salaries recommended and subsequently approved amounted to £238. In addition, a sum of 10s. per week to be paid to one of the Sanitary Inspectors for work performed during the fishing season only was approved. A Table showing these appointments will be found in the Appendix.

Salaries
recommended
for approval of
Secretary for
Scotland.
App. (B.)
No. 26.

These three Tables show that during the year a total increase of £1118 0s. 5d. was approved to rank as a claim against the Sanitary Officers' Grant.

We again examined the claims by Local Authorities to participate in the contribution of £15,000 from the Local Taxation Account, in aid of the cost of Medical Officers and Sanitary Inspectors. We print in the Appendix a detailed account of the distribution for last year, showing the Local Authorities participating, and the amount received by each Local Authority. The Grant was distributed at the rate of 7s. 3-8992d. per £ of approved and vouched expenditure. The gradual and in early years rapid depreciation of the rate of distribution of the Sanitary Officers' Grant as shown in the following Table is noteworthy:—

Local Taxation

Burghs.
App. (B.)
No. 23.

Public Health.

Sanitary
Officers' Grant
and Regula-
tions for Sani-
tary Officers.

On 20th January 1903 we issued to County Clerks and Town Clerks copies of the new Regulations framed by the Secretary for Scotland for the distribution of the contribution from the Local Taxation Account towards the cost of Medical Officers and Sanitary Inspectors.

Under these revised Regulations, there now rank against the Grant, in addition to the salaries and travelling expenses allowed under the previous Regulations, "the reasonable travelling expenses of any Medical Officer or Sanitary Inspector of a District of a County who shall in the opinion of the Local Government Board devote his whole time to the duties of his office." During the year we took steps to ascertain which officers devoted their whole time to their duties.

It is further provided by the revised Regulations, in addition to previous requirements, that, in order to entitle a County Council, District Committee, or other Local Authority to participate in the Grant, the arrangements made for carrying out the provisions of the Public Health and Local Government Acts, as regards the "duties and respective relations to each other" of the officers, shall be approved by the Secretary for Scotland, upon our recommendation. We stated in our Circular that this condition would be held to have been fulfilled in all those cases in which Regulations for the duties of the officers had been approved by us in terms of Section 15 of the Public Health (Scotland) Act, 1897, and we added that, where such Regulations had not been approved, no time should be lost in submitting suitable Regulations to us, so that they might be approved before 15th May 1903. A copy of the Circulars of 20th January 1903 and relative revised Regulations will be found in the Appendix.

App. (A.)
Nos. 12 & 13.

As a result of the above intimation, the most of those Local Authorities who had not obtained our approval under Section 15 of the Public Health (Scotland) Act, 1897, to Regulations for regulating the duties of their Sanitary Officers submitted such Regulations for our consideration, and during the year we have approved Regulations in the districts of 145 Local Authorities. A list containing the names of these Local Authorities will be found in the Appendix. Prior to 15th May, the Local Authorities that had not submitted Regulations were reminded of the terms of the Circular of 20th January, and in the beginning of October, when the Claims for participation in the Sanitary Officers' Grant are received, we intimated to several Local Authorities that they would not participate in the said Grant in respect of the salaries of their Sanitary Officers, as Regulations under Section 15 had not been forwarded for the Board's approval. These Local Authorities were as follows:—Aird and South Uist Districts of Inverness-shire; Black Isle District of Ross and Cromarty; Mainland and North Isles Districts of Zetland; and the Burghs of Barrhead, Callander, Cromarty, Dalkeith, Earlsferry, Elie, Fort-William, Gourrock, Lasswade, Laurencekirk, Linlithgow, Loanhead, New Galloway, Queensferry, Sanquhar, Whitburn. In addition there were 20 Local Authorities that had submitted Regulations which had been returned for amendment. In these cases 10 days were allowed within which to submit Regulations such as we were able to

Regulations for
Sanitary
Officers.
Section 15.
App. (B.)
No. 27.

approve, but as regards the Burghs of Armadale, Clydebank, and Inverness, the Regulations were not forwarded within that period, and as a consequence the Grant was also disallowed in these cases. Public Health.

With a few exceptions, all the Local Authorities in Scotland under the Public Health (Scotland) Act, 1897, have adopted and have had approved by us Regulations under Section 15 of that Act for regulating the duties of Medical Officers of Health and Sanitary Inspectors more or less on the lines of our Draft Regulations. The Local Authorities who at the end of 1903 had not had Regulations approved are:—Aird, Skye, Harris, North Uist, and South Uist Districts of Inverness; the Burghs of Armadale, Callander, Clydebank, Earlsferry, Elie, Fort-William, Inverness, Lasswade, and Laurencekirk.

During the year one form of periodical returns of Births and Deaths was approved by us. Registrars' Returns, Section 15.

We append a list of the Local Authorities who have adopted such returns under Section 15. App. (B.) No. 28.

As empowered by Section 32 (1) of the Act,* we confirmed an Order declaring the business of a glue manufacturer to be an offensive business within the meaning of the Section. Proceedings under Section 32.

We have not been called upon to exercise our powers under Section 32 (2) of the Act. As regards the case referred to in our last Report, Byelaws were subsequently adopted by the Local Authority and confirmed by us, and the Local Authority thereafter gave their sanction to the establishment of the business. Offensive Trades. Appeals to Board.

We received an appeal under Section 33 (7) of the Act against the resolution of a Local Authority refusing to grant a licence for a slaughter-house. We dismissed the appeal and determined that the granting of the licence was properly refused by the Local Authority. Slaughter-house Licence. Appeal to Board.

In terms of Section 122 (1) of the Act, copies of resolutions as to the formation of Special Drainage Districts were forwarded to us by nineteen Local Authorities. In thirteen cases the Local Authorities resolved to form districts, in three cases to enlarge existing districts, in two cases to limit and enlarge existing districts, and in one case the Local Authority resolved to combine Special Districts. A Table including the names of the Special Drainage Districts is printed in the Appendix. Special Drainage Districts. App. (B.) No. 22.

In terms of Section 131 (1) of the Act, copies of resolutions as to the formation of Special Water Supply Districts were forwarded to us by twenty-eight Local Authorities. In fourteen cases the Local Authorities resolved to form districts, in six cases to enlarge existing districts, in three cases to limit and enlarge an existing district; in one case the Local Authority declined to form a Special District, and in another case the Local Authority declined to limit the boundaries of a Special District. In one case the Local Authority resolved to combine and enlarge two Special Districts, in one case to combine two Special Districts, and in another case to dissolve a Special District, a new one being formed. A Table including the names of the Special Water Supply Districts is printed in the Appendix. Special Water Supply Districts. App. (B.) No. 22.

* Throughout this portion of our Report, the "Act" referred to is the Public Health (Scotland) Act, 1897. When any other Act is referred to its title is given.

Public Health. In terms of Section 137 of the Act, we approved (1) of the Special Sewer Assessment and Special Water Assessment in the Collieston Special Drainage and Water Supply District in the Ellon District of the County of Aberdeen being increased for the current year to 3s. 3d. per £, and (2) (a) of the Special Water Assessment in that part of Bellsquarry Special Water Supply District outwith the Special Drainage District in the Calder District of the County of Edinburgh being increased for the current year to 3s. 6d. per £, and (b) of the Special Water Assessment in that part of the said Special Water District within the said Special Drainage District being increased for the current year to 2s. 6d. per £, the Special Sewer Assessment being 1s. per £.

Increasing limit of Assessment in Special Districts. In one case we gave our sanction in terms of Section 130 of the Act to two Local Authorities combining together for the purpose of executing Water Supply Works.

Local Authorities Combining for Water Supply Works. We have received during the year eighty-one applications by Local Authorities for our recommendation of loans from the Public Works Loan Board, the aggregate amount being £263,124, of which we were able to recommend £256,519. Of the applications recommended, the sum of £103,388 was for the execution of water works, £112,402 for drainage works, £37,205 for the erection of hospitals, £524 for public slaughter-houses, and £3000 for a refuse destructor.

Loans from Public Works Loan Board. We print in the Appendix a Table showing in detail the applications made, and the manner in which they have been dealt with by us.

App. (B.)
No. 15. Since the passing of the Public Health (Scotland) Amendment Act, 1875 (11th August 1875), we have received 882 applications from Local Authorities for our recommendation of loans. The aggregate amount of these proposed loans is £2,823,949 1s. 3d. The total amount of loans recommended by us during the above period is £2,739,521 11s. 3d.; the amount which we have declined to recommend during the same period being thus £84,427 10s. Of the loans recommended by us, £1,696,836 was for the execution of water works, £596,191 11s. 3d. for drainage works, £52,712 for water and drainage combined, £352,789 for the erection of hospitals, £28,094 for public baths, £9249 for public slaughter-houses, £650 for public conveniences, and £3000 for a refuse destructor.

Common Lodging-houses. As empowered by Section 89 of the Act, we have approved in seven cases of the sum payable per night, according to which it is ascertained whether a house, or part thereof, is a common lodging-house, being raised from fourpence to sixpence.

App. (B.)
No. 38. A Table is printed in the Appendix giving a complete list of the Local Authorities who have since the passing of the Act obtained such approval.

Enquiries as to Drainage Outfalls. In connection with applications by Local Authorities to the Board of Trade, under Section 119 of the Act, we continue to be consulted by that Department as to whether, from a sanitary point of view, we have any objections to their consent being given to the discharge of drainage below low-water mark. These applications necessitate the appointment of an Engineering Commissioner to visit, consider any objections lodged with us or with the Local Authority, and report.

During the year there have been eight such enquiries in connection with proposed outfall sewers to be constructed by the

Local Authorities of the Burghs of Culross, Lossiemouth, Nairn, Oban, and Pittenweem, and of the Banff District of Banff at Boyndie, the County of Elgin at Hopeman, and the Inverness District of Inverness at Campbelltown. In the last-named case we intimated that, with great reluctance, we abstained from raising any further objections on sanitary grounds provided that the outfall was extended as far as the end of the pier (at Campbelltown). We also reserved to ourselves the right to require an extension of the outfall should a nuisance occur. In the other cases we saw no reason to object on sanitary grounds, but it is now our practice to intimate to the Local Authorities that our decision in such cases is without prejudice to our right to take action if any question should hereafter arise as to nuisance or pollution of the foreshore.

As the confirming authority, we have a duty to revise byelaws and regulations submitted to us, and, as applications for confirmation or approval are numerous and the byelaws, etc., refer to many different subjects (in some cases involving technical considerations of some intricacy), and all require careful and laborious examination in detail, we continue at times to inform Local Authorities that, while no unnecessary delay would take place, we must deal with business of this nature with deliberation, and that, from the general pressure on ourselves and our staff, they must be prepared for some delay.

We confirmed during the year 61 series of byelaws made by Local Authorities under the Public Health (Scotland) Act, 1897. The subjects of the byelaws and the number of series made were as follows:—

Offensive Trades,	30 series.
Pigstyes,	9 "
Houses Let in Lodgings,	7 "
Tents and Vans,	7 "
Common Lodging-houses,	7 "
Buildings,	1 "

A Table giving the names of the Local Authorities by whom the respective series of byelaws were made is given in the Appendix. We also append a similar Table showing a complete record of the byelaws confirmed since the Public Health (Scotland) Act, 1897, came into operation.

By Section 318 of the Burgh Police (Scotland) Act, 1892, the duty is laid upon us of confirming byelaws made under that Act relating to sanitary matters. Fourteen applications were made to us during the year ending 31st December 1903. Six of these dealt with slaughter-houses, six with paving of private courts, one with cleansing of private courts, and one with water supply. These we confirmed in so far as they related to sanitary matters.

A Table is printed in the Appendix showing the names of the Local Authorities making the above applications.

In terms of Article II. of the Dairies, Cowsheds, and Milkshops Order, 1899, copy of which will be found on pages 77 and 78 of our Book of Instructions, Forms, &c., we confirmed regulations for the Local Authorities of the Burghs of Aberlour, Ballater, Bo'ness Bridge of Allan, Coatbridge, Dunbar, Huntly, Kingussie, Kirkwall,

Public Health

Byelaws and Regulations.

Byelaws under the Public Health (Scotland) Act, 1897.

App. (B.) Nos. 30 and 31.

Byelaws under the Burgh Police (Scotland) Act 1892.

App. (B.) No. 32.

Dairy Regulations.

Public Health. Macduff, and Newport; also for the Local Authorities of Kirkcaldy District of Fife, Eastern District of Haddington, Inverness District of Inverness, and Lower District of Wigtown.

App. (B.) No. 29. A list is printed in the Appendix showing the names of Local Authorities who have had regulations confirmed by us under Article II. of the Dairies Order of 1899.

Infectious Disease (Notification) Act, 1889. The power to extend, with our approval, the Infectious Disease (Notification) Act to diseases not specified in the Act was taken advantage of by one Local Authority, who added whooping-cough to the statutory list. In one case the addition of measles was revoked, and in another case the addition of both measles and whooping-cough was revoked.

Administration of Sale of Food and Drugs Acts. The administration of the Sale of Food and Drugs Acts continues to receive our attention.

Defaulting Local Authorities. During the year we have had occasion to communicate with some Local Authorities as to their failure to properly apply these Acts within their respective jurisdictions by neglecting to have samples taken and submitted for analysis. The result of our communications was satisfactory, and samples were duly taken. It is our intention during 1904 to cause a systematic examination of the various quarterly returns to be made with a view to ascertaining whether sampling is being properly carried out, and whether sufficient samples are being taken in proportion to the number found to be adulterated. In this connection we have in view the following opinion of the Select Committee on Food Products Adulteration which reported to the House of Commons in 1896, viz. :—

“It appears to your Committee that a Local Authority would do well to increase the number of samples taken on their behalf from time to time until the number of adulterated samples found in those taken falls below a proportion which may be regarded as not unsatisfactory.”

Joint action between Counties and Burghs. The Local Authority of the Burgh of Wishaw intimated to us during the year that arrangements had been made whereby the County Council and their officers would administer the Sale of Food and Drugs Acts in the burgh. No agreement has yet been come to between the County Council of Banff and the various burghs therein referred to in our last Report.

Appointment of Public Analysts. During the year we gave our approval, in terms of Section 10 of the Sale of Food and Drugs Act, 1875, to the appointment of Public Analysts in one county and in twelve burghs. A Table showing the names of these counties and burghs, the names of the Analysts, and the date of our approval of the appointment, during the year 1903, will be found in the Appendix. We also print in the Appendix a Table showing the names of the Analysts for the various counties and burghs in Scotland.

App. (B.) No. 33.
App. (B.) No. 34.

During the year we ascertained that certain Local Authorities cause test samples of food and drugs to be taken informally for analysis by the Public Analyst with the view, in cases where such samples are found to be adulterated, of afterwards taking samples with the formalities required by the Act. It seemed to us that these samples represented an important part of the work done

under the Sale of Food and Drugs Acts, and accordingly we issued Public Health. to Local Authorities on 30th November a Form of Return in which such test samples could be entered. A copy of the Return App. (A.) No. 20. and relative Circular will be found in the Appendix.

We also print in the Appendix copies of the Board of Agriculture's Circulars, dated 13th July 1903 and 17th August 1903, App. (A.) No. 19. dealing respectively with the collection and retention of samples of butter, and with the practicability of making a satisfactory analysis of milk when sour.

During the year an Analyst wrote to us referring to our Circular of 13th December 1901 (*see* page lix. of our Report for 1901), and complaining that certain information had been withheld from him by the sampling officers. On enquiry we found that said information was of no value to the Analyst in conducting the analysis, and we pointed out that the object of the second of the Instructions suggested by us in the aforesaid Circular was to secure as far as possible that Analysts' certificates should not be vitiated through want of information. Whether such information be furnished or not, it is the duty of the Analyst, in regard to every sample submitted to him, to make such tests as will enable him to give the certificate required by the Statute, and to support such certificate, if need should arise, by oral evidence in court.

In one case complaint was made as to the Analyst's delay in sending certificates of analysis of samples submitted to him. On enquiry it appeared to us that some delay might be due to the fact that the certificates were sent to the sampling officers. While this was in accordance with Section 13 of the Sale of Food and Drugs Act, 1875, we suggested that it was for consideration whether it might not be advisable to arrange that the certificates be sent direct to the Clerk or otherwise so as to expedite the procedure. Delay in forwarding Certificates of Analysis.

The Association of County Councils in Scotland, through their Secretary, represented to us that the Sale of Food and Drugs Acts should be amended so as to enable Local Authorities to make bacteriological examination of ice-cream sold or exposed for sale in ice-cream shops. It was explained in support of the representation that, although a chemical examination of certain samples recently taken had indicated that great impurities existed, the Analyst was not prepared to say, without bacteriological examination, whether the ice-cream in question was injurious as food. In reply, we stated that in our opinion, as at present advised, an extension of the Sale of Food and Drugs Acts to embrace the bacteriological examination of articles of food was not advisable. We pointed out that the primary object of the Sale of Food and Drugs Acts is to secure genuineness, and that these Acts do not take cognisance of questions of injury to health; the object of a bacteriological examination on the other hand is to ascertain *wholesomeness*. These two are thus very indirectly inter-related, and, looking also to the radical difference between the processes of bacteriological examination and chemical analysis, we doubted the expediency of associating them. Bacteriological Examination of Ice-cream.

It appeared to us that the question whether ice-cream or any other article of food is injurious to man is one that comes within

Public Health. the scope of the Public Health (Scotland) Act, 1897, rather than within that of the Sale of Food and Drugs Acts. Section 43 of the former Act empowers the Medical Officer or Sanitary Inspector to inspect and examine any article of food with the view of ascertaining if it be "diseased or unsound or unfit for the food of man." A bacteriological examination does not seem to be excluded by the terms of the Section, and we are of opinion that it would not be advisable to apply for legislation in the direction indicated by the Association of County Councils unless and until it is shown that Local Authorities are unable to attain the desired end under their existing powers.

Appointment in Liverpool of a Bacteriologist as an Analyst.

We had observed that the City of Liverpool Sanitary Authority carried on bacteriological examinations of "food stuffs," and on communicating with the Town Clerk of Liverpool we ascertained that the City Council of that city had appointed a bacteriologist as Analyst under the Sale of Food and Drugs Acts, in order that certificates showing bacteriological impurity might be acted upon in the same way as the chemical analyst's certificates showing chemical impurity. The Town Clerk also informed us that no prosecutions had been carried out to their completion on a bacteriological certificate alone, owing to the circumstance that the investigations had continued longer than the statutory period required by the Act, but the Town Clerk added that the bacteriologist had many times been called as a witness in cases of adulteration, *e.g.* milk with preservatives, also other food stuffs with preservatives such as boracic acid, salicylic acid, and so forth.

In forwarding the above further information to the Secretary of the Association of County Councils we stated that it appeared to us that the course followed in Liverpool suggested a means whereby the object aimed at by the Association might be attained without further legislation. We added, however, that, while we were not prepared to say that a prosecution under the Sale of Food and Drugs Acts depending on a bacteriological examination would not succeed, we remained of opinion that the sale of articles of food that could be shown to be unsound or unwholesome is more appropriately dealt with under the Public Health Act than under the Sale of Food and Drugs Acts.

Public Analysts' Quarterly Reports. Statistics relating to samples examined. App. (B.) Nos. 35 and 36.

We have again collected and tabulated the Public Analysts' Quarterly Reports transmitted to us by Local Authorities in terms of Section 19 of the Sale of Food and Drugs Act, 1875. The reports show that during the year ended 30th September 1903 the number of samples examined by public analysts on behalf of Local Authorities was 6644, and on behalf of private persons 196. Of the former, 597, or 9·0 per cent., and of the latter, 21, or 10·7 per cent., were found to be adulterated.

The following Table shows the number of samples examined on behalf of the Local Authorities, and the number and percentage of cases in which adulteration was reported :—

[TABLE.]

Articles.	Number of Samples.		Percentage Adulterated.
	Examined.	Found Adulterated.	
Milk,	2,816	368*	13·1
Butter,	885	56	6·3

Beer,	74	1	1·4
Spirits,	646	59	9·1
Drugs,	284	37	13·0
Other articles,	683	50	7·3
Totals,	6,644	597	9·0

* One sample reported as "doubtful" is included here.

Prosecutions were instituted in respect of 325 samples—283 of them being on account of adulteration, and 42 on account of contravention of the statutory provisions relating to the labelling of margarine, margarine-cheese, &c., sold or exposed for sale. In 238 cases convictions were obtained; in 49 the charges were withdrawn; and in 38 there was no conviction.

Penalties were imposed in 231 out of the 238 convictions; in 7 the vendors were admonished. The penalties amounted to £630 6s. 6d., and, in addition, the offenders were found liable in costs amounting to £19—the penalties and costs together being £649 6s. 6d., or, on an average, £2 14s. 7d. for each conviction. In the 49 cases which were withdrawn, costs were allowed against the offenders to the amount of £50 11s. 0d., an average of £1 0s. 8d. per case. The total costs charged to the Local Authorities in the 325 prosecutions amounted to £214 10s. 2d., or an average of 13s. 2d. per prosecution.

The following Table shows for each article the number of cases in which prosecutions were instituted and the manner in which they were disposed of, together with the penalties imposed and costs charged on (a) the offender and (b) the Local Authority:—

Public Health.

Articles submitted for Analysis.	Number of Cases in which Prosecutions were instituted.	Number of Convictions.	Number of Cases withdrawn.	Number of Cases in which no Conviction was obtained.	Number of Penalties imposed.	Amount of Penalty imposed.	Amount of Costs.

* In one of these cases proceedings were taken, not on account of adulteration, but because the vessel containing the milk was unlabelled.

† In these cases proceedings were taken, not on account of adulteration, but because the article had not been duly labelled.

Milk.—Of the 2816 samples of milk examined on behalf of Local Authorities, 368, or 13·1 per cent., were reported to be adulterated. The common forms of adulteration were deficiency of fat and addition of water. Sometimes, however, the analysis showed that skim milk had been added to new milk, or that fat had been extracted and water also added. Several cases were reported to be deficient in non-fatty solids. There was a wide range in the extent of adulteration. The deficiency in fat ranged from "slightly low in fat" to 74 per cent. deficient in fat. The extent of water adulteration varied from 1 per cent. to 28 per cent. One sample was found to contain 36·33 per cent. added skim milk, and one was deficient in solids other than fat to the extent of 20 per cent.

Prosecutions were instituted in respect of 192 of the 368 samples reported to be adulterated. A prosecution in 1 other case was instituted because of a contravention of Section 11 of the Sale of Food and Drugs Act, 1899, in regard to the labelling of vessels. In 145 cases convictions were obtained, 19 were withdrawn, and in 29 there was no conviction.

Penalties were imposed in respect of 141 of the 145 convictions to the amount of £382 19s., with costs to the amount of £9 3s. In 1 case a penalty of £24 was imposed in respect of 4 samples taken from a farmer in course of delivery; in another case a penalty of £15 was imposed in respect of 4 samples; and in 17 cases penalties of £5 to £8 were imposed. The average penalty was £2 12s. 10d. per conviction.

In many of the cases withdrawn, the offenders were found liable Public Health.
in costs, the total amounting to £11 18s.

The costs charged on the Local Authorities amounted to £139 0s. 7d.

In addition to the samples above mentioned, 189 samples were examined at the instance of private individuals. Of these, 18, or 9·5 per cent., were reported to be adulterated.

Butter.—Of the 885 samples of butter examined, 56, or 6·3 per cent., were reported to be adulterated. In a considerable proportion there was gross adulteration. No fewer than 39, or 69·6 per cent., of the adulterated samples contained more than 70 per cent. of foreign fat. Fourteen of them were reported to be wholly margarine, 10 as containing from 90 to 99 per cent. of foreign fat, and 15 from 80 to 90 per cent. Three samples contained foreign fat in the following proportions, viz.:—69 per cent., 49 per cent., and 45 per cent. Two samples, included above as adulterated with more than 90 per cent. foreign fat, contained in addition 38 per cent. and 0·7 per cent. of boric acid respectively. Ten samples were reported against for containing added water in quantities ranging from 99 per cent. to 17·75 per cent., and 4 samples because of the presence of boric acid, 1 of which also contained added water.

Prosecutions were instituted in respect of 36 of the 56 samples reported to be adulterated. In 28 cases convictions were obtained, 4 were withdrawn, and in the remaining 4 cases there was no conviction.

Penalties were imposed in respect of the 28 convictions to the amount of £83 0s. 6d. In 1 case the penalty was £6 11s. 6d., in 3 cases £5, in 1 case £4 18s., and in 4 cases £3 18s. The average penalty was £2 19s. 4d. per conviction.

In the 4 cases withdrawn the offenders were found liable in costs, the total amounting to £7 6s. The costs charged on the Local Authorities amounted to £15 7s. 4d.

In addition to the samples above mentioned, 2 samples were examined at the instance of private individuals. Of these, 1, or 50 per cent., was reported to be adulterated.

Cheese.—Of the 161 samples of cheese examined, 3, or 1·9 per cent., were reported to be adulterated. One of the samples was almost entirely composed of foreign fat; 2 samples contained respectively 18 per cent. and 11 per cent. of foreign fat.

A prosecution was instituted in respect of 1 of the 3 samples reported to be adulterated, but was withdrawn, the offender being found liable in costs to the amount of £8. No costs were charged on the Local Authority.

Margarine.—Of the 163 samples of margarine examined, 6, or 3·7 per cent., were reported to be adulterated. Three were reported against on the ground that they contained boric acid in the following proportions, viz.:—0·9 per cent., 27 per cent., and 56 per cent.; and 3 on the ground that they contained butter fat in the following proportions, viz.:—11 per cent., 13 per cent., and 90 per cent.

Forty-one prosecutions were instituted under the Margarine Act of 1887, the articles not having been duly labelled. In 32 cases convictions were obtained, 8 were withdrawn, and in 1 there was no conviction.

Penalties were imposed in respect of 30 of the 32 convictions to the amount of £73 4s. 6d., with costs to the amount of £2 10s.; in 2 cases the penalty was £4 18s., in 3 cases £4, and in 9 cases £3. The average penalty was £2 5s. 9d. per conviction. In the 8 cases withdrawn, the offenders were found liable in costs to the amount of £9 18s. The costs charged on Local Authorities amounted to £36 2s. 9d.

Coffee.—Of the 164 samples of coffee examined, 6, or 3·7 per cent., were reported to be adulterated. Chicory was the adulterant in 5 cases in quantities varying from 5 per cent. to 70 per cent.; in the remaining case the adulterant consisted of starchy matter having the appearance of bread crumbs or other substance of like nature.

In 3 instances samples of coffee were reported by the Analyst to be adulterated on the ground that they contained a percentage of chicory, but as the samples were protected by label they have been included in the foregoing figures as genuine.

Prosecutions were instituted in respect of 3 of the 6 samples reported to be adulterated. In 2 cases convictions were obtained, and in the remaining case there was no conviction.

Penalties were imposed in respect of the 2 convictions to the amount of £2 5s. The average penalty was £1 2s. 6d. per conviction. The costs charged on Local Authorities amounted to £1 8s.

Sugar.—Of the 117 samples of sugar examined, 1, or ·9 per cent., was reported to be adulterated on the ground that it contained moisture 5·16 per cent., and mineral matter 1·70 per cent.

No prosecution was instituted.

Confectionery and Jam.—Of the 153 samples of confectionery and jams examined, 3, or 2·0 per cent., were reported to be adulterated—jam being the adulterated article in each case. In 2 cases the adulterant was glucose in the following proportions, viz.:—10 per cent. and 13·57 per cent. In the remaining case the adulterant was salicylic acid, and was present to the extent of 1·2 grains per pint.

A prosecution was instituted in respect of 1 of the 3 samples reported to be adulterated, but the case was withdrawn, the offender being found liable in costs to the amount of £1 10s. No costs were charged on the Local Authority.

Pepper.—Of the 224 samples of pepper examined, 3, or 1·3 per cent., were reported to be adulterated. One sample contained 4 per cent. of woody fibre, 1 contained 15 per cent. of foreign starch, and 1 contained 25 per cent. of husky matter.

A prosecution was instituted in respect of 1 of the 3 samples reported to be adulterated. A conviction was obtained and a penalty of £3 imposed. No costs were charged on the Local Authority.

In addition to the samples above mentioned, 2 samples were examined at the instance of private individuals. Of these, 1, or 50 per cent., was reported to be adulterated.

Tea.—Seventy-one samples of tea were examined, and all reported to be genuine.

Oatmeal.—One hundred and eight samples of oatmeal were examined, and all reported to be genuine.

Flour.—Of the 44 samples of flour examined, 1, or 2·3 per cent., was reported to be adulterated. This was a sample of self-raising flour, which was adulterated with 5 per cent. rice starch. Public Health.

No prosecution was instituted.

Syrup.—Of the 51 samples of syrup examined, 3, or 5·9 per cent., were reported to be adulterated. Glucose was the adulterant in every case, being found present in the following proportions, viz. :—37 per cent., 57 per cent., and 77 per cent.

Prosecutions were instituted in respect of 2 of the 3 samples reported to be adulterated. In 1 case a conviction was obtained, and in the remaining case there was no conviction.

A penalty of £2 was imposed in respect of the conviction. The costs charged on the Local Authorities amounted to £1 15s. 4d.

Beer.—Of the 74 samples of beer examined, 1, or 1·4 per cent., was reported to be adulterated. This was a sample of small beer, which contained 1·2 grains of copper per gallon and also an artificial dye.

A prosecution was instituted, and the offender was admonished. No costs were charged on the Local Authority.

Spirits.—Of the 646 samples of spirits examined, 59, or 9·1 per cent., were reported to be adulterated, the greater number of which were samples of whisky containing less than the statutory limit (25 degrees under proof) of alcohol. Many of the samples reported adulterated were but slightly under the standard, while in others the adulteration was considerable—1 being 41·5 degrees under proof, or 16·5 degrees under the statutory limit. Nine samples of brandy were reported to be adulterated on the ground that they contained spirit not derived from grapes, in quantities varying from 20 per cent. to 65 per cent.

Prosecutions were instituted in respect of 27 of the 59 samples reported to be adulterated. In 23 cases convictions were obtained, and 4 cases were withdrawn.

Penalties were imposed in respect of all the convictions to the amount of £79 10s. In 2 cases the penalty was £10, in 3 cases £5, and in 1 case £4. In another case the offender was convicted and fined £3 3s., and on appeal the decision was sustained, the offenders being found liable in costs to the amount of £7 7s. The average penalty was £3 9s. 2d. per conviction.

In 2 of the 4 cases withdrawn the offenders were found liable in costs, the total amounting to £2 1s. 6d.

The costs charged on the Local Authorities amounted to £15 0s. 4d.

DRUGS.

Of the 284 samples of drugs examined, 37, or 13·0 per cent., were reported to be adulterated.

The following were analysed and found to be genuine, viz. :—One sample each of bicarbonate of soda, calcined magnesia, compound liquorice powder, glycerine, health salt, linseed liquorice and aniseed jujubes, linseed liquorice and chlorodyne jujubes, quinine and iron tonic, salicylate of soda, snuff, and tincture of opium ; 2 samples each of cod liver oil and linseed meal, 3 samples

Public Health. of castor-oil, 4 samples of Epsom salts, 5 samples of mercury ointment, 6 samples of cascara sagrada, 7 samples of quinine wine, 12 samples of carbonate of soda, and 21 samples of camphorated oil.

Cream of Tartar.—Of the 131 samples examined, 14, or 10·7 per cent., were reported to be adulterated. Ten samples were deficient in acid tartrate of potash in amounts varying from 2 per cent. to 7 per cent., 1 of which was deficient in acid tartrate to the extent of 7·0 per cent., and, further, contained 6·5 per cent. of sulphate of lime; 1 sample contained 9·5 per cent. of impurity consisting of sulphate of lime over the maximum prescribed by the British Pharmacopoeia, 1 contained 8 per cent. of impurities the nature of which was not stated, 1 contained 18 per cent. acid phosphate of lime, and 1 contained 98 per cent. tartaric acid.

Prosecutions were instituted in respect of 3 of the 14 samples reported to be adulterated. In 2 cases convictions were obtained, and in 1 case there was no conviction.

Penalties were imposed in respect of the 2 convictions to the amount of £2. The average penalty was £1 per conviction. The costs charged on the Local Authorities amounted to £2 10s.

In addition to the above-mentioned samples, 3 samples were examined at the instance of private individuals. Of these, 1, or 33·3 per cent., was reported to be adulterated.

Tartaric Acid.—Of the 31 samples of tartaric acid examined, 8, or 25·8 per cent., were reported to be adulterated. In every case the samples were deficient in tartaric acid in amounts varying from 1 per cent. to 6 per cent.

Prosecutions were instituted in respect of 2 of the 8 samples reported to be adulterated. In 1 case a conviction was obtained, and 1 was withdrawn.

A penalty of 7s. 6d. was imposed in respect of the conviction, and in the case withdrawn the offender was found liable in costs to the amount of 7s. 6d. The costs charged on Local Authorities amounted to £1 10s. 6d.

Sulphur.—Of the 16 samples of sulphur examined, 2, or 12·5 per cent., were reported to be adulterated. In 1 case precipitated sulphur was asked for, and milk of sulphur was supplied; in another case the adulterant consisted of 1·78 per cent. of mineral matter.

No prosecutions were instituted.

Lime Water.—Of the 14 samples of lime water examined, 2, or 14·3 per cent., were reported to be adulterated on the ground that they were deficient in lime to the extent of 36·98 per cent. and 46·78 per cent. respectively.

Prosecutions were instituted in respect of both of the adulterated samples, but the cases were withdrawn, the offender being found liable in costs, the total amounting to £3. No costs were charged on Local Authorities.

Gregory's Mixture.—Of the 6 samples of Gregory's Mixture examined, 3, or 50 per cent., were reported to be adulterated on account of deficiency of magnesia to the extent of 1·68 per cent., 5·0 per cent., and 6·0 per cent. respectively.

No prosecutions were instituted.

Sweet Spirits of Nitre.—Of the 5 samples of sweet spirits of Public Health. nitre examined, 4, or 80 per cent., were reported to be adulterated. Two samples were deficient in ethyl nitrate to the extent of 25 per cent. and 52 per cent. respectively, 1 was deficient in nitrous ether 3 per cent., and one evolved only 88 per cent. of the amount of gas it should have evolved.

Prosecutions were instituted in respect of 2 of the 4 samples reported to be adulterated, but the cases were afterwards withdrawn, the offenders being found liable in costs, the total amounting to £3 10s. No costs were charged on the Local Authorities.

Seidlitz Powder.—Of the 5 samples of seidlitz powder examined, 2, or 40 per cent., were reported to be adulterated. One was destitute of Rochelle salt, and contained 42 per cent. sulphate of magnesia; in the remaining case the 3 white packets were too light, 31·7 grains, and the 3 blue packets were too light, 66·8 grains.

No proceedings were instituted.

Eucalyptus Oil.—Of the 2 samples of eucalyptus oil examined, 1, or 50 per cent., was reported to be adulterated, but the sample was too small to enable the Analyst to discover the exact nature and extent of the adulteration.

No prosecution was instituted.

Phosphate of Soda.—One sample of phosphate of soda was examined, and reported to be adulterated on the ground that it contained arsenic equal to ·9 grain of arsenious acid per lb.

No prosecution was instituted.

OTHER ARTICLES.

A considerable variety of miscellaneous samples were dealt with by the Analysts.

Of the 683 samples examined, 50, or 7·3 per cent., were reported to be adulterated.

The following were submitted and found to be genuine, viz.:—

One sample each of cake, cherry vino, chocolate, claret, custard powder, egg powder, French capers, fried potato, ginger beer, grape juice, hop bitters, infant food, kola, lime juice and soda, milk food, orange fruit wine, spice, tinned salmon, wheatmeal, and zolakone; 2 samples each of cassia, pickles, raspberry wine, semolina, and split peas; 3 samples each of biscuit and preserved apricots; 4 samples each of fat, lime juice, margarine-cheese, mushroom ketchup, salt, and stout; 5 samples of treacle; 7 samples of peasemeal; 8 samples each of baking powder, corn-flour, and soda water; 10 samples each of cocoa, lemonade, and tapioca; 11 samples of oatcake; 14 samples of ice-cream; 17 samples of baking soda; 19 samples of honey; 21 samples of port wine; 28 samples of arrowroot; and 56 samples of bread.

Lard.—Of the 68 samples of lard examined, 2, or 2·9 per cent., were reported to be adulterated. One sample was adulterated with 50 per cent. cotton-seed oil, and 1 with 1 per cent. common salt.

A prosecution was instituted in respect of 1 of the 2 samples reported to be adulterated. A conviction was obtained and a penalty of £1 imposed on the offender. No costs were charged on the Local Authority.

Public Health. *Rice*.—Of the 54 samples of rice examined, 1, or 1·9 per cent., was reported to be adulterated. The adulterant was starchy matter, which was found to be present to the extent of ·3 per cent.

No prosecution was instituted.

Cinnamon.—Of the 44 samples of cinnamon examined, 2, or 4·5 per cent., were reported to be adulterated. Both samples consisted entirely of cassia.

No prosecutions were instituted.

Mustard.—Of the 44 samples of mustard examined, 8, or 18·2 per cent., were reported to be adulterated. Six were adulterated with starch in quantities varying from 4 per cent. to 20 per cent., and 2 contained 10 per cent. and 20 per cent. respectively of wheaten flour.

Prosecutions were instituted in respect of 2 of the 8 samples reported to be adulterated. In 1 case a conviction was obtained, and in 1 case there was no conviction.

A penalty of £1 was imposed in respect of the conviction. The costs charged on the Local Authority amounted to £1 15s. 4d.

Ginger.—Of the 43 samples of ginger examined, 3, or 7·0 per cent., were reported to be adulterated. The adulterant in every case was spent ginger, which was present in the following proportions, viz. :—17 per cent., 30 per cent., and 39 per cent.

Prosecutions were instituted in respect of the 3 adulterated samples, but the cases were afterwards withdrawn, the offenders being found liable in costs, the total amounting to £3. No costs were charged on the Local Authorities.

Barley.—Of the 36 samples of barley examined, 4, or 11·1 per cent., were reported to be adulterated. Whiting was the adulterant in 3 cases, being present in the following proportions, viz. :—7 per cent., 8 per cent., and 1·03 per cent.; the remaining sample contained 1·95 per cent. of a white powder of which at least 30 per cent. was fine earthy matter or clay.

Prosecutions were instituted in respect of 3 of the 4 samples reported to be adulterated, but the cases were afterwards withdrawn. In one case the offender was found liable in £5 expenses. No costs were charged on the Local Authorities.

Olive Oil.—Of the 36 samples of olive oil examined, 1, or 2·8 per cent., was reported to be adulterated on the ground that it contained 4·7 per cent. sand and mineral matter.

No prosecution was instituted.

Vinegar.—Of the 17 samples of vinegar examined, 1, or 5·9 per cent., was reported to be adulterated on the ground that it consisted of 100 per cent. acetic acid of 29 per cent. strength.

No prosecution was instituted.

Preserved Green Peas.—Of the 11 samples of preserved green peas examined, 9, or 81·8 per cent., were reported to be adulterated. The adulterant in every case was copper sulphate, which was present in quantities varying from ·42 grain to 4·64 grains per lb.

No prosecutions were instituted.

Sago.—Of the 12 samples of sago examined, 1, or 8·3 per cent., was reported to be adulterated on the ground that it was not sago but tapioca.

No prosecution was instituted.

Sherry Wine.—Of the six samples of sherry wine examined, 1, or Public Health. 16·7 per cent., was reported to be adulterated on the ground that it contained salicylic acid under 1 grain per pint.

No prosecution was instituted.

Potash Water.—Of the 4 samples of potash water examined, 2, or 50 per cent., were reported to be adulterated. Both samples were deficient in bicarbonate of potash to the extent of 12 grains per pint and 27 grains per pint respectively.

A prosecution was instituted in respect of 1 of the 2 samples reported to be adulterated, but the case was afterwards withdrawn.

No costs were charged on offender or Local Authority.

Lemon Squash.—Three samples of lemon squash were examined and all reported to be adulterated. The adulterant in every case was salicylic acid, which was found to be present in the following proportions, viz.:—3·8, 4·5, and 5·8 grains per pint.

No prosecutions were instituted.

Lime Juice Cordial.—Three samples of lime juice cordial were examined and all reported to be adulterated. The adulterant in every case was salicylic acid, which was found to be present in the following proportions, viz.:—1·3, 2·3, and 5·7 grains per pint.

No prosecutions were instituted.

Temperance Beer.—Two samples of temperance beer were examined and both reported to be adulterated on the ground that they contained 1·02 per cent. and 1·51 per cent. alcohol by weight respectively.

No prosecutions were instituted.

Unfermented Wine.—Two samples of unfermented wine were examined, both of which were reported to be adulterated. The adulterant in each case was salicylic acid, which was found to be present in the following proportions, viz.:—2·1 grains per pint and 3·2 grains per pint.

No prosecutions were instituted.

Grape Wine.—Of the 2 samples of grape wine examined, 1, or 50 per cent., was reported to be adulterated on the ground that it contained only 2 per cent. of alcohol and was not wine.

No prosecution was instituted.

Black Currant Wine.—One sample of black currant wine was examined and reported to be adulterated on the ground that it contained salicylic acid 1·8 grains per pint.

No prosecution was instituted.

Fruit Wine.—One sample of fruit wine was examined and reported to be adulterated on the ground that it contained salicylic acid 4·5 grains per pint.

No prosecution was instituted.

Ginger Champagne.—One sample of ginger champagne was examined and reported to be adulterated on the ground that it contained salicylic acid 1·6 grains per pint.

No prosecution was instituted.

Ginger Wine.—One sample of ginger wine was examined and reported to be adulterated on the ground that it contained salicylic acid 4·3 grains per pint.

No prosecution was instituted.

Vaccination.

VACCINATION.

Modifications,
App. (B.)
No. 41.

An abstract of the modifications of the Vaccination Act presently in force framed by us, in pursuance of the powers conferred by the 12th Section of that Statute, and approved by the Lord Advocate, is printed in the Appendix, showing the parishes from which the applications were made; and the modifications which were granted.

Number of
Persons
Vaccinated.
App. (B.)
No. 39.

We print in the Appendix abstracts of returns from all parishes in Scotland, which have been made, in compliance with our Regulations, by the Vaccinators appointed under the Vaccination Act, for the half-years ended 31st December 1902 and 30th June 1903. These returns show the number of persons vaccinated successfully and unsuccessfully during the half-year, the number of cases in which certificates of insusceptibility have been granted, and the number of persons vaccinated who were not in receipt of parochial relief. They relate exclusively to vaccinations performed by the Vaccinators in their official capacity—i.e., cases of paupers and the children of paupers, and of those persons not paupers whom the Parish Council have authorised the Vaccinator to vaccinate; and they do not include vaccinations performed by the Vaccinators, or other medical practitioners, in the course of their private practice.

Number of
Defaulters.

In compliance with our Regulations, the Inspectors of Poor of every parish in Scotland furnish returns of the number of defaulters under the 18th Section of the Vaccination Act. We print in the Appendix an abstract of these returns for the year ended 30th June 1903. That abstract shows the number of defaulters, the number of persons vaccinated during the year in terms of the section referred to, the number of prosecutions under Sections 17 and 18 respectively, and the number of such prosecutions in which penalties have been adjudged.

App. (B.)
No. 40.

Central
Vaccine
Institution.
App. (A.)
No. 30.

The operation of the Central Institution for the collection and distribution of vaccine lymph in Scotland during the past year has continued to be entirely satisfactory. The report of the Superintendent on the work of the institution is printed in the Appendix.

Departmental.

DEPARTMENTAL.

Appointment
of Secretary
for Scotland
and President.

The Right Honourable the Lord Balfour of Burleigh, K.T., having, during the past year, resigned the office of Secretary for Scotland, a vacancy occurred in the office of President of the Board, which has been filled by the appointment of the Right Honourable A. Graham Murray, K.C., M.P., to the former office.

Letter from the
Right Honour-
able the Lord
Balfour of
Burleigh, K.T.,
on demitting
the office of
President.

We have pleasure in reproducing a letter which His Lordship on demitting office addressed to our Vice-President:—

“DOVER HOUSE,

WHITEHALL, 9th October 1903.

“MY DEAR M'NEILL,

“I tried to see you the other day in Edinburgh to bid an *official* farewell.

“I cannot leave my office without thanking you and my

other colleagues on the Local Government Board as well as Departmental.
all the staff of the office with the Secretary at their head for
the kind and able co-operation in work which has so much
sweetened official life during the last eight years.

"I shall be obliged if you will let the staff know I appreciate
their services, and add an expression of my earnest hope that,
if official connection is severed, private friendships may long
remain.

"I am,

Very faithfully,

(Signed) BALFOUR OF BURLEIGH.

"Malcolm M'Neill, Esq., C.B."

The post of Lord Advocate for Scotland, vacated by the Right Appointment of Lord
Honourable A. Graham Murray, K.C., M.P., on his appointment to Advocate and
the office of Secretary for Scotland, was filled by the promotion of Solicitor-General for
Solicitor-General, Charles Scott Dickson, K.C., M.P., who accordingly Scotland.
relinquished his position as a member of the Board. The vacancy
was filled by the appointment of David Dundas, Esq., K.C., to the
post of Solicitor-General for Scotland.

The Departmental Committee on Poor Law Medical Relief, the Departmental
appointment of which was referred to in our Eighth Annual Report, Committee on
have completed their arduous labours and reported to us. We are Poor Law
at present considering the suggestions and recommendations Medical Relief.
contained in their Report.

During the year ended 31st December 1903, Mr. Barclay visited General
118 parishes and conducted 26 special enquiries. He also visited Superin-
all the Poorhouses and conducted 41 special Poorhouse enquiries. tendents'
Mr. Barclay's time has been much occupied during the year Reports.
with work connected with the Departmental Committee on
Medical Relief and in examining plans of new poorhouses and
hospitals. Mr. Penney visited 289 parishes and conducted 21 special
enquiries. Mr. Stuart visited 225 parishes and conducted 14 special App. (A.)
enquiries. Mr. Millar visited 127 parishes and conducted 20 special Nos. 1, 2, 3, 4.
enquiries.

There will be found in the Appendix the latest General Reports
of our officers.

Our Inspecting Officers have reported upon the sanitary Inspecting
defects of many places, as their time permitted. During the Officers'
above period Mr. Barclay has made 9 special reports, Mr. Reports.
Penney 14, Mr. Stuart 16, Mr. Millar 39. Our Medical Inspector, Medical
Dr. Leslie Mackenzie, has also made 21 special reports and en- Inspector's
quiries in cases where the existence of disease or other circum- Reports.
stances rendered his services desirable. We have, in certain App. (A.)
cases, transmitted copies of these officers' reports to the Local No. 28.
Authorities of the places reported on, and have called their atten-
tion to the defects specified. In addition, Colonel Gore-Booth, R.E.,
the Scottish Office Consulting Engineer, with your approval,
reported specially to us in 38 cases. We have also consulted during Special Com-
the year special legal, medical, engineering, and architectural missioners'
Reports.

Departmental. Commissioners in connection with public health matters, whose criticisms and reports have been of signal service not only to us but to Local Authorities.

Parliamentary and Government Returns. A considerable and increasing amount of labour continues to be imposed upon us in the collection, examination, and tabulation of returns from Local Authorities and Parish Councils for the information of Parliament or the Government. During the past year we have obtained and furnished annual returns in terms of the "Local Taxation Returns (Scotland) Act, 1881."

The trouble involved in the preparation of these returns has been much heavier than usual owing to the decision of the Secretary for Scotland that an abstract of the accounts of a Town Council in the form prescribed by him for the purpose of Section 96 of the Town Councils (Scotland) Act, 1900, shall come in place of and render unnecessary a return of the receipts and expenditure of the Town Council in pursuance of the Local Taxation Returns (Scotland) Act, 1881.

We have also obtained, for publication in the *Labour Gazette*, monthly statistics of pauperism from certain parishes situated in the chief industrial centres.

We have the honour to be,

SIR,

Your most obedient, humble Servants,

MALCOLM M'NEILL.
REGINALD MACLEOD.
DAVID DUNDAS.
J. PATTEN MACDOUGALL.
JAS. B. RUSSELL.

G. FALCONAR-STEWART,
Secretary.

DOCUMENTS ISSUED AND RECEIVED BY THE BOARD.

POOR LAW.

NO. 1.—REPORT BY GENERAL SUPERINTENDENT OF POORHOUSES AND SOUTH-WESTERN DISTRICT, FOR THE YEAR ENDED 15TH MAY 1903.

Edinburgh, 16th May 1903.

Sir,—The following Table shows the pauperism of my district in January last, and the comparison with January 1902 :—

Counties.	Poor on Roll.	Depen- dants.	Total Poor and Depen- dants Jan. 1903.	Total Poor and Depen- dants Jan. 1902.	Increase at Jan. 1903.	Decrease at Jan. 1903.
Lanark, . . .	18,070	12,109	30,179	28,871	1,308	...
Renfrew, . . .	3,549	2,006	5,554	5,475	79	...
Ayr, . . .	3,510	1,917	5,427	5,264	163	...
Dumfries, . . .	976	525	1,501	1,485	6	...
Kirkcudbright, . . .	702	335	1,037	1,081	...	44
Wigtown, . . .	741	271	1,012	1,012
Total, . . .	27,548	17,162	44,710	43,188	1,566	44
Net,					1,522	

The increase is again in the counties of Lanark, Renfrew, and Ayr, containing the large towns and manufacturing centres, but it is satisfactory to note that the increase shown last year is slightly arrested.

Various points in the administration of the Poor Law, which it has been my habit to notice in my reports made to you at this time, have been brought before the Departmental Committee of which I have the honour to be a member, and need not be repeated here. I look forward with great hope to great improvement, especially in indoor administration, as a result of the Committee's investigations.

I have to report a continued development of modern views of the treatment of phthisis. These cases are now universally regarded as cases requiring isolation and special precautions as to disinfection, and generally as requiring more air space and food than other cases, and in some cases open-air treatment for cure has been, and successfully, afforded. At Leith Poorhouse Hospital and Craiglockhart Poorhouse sheds have been erected where phthisis patients can be accommodated by day and night. The following interesting report has been furnished to me by the Medical Officers of Leith Poorhouse Hospital.

"These patients are put on a special diet of five meals daily.

"All patients able to leave their beds are kept out in the open air or in the "shelters from 7 a.m. to 6 p.m., and longer in warm weather; they take their "meals there also. Several patients unable to walk lie all day in bed in the "shelters.

"Medicinal treatment is reduced to a minimum, and bears a very strong contrast to the former treatment pursued in the wards.

"We have come to the conclusion that the present line of treatment is a great advance on the former system. We mean open air along with increased supply of food, as against lying in bed in the ward and soothed by means of medicines. We have had a great many examples of marked improvement, and several patients who have remained under treatment for a few months have been able to leave the poorhouse in a condition fit to resume work, and become self-supporting. When the cost of medicines is deducted and placed against the extra diet, we question if the cost of the open-air treatment is much more than the medicinal treatment, while the results are very much better, both from a curative and economical point of view.

(Signed) "GEORGE DONALD, M.D.; GEORGE M. JOHNSTON, M.D.,
F.R.C.P."

In contrast to the above the following facts are disheartening. A proposal was made by the Parish Council of Old Monkland that the parishes around Coatbridge should combine to erect a sanatorium, and the following statistics were obtained from twelve parishes:—How many cases were sent from these parishes to a poorhouse for three years 1900-2?—67. How many left the poorhouse recovered?—None. How many relieved?—48. How many died?—19 (or 28 per cent.).—I have the honour to be, your obedient servant,

R. B. BARCLAY.

*The Secretary,
Local Government Board.*

NO. 2.—REPORT BY GENERAL SUPERINTENDENT, SOUTHERN HIGHLAND DISTRICT, FOR THE YEAR ENDED 15TH MAY, 1903.

Perth, June 1903.

Sir,—I have the honour to report as follows for the twelve months to May 15, 1903:—

During that time I made 301 ordinary visits to Inspectors of Poor, and conducted 49 special inquiries under instructions from the Board.

The subjoined Table shows the number of paupers and dependants enrolled on January 15, 1903. There is a slight increase in the total when comparison is made with that on January 15, 1902.

Counties.	Population in 1901.	Poor on Roll.	Dependants.	Total Poor and Dependants on Jan. 15 1903.	Total Poor and Dependants on Jan. 15 1902.	Increase at Jan. 15 1903.	Decrease at Jan. 15 1903.
Aberdeen, .	313,825	4,492	2,304	6,796	6,735	61	...
Forfar, .	284,082	4,277	1,905	6,182	6,135	47	...
Fife, .	218,840	2,257	1,249	3,506	3,405	101	...

Kinross, .	6,981	58	10	68	82	...	14
Total, .	1,010,577	13,369	6,435	19,804	19,665	209	70
				Net	increase,	139	

It is much to be regretted that there is still no uniformity of practice, throughout the district, in the granting of relief to applicants. In some parishes the Board's recommendations as to the form of relief are persistently observed. In these the numbers in receipt of relief are, I may say, almost

invariably lower than elsewhere ; there is also less discontent, and an absence of that feeling of injustice so prejudicial to good administration. In other parishes these recommendations are as frequently disregarded, and relief is given on, apparently, no fixed principle whatever.

It is often, but erroneously, imagined that the great object of those who supervise the administration of the Poor Laws is to reduce the number of those who are in receipt of relief to the lowest possible figure. It is, I apprehend, rather to see that relief flows in proper channels, and that its receipt is beneficial and not harmful. The deserving poor, who "suffer through no fault of their own," ought to be liberally assisted towards an improved condition, while those whose vices, or inherent unwillingness to labour for their own support, have brought them to a state of pauperism, ought to be maintained only in a manner which will convince them, and others, that self-indulgence brings certain retribution.

The granting of outdoor relief, where the test of the Poorhouse ought to be applied, is injurious both to the moral fibre of the recipient, and, in the words of a shrewd Inspector, "spoils the parish." If A be known, by means of receipt of relief in money, to spend much of his, or her, time in gossiping and idleness, it is not unlikely that hitherto hardworking B, C, and D will conclude that their continued struggles are foolish and superfluous, that their energies will relax, and that they will soon follow the example constantly before their eyes.

The mal-administration of relief is the more to be regretted when we consider the piteous cases coming, from time-to-time, to our notice. Such are by no means unknown where the struggle for independence is continued to the bitter end. I would instance a recent case of a widow with four children, the eldest seven years of age. Necessity compelled her to accept relief from the parish for two years. At the end of that time she voluntarily resigned her allowance, saying that, with the help of friends, she preferred to struggle along. After a few months, however, one child died and the over-wrought brain gave way ; she was removed to the asylum in April, and there received her last discharge in May. Relief from the rates might have been her's again for the asking, but its receipt had been galling, and so hurtful to her self-respect that she could not bring herself to repeat the application. Another sad case was that of a woman once in fair circumstances. Her rent got into arrears and her furniture was seized ; she then removed to a room, the rent of which was such few pence as she could afford to pay weekly. Day after day she was heard leaving her room in the early morning for work outside, and returning at night. Keeping herself apart from her neighbours she gave no encouragement to well-meant overtures. At last her step was missed on the staircase and the constable on the beat was called in. Her room was entered and she was found seated on the bare floor, without food or fire, literally waiting for death. Consenting to go to the Poorhouse, and bearing up to the last, she walked down the staircase, walked to the cab which was procured, walked from it to the Poorhouse, to fall down dead on entering its shelter.

As with disease, so with pauperism—prevention is better than relief. It is the desire of the State "to get the most out of its citizens." Is it not advisable that they should be taught how to make the most of themselves and their earnings ? Great attention is now being paid to the physical condition of our school children, and most instructive papers are available on the subject. Is it unreasonable to hope that, in the near future, the long-looked for instruction in the elements of sanitary science will be imparted to parents and children alike ; that they will be taught how best to avoid and combat disease ; that explanation will be supplied of the why and wherefore certain kinds of food should be preferred as building up bone and muscle, and others discarded as merely temporarily stilling the pangs of hunger ? On many ears, doubtless, such teaching will fall in vain, but a percentage of intelligent auditors may reasonably be expected, and in time the whole lump will be leavened.

Thousands and thousands of working men, women, and children notoriously live from hand to mouth. When work fails, or wages go down, then the pinch comes, and the worst nurtured give way first. At the best, with many, there is not much money available for food. On what kind of food does the money go ? White bread and tea are, it is well known, the most frequent purchases, and these form the staple diet of only too many women. As the

parent is, so will the child probably be. Some years ago I was told by one of the physically finest and strongest men I ever met that he had tasted nothing but porridge and milk till he was seventeen years of age. Of both of these he had plenty, and the foundation of a stalwart frame and sound constitution was successfully laid. Quite recently, an eminent professional man, whose calling demands great power of endurance, coupled with the utmost steadiness of hand and eye, assured me that he took nothing from morning till evening but two saucers of one of the many cereal foods, to be procured everywhere nowadays ready for use, with milk or cream. His bodily health and strength were, he declared, much improved since he adopted this diet.

Popular prejudice is, undoubtedly, a hard foe to tackle—the dread of being laughed at by the neighbours prevails to a great extent among those in humble life, as does the fear of not being up-to-date with the more exalted. A widow with young children, into whose circumstances inquiry was being made, lamented to me, not long ago, that, since leaving the country for the town, she had been obliged, by the pressure of surrounding “neighbourly” opinion, to make her children abandon their previous hardy habit of going about bareheaded and barefoot, with bad results from a health point of view. She also regretted, and this more bitterly, that milk was scarce and costly; water had to be added to make the supply go round, and the children suffered in consequence. Their milk and porridge diet was also looked down on by the neighbours who stood on the higher plane of bread and tea consumers. It is to be feared that the pressure of (uneducated) public opinion will probably bring her to adopt the more easily prepared meal of bread and tea for herself or progeny, with, to quote Dr. Leslie Mackenzie’s descriptive words, “appalling difference of physique due to slight difference of food.”

While we approve of every genuine effort by our less fortunate brothers and sisters to keep themselves from joining the great army of paupers, can it be said that every possible assistance is given them? A little knowledge is not always a dangerous thing; it may mean the making of a man’s or woman’s career. The imparting of such knowledge must be left to our professional men, but the “mere layman” can, at all events, throw a stone at the giants—Prejudice and Custom. His aim may be bad, and his efforts provoke a smile, but, if enough stones are thrown, some will be likely to hit, and every hit tells.—I have the honour to be, Sir, your most obedient servant,

W. PENNEY.

*The Secretary,
Local Government Board,*

NO. 3.—REPORT BY GENERAL SUPERINTENDENT, SOUTH-EASTERN DISTRICT,
FOR THE YEAR ENDED 15TH MAY 1903.

Edinburgh, 15th May 1903.

Sir,—I have the honour to report as follows for the year ended 15th May 1903:—

Since 15th May 1902, I have made 200 visits to parishes, and have conducted, by instructions received from the Board, 30 special enquiries, 13 of which were in connection with the administration of the Poor Law.

As will be seen from the following Table, pauperism has increased by 439 since the date of my last report, not a very alarming increase if the increase of population be taken into account. Still I think something might be done to check the growth of pauperism. Of course, the Board can not (in ordinary circumstances) compel a Parish Council to strike a case off the Roll, or insist on indoor relief alone being offered, but I have, more than once, drawn attention to cases on the outdoor Roll, which were not *legally entitled* to relief, as they had no dependants, and were certified by the Medical Officer to have no disablements.

As the House of Lords has held that no assistance can be legally given to “able-bodied” persons, out of funds raised for the relief of the poor, could the Board not take advantage of Sec. LXXXVII. of the Poor Law Act of 1845, and apply to the Court of Session, when instances are brought to their notice of Parish Councils granting relief illegally? One or two cases would, I

believe, have a good effect, as they would "encourage the others" to give relief to those cases alone who were legally entitled to it.

The total number of lunatics is 3205, an increase of 63 since last year, made up of :—

In lunatic wards of poorhouses,	341
Boarded out,	619
In asylums,	2,245
Total,	3,205

It is worthy of note that, although the County of Peebles shows a small increase of pauperism, out of the fourteen parishes which compose the county, one parish has only two paupers, two parishes have only one pauper each, and *five parishes* have no paupers chargeable to them at all.

In the whole of my district, only 24 women now receive outdoor relief for 44 illegitimate children, which is a vast improvement on previous years. In 1872, in the County of Berwick alone, no less than 45 women were in receipt of relief for 98 illegitimate children. At the present time, in the same county, there is not a single case of a woman receiving relief for an illegitimate child.

The Board, in 1900, drew the attention of several Parish Councils to the fact that, as they were allowing the police to send any able-bodied tramps who might apply for relief to their Casual Sick Houses, they were using the ratepayers' money for an illegal purpose. In October 1900, the Board appointed Sir John Cheyne a Commissioner to examine into and report on the manner in which the Casual Sick House, or rather the Night Shelter, at Selkirk was being conducted.

I had the advantage of being associated with Sir John in the enquiry which he held at Selkirk; in his report Sir John quotes a piece of information which I gave him at the enquiry in regard to the parish of Stow. His remarks are as follows :—"And, though in view of the main road position of Selkirk it may be that the decrease in the number of tramps passing through the burgh consequent on the closing of 'the Shelter' as a resting-place for their order would not be so marked as was the case in the parish of Stow (where it was stated to me that, on the Parochial Board some 13 years ago refusing to admit able-bodied persons into a Shelter House which they had been working on the lines on which the Selkirk 'Shelter' is being conducted, the number of admissions fell in one year from about 1400 to between 50 and 60), still the experience of Stow and the statements in regard to the South-Western District of Scotland contained in Mr. Barclay's interesting report, which you were good enough to send me for perusal, justify the belief that the number of tramps visiting Selkirk would be considerably diminished were the present 'Shelter' fitted up and used strictly as a Casual Sick House, to which admission could be obtained only through the Inspector of Poor and on a certificate from the Parish Medical Officer."

It is most gratifying to be able to report that the result of the Selkirk Parish Council's adopting Sir John Cheyne's recommendations is that the improvement which took place at Stow has been nearly equalled at Selkirk, since the admissions from 15th May to 15th November 1902 to the Casual Sick House at Selkirk only amounted to 61, while from 15th November to 21st April 1903 (the date of my last visit to Selkirk) there had only been 40 admissions. What a change to the 1696 admissions which were the average yearly admissions for the decade 1890-1900. In addition, there is this great advantage, that the "Shelter" is now a capitally conducted Casual Sick House, thus fulfilling its proper purpose.

A fear was expressed at the enquiry that the Inspector would be overwhelmed by the number of applications. I am glad to say that the fear has proved to be unfounded, as, in addition to those admitted to the Casual Sick House, the Inspector has only had about 50 applications since May last.

I expect that even this number will decrease when the tramps become aware that only those legally entitled to relief will gain admission to the Casual Sick House.

As the Board have been so successful in dealing with this description of illegality, I trust that they may be encouraged to take up the other phase of it to which I have drawn attention above.

I would take this opportunity of drawing the attention of the larger Parish Councils to a practice which, I am glad to say, is increasing in my district, viz., that of having the Minutes printed. Several of my parishes have adopted this plan, with good results; each Councillor receives a copy of the Minutes, and the Inspectors are kind enough to send me a copy also. Of all the Parish Councils which have their Minutes printed, only one refuses to supply me with a copy.

When holding an enquiry the other day, I had occasion to examine some old Burial Registers for the years 1780-90, and was much struck by the large number of deaths from smallpox, which, I think, were only exceeded by "consumahon" or perhaps "fiver." If the anti-vaccinationists would only examine the old Burial Registers, I think they might almost be induced to change their views on the subject.

I am glad to report that the Inspectors of my district continue, almost without exception, to discharge their duties with care and discretion. My thanks are due to them for the punctual manner in which they have sent in their Returns. In no case had I, this year, to write a reminder for a delayed Return.—I am, Sir, your obedient servant,

ALEX. STUART.

*The Secretary,

NO. 4.—REPORT BY GENERAL SUPERINTENDENT, NORTHERN HIGHLAND DISTRICT, FOR THE YEAR ENDED 15TH MAY 1903.

Inverness, May 1903.

Sir,—I have the honour to report that during the year ended 15th May last I have visited 139 parishes and conducted 49 (22 Poor Law and 27 Public Health) special inquiries. I also paid 15 special visits to different parts in my districts.

The following Table shows the pauperism of the various counties in the Northern Highland District at 15th January last :—

[TABLE.]

Counties.	15th January 1903.			15th Jan. 1902. Total Pauperism.	Increase.	Decrease.
	Paupers.	Depts.	Total.			
Banff, . . .	1,055	375	1,430	1,454	...	24
Caithness, . . .	931	312	1,243	1,292	...	49
Elgin, . . .	973	440	1,413	1,423	...	10
Inverness, . . .	2,477	718	3,195	3,282	...	87

Zetland, . . .	753	121	874	886	...	12
Total, . . .	10,068	3,258	13,326	13,526	54	254
Net decrease,						200

It is satisfactory to be able to report a further reduction of pauperism in the district.

I consider a further reduction might still be made were Parish Councils to adhere to the recommendations of the Board as to granting relief. Several Councils adhere to the Board's instructions, and find that their pauperism is reduced.

One Inspector accounted for the increase in his parish by the Parish Council "not exercising the poorhouse test with the same firmness as it used to and ought to be."

The following Table shows the number of women, in each county, receiving relief solely on account of having illegitimate children, as compared with the same date last year :—

Counties.	15th Jan. 1903.				Total Indoor and Outdoor.		15th Jan. 1902.				Total Indoor and Outdoor.	
	Indoor.		Outdoor.				Indoor.		Outdoor.			
	Women.	Children	Women.	Children	Women.	Children	Women.	Children	Women.	Children	Women.	Children
Banff, . . .	1	3	7	18	8	21	4	8	4	9	8	17
Caithness, . . .	2	5	2	7	4	12	2	3	1	3	3	6
Elgin, . . .	3	7	8	21	11	28	4	7	5	17	9	24
Inverness, . . .	3	4	11	17	14	21	5	5	14	23	19	28
Nairn,	2	3	2	3
Orkney,	13	23	13	23	16	24	16	24
Ross, . . .	3	4	13	17	16	21	6	11	9	10	15	21
Sutherland, . . .	3	4	6	9	9	13	2	3	6	9	8	12
Zetland,. . .	1	3	8	12	9	15	2	4	5	8	7	12
Total, . . .	16	30	68	124	84	154	25	41	62	106	87	147

There is a slight reduction in the number of women, but there is an increase in the number of children.

I find great difficulty in convincing Parish Councils that only indoor relief should be offered to such cases, and am almost always informed that it is much cheaper to keep them in the parish on a small outdoor allowance. The Parish Councils overlook the fact that they are really encouraging immorality. It

has been proved over and over again, if indoor relief only is offered when application is made for the first time, that even if the woman should lapse a second time, she will not apply to the Parish Council on behalf of her second child.

There is a slight increase in the number of lunatics. Out of a pauperism of 13,326 there are 1847 lunatics—1168 of whom are in asylums, 555 are boarded out in the parishes to which they are chargeable, and 124 are boarded out in other parishes.

There are boarded out 334 children chargeable to the parishes in my district.

Poorhouse accommodation is provided by 148 parishes, but I should like to see the remaining 21 parishes provide poorhouse accommodation also.

Casual Sick House accommodation has been provided by 44 parishes only, leaving 125 parishes without such accommodation. Some parishes, however, have poorhouse accommodation at hand and do not consider it necessary to provide a Casual Sick House. A great responsibility attaches to Parish Councils through their failure to provide the officials with such a house. A case recently occurred in my district where the Inspector could not induce anyone to give an old man shelter. The man broke down in the outskirts of the parish, and was given shelter in an outhouse until the Inspector was communicated with. The Inspector could not find accommodation for the man, who absolutely refused to enter the poorhouse although certified fit for removal by the Medical Officer, and was called on by the owner of the outhouse to remove the man at once. I understand that no house could be procured in the parish for such a purpose, and at the present time Parish Councils have no power to borrow for the erection of a Casual Sick House.

108 parishes print and circulate to the ratepayers a list of all paupers chargeable. I should like to see such a list printed and circulated in every parish.—I have the honour to be, Sir, your obedient servant.

ALEX. B. MILLAR.
General Superintendent.

*The Secretary,
Local Government Board.*

NO. 5.—CIRCULAR TO GOVERNORS OF POORHOUSES AS TO THE DIET OF THE INMATES.

*Local Government Board,
Edinburgh, 6th February, 1903.*

Sir,—With reference to the Board's Circular of 2nd February, 1898, I am directed to inform you that, in deference to the opinions of experts in alimentation, the Board have resolved to withdraw, and do hereby withdraw, their approval of the Diet Scale prescribed in Rule LXVII. for the Management of Poorhouses. They do so meanwhile in favour of the scale which was then issued as an alternative for the consideration of House Committees and of which a copy is herewith enclosed.

The subject is still engaging the Board's attention, and when their enquiries are concluded a further communication will be addressed to you.

You will be good enough to lay this Circular before an early meeting of your Committee, and to favour me with their Minute adopting the new dietary, if it has not already been adopted either in whole or with approved modification.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Governor of the Poorhouse.

DIET OF THE INMATES.

RULE LXVII.—THE DIETARY OF THE POORHOUSE SHALL BE FRAMED IN ACCORDANCE WITH THE FOLLOWING RULES:—

1. No article of diet which is not of good quality, and in a wholesome state, shall be issued, prepared for, or given to any inmate.

2. The inmates—not under medical treatment—shall be divided, for the purpose of diet, into eight classes, viz. :—

- Class A. Adults, of either sex, who are not working, and who have not completed, from the date of their last admission, a fortnight's residence in the poorhouse. (The aged and infirm, and all women advanced in pregnancy, or who are suckling children, are to be exempted from this "entrance" diet.)
- „ B. Adults, of either sex, who are not working, and who are not aged persons, and who have been inmates for fourteen consecutive days.
- „ C. Adult persons, of either sex, who are working.
- „ D. Infirm persons of either sex.
- „ E. Children, above five, and not above fifteen years of age.
- „ F. Children, above two, and not above five years of age.
- „ G. Infants, not above two years of age.
- „ H. The privileged inmates deemed deserving of a more varied diet.
3. To Classes A, B, C, and D, three meals a day, and for Classes E, F, and H, four meals shall be allowed, which shall consist of—

For Class A.—(First Rate.)

- Breakfast* . Meal, four ounces ; and butter-milk, three-fourths pint imperial.
- Dinner* . . Bread, eight ounces ; and broth, one-and-a-half pints imperial.
- Supper* . . Meal, four ounces ; and butter-milk, three-fourths pint imperial.

For Class B.—(Second Rate.)

- Breakfast* . Meal, four ounces ; and skimmed milk, three-fourths pint imperial.
- Dinner* . . Bread, eight ounces ; and broth, one-and-a-half pints imperial ; four ounces of suet pudding (sweetened) twice weekly.
- Supper* . . Meal, four ounces ; and skimmed milk, three-fourths pint imperial.

For Class C.—(Third Rate.)

- Breakfast* . Meal, four ounces ; and skimmed milk, three-fourths pint imperial.
- Dinner* . . Bread, eight ounces ; broth, one-and-a-half pints imperial ; and boiled meat, four ounces ; four ounces of suet pudding (unsweetened) twice weekly, with the meat.
- Supper* . . Meal, four ounces ; and skimmed milk, three-fourths pint imperial.

For Class D.—(Fourth Rate.)

- Breakfast* . Meal, four ounces ; and skimmed milk, three-fourths pint imperial.
- Dinner* . . Bread, six ounces ; rice soup or broth, one-and-a-half pints imperial ; and four ounces of beef may be allowed when a member of Class D is able and willing to work.
- Supper* . . Bread, six ounces ; butter, half-an-ounce ; and tea, half-pint imperial.

For Class E.—(Fifth Rate.)

- Breakfast* . Meal, four ounces ; and new milk, three-fourths pint imperial.
- Lunch* . . Beef-tea or new milk, one-quarter pint ; and bread, two ounces.
- Dinner* . . Bread, six ounces ; and broth, one pint imperial ; two ounces of meat four days in the week, and on the other days suet or other pudding may be substituted.
- Supper* . . Meal, three ounces ; and new milk, half-pint imperial. Bread, four ounces ; and new milk, three-fourths pint imperial, may be substituted for the porridge and milk.

For Class F.—(Sixth Rate.)

- Breakfast* . Meal, three-and-a-half ounces ; and new milk, half-pint imperial.
- Lunch* . . Bread, two ounces ; and new milk (hot), one-fourth pint imperial.
- Dinner* . . Bread, five ounces ; and broth or other soup, three-fourths pint imperial ; one ounce of meat daily.
- Supper* . . Meal, three ounces ; and new milk, half-pint imperial. Bread and new milk may be substituted for the porridge and milk.

For Class G.—(Seventh Rate.)

Not less than eight ounces of white leavened bread, or seven ounces of meal, and one pint imperial of new milk, daily ; to be prepared in such manner, and given at such times, as the Medical Officer shall recommend.

For Class H.—(Eighth Rate.)

- Breakfast* . Meal, three ounces ; skimmed milk, three-fourths pint imperial ; or tea, half-a-pint imperial ; butter, half-an-ounce ; bread, four ounces. (See Note.)
- Dinner* . . Bread, six ounces daily, along with the following :—One day in week—Rice soup (without the meat with which it is prepared), one-and-a-half pints imperial ; suet pudding (sweetened), two ounces. (Occasionally apples may be used in making this pudding.) Two days in week—Broth, one-and-a-half pints imperial. One day in week—Lentil or pea soup, one-and-a-half pints imperial. One day in week—White fish, eight ounces, with plain butter sauce (one-quarter of an ounce butter to each person). Two days in week—Minced meat, two ounces ; with four ounces of potatoes one of the days, and two ounces of suet pudding (unsweetened) the other day.
- Tea* . . . Tea, half-a-pint imperial ; bread, three ounces, and butter, half-an-ounce, four days in the week ; and marmalade (or other preserve), half-an-ounce, on the remaining three days.
- Supper* . . Skimmed milk, three-fourths pint imperial ; meal, three ounces, four days in the week ; and bread, four ounces (instead of porridge), the remaining three days.

NOTE.—To the members of Class H who prefer a tea, bread and butter diet, to a porridge and milk one, it is recommended that the tea diet be allowed on the four mornings in which they partake of porridge and milk for supper, i.e., three breakfasts and four suppers of porridge and milk in the week, ensuring one such diet daily. It is recommended that Class H be allowed to dine earlier and to sup a little later than the ordinary inmates.

4. The meal may be either oatmeal or Indian meal, or a mixture of these two kinds. It is recommended that Indian meal be dispensed with.

5. The suet pudding shall be made with one ounce of suet to every three ounces of flour. It should be sweetened when eaten as a pudding, and unsweetened when partaken of with the meat.

6. The bread, except for Class G (Seventh Rate), may be of such sort as is generally used by the labouring population in the parish or parishes to which the poorhouse belongs.

7. The broth shall be made with two ounces of meat exclusive of bone, two ounces of barley, half-an-ounce of peas, one-and-a-half ounces of carrots, turnips, or other vegetables approved by the Medical Officer, and a due quantity of salt, for each ration of one-and-a-half pints imperial ; and for other quantities in the like proportions.

8. The rice soup for Class D (Fourth Rate) and for Class H (Eighth Rate) shall be so made that for each ration for an infirm inmate there shall be four ounces of meat (which shall be left in the soup or not, as the Medical Officer

shall direct, in each case); rice, one-and-a-half ounces; vegetables, two ounces; salt and pepper, the due quantity.

9. The tea for Class D (Fourth Rate) and for Class H (Eighth Rate) shall be made with—sugar, half-an-ounce; new milk, one ounce; and tea, one-eighth of an ounce, for each half-pint imperial.

10. In the *First*, *Second*, and *Third* Rates, there may be substituted, not more than three times a week, for the broth at dinner, one-and-a-half pints imperial of *pea* soup, made with two ounces of whole or split peas, one-and-a-half ounces of *pease-flour*, one ounce of vegetables, and a due proportion of salt and pepper.

11. In the *Second*, *Third*, and *Fourth* Rates, there may be substituted, not more than once a week, for the broth at dinner, three ounces of skimmed-milk cheese; and for the broth and meat together, four-and-a-half ounces.

12. In the *Second* and *Fourth* Rates, there may be substituted, not more than twice a week, for the broth at dinner, eight ounces of white fish; and in the *Third* and *Fourth* Rates, twelve ounces of *white fish*, for the broth and meat together.

13. In the *First* Rate, there may be substituted, not more than twice a week, for the bread and broth at dinner, one-and-a-half pounds of boiled potatoes, with three-fourths of a pint imperial of butter-milk; in the *Second* and *Fourth* Rates, two pounds of boiled potatoes, with three-fourths of an imperial pint of skimmed milk; and in the *Third* Rate, for the bread, broth, and meat together, three pounds of boiled potatoes, with one imperial pint of skimmed milk; while in the *Fourth* Rate, when a member of Class D is earning beef, he, or she, may be allowed eight ounces of potatoes as a substitute for the rice soup or broth.

14. The House Committee may, under the written advice of the Medical or Medical Officers, and by an order entered in the minutes of their proceedings, direct the use of other articles, in other proportions than the above, whenever the scarcity of any article, the season of the year, or any circumstance affecting the sanitary condition of the inmates, shall be deemed to justify such changes; but, in any such change, there shall be no diminution of the amount of nutriment, or of the proportion of nitrogenous or azotised nutriment required by these rules, unless with the previous consent of the Local Government Board.

15. The diet for any inmate who is under medical treatment shall be such as the Medical Officer shall prescribe for him, and shall enter in a book, to be kept for that purpose, and to be called "The Medical Officer's Sick-Diet Book," which shall be submitted to the House Committee at every ordinary meeting.

DIET OF INMATES.—INTERPRETATION OF RULE LXVII.

The Circular issued November 18th, 1869, explains that the inmates are not entitled, as a matter of right, to be served with the solid meat with which the broth or rice soup is made.

The meat used in the preparation of the broth and rice soup imparts flavour and some nutriment, in the same manner as "stock," or the water in which meat has been for some time boiled. The calculation of the amount of proteids, fat, and carbohydrates, as well as the heat-producing power (calories) of all the diets, has been made on the assumption that the meat boiled in the broth or rice soup has been removed—to be ultimately consumed by the *workers* in the poorhouse, who are entitled to four ounces of boiled meat at dinner. When the Medical Officer has occasion to order meat, he will probably find it more convenient to order it to be served separately, and not left in the rice soup or broth.

EXTRACTS FROM REPORT BY DRS. BELL AND LITTLEJOHN, DECEMBER 31ST, 1887, ON "DIETARIES OF CHILDREN IN POORHOUSES."

We are of opinion that the time has now arrived when the Board may safely dispense with the alternative use of *Indian meal*, and should insist on *oatmeal* being used in all cases, and we beg to recommend accordingly.

Where broth is ordered, a variety should be allowed in the kind of soup. We find in several of the poorhouses that a rotation of soups was in regular use, viz.:—Broth, pea, rice, and potato soups.

As to the ration of meat which we have recommended in Classes E and F, a similar variety in the mode of cooking should be enforced.

In the course of this inquiry we were impressed with the importance (whatever the dietary employed) of the younger children being carefully watched and superintended during the time of meals.

In poorhouses of limited size, there was apparently more of a home arrangement, and the older paupers took a great interest in the children. In large establishments, on the other hand, where stricter discipline was necessary, and was maintained, there was some difficulty in insuring careful superintendence, and there was a chance of the weaker children not receiving due attention and consideration.

We take the liberty of recommending that the children at meal hours might, with advantage, be divided into groups or companies, consisting, say, of ten, and that each group should be superintended by one of the pauper inmates. If these happened not to be suitable, the nurses might discharge this duty (of short duration) without detriment to their patients.

No. 6.—CIRCULAR TO GOVERNORS OF SOME OF THE LARGER POORHOUSES AS TO THE DIET OF THE INMATES.

*Local Government Board,
Edinburgh, 6th February, 1903.*

Sir,—With reference to the Board's Circular of 2nd February, 1898, I am directed to inform you that, in deference to the opinions of experts in alimentation, the Board have resolved to withdraw, and do hereby withdraw, their approval of the Diet Scale prescribed in Rule LXVII. for the Management of Poorhouses. They do so meanwhile in favour of the scale which was then issued as an alternative for the consideration of House Committees, and of which a copy is herewith enclosed.

The subject is still engaging the Board's attention, and when their enquiries are concluded a further communication will be addressed to you.

Meantime, I am to request that, under the direction of the Medical Officer, you will make arrangements and provide facilities for a careful record of the weights, on admission and at regular intervals thereafter, of such a number of your inmates as may afford the means of estimating the nutritive effect of the approved diets.

You will be good enough to lay this Circular before an early meeting of your Committee, and to favour me with their Minute adopting the new dietary, if it has not already been adopted either in whole or with approved modification.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Governor of the Poorhouse,

No. 7.—CIRCULAR TO INSPECTORS OF POOR SUGGESTING THAT PARISH COUNCILS SHOULD PRINT AND CIRCULATE ANNUALLY AMONG THE RATEPAYERS A LIST OF THE PAUPERS WITH THEIR ALLOWANCES.

*Local Government Board,
Edinburgh, 14th December 1903.*

Sir,—It has recently been brought to the knowledge of the Board that great benefit has accrued to a Parish Council from their practice of printing and circulating annually among the ratepayers a list of the Paupers with their allowances. The Board learn that the publication of such a list has discouraged unnecessary applications for relief, that it has resulted in Paupers being removed from the Roll, and that it has frequently been the means of enabling the Parish Council to recover advances which would not otherwise have been refunded.

The Board are aware that, in some Parishes, the practice of printing and circulating a list of the Paupers is already followed, and they have long been of opinion that, where it was followed, the Parish Councils were consulting

their best interests. But the Board have reason to believe that the number of Parishes in which lists are published is comparatively small, and they now desire strongly to urge upon all those Parish Councils which have not hitherto adopted the practice, the expediency of at once doing so. The Board feel sure that the benefit to the Parish arising from the printing and circulating of such a list will more than compensate for the trifling cost entailed in producing it. As regards the method of circulation, the Board, of course, leave this to the discretion of each Parish Council. But they may suggest, as probably an efficient and certainly an economical manner, the simple handing of a copy of the list to each ratepayer,—say, when calling for the purpose of paying his assessments.

You will be good enough to lay this letter before the next meeting of your Parish Council.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Inspector of Poor.

NO. 8.—SUMMARY OF ARBITRATIONS UNDER SECTION 2 OF THE POOR LAW (SCOTLAND) ACT, 1898.

Auchterderran Parish Council v. Flisk and Kirkcaldy Parish Council.
(2nd January, 1903.)

Derivative Settlement—Parent and Child.—Circumstances in which held that an orphan, aged 8, took the settlement of his deceased father.

The facts of this case were:—The pauper is an orphan child named John Murdoch. He is aged 8 years, and was born in Auchterderran Parish. His father was born in Flisk Parish, and died in 1898, without other settlement than that of his birth in Flisk. The widow, who is a native of Kirkcaldy, married an Irishman two years after her husband's death. Her second husband had no settlement in Scotland. She died in March, 1901. Since then the pauper has been residing in Auchterderran with his grandfather, who has applied for relief on his behalf. Auchterderran claims to be relieved by Flisk. It is agreed that the pauper derives a settlement from one or other of his parents, but it is disputed which. Auchterderran contends that the father's birth-settlement—Flisk—is liable, while Flisk alleges that Kirkcaldy is liable. He reasons thus:—The boy follows his mother's settlement. She lost that of her husband in Flisk when she married an Irishman, and took the settlement of her second husband. But he has no settlement in Scotland. Consequently any settlement his wife had was in the parish of her own birth—Kirkcaldy. Therefore her boy's settlement is in Kirkcaldy. Kirkcaldy, however, declines to admit this plea.

The Local Government Board have issued the following award:—The Board are of opinion that the parish of Flisk is liable for the relief of this pauper. In the view of the Board, this orphan pauper takes the birth-settlement of his father, which is admittedly in the parish of Flisk. Reference may be made to the following cases:—*Barbour v. Adamson*, decided in the House of Lords, 30th May, 1853; *St. Cuthbert's v. Cramond* (1 R. 174); *Beattie v. M'Kenna and Wallace* (5 R. 737); and *Hendry v. Mackison and Christie* (7 R. 458).

Glasgow Parish Council v. Campsie Parish Council.
(14th January, 1903.)

Proof of Birth.—Evidence which was held to be sufficient to establish birth in a certain parish.

The facts of this case were:—Margaret M'Kay Fox was chargeable in Glasgow for the period from 6th November, 1899, till her death on 30th March, 1900. As she had no settlement but that of birth, Glasgow claimed on the parish of Campsie, believing that the pauper was born there. Campsie refused liability on the ground that the evidence of birth in their parish was insufficient. The pauper gave the following statement when examined in Barnhill Poor-

house on 13th February, 1900:—"I am about 56 years of age, and was born "in M'Callum's Land, Lennoxtown, parish of Campsie, as I have heard my "mother say. My father, Archibald M'Kay, a labourer, was killed in Town- "head, Glasgow, seven months before I was born; and my mother, Susan "Alford, died in Goldie's Land, Chapel Lane, Lennoxtown, seventeen years "ago. I was baptised in the Roman Catholic chapel by Father Green or "Father Gillon." The following entry appears in the baptismal register of St. Machan's Roman Catholic Chapel, Campsie:—"Margaret M'Kay, lawful "daughter of Archibald M'Kay and Susan Alford, was born on 10th February, "1841, and was baptised 15th March, 1841, by the Rev. Charles Green." There is no such land as "M'Callum's" known in Lennoxtown, but there was a "M'Allan's Land," commonly called "M'Callum's." At the period when the pauper was born it was the custom to baptise Roman Catholic children from Kilsyth and surrounding parishes in the chapel at Lennoxtown, because that was the only Roman Catholic chapel in the western district of Stirlingshire. In the baptismal register, both before and after the entry quoted, it is in most cases specifically stated where the birth took place. In the present case and in several others there is no mention of birthplace.

The Local Government Board have issued the following award:—"In the view of the Board, the parish of Campsie is liable for the sums expended by the parish of Glasgow on behalf of this pauper. The Board think that the evidence set forth in the statement of facts is sufficient to warrant the conclusion that the pauper was born in the parish of Campsie.

Kilbirnie Parish Council v. Dalry and Govan Parish Councils.
(17th January, 1903.)

Husband and Wife—Foreigner—Desertion—Loss of Settlement.—Held (a) that the chargeability of the dependants of a husband in desertion does not prevent him from losing a settlement acquired by residence, (b) that a wife follows the settlement of her husband notwithstanding that he is in desertion, and (c) that, therefore, when the husband has no settlement in Scotland, the wife does not revert to her own birth-parish but remains chargeable to the parish in which pauperism occurs.

The facts of this case were:—The paupers were the dependants of James Gibson, an Englishman, who had acquired by residence a settlement in the parish of Dalry. He left Dalry in August, 1898, and went to live in Kilbirnie. Early in 1899 he deserted his wife and children, who, in consequence, became chargeable to the parish of Kilbirnie. Dalry admitted liability. Shortly afterwards James Gibson returned, and chargeability ceased; but in July he again deserted, and again his dependants became chargeable. This time his wife became insane and was placed in an asylum by Dalry. The children continued chargeable till March of 1900, when their father, who had meantime been found, took them out of the poorhouse. He then applied for relief for himself and his children. The Inspector of Poor of Kilbirnie granted lodging for one night, as he considered that, although Gibson was presumably able-bodied, the lives of the children would be endangered if he refused relief. Dalry admitted liability for "James Gibson's children," and repaid the expenditure of 8d. incurred by Kilbirnie. Mrs. Gibson regained sanity, but she and her dependants were chargeable till April 5th, 1900, also from October 10th to December 12th, 1900, and from February 19th to May 20th, 1901. From this last date she and her husband took up house in Kilbirnie and lived together till January, 1902, when he again deserted, with the usual result that his wife and children became chargeable to the rates. Mrs. Gibson again became insane, and died in the Ayr District Asylum in May, 1902. The children remained in the poorhouse till August 15th, 1902, when they were taken out by their father. Kilbirnie claimed the expenses of this last chargeability against Dalry, being of opinion that the repeated chargeability of the dependants had retained James Gibson's settlement in Dalry. Dalry, however, refused liability, maintaining that, as Gibson was in desertion, the chargeability of his dependants did not affect his *status* to the extent of preventing loss of settlement by non-residence. Dalry was of opinion that Gibson lost his settlement in their parish in August, 1901. Kilbirnie then claimed on Govan,

in respect that the pauper's wife was born in Govan, and that, as her husband, being an Englishman, had no birth-settlement in Scotland, she with her children took her maiden-settlement. Govan, however, refused to admit liability, on the ground (a) that birth in Govan was not proved, and (b) that the recent decision of the House of Lords in the case of *Rutherglen v. Glasgow* (P.L.M. for 1902, page 351) established that a married woman could have no settlement apart from her husband.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Kilbirnie is liable for the relief of this pauper and her dependants. In the view of the Board, the recent decision of the House of Lords (*Rutherglen v. Glasgow*, P.L.M. for 1902, page 351) makes it clear that a married woman follows the settlement of her husband. Consequently Govan, as being only the alleged maiden-settlement of the late pauper, Mrs. Gibson, is clearly not liable. The question next arises whether the absence of the pauper's husband, James Gibson, from the parish of Dalry since August, 1898, was such as to cause the loss of his settlement in that parish notwithstanding the repeated chargeability meantime of his wife and children. In the view of the Board, in the special circumstances of this case, the chargeability of the dependants did not have the effect of preventing the loss of James Gibson's settlement in Dalry. The position, therefore, is that, as James Gibson has no settlement in Scotland, Kilbirnie, the parish in which his wife became chargeable, has no claim against any other parish in Scotland for advances made by it during the period in dispute.

Kilbarchan Parish Council v. Auchinleck Parish Council.
(25th February, 1903.)

Continuous Residence—Interruption.—Circumstances in which held that absence of six months from a parish in which the pauper's wife and mother lived prevented the acquisition of a residential settlement in that parish.

The circumstances were these :—John Ferns, aged 32 and married, was born in the parish of Auchinleck. Prior to the chargeability now in dispute he had twice been chargeable as a lunatic to Auchinleck, and he last ceased to be so on 6th July, 1898. On that date he went to Kilbarchan Parish and lodged with his mother. He remained in Kilbarchan till April of the following year in full employment; he then gave up his situation and went off on a drinking bout, without any clear idea of where he was going or what he meant to do. Meantime he had contributed nothing towards the support of either his wife or his mother. After leaving Kilbarchan he lodged in Kilmarnock for one night, and in Pumpherston for a week. He next went to the parish of Hamilton, where he remained for six months employed as a miner. On 11th October, 1899, he returned to his mother's house in Kilbarchan. On 1st October of the following year he left his mother's house and went to live with his wife, also in the parish of Kilbarchan. Hitherto he and his wife, by mutual consent, had lived apart. He had no house of his own and no furniture. Till they resumed cohabitation his wife had lived with her mother and supported herself by working in a mill. On 10th January, 1902, John Ferns again became lunatic and was sent to the asylum by the Inspector of Kilbarchan, who claimed against Auchinleck on the ground that the pauper, by absence from April to October in 1899, had failed to gain a settlement in Kilbarchan. Kilbarchan referred to the cases of *Allan v. Shaw and King* (2 R. 463), *Hanton v. Taylor* (27 S.L.R. 133), *Kilmarnock v. Leith* (P.L.M. for 1899, page 26), *Gamrie v. Fordyce* (P.L.M. for 1901, page 37), and *Alexander v. Smith* (P.L.M. for 1890, page 261) as supporting his view that the pauper had not constructively resided for over three years continuously in their parish. During his absence he had left nothing behind him in Kilbarchan; and that he had completely severed his connection with the parish is shown by the fact that, though Hamilton, where he resided, is only 20 miles distant from Kilbarchan, he had never once during that period visited Kilbarchan. Auchinleck refused to admit liability, maintaining that constructively the pauper had resided continuously in Kilbarchan for over three years before becoming chargeable, and that he had never intended to sever his connection with Kilbarchan, where all his family ties and connections were, and to which

place he returned when he had fairly got over his drunken frolic. Reference was made to these decisions:—*Wallace v. Highet and Beattie* (8 R. 345), *Nixon v. Deas* (11 R. 945), *Row v. Callander and Aberfoyle* (P.L.M. for 1899, page 495), and *Rosskeen v. Lochbroom* (P.L.M. for 1902, page 147).

The Local Government Board have issued the following award:—The Board are of opinion that the parish of Auchinleck is liable for the relief of this pauper lunatic. In the view of the Board, the absence of the pauper from Kilbarchan for the six months from April to October in 1899 was fatal to the contention that he had acquired a settlement in that parish by continuous residence there for the statutory period of three years. It is to be observed that he left no effects behind him in Kilbarchan, that he had no home there, and that during the period of his absence, though residing only 20 miles away, he did not once visit Kilbarchan. In these circumstances the Board are unable to hold that constructively the pauper resided continuously in Kilbarchan for the statutory period of three years, and they are therefore of opinion that his birth-parish—Auchinleck—is liable.

Kilmarnock Parish Council v. Muirkirk Parish Council.
(25th February, 1903.)

Parent and Child—Retention of Settlement.—Held that the fact that the Parish Council had placed three of the pauper's children in a Home, and subscribed towards their maintenance, continued the chargeability of the pauper in their parish so as to prevent loss of settlement, notwithstanding that the pauper had been maintaining herself for several years in another parish.

The facts were these:—The pauper, Sarah Dempster McAre, became chargeable in Kilmarnock in 1893. She took the settlement of her deceased husband in Muirkirk, which parish admitted liability. She had six children, the oldest aged 15 years, the youngest 4 months. Muirkirk continued to grant relief till January, 1898, when, owing to the bad conduct of the pauper, the Inspector of Muirkirk discontinued payment of aliment to the pauper personally, but took from her the three youngest children and placed them in the Roman Catholic Orphanage at Lanark. The pauper continued to reside in Kilmarnock and supported herself until 19th July, 1902, when, having applied for relief and being certified unfit, she was relieved at the rate of 2s. 6d. per week till she died on 12th October, 1902.

Kilmarnock claimed to be relieved by Muirkirk, which parish refused liability for the following reasons:—The children were not removed from the pauper by compulsion. Her aliment was stopped because she had more than once sold the children's clothing, and had shamefully neglected them. She then voluntarily handed the children over to the Parish Council, thus divesting herself of all parental care and responsibility for their upbringing. By so doing she forfeited her right to maintain the residential settlement left her by her husband. She was able-bodied and only acquired the benefit of the settlement accruing to herself and the children so long as she acted her part as a parent; but immediately she parted with the children and maintained herself without parochial relief, she began to acquire a settlement for herself. Muirkirk admits that the mother has hitherto been treated as the pauper, but contends that she was not a pauper when self-supporting.

Kilmarnock is of opinion that this woman could not have a separate settlement from her dependent children, and that the fact that she voluntarily handed over the children to the care of the Parish Council did not enable her to acquire a settlement for herself apart from her children during their chargeability.

The Local Government Board have issued the following award:—The Board are of opinion that the parish of Muirkirk is liable for the relief of this pauper. In the view of the Board, the fact that the Parish Council of Muirkirk assumed responsibility for the children of the pauper by boarding them in the Roman Catholic Orphanage at Lanark, and by subscribing towards their maintenance there, continued the pauperism of the mother and prevented the loss of her settlement in Muirkirk.

Dornoch Parish Council v. Tongue Parish Council.
(2nd March, 1903.)

Constructive Residence—*Held* that a native of Scotland who resided at Buenos Ayres did not gain for himself a residential settlement in the parish of Dornoch by maintaining his wife and children in that parish for a period of three years.

The facts of this case were :—The pauper, Annie Mackay or Hymers, is the widow of John Hymers, who died in Buenos Ayres in June, 1901. John Hymers was born in the parish of Tongue in 1865. His father was a shepherd and moved from parish to parish ; but in 1886 father and son went to live in the parish of Golspie, John Hymers obtaining employment in that parish and living in his father's house. In June, 1889, John Hymers married in Glasgow the pauper, Annie Mackay ; and two days later he and his wife sailed for Buenos Ayres. Arrived there, Hymers was employed on a farm and two children were born to him. Nine years afterwards—in May, 1898—Mrs. Hymers returned to this country, bringing her children with her. She went to live in Dornoch (her birth-parish), where, on 30th December of the same year, a third child was born. John Hymers maintained his wife and children in the parish of Dornoch till his death in Buenos Ayres in June, 1901—a period of over three years. As he left no estate, his widow, being unable to support herself and children, was obliged to apply to the Inspector of Poor of Dornoch for relief. Dornoch granted relief, but claimed against the parish of Tongue, as being the birth-parish of the deceased John Hymers. Tongue refused liability, urging—

- (1) That Hymers, before leaving for Buenos Ayres, had acquired a settlement by residence in the parish of Golspie, which he had not forfeited by absence abroad ; and
- (2) That, failing this plea, as Hymers had for over three years maintained his wife and children in the parish of Dornoch, he had gained constructively a residential settlement in that parish.

Dornoch repelled these pleas, maintaining—

- (1) That the settlement of a married woman is that of her husband ;
- (2) That, as John Hymers had never resided in Dornoch, he could not have acquired a residential settlement in that parish, notwithstanding that he had maintained his wife and children there ; as the doctrine of a constructive residential settlement does not apply unless the husband has himself established a home in the parish with a view to living there, or, at least, has made occasional visits ; and
- (3) That any residential settlement acquired by Hymers before he left for Buenos Ayres has been lost by absence.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Tongue is liable for the relief of this pauper. The Board cannot give effect to the contention that the pauper's husband constructively acquired a residential settlement in Dornoch by the fact that, although he still remained in Buenos Ayres, his wife returned to this country and lived with the children of the marriage for more than three years in that parish—her native parish—where she was maintained by him. In cases where the doctrine of constructive residence has been held to apply, there have always been circumstances (which are wanting here) inferring that the husband had made his home in the parish in which he was adjudged to have been constructively resident. The pauper, therefore, falls to be maintained by her husband's birth-parish.

Longside Parish Council v. Peterhead Parish Council.
(13th March, 1903.)

Lunacy—Derivative Settlement—Residential Settlement.—Circumstances in which *held* that a person gained a settlement by residence in a parish notwithstanding the chargeability of his imbecile son to another parish ; and that the residential settlement acquired by the father was also acquired for the imbecile son.

The facts of this case were :—The pauper, George Burnett, was born in Longside Parish, and is aged 43. He is married and has seven children. In 1899 he obtained relief from the parish of Longside to the extent of 3s. per week for an imbecile boy. This relief has continued ever since. On 28th May, 1899, Burnett, with his family, went to live in Peterhead Parish, and continued to reside there till 28th May, 1902—a period of exactly three years. He then returned to Longside. On 2nd July, 1902, being disabled by diabetes, he applied for and obtained parochial relief for himself. Longside having granted relief, sent the usual statutory notice to Peterhead, in respect that Burnett had gained a settlement for himself and family by residence in Peterhead, and that the settlement of the imbecile boy followed that of the father notwithstanding the continuance of chargeability. Peterhead, however, maintained that Burnett had not gained a settlement by residence in their parish, because during the last half-year of the three years for which he resided there he was ill and destitute, and would have asked for relief but shrank from doing so, as he looked on the 3s. paid on account of the imbecile boy as relief to himself. Further, his poverty would have been known and relief given and notified to Longside had not the Inspector of Peterhead been ill and failed to visit the family during the winter. Generally, Peterhead held that they should not be regarded as liable for a case in which much-needed relief was delayed by an omission, of which they were not aware and for which their Inspector could not in the circumstances be held responsible.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Peterhead is liable for the relief of this pauper. In the view of the Board, the pauper's residence in Peterhead for a period of three years without relief or application for relief has given him a residential settlement there. The parochial relief which during that period was afforded to him on behalf of his imbecile son does not affect the question, inasmuch as it has been decided that relief granted in such circumstances does not pauperise the parent (*Milne v. Henderson and Smith*, December 3rd, 1879, 7 R. 317). The father's settlement being now in Peterhead, that parish will also now be liable for the support of the imbecile son in terms of the above-quoted decision.

Bothwell Parish Council v. Dalziel Parish Council.
(24th March, 1903.)

Loss of Settlement.—Held that a chargeability which was not intimated to the parish of settlement did not prevent loss of settlement by absence of over three years.

The circumstances were these :—Rose Ann Thackney or Rafferty, aged 65 years, a widow, born in Ireland, became chargeable to Bothwell Parish on 2nd March, 1898. Her husband, Arthur Rafferty, also born in Ireland, died in Rutherglen on 25th April, 1895, and at the date of his death was chargeable to Dalziel Parish on a residential settlement.

Dalziel admitted liability to Bothwell for Rose Ann Thackney or Rafferty on 7th March, 1898, in respect of the residential settlement derived from her husband, and chargeability ceased on 16th March, 1898, the pauper having refused the offer of relief in the poorhouse made by Dalziel.

The pauper left Bothwell Parish shortly after this date, and went to reside in Avondale Parish, where she became chargeable on 5th July, 1899. Dalziel received no notice or claim in respect of this chargeability. The pauper left Avondale Parish on 19th October, 1899 (to which date she had remained chargeable), and resided with various members of her family in different parishes until 6th March, 1902, when she became chargeable to Hamilton.

On 6th March, 1902, Hamilton made a claim upon Dalziel in respect that the pauper still retained the settlement derived from her husband; but Dalziel refused liability on the ground that, having received no notice or claim since the pauper's chargeability in Bothwell on 16th March, 1898, and as the pauper had been absent from Dalziel Parish for over three years, the mere fact of the intervening chargeability in Avondale did not prevent the loss, by absence, of the settlement in Dalziel.

The pauper left Hamilton Parish on 9th October, 1902 (to which date she had been chargeable), and went to reside at Hamilton Palace Colliery, in

Bothwell Parish. She again became chargeable to Bothwell, who made claim on Dalziel on the same grounds as Hamilton, but liability was again refused for the reasons above stated.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Dalziel is not liable for the relief of this pauper. Having regard to the decision of the Court of Session in the case of *Campbell v. Deas* (21 R. 64), it seems to the Board to be quite clear that on 6th March, 1902, when the pauper became chargeable in Hamilton, she had lost her settlement in Dalziel, no claim having been made on that parish in respect of the pauper for a period of over three years. It would therefore appear that the pauper, having lost her settlement in Dalziel, and not having gained a settlement in any other parish, has at present no settlement in Scotland.

Fetteresso Parish Council v. Dunnottar Parish Council.
(24th March, 1903.)

Residential Settlement—Imprisonment—Chargeability of Dependants.—Held that the chargeability of dependants during the imprisonment of their parent did not prevent him from acquiring a residential settlement.

The facts of this case were :—Alexander Stewart, after gaining a residential settlement in Fetteresso, went to live in Dunnottar. He resided there for over three years, and became chargeable in January, 1903. The Inspector of Dunnottar claimed on Fetteresso in respect that the pauper had not lost his settlement in that parish, because during his residence in Dunnottar he had been in Aberdeen Prison for a month (June to July, 1900), and his children had meantime been chargeable to Fetteresso, thereby preventing the loss of the pauper's settlement in Fetteresso. Fetteresso, however, refused liability, maintaining that the chargeability of the children did not in these circumstances pauperise the father.

The Local Government Board have issued the following award :—In the view of the Board, the chargeability of the children during their father's detention in prison did not have the effect of preventing Alexander Stewart from acquiring a residential settlement in Dunnottar. Reference may be made to the cases of *Wallace v. Turnbull* (10 M. 675), *M'Callum v. Dempsey* (1861—X. P.L.M. 360), *Chalmers v. Brackenridge* (1881—X. P.L.M., n.s., 45), and the arbitration case of *Broadwood v. Boyd* (1887—XV. P.L.M., n.s., 321).

Edinburgh Parish Council v. Makerstoun and Yetholm Parish Councils.
(6th May, 1903.)

Derivative Settlement—Forisfamiliation—Lunatic.—Held that a settlement derived from a parent is retained or lost in the same manner as a settlement acquired by residence.

The facts of this case were :—Hannah Paterson Blake was born in Yetholm Parish in 1885. From 1894 to May, 1900, she resided with her parents in Makerstoun Parish. Her parents acquired a residential settlement in Makerstoun. In May, 1900, Hannah went into domestic service and was able to maintain herself until January, 1903, when she became chargeable as a lunatic to the parish of Edinburgh. Edinburgh, being admittedly not liable, claimed (a) on Makerstoun, as the parish in which the pauper had a derivative residential settlement, and (b) on Yetholm, the parish of birth. Makerstoun contended that, as the pauper is now forisfamiliated, she reverts to her birth-settlement. Yetholm, on the other hand, urged that a derivative residential settlement is retained or lost in the same manner as an ordinary residential settlement, and that the pauper had not been sufficiently long away from the parish of Makerstoun to lose her residential settlement there.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Makerstoun is liable for the relief of this pauper. It is clear that the pauper had a settlement in the parish of Makerstoun derived from the residence of her parents there. That settlement she held in May, 1900, when she left Makerstoun to enter domestic service. From

the decision in the case of *St. Cuthbert's v. Cramond* (1 R. 174), it follows that a derivative settlement is retained or lost in the same manner as a settlement acquired by residence. In the present case the absence—being less than three years—was not sufficient to permit of the loss of the settlement, which is still in *Makerstoun*. Reference may also be made to a case recently decided by the Board, viz., *Kirkwall v. Stromness* (July 15th, 1902), P.L.M. for 1902, page 480.

Edinburgh Parish Council v. Fala and Soutra and Prestonkirk Parish Councils.
(30th May, 1903.)

Lunatic—Illegitimacy—Derivative Settlement—Residence in England.—Circumstances in which *held* that an illegitimate imbecile daughter took the settlement in Scotland derived by her mother from marriage subsequent to birth of daughter, notwithstanding that the mother meantime had died and that the husband resided in England.

The circumstances were :—Margaret Black, the pauper, is the illegitimate daughter of Isabella Black or Smail, deceased. She was born in Prestonkirk in 1864, and has been imbecile from birth. Her mother was also born in Prestonkirk. After the birth of her illegitimate daughter, Isabella Black or Smail married William Smail, a native of Fala and Soutra. In August, 1902, Mrs. Smail died at Berwick-on-Tweed, where she with her husband and the pauper had resided during the preceding eight years. On her mother's death Margaret Black went to reside with a cousin in Edinburgh, where on 25th September, 1902, she became chargeable as a certified lunatic.

Edinburgh claimed on the parish of Fala and Soutra in respect of the Scotch settlement held by the mother as the wife of William Smail, born in Fala and Soutra. But Fala and Soutra, while acknowledging the birth, denied liability on the ground that the chargeability to Edinburgh was subsequent to the mother's death, that the mother had left her illegitimate child a settlement by residence in Berwick, that as this settlement was not now available she could not fall back upon the mother's husband's Scotch settlement, but, being illegitimate, took her mother's birth-settlement, viz., Prestonkirk.

Upon Fala and Soutra refusing liability, Edinburgh claimed on Prestonkirk in respect of the mother's birth. Prestonkirk replied that, as the mother of the pauper was a married woman at the date of her death, the pauper's settlement was that of the mother's husband—Fala and Soutra.

The Local Government Board have issued the following award :—The Board are of opinion that, in answer to the question in the last paragraph of the submission—"Which of the parishes of Fala and Soutra or Prestonkirk is "liable, in order that the parish so found liable may relieve Edinburgh of the "future burden of the pauper"—the parish of Fala and Soutra is liable for the relief of this pauper.

An illegitimate child takes its mother's settlement, although that settlement be acquired by subsequent marriage of the mother (*Hay v. Thomson, Murray, Beattie, and Laing*, 18 D. 510, and others); and a person imbecile from infancy, as the pauper is, remains a perpetual pupil, and is incapable of having a settlement other than that derived from a parent (*Hopkins v. Ironside*, 3 M. 424, and *Lawson v. Gunn*, 4 R. 151). Therefore, notwithstanding the death of the mother prior to the chargeability of the pauper in this case, the mother's settlement is liable just as if she had been alive. The mother's settlement was that of her husband, and, as he had no residential settlement, his birth-parish—Fala and Soutra—must be liable.

Kilmalcolm Parish Council v. Houston Parish Council.
(20th June, 1903.)

Retention of Residential Settlement.—A pauper ceased to be chargeable on 13th March, 1899, to a parish in which he had a residential settlement; he again became chargeable on 13th March, 1902; *held* that on the date of his second chargeability he had not lost his residential settlement by absence of three years.

The facts of this case were:—Charles Swiney, the pauper, was born in Kilmalcolm in 1870. When he grew up he was employed as a farm servant. On 5th January, 1897, he became chargeable as a pauper and was relieved by Houston Parish, in respect that he had acquired a residential settlement in that parish. Chargeability ceased after a few days. In January, 1899, he again became chargeable to Houston, and was sent to Paisley Poorhouse, where he remained till 13th March, 1899, on which date his chargeability to Houston ceased. On leaving the poorhouse he went to reside in Lochwinnoch, and remained there for two months. He then returned to Houston, where he lived till the end of the year 1899. From that time onwards he went about from place to place, never residing in one parish for any length of time. So far as has been ascertained, he did not return to Houston. On 13th March, 1902, he became chargeable in Paisley. The Inspector of Paisley claimed (a) on Kilmalcolm, as the parish of birth, and (b) on Houston, as the parish in which the pauper had acquired a residential settlement.

Kilmalcolm contended that Houston was liable in respect that the pauper had not lost his residential settlement in Houston when he became chargeable on 13th March, 1902. They held that the pauper constructively resided in Houston till the end of the year 1899, and that his absence for two months in Lochwinnoch did not break the continuity of residence in Houston. In that light the pauper had not on 13th March, 1902, lost by absence his settlement in Houston. But Kilmalcolm further contended that, even admitting that the pauper ceased to live in Houston at 13th March, 1899, between that time and 13th March, 1902, there was not a sufficient interval to permit of the settlement being lost by a clear absence of three years.

Houston pointed out that, as the pauper had led a wandering life prior to his chargeability in 1899, he could not be held to have been continuously resident in their parish until the end of that year—that, in fact, his connection with the parish ceased when he left Paisley Poorhouse on 13th March, 1899; and, further, that as he had been three full years away from the parish at 13th March, 1902 (when he next became chargeable), he had lost by absence his residential settlement in Houston.

The Local Government Board have issued the following award:—The Board are of opinion that the parish of Houston is liable for the relief of this pauper. The Board cannot give effect to the argument of the Parish Council of Kilmalcolm that the pauper continued to reside in Houston till the end of the year 1899. In their view he ceased to live in Houston on 13th March, 1899, and the question for decision now is: Had the pauper, when he became chargeable on 13th March, 1902, lost by absence of three years his settlement in Houston? In the view of the Board, the settlement was not so lost. The period of absence from Houston began on 14th March, 1899; hence the absence of the pauper, when he became chargeable on 13th March, 1902, was insufficient by one day to cause the loss of the settlement in Houston. This, in the Board's opinion, clearly follows from the authorities which have been cited by both parties.

Keith Parish Council v. Alves and Cairnie Parish Council.
(10th July, 1903.)

Derivative Settlement—Forisfamiliation—Illegitimacy.—Circumstances in which held that the illegitimate daughter of a married woman, being forisfamiliated, took her own birth-settlement.

The facts were these:—On 7th January, 1903, Williamina Fraser Mann, aged 14 years and 5 months, became chargeable to the parish of Keith, being wholly disabled from inflammation of an ankle joint. She was born in Alves, and is the illegitimate daughter of Mary Mann, who was married in 1894 to Richard Fraser, labourer. The pauper resided with her mother and stepfather for six years in the parish of Cairnie. But during the winter of 1901 her mother was imprisoned for theft, and in the interval the pauper was so ill-used by the stepfather that he also was sent to prison. The mother, being released first, arranged that the pauper should live in Keith with an aunt, giving her services in return for food. She resided in Keith for five months, and then became chargeable as above stated.

Keith claimed (a) on Cairnie, as the parish in which the pauper had a derivative settlement through her mother, and (b) on Alves, as the parish of her birth.

Cairnie refused liability on the ground that the pauper, being illegitimate, and living apart from her mother, was forisfamiliarated and took her own birth-settlement. Alves contended that the pauper, being illegitimate and not forisfamiliarated, took the settlement in Cairnie derived from her mother, which had not been lost by absence.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Alves is liable for the relief of this pauper. In the view of the Board, Williamina Fraser Mann was forisfamiliarated at the date when she became chargeable, and so takes her own birth-settlement in Alves. (See *Greig v. Ross*, 10th February, 1877—4 R. 465.)

Govan Parish Council v. Eastwood Parish Council.
(14th August, 1903.)

Constructive Residence—Failure to acquire a residential settlement.—Circumstances in which held that a woman who left a parish four days before the expiry of three years' residence in it, to be confined in a Maternity Hospital, failed to acquire a settlement by residence in said parish.

The facts of this case were :—Bessie Morrison, the pauper, was born in Eastwood parish in 1878, and is unmarried. With the exception of a few days spent with her aunt in Pollokshaws in the interval between leaving one situation and entering another, she resided in Govan parish from 2nd April, 1898, till 29th March, 1901. On that date she was admitted to the Maternity Hospital in Glasgow, where she gave birth to an illegitimate child. At the time of, and for nearly two years prior to, her admission to the Maternity Hospital, Bessie Morrison lodged with a Mrs. Riddock at 13 Mansfield Street in Govan parish. She left with Mrs. Riddock her box and its contents (described by Mrs. Riddock as a few rags). She stated that she intended to return to Mrs. Riddock's house on leaving the hospital, but Mrs. Riddock affirmed that she did not intend to take her back. On 7th or 8th April, 1901, a nurse from the Maternity Hospital called on Mrs. Riddock to get clothing for the child, but got nothing, as Mrs. Riddock said there was nothing to get. On leaving the Maternity Hospital, Bessie Morrison went direct to Mrs. Riddock's house; but the latter being from home, she did not get in. She then went to her aunt in Pollokshaws, and soon afterwards removed her box from Mrs. Riddock's house. On registering the birth of her child, she gave her domicile at the date of the birth as at Mrs. Riddock's house in Govan.

She was chargeable to Glasgow parish from 16th to 30th April, 1901, and from 8th January to 11th February, 1902. Her child was also chargeable to Govan from 12th February, 1902, to July, 1902.

The question submitted to the Board was—had Bessie Morrison at the date when she became chargeable acquired by residence a settlement in Govan parish, or did her entrance to the Maternity Hospital before the expiry of her three years' residence in Govan prevent the acquisition of such residential settlement and cause her to revert to her birth parish, Eastwood?

The Local Government Board, after consideration of the case, stated that they were prepared to issue the following determination :—The Board are of opinion that the parish of Eastwood is liable for the relief of this pauper. In the Board's view, there are no sufficient grounds for holding that the doctrine of constructive residence will apply in the case. The pauper, therefore, having left the parish of Govan Combination on the 29th of March, 1901, within some four days of the time necessary for the acquisition of a settlement by residence in that parish, and neither having returned to Govan, nor possessing any house there, the parish of her birth, viz. Eastwood, must be held to be the parish of her settlement.

The Parish Council of Eastwood submitted the following arguments against the above determination :—The doctrine of constructive residence has been applied in numerous cases, and it is now clearly settled that personal presence is not necessary to the acquisition of a settlement (*Dixon v. Deas*, 17th June, 1884, P.L.M. for 1884, page 538). In estimating the value of an absence in

dealing with the question of continuity of residence, everything depends on the character of the absence or break, and it is contended that this consideration applies with equal force, although the absence occurs at the termination of the residence, notwithstanding the remarks of some of the Judges in the case of *Beattie v. Leighton and Mitchell* (20th February, 1863, P.L.M. 1862-63, page 372).

It would be unreasonable to differentiate between an absence occurring just before the termination of a residential settlement and one occurring in the middle of the period of acquisition.

The former might weigh in the determination of the question whether the absence was of such a nature as to prevent acquisition to a greater extent than the latter, seeing that in ordinary circumstances it is less likely to be incidental, but the absence might nevertheless be incidental at the termination as well as in the middle of the absence.

The Lord President in the case of *Stark v. Beattie* (23rd May, 1879, P.L.M. for 1879, page 337) said:—"The novelty of the case lies simply in this that Russell, the person who acquired the settlement after he left the Barony parish, never returned. But it does not appear to me that that introduces any difficulty into the case if it can be affirmed that he continued to reside in Barony parish down to the 6th of June." The man had actually left the Barony parish in February and never returned, but it was held that he was constructively resident in Barony till 6th June. The question was, no doubt, one of retention, but residence for retention is the same in principle as residence for acquisition.

In cases of absence the question always arises, was the absence incidental to the residence, and was it of such a nature as is consistent with continuity of residence? See the Sheriff's observations in the case of *Nixon v. Deas*, above referred to.

Now it is difficult to conceive of any absence to which the words and expressions "incidental," "transient," "not incompatible with continued residence," could be more appropriately applied than the absence of the pauper in the Maternity Hospital. She was hurried off from the lodgings where she had been for two years, while in the pains of labour, never dreaming of anything but a speedy return. She left behind her in these lodgings not very much, but certainly all that she possessed. It is true that her landlady says that she had made up her mind not to allow her to return, but no intimation to this effect was made to the pauper, and the latter must have had, in consequence, every reason to believe that the lodgings were still hers. All her subsequent actions go to support the contention that until she failed to gain admission to the lodgings these were her recognised home. *She had no other.* The statement of the landlady "that she had made up her mind when she left on 29th March not to allow her to return" might very well be considered open to suspicion, but in any case has little or no bearing on the question. The actual circumstances coupled with the pauper's intention are alone pertinent. See the observations of Lord Deas on "Intention" in the case of *Beattie v. Smith and Paterson*, October 25th, 1876 (4 P.L.M., 642).

In the whole circumstances of the case, it is argued that the pauper's residence in Govan cannot be held to have terminated on her removal to the Maternity Hospital on 29th March, 1901, but that there is every ground for holding her constructively resident in that parish till her discharge from the hospital on 8th April.

To the foregoing the Local Government Board replied that they "see no reason which would justify them in departing from their finding as 'intimated,' in their 'letter of the 14th August. In the view of the Board, 'the present case is differentiated from the cases cited by you by the 'circumstance that the pauper never in fact returned to or resided in the 'parish of Govan after she left it on 29th March.'"

Glasgow Parish Council v. Paisley Parish Council.
(26th August, 1903.)

Industrial School—Parent and Child—Derivative Settlement.—Held (1) that payments made by a Parish Council for a child in an industrial school did not

pauperise the parent of the child so as to prevent the acquisition of a residential settlement, and (2) that a child whose father is dead takes, on the death of its mother, the settlement of its father.

The circumstances were these:—Catherine Harrison or Kelly or Donald was born in Glasgow. Her husband died in January, 1888, leaving her a residential settlement in Abbey (now Paisley) Parish. She was on the roll of Abbey Parish till 12th August, 1889. Being then offered indoor relief, she refused it, and removed to Glasgow, where she resided for a period of six years and ten months without applying for or receiving relief. In October, 1889, her illegitimate boy, William, aged 10 years, having got beyond control of his mother, was committed to an industrial school, where Abbey Parish paid for his maintenance till 2nd December, 1893. In June, 1896, Catherine Harrison or Kelly or Donald died in Glasgow, and thereupon Jane and George, her two other children (aged respectively eleven and seven), became chargeable to the parish of Glasgow. Jane was the legitimate daughter of the pauper; George was illegitimate, having been born some time after the death of the pauper's husband.

Glasgow claimed to be relieved by Paisley on the ground that the derivative residential settlement in Paisley held by the mother in 1889 had been retained by the chargeability of the boy William; but Paisley refused liability, opposing the plea of Glasgow, and maintained that the absence of Mrs. Donald from Paisley for a period of six years and ten months, without receipt of, or application for, relief, had severed her connection with Paisley.

Glasgow urged that, as the maintenance of the boy William in the industrial school was provided out of the poor rate, it was equivalent to parochial relief to the mother, and pauperised her. Reference was specially made to the arbitration case of *Edinburgh v. St. Cuthbert's* (P.L.M. for 1876, page 103), in which the arbiter (Sheriff Guthrie Smith) says:—"A pupil is not personally a pauper, but is a burden on his parents. The separation of the mother and son was a legitimate act of administration deemed advisable in the interests of the boy, but still any relief given to him was relief given to the mother." The mother was unable to contribute anything towards William's maintenance.

Glasgow further contended that, even failing the above plea, the legitimate child, Jane, took, on the death of her mother, the settlement of her deceased father in Paisley.

Paisley, on the other hand, held that the rebellious conduct of William had the effect of severing him from his parent, and of rendering it possible for her to acquire an independent settlement. They also pointed out that the detention of the boy in an industrial school was not pauperism in the strict sense of the word, and ought not to have the effect of pauperism in preventing the loss of a settlement.

The Local Government Board have issued the following award:—The Board are of opinion that the parish of Paisley is liable for the relief of Jane Donald, and the parish of Glasgow for that of the boy, George Harrison—children of the deceased Catherine Harrison or Kelly or Donald.

In the Board's view, the case of Jane Donald, the legitimate child, is ruled by the decisions in the cases of *St. Cuthbert's v. Cramond* (November 12th, 1873, 1 R., 174), and *Beattie v. M'Kenna and Wallace* (March 8th, 1878, 5 R., 737), where it was held that, on the death of the father, his settlement enured to his children. The concluding remarks of Lord Shand in *Beattie's* case are much in point. Lord Shand says:—"On the mother's death the child's hold on the mother's parish is at an end, and she takes her father's settlement." Reference may also be made to Lord Adam's opinion in *Shotts v. Bothwell and Rutherglen* (24th November, 1896, 24 R., 169). It is admitted that the father at the time of his death had a settlement in the Abbey (now Paisley) Parish, which parish must, therefore, in the opinion of the Board, be held liable for the daughter Jane.

As regards the settlement of the younger child, George, who is illegitimate, the Board are of opinion that the settlement must be held to be in the parish of Glasgow. The Board cannot, in the circumstances, assent to the view that the payments by the Parish Council of Paisley for the boy William in the industrial school up to 1893 constituted, as pleaded by Glasgow, parochial relief to his mother and pauperised her. George Harrison will, therefore, follow the settlement in Glasgow acquired by his mother, and left to him at her death.

Govan Parish Council v. Urquhart (Inverness) Parish Council.
(3rd September, 1903.)

Lunatic—Foreigner—Sharing of Liability.—Circumstances in which the parties agreed, on the suggestion of the Local Government Board as arbiter, to share the liability between them.

The facts of this case were :—The father of the pauper, William Wilson Macdonald, was born in the parish of Urquhart and Glenmoriston. He had practised as a solicitor in England for fifty years prior to his death. He latterly resided in Southport, England, but was in the habit of spending some months of every year in Urquhart, where he owned a small cottage. His son, William Wilson Macdonald, was born in Dursley, Gloucestershire, England, in 1868. He was an imbecile from birth. From 1884 till 1890 his father boarded him in Larbert Institution for Imbeciles. Afterwards he boarded him partly in a private house in Larbert and partly in Glasgow Royal Asylum. He paid for his son's maintenance till the time of his own death in February, 1897. After his death, however, it was found that his affairs were hopelessly insolvent, and, in consequence, his son, William Wilson Macdonald, became chargeable to Govan Parish Council. He was maintained at the cost of Govan till his death in January, 1903. Govan was of opinion that the pauper, having been imbecile from birth, adhered to his father's settlement, wherever that might be, and was not removable to the parish of his own birth in England. As the father had no settlement in England at the time of his death, Govan contended that his birth-settlement in Scotland, viz. Urquhart, was liable for the imbecile son. Urquhart, however, refused to admit liability, maintaining that the pauper was removable to England.

After considering the case the Local Government Board wrote to the parties as follows :—With reference to the above case, I am to state that the Board have given the fullest consideration to its merits and to the points of law involved, and they are prepared to issue a determination. Recognising, however, the difficulty and exceptional nature of the case, they direct me to say that, in the circumstances, they would view with satisfaction any arrangement by which the two parishes should agree to divide the liability for maintenance. This course would, in their view, substantially meet the justice of the case, and be unattended by hardship to either party. They will, therefore, be glad to know as soon as possible whether the Parish Councils concerned would prefer such a course ; if not, a determination will at once be issued.

Both of the Parish Councils agreed to the suggestion to divide the liability between them.

Denny Parish Council v. Muiravonside Parish Council.
(7th September, 1903.)

Residential Settlement—Interruption—Imprisonment.—Held that imprisonment does not interrupt the process of acquiring a residential settlement notwithstanding that it may cause dependants to become chargeable.

The facts of this case were :—Prior to 1st September, 1898, John Miller had a residential settlement in Denny Parish. On that date he went to live in Muiravonside. Being imprisoned for one week in June, 1899, his wife became chargeable in Muiravonside, and Denny admitted liability. On 14th March, 1902, Miller himself became chargeable in Muiravonside. Muiravonside claimed on Denny, in respect that the chargeability of Mrs. Miller in 1899 had retained the pauper's residential settlement in Denny. Denny, however, contended that the chargeability of the wife did not pauperise the husband, who had acquired a settlement in Muiravonside by residing there for over three years.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Muiravonside is liable for the relief of this pauper. In the view of the Board, the chargeability of Mrs. Miller during her husband's detention in prison did not have the effect of preventing John Miller from acquiring a residential settlement in Muiravonside. Reference may be made to the cases of *Wallace v. Turnbull* (10 M. 675), *McCallum v. Dempsey* (3 P.L.M. 360), *Chalmers v. Breckenridge* (X. P.L.M., n.s., 45), and to the arbitration cases of *Broadwood v. Boyd* (XV. P.L.M., n.s., 321) and *Fetteresso v. Dunnottar* (P.L.M. for 1903, 333).

Balfon Parish Council v. Glasgow Parish Council.
(8th September, 1903.)

Industrial School—Continuous Chargeability—Derivative Settlement.—Held that the settlement of a pupil cannot change during the continuance of chargeability in an industrial school, notwithstanding a change in the settlement of the parent from whom the pupil's settlement is derived.

The circumstances were these :—Richard Holmes was born in Govan Parish in 1890. He is the illegitimate son of Elizabeth Holmes, now the wife of George Goldie, brassfinisher, whom she married on 5th May, 1902. In 1897 Richard Holmes was sent to Mossbank Industrial School, the Magistrate's warrant ordering his detention there till he reached the age of 16. As his mother was unmarried at the date of committal, and had not gained a residential settlement, Balfon, the parish of her birth, became liable to contribute toward the cost of Richard in the industrial school. But when Elizabeth Holmes married George Goldie she took the settlement of her husband, which was in Glasgow Parish. Balfon then claimed that the settlement of Richard changed with that of his mother, and that Glasgow was now liable to pay the claim by the industrial school. Glasgow refused to admit this plea, being of opinion that the settlement of Richard Holmes could not change during the continuance of his chargeability in the industrial school.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Balfon is liable for the relief of this pauper. It is now established law that a settlement cannot change during the continuance of chargeability. For a statement of the reasons on which this opinion is based, the Board refer to the arbitration case of *Port-Glasgow v. Inverurie*, previously decided by them, and reported in the *Poor Law Magazine* for 1902, page 272. Balfon being liable at the date when Richard Holmes was committed, and having remained so continuously, cannot now transfer the burden to Glasgow, notwithstanding that the mother may have meantime acquired a settlement in Glasgow.

Birsay Parish Council v. Rousay Parish Council.
(9th September, 1903.)

Widow—Residential Settlement.—Circumstances in which held that a widow had gained by residence a settlement which she took in preference to a settlement derived from her deceased husband.

The facts of this case were :—The pauper, Jean Linklater or Pearson, is the widow of David Pearson, who died in 1875, having a birth-settlement in the parish of Rousay and Egilshay. After her husband's death Mrs. Pearson became chargeable as a pauper in the parish of Birsay and Harray. Birsay claimed on Rousay, in respect of the husband's birth-settlement. Rousay admitted liability, and continued to pay aliment down to August, 1892, Rousay then refused to grant further outdoor relief, and offered relief only in the poorhouse. The pauper declined to accept this, and ceased to be chargeable. She continued to live in Birsay, and a period of over five years elapsed before (in March, 1899) she again became chargeable in Birsay. Birsay claimed to be relieved by Rousay in respect that the settlement derived from the husband still endured. Birsay urged that Mrs. Pearson continued to be a proper object of parochial relief during the period of her residence in Birsay ; that, on his usual quarterly visits to a pauper residing in the same house, Mrs. Pearson frequently complained of her circumstances, and was referred to Rousay's offer of indoor relief. Rousay, on the other hand, contended that Mrs. Pearson, by maintaining herself for a period of over five years in Birsay, during which no application for relief was received from her, acquired a settlement by residence in Birsay.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Birsay is liable for the relief of this pauper. In the view of the Board, upon the facts as stated, the pauper, by residing in Birsay for a period of over three years prior to March 8th, 1899, without receiving relief, gained a residential settlement in that parish.

Maybole Parish Council v. Kirkoswald and Girvan Parish Councils.
(22nd September, 1903.)

Parent and Child—Forisfiliation.—Held that, where the father is dead, his child, not being mentally incapacitated, becomes forisfiliated on the attainment of puberty.

The facts of this case were :—Agnes Earl, the pauper, was born in Kirkoswald Parish in April, 1889. Owing to physical inability she has never been able to contribute towards her own maintenance, but has lived in family with her parents. On 30th April, 1902, owing to the fact that her father, John Earl, was a patient in Ayr Hospital, the pauper's mother applied to the Parish Council of Ayr and received relief for herself and children. Ayr claimed on Girvan, the parish of the husband's birth. On 13th June, 1902, Girvan admitted liability, but expressly excluded Agnes from the admission. On 14th June, 1902, Mrs. Earl again applied for and received relief, this time from Kirkoswald. As before, Girvan admitted liability, excluding Agnes. A third application for relief was made in July in the parish of Maybole, and similarly dealt with. On 16th October, 1902, application for relief was made to the Inspector of Poor of Maybole on behalf of Agnes Earl, then 13½ years old, and living in family with her mother. She was stated to be wholly disabled by hip disease, but not mentally incapacitated. The Inspector of Poor of Maybole granted relief, and then claimed (a) on Kirkoswald, as the parish of the pauper's birth, and (b) on Girvan, as the parish of settlement of the deceased father. Both Kirkoswald and Girvan admitted that Maybole was not liable, and that one or other of them must be liable.

Kirkoswald maintained (1) that Agnes Earl had always been, and still was, unable to earn anything by her own industry, and consequently was incapable of forisfiliation; (2) that not having been forisfiliated in April, 1902, when relief was given to the mother and children in Ayr, she was then, and continued to be, in the same position as the pupil children of the family; and (3) that her settlement at that date was in her father's birth-parish, and, as the pauperism had continued ever since, her settlement was unchanged.

Girvan contended that the pauper, Agnes Earl, was never recognised by them as a dependant; that she was *minor pubes*, and, not being mentally incapacitated, became forisfiliated or emancipated immediately on her father's death, not until after which did she become chargeable; and that, therefore, she fell to be relieved by her own birth-parish, and not by the birth-parish of her deceased father.

The Local Government Board have issued the following award :—The Board are of opinion, and are prepared to issue a determination to the effect, that the parish of Kirkoswald is liable for the relief of this pauper. In the view of the Board, Agnes Earl, the pauper, was forisfiliated in October, 1902, when application for relief was made on her behalf; and, as her father's settlement was one of birth, she falls to be supported by her own birth-parish. The Board do not regard the fact that the pauper lived in family with her mother, who was in receipt of relief, as affecting the question of settlement. The Board have already expressed a general opinion on a somewhat similar question of forisfiliation in a case submitted to them by the Parish Councils of Fordoun and Marykirk (P.L.M. for 1902, page 375), where they state that "in the case of *Craig v. Greig and Macdonald* (1 M. 1172) it is established that, where the father is dead, his child, not being mentally incapacitated, "becomes forisfiliated or emancipated on the attainment of puberty."

Govan Parish Council v. Greenock Parish Council.
(21st October, 1903.)

Interpretation of Section 1 of the Poor Law (Scotland) Act of 1898—Husband and Wife—Lunatics.—Held, that in terms of the proviso to Section 1 of the Poor Law (Scotland) Act of 1898, where a wife was chargeable as a lunatic at the commencement of the said Act, the parish to which she was then chargeable remains liable for her maintenance for the next four years, notwithstanding any other settlement which her husband may have acquired.

The facts of this case were :—The pauper, Annabella Mulholland or Angus,

is the wife of William Angus, iron ship plater, who was born in Govan parish. William Angus resided in Greenock from 5th July, 1893, to 14th May, 1898—a period of nearly five years. Mrs. Angus has been chargeable as a lunatic as follows:—

13th to 20th March, 1894.

28th April to 18th October, 1894.

4th April to 13th June, 1896.

Each of these chargeabilities occurred in Greenock, and the Inspector of Greenock claimed on Govan, the parish of the husband's birth. Govan admitted liability, as at this period there was no question of Angus having gained a settlement in Greenock. After leaving Greenock, Angus resided for short periods in Port-Glasgow and Govan respectively. On 28th June, 1898, Angus and his wife being then residing in Port-Glasgow, Mrs. Angus again became insane, and was sent to the asylum by the Inspector of Poor of Port-Glasgow. She remained in the asylum from 28th June to 9th December, 1898. Port-Glasgow claimed on Govan, as Greenock had done; but Govan now refused to admit liability on the ground that William Angus (the lunatic's husband) had now acquired a settlement by residence in Greenock, having resided there from April, 1893, to 14th May, 1898 (a period of over five years). Port-Glasgow then claimed against Greenock, but Greenock also refused liability, denying the alleged completeness of a five years' residence in their parish. Port-Glasgow now raised an action in the Sheriff's Small Debt Court at Greenock against both Govan and Greenock, either jointly or severally, for the cost of maintaining Mrs. Angus in the asylum. The Sheriff held that Greenock was not liable, in respect that William Angus, the pauper's husband, had not resided for a complete five years in Greenock, his residence there having begun not earlier than 28th June, 1893, and having ended on 14th May, 1898. Decree was therefore granted against Govan, as the parish of the husband's birth-settlement, and the sums decreed for were paid by Govan.

Mrs. Angus again became chargeable as a lunatic on 25th October, 1899. This is the period now in dispute. As the chargeability occurred in Govan, she was sent to the asylum by the Inspector of Poor of that parish. Govan then claimed against Greenock—this time in respect of a *three* years' residence in Greenock; but Greenock refused liability, maintaining that William Angus had not acquired a residential settlement in their parish, and that in any case as Mrs. Angus was chargeable to Govan on 1st October, 1898, at the date when the Poor Law Act of 1898 came into force, in terms of the proviso to Section 1 of that Act, her settlement would not change for the next four years.

Govan urged (1) that, lunacy being an exceptional disability, the chargeability of a wife (who is a dependant) does not of itself pauperise the husband, nor prevent him from gaining a settlement by industrial residence; (2) that William Angus acquired a settlement by three years of such residence in Greenock parish, notwithstanding the chargeability of his wife on different occasions; and (3) that the proviso to Section 1 of the Poor Law Act of 1898 applies to the person gaining the settlement rather than to the pauper dependant, and that, as William Angus was not personally chargeable, the proviso does not affect the case.

Greenock pleaded (1) that, as the residence of William Angus in Greenock was not *immediately* before the passing of the Act of 1898, it did not confer on him a settlement in terms of Section 1 of that Act; (2) that in any case the chargeability of Mrs. Angus as a lunatic incapacitated her husband from acquiring a settlement by residence; (3) that the proviso to Section 1 of the Poor Law Act of 1898 expressly excludes from the benefit of said section for a period of four years such persons as may be chargeable to any parish at the commencement of the Act, and that, as Mrs. Angus was so chargeable, her settlement did not change; (4) that the present claim is for a period within the four years to which the proviso applies.

The Local Government Board have issued the following award:—The Board are of opinion that the parish of Govan Combination is liable for the relief of this pauper.

On the facts as stated, the pauper was *de facto* chargeable to the parish of Govan Combination at 1st October, 1898, when the Poor Law (Scotland) Act

of that year became operative. By Section 1 of that Act it is provided "that nothing herein contained shall until the expiration of four years from the commencement of this Act be held to affect any persons who at the commencement of this Act are chargeable to any parish in Scotland." This appears to the Board to mean that none of the provisions of the Act are to apply to any case becoming chargeable inside of these four years in the circumstances stated, i.e., before 1st October, 1902. But the present question arises out of a chargeability which began in October, 1899. Accordingly, in the Board's view, the Act will not apply; and, as before stated, the parish of Govan must still be held to be liable.

Fordyce Parish Council v. Bellie Parish Council.
(18th November, 1903.)

Parent and Child—Retention of settlement—Relief to dependants of an able-bodied man.—Held that parochial relief granted to the children of an able-bodied man does not prevent the loss of a residential settlement.

The circumstances were:—Alexander Garrow was born in the parish of Bellie. He has been employed as a farm servant. On 7th December, 1888, he married Jessie Innes. For nine years prior to 30th October, 1899, he lived with his wife and family in the parish of Fordyce and acquired a residential settlement there. On 30th October, 1899, he left Fordyce and was employed in other parishes. On 6th June, 1901, he brought his wife and children to the parish of Fordyce, and on the same day his wife died in her father's house. Garrow then arranged to board his children, Helen (11) and Alexander (8), with their grandmother in Fordyce, himself returning to the parish of Bellie. Soon afterwards, however, he left Bellie, and was employed in various parishes during the next thirteen months.

He then went to England and ceased to send money for the support of his children. At the same time he ceased to communicate with his mother-in-law with whom his children were boarded. The latter in consequence applied for relief on behalf of the children, and on 12th September, 1902, they were placed on the Roll of Poor by the parish of Fordyce. Fordyce then claimed on Bellie as being the parish of the father's birth. On 4th November, 1902, the Inspector of Poor of Fordyce sent a second statutory notice to the Inspector of Poor at Bellie, being of opinion that at said date Garrow had lost by absence his residential settlement in Fordyce and reverted to his birth-parish, and that the children followed their father's settlement. Bellie refused liability on the ground that Garrow's residential settlement in the parish of Fordyce had not been lost.

The children ceased to be chargeable on the 27th of January, 1903, the father having sent ten shillings to the grandmother; but, as he sent nothing more, chargeability recommenced.

Fordyce parish contended that the children followed their father's settlement, and that he lost his settlement in their parish in November, 1902, and reverted to his birth-settlement.

Bellie contended that the chargeability of the children prevented the loss of the residential settlement acquired by the pauper in Fordyce.

The Local Government Board have issued the following award:—The Board are of opinion that the parish of Bellie is liable for the relief of the children of Alexander Garrow. In the view of the Board, the chargeability of the children of Alexander Garrow to Fordyce parish did not have the effect of preventing the loss of Garrow's settlement in that parish, Garrow being an able-bodied man in no wise entitled to relief. He, therefore, in the opinion of the Board, having lost by absence his settlement in Fordyce, reverts to his birth-settlement in Bellie, which settlement enures to his children.

Reference may be made to the recent House of Lords' case—*Rutherglen v. Glasgow* (4 F. 19), and to that of *Hunter v. Henderson*, January 30, 1895, (22 R. 331).

Port-Glasgow Parish Council v. Falkirk Parish Council.
(3rd December, 1903.)

Forisfiliation.—Circumstances in which *held* that a boy aged 15 was forisfiliated, and in consequence took his own birth-settlement.

The facts of this case were :—Henry M'Manus was born in Falkirk in July 1887. His mother was a street-singer, unmarried, and a native of Port-Glasgow. In 1891, Henry M'Manus was deserted in Glasgow by his mother, and became chargeable to that parish. Liability was admitted by Port-Glasgow, the parish of the mother's birth. Port-Glasgow boarded out the boy in Smyllum Orphanage, Lanark, and continued to pay for his maintenance there till he was over 14 years of age. As a rule, the parish of Port-Glasgow, after withdrawing relief on the ground that the children are old enough to work for themselves, leave their children in the Orphanage, trusting that the Sisters of Charity will find suitable employment for them. But, as Henry M'Manus was somewhat backward, it was difficult to obtain employment for him; and, in consequence, the Sisters of Charity found it necessary in November, 1902, to apply to the Inspector of Poor of Lanark for relief on his behalf. Lanark had afforded relief to the extent of £5 5s. before work was found for M'Manus. Lanark then claimed against (a) Port-Glasgow, as the parish of his mother's birth, and (b) Falkirk, as the parish of the pauper's own birth. Both Falkirk and Port-Glasgow agreed that either one or other of them was liable.

The Local Government Board have issued the following award :—In the view of the Board, Henry M'Manus was forisfiliated (being over 14 years of age, and living apart from his mother) when the Sisters of Charity made application on his behalf, and when, in consequence, he was relieved by Lanark in 1902; accordingly he had a residential settlement in Falkirk, being the parish of his birth. Reference is made to the case of Greig v. Ross (4 R. 465).

Rathven Parish Council v. Banff, Fraserburgh, and Botriphnie Parish Councils.
(19th December, 1903.)

Constructive Residence—Chargeability of wife of able-bodied man.—Circumstances in which *held* (1) that a hawker had constructively resided in a parish sufficiently long to gain a settlement, and (2) that the chargeability of his wife did not affect his settlement, he being an able-bodied man.

The circumstances of this case were :—Martha M'Intosh or Ord is the wife of James Ord, a hawker, who was born in Botriphnie parish. James Ord and his wife lived together as follows :—

Macduff, - - - - -	2 years.
Fraserburgh, - - - - -	14 years.

In October, 1894, the parties removed to Banff, and while there the following applications for relief were made. Relief was granted upon each occasion, and the claim admitted by Fraserburgh :—

24th October, 1894—Husband ill.
26th October, 1894—Husband in desertion.
6th November, 1894—Mrs. Ord ill of catarrh.
7th February, 1895—Husband in desertion.
1st February, 1897—Husband in desertion.
29th September, 1897—Husband in desertion.
30th October, 1897—Cause not stated.
28th February, 1898—Mrs. Ord homeless.

In August, 1898, James Ord and his wife went to live in Fraserburgh. They lived there till Whitsunday, 1899, when they removed to Banff. They lived together in Banff till Whitsunday, 1901. Ord then separated from his wife, and took a house for her in Banff, where she sometimes resides. He pays a rent of £3 for this house, and makes his wife an allowance for her maintenance. Since leaving his house in Banff, Ord has been moving about the country as a hawker. On 22nd October, 1901, Mrs. Ord applied to Banff for

relief, on account of the desertion of her husband. The Inspector of Poor of Banff gave her an order for groceries to the value of 2s. 6d. On hearing of this her husband returned and paid the 2s. 6d. The Inspector of Banff made claim on the parishes of Fraserburgh and Botriphnie in respect of this application, but the claim was not admitted. Mrs. Ord, who occasionally hawks articles for sale about the country, became chargeable to the parish of Rathven on 21st March, 1903, and the Inspector of Rathven claimed on Botriphnie, Banff, and Fraserburgh, who each denied liability, while admitting that Rathven was not liable.

Fraserburgh contended that the settlement admittedly acquired by James Ord in their parish had been lost by absence for more than the statutory period, and that the settlement was not retained by any relief given to Mrs. Ord, as relief given to the wife of an able-bodied man does not pauperise the husband.

Botriphnie contended that the home of James Ord had been sufficiently long in Banff to enable him to acquire a residential settlement there for himself and for his wife, and that his absences from Banff were chiefly to be attributed to the nature of his occupation of hawker. Botriphnie submitted a letter from James Ord, stating that he considered his home to be in Banff.

Banff simply stated their opinion that James Ord had not acquired by residence a settlement in their parish.

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Banff is liable for the relief of Mrs. Martha M'Intosh or Ord. In their view the husband has had his home in Banff since May, 1899. It cannot be successfully maintained that he is in desertion, for when he ceased to live with his wife, he took a house for her, for which he pays rent, and he has continued to contribute towards her maintenance. The Board do not regard Mrs. Ord's application for relief in October, 1901, as in any way affecting the case, Ord being then an able-bodied man, who promptly repudiated the application and repaid the sum given to his wife. Further, it is to be pointed out that Ord's frequent absences from home are consistent with his occupation of hawker.

New Monkland Parish Council v. Eastwood Parish Council.
(30th December, 1903.)

Interpretation of Section 1 of the Poor Law (Scotland) Act of 1898—Residential Settlement—Chargeability.—*Held*, following the decision of the Court of Session in the case of *Stornoway v. Edinburgh* (4 F. 998), that residence of three years does not confer a settlement if prior to the passing of the Poor Law Act of 1898 there has been chargeability as a pauper.

The facts of this case were :—James Clelland was born in New Monkland Parish. Prior to June, 1895, he resided for three years and ten months in the parish of Eastwood. Thereafter he was chargeable as a pauper to Eastwood for the following periods :—

18th June to 27th September, 1895.

9th October, 1895, to 4th July, 1896.

Eastwood made no claim on the birth-parish, though entitled to do so, but accepted the liability. James Clelland continued to reside, and to support himself, in Eastwood till 15th May, 1899, when he left Eastwood. On 4th January, 1900, he became chargeable to New Monkland, who claimed on Eastwood, in respect that a residential settlement had been acquired and retained in that parish.

The following considerations were urged by the Parish Council of New Monkland : (1) That, as James Clelland had resided in the parish of Eastwood for over three years without application for, or receipt of, relief, he had acquired a settlement in that parish ; (2) that, as subsequently he had resided in Eastwood from 4th July, 1896, to 15th May, 1899, his settlement in Eastwood was still available when he became chargeable in January, 1900 ; (3) that, as the chargeabilities in 1895 and 1896 were not intimated to the parish of New Monkland, that parish was afforded no opportunity of verifying the chargeabilities in question, and ought not be bound by the action of

another parish. New Monkland further pointed out that, in previous decisions, the Local Government Board, founding on the case of *Falkirk v. Stirling and Govan* (P.L.M. for 1900, page 410), had decided that a chargeability occurring prior to the passing of the Poor Law Act of 1898 did not nullify the effect of a three years' residence also prior to the date of that Act. They admitted that the recent decision of the Court in the case of *Stornoway v. Edinburgh* (P.L.M. for 1902, page 532) was adverse to this view, but submitted that the Local Government Board in the subsequent case of *West Calder* (P.L.M. for 1903, page 103) had refused to be bound by the principles laid down by the Judges in the *Stornoway* case. They also pointed out that Section 1 of the Act of 1898 makes special provision for chargeability occurring after the acquisition of a settlement by three years' residence but before the commencement of the Act, but only where such chargeability actually existed at the date when the Act came into force.

Eastwood contended that the case was identical in principle with the *Stornoway* case, and fell to be decided in terms of the decision of the Court therein. They admitted that a different interpretation of the law had reasonably been held to result from the decision in the case of *Falkirk v. Stirling and Govan*; but maintained that the arbiters must follow the more recent ruling of the Court.

The Local Government Board have issued the following award:—The Board are of opinion that the parish of New Monkland is liable for the relief of this pauper. In their view, this case is ruled by the decision in the case of *Stornoway v. Edinburgh* (4 F. 998). In terms of that decision, the chargeability of James Clelland in 1895 and again in 1896, prior to the passing of the Poor Law Act of 1898, prevented him from obtaining a settlement in Eastwood under the provisions of that Act by virtue of his residence of three years in that parish prior to 1895. Accordingly, when he became chargeable in 1900, he had no residential settlement, and reverted to his birth-parish, New Monkland.

NO. 9.—ARBITRATION. POOR LAW ADMINISTRATION. STATUTORY NOTICE.
LUNATIC PAUPER.

Edinburgh Parish Council v. Greenlaw Parish Council.
(14th March, 1903.)

Statutory Notice—Lunatics.—Circumstances in which held that, in terms of Section 78 of the Act 20 and 21 Vic., cap. 71, expenses might be recovered by the relieving parish from the parish of chargeability for the year immediately preceding the date of the statutory notice.

The circumstances were these:—Margaret Jeffrey, the pauper, was born in Edinburgh on 25th January, 1878. She is imbecile, and is the child of John Jeffrey, deceased, and Robina Davidson or Jeffrey, now residing in the parish of Sprouston. In 1889 Margaret Jeffrey, then aged 11, was certified to be imbecile, and was sent to Baldovan Institution at the instance of the Inspector of Poor of the old city parish of Edinburgh, where she remained till 21st November, 1892, when she was handed over to the care of her widowed mother, then residing in the parish of Eccles; the arrangement being that the mother was to receive 7s. per week of alimony from the parish of Edinburgh for the maintenance of her imbecile child. On 28th May, 1896, Mrs. Jeffrey, along with her imbecile daughter, removed from the parish of Eccles to the parish of Greenlaw, where she resided up to May, 1901. In 1901 the Parish Council of Edinburgh, who came in place of the old city Parochial Board, in revising the cases chargeable to the parish, discovered that Mrs. Jeffrey, the mother of the pauper, had resided in the parish of Greenlaw from May, 1896, and had thereby acquired a settlement for herself and her imbecile daughter, the chargeability of the daughter not pauperising the mother.

On 9th December, 1901, notice was sent to the Inspector of Poor of Greenlaw, under the Lunacy Act, 20 and 21 Vic., cap. 71, intimating that the Parish Council of Edinburgh claimed to be relieved of the future support of the pauper, Margaret Jeffrey, in respect that the mother had now acquired a settlement for her imbecile daughter in Greenlaw, and claiming repayment of all advances made by them in terms of the Lunacy Acts. After some

correspondence the Parish Council of Greenlaw, on 8th February, 1902, unreservedly admitted liability for support of Margaret Jeffrey, and relieved the parish of Edinburgh of her future support.. Since then the pauper has been maintained by Greenlaw. The parish of Edinburgh, in submitting their account to the Parish Council of Greenlaw, claimed for all sums paid to the pauper from the date of notice on 9th December, 1901, and for twelve months prior thereto, in terms of Section 78 of the Act 20 and 21 Vic., cap. 71. Mrs. Jeffrey had acquired a settlement in the parish of Greenlaw on 28th May, 1899, but as this fact was not ascertained by the parish of Edinburgh till 1901, their advances between May, 1899, and December, 1900, have been lost. They claim, however, that they are entitled to their advances for twelve months prior to the date of notice, as above stated, viz. :—from 9th December, 1900. The parish of Greenlaw declines to pay the parish of Edinburgh the advances made for twelve months prior to the date of notice, on the ground that the proviso in the section referred to does not apply to such a case as this, but only to new cases where the facts could not be ascertained, owing to the insanity of the pauper. Edinburgh contends that the proviso of the Act is unconditional and applies to this case, whose new settlement was only discovered on the revival of the cases belonging to the Edinburgh parish in 1901.

The section in question (78 of the Lunacy Act of 1857) is as follows :— “ If
 “ the parish of the settlement of any such pauper lunatic cannot be ascertained,
 “ and if the lunatic has no means of defraying the expense of his maintenance,
 “ nor any relations who can be made liable for the same, the expenses attend-
 “ ing the taking and sending such lunatic, and of his maintenance in the
 “ district asylum, shall be defrayed by the parish in and from which he was
 “ taken and sent, but with recourse, nevertheless, to such parish at any time
 “ when it shall appear that such expenses are legally chargeable to any other
 “ party or parish, against such party or parish, and who or which shall be
 “ liable also in interest and expenses ; and the Sheriff of the County in which
 “ the parish defraying such expenses in the first instance is situated shall
 “ certify under his hand the amount of such expenses ; and such certificate
 “ shall be final and conclusive as to such amount, and shall not be subject to
 “ review by any process whatsoever under any proceeding instituted for
 “ recovery of the same ; and the party entitled to recover such expenses shall
 “ proceed as accords of law against the party or the parish liable for the same,
 “ by summary process before the Sheriff of the County within which such
 “ party resides, or in which such parish is situated, and the judgment of such
 “ Sheriff shall be final : Provided always that the parish of settlement shall not
 “ in any case be liable in repayment of the expenses incurred in relation to
 “ any lunatic as aforesaid, unless written notice shall have been given by the
 “ parish or party disbursing the same to the Parochial Board of the parish of
 “ settlement, and shall then only be liable for the expenses incurred subsequent
 “ to such notice, and for the year preceding.”

The Local Government Board have issued the following award :—The Board are of opinion that the parish of Greenlaw is liable to repay the parish of Edinburgh the expenditure incurred by them on account of the above pauper for the year immediately preceding the date of the statutory notice issued by the Inspector of Poor of Edinburgh to the Inspector of Greenlaw.

In the view of the Board, the proviso to Section 78 of the Act 20 and 21 Vic., cap. 71, applies to the circumstances of this case. This seems to the Board to follow from the decision of the Court in the case of *Methven v. Arthur*, 4th February, 1869 (7 M. 477), where it was held that the proviso in Section 78, applied, not only to that section but also to the immediately preceding sections of the Act.

AUDIT.

NO. 10.—CIRCULAR TO PARISH COUNCILS AND LANDWARD COMMITTEES AS TO
(1) THE PREPARATION OF THE ASSESSMENT ROLL, (2) THE MANNER IN
WHICH PAYMENTS FOR "SUSPENSE POOR" SHOULD BE DEALT WITH, AND
(3) ILLEGAL PAYMENTS.

*Local Government Board,
Edinburgh, 18th April, 1903.*

PARISH AUDIT.

1. ASSESSMENT ROLL.

Sir,—It has been brought to the notice of the Board that for a number of years prior to the introduction of the present Audit in 1896 a Collector of Rates, who was entrusted with the preparation of the Parish Assessment Roll, appropriated large sums to his own use by means of a course of systematic fraud which the Auditors appointed annually by the Parish Council had failed to detect. The Board have accordingly given careful consideration to the whole matter of the preparation of the Roll and the collection of the Rates.

The Valuation Roll is the basis of assessment. When completed it is, under Section 12 of the Valuation Act, 1854, authenticated, and the County Clerk or Town Clerk, as the case may be, furnishes to the Clerks of the several Councils within the County or Burgh a copy of so much as relates to their respective Parishes. Although not specifically stated, it seems to be implied that the copy should be certified by the County Clerk or Town Clerk, and, looking to the important use to which the Valuation Roll is put, there can be no doubt as to the expediency of such a certificate.

The Board are therefore of opinion that the Assessment Roll should be prepared from a copy of the Valuation Roll bearing the certificate of the County Clerk or Town Clerk,—showing the total valuation of the Parish or portion of the Parish in the County or Burgh.

In many Parishes the Assessment Roll is prepared by the Collector of Rates,—a practice to which, from an accounting point of view, there are obvious objections. But, as it is the statutory duty of the Parish Council to "make up or cause to be made up" the Assessment Roll (Section 40 of the Poor Law (Scotland) Act, 1845), it appears to the Board that it would be at least expedient that, before the commencement of the collection, a Committee of the Parish Council, or some one with a local knowledge—not being the Inspector or Collector—delegated by them, should compare it with the Valuation Roll or Valuation Rolls, and also see that the deductions under the Poor Law Act of 1845 and under the Agricultural Rates Act are correct, and thereafter certify to the following effect:—

"We hereby certify that we have carefully examined the particulars in
"the various columns of this Assessment Roll, and that they are correct
"to the best of our knowledge and belief; that the Gross Rentals therein
"agree with those in the Valuation Roll; that the deductions in terms of
"the 37th Section of the Poor Law (Scotland) Act, 1845, fixed by the
"Parish Council, and under the Agricultural Rates, &c. (Scotland) Act,
"1896, have been properly given effect to; and that the total amount of
"assessment to be collected by the Parish Council is _____
"pounds _____ shillings and _____ pence.

"_____, *Parish Councillor.*

"_____, *Parish Councillor.*"

In Parishes where a certified classification of occupants is still in operation the certificate will of course be varied to the effect that the classification has been properly made.

In consequence of the complexity of the Parish Council Assessment Roll, the Board issued with their Circular of 6th July 1900 a form of Roll with columns for, *inter alia*, the rate and amount of deductions allowed to each subject in computing the Assessable Rental, and they recommended the same for adoption.

It seems, however, that in a number of Parishes old forms of Roll, which do not set out the particulars of the gross rental or the deductions, are still in use.

Such forms are in many Parishes inadequate for the purposes of examination prior to the certification above referred to and also for those of audit, and should be discontinued forthwith, and if this be not done, or undue and unnecessary labour be involved in verification of the Roll at audit, the Board think it right to bring under the notice of Parish Councils that it may be their duty to hold that the usual audit fee is insufficient remuneration for the additional work thereby rendered necessary.

It seems to the Board that it is not too much for them to ask, or for the ratepayers to expect, that Parish Councillors should take an active interest in and exercise supervision over the accounting as well as the other parochial work, and, further, see that their officers are performing their accounting duties in accordance with the Board's requirements. In the view of the Board there should be a hearty co-operation between the Parish Council and their officials in all matters relating to Parish Council administration.

2. SUSPENSE POOR.

It appears that there is considerable dubiety as to the meaning of the term "Suspense Poor," payments for whom form an item of "Maintenance" in the prescribed form of Abstract of Accounts, and that, in consequence, there is a want of uniformity in showing the cost of that class of paupers.

The heading "Payments for Suspense Poor" should embrace all payments made to those poor who are not on the Register of the Parish and are not vagrants or admittedly chargeable to other Parishes. But the item will of course be limited to the poor in suspense at the closing of the accounts. The cost of those poor persons who, although on the Suspense Roll during the year, have had their settlements determined before 15th May will not appear under this heading but under the other appropriate headings of "Maintenance" or "Medical Relief," &c., or under "Cost of Other Parish Poor."

3. ILLEGAL PAYMENTS.

The following payments not previously dealt with at audit were, during the past year, held by the Board to be illegal charges against the rates:—

Law agent's account for precognoscing witnesses in connection with representation to District Committee relative to right-of-way.

Printing bills and cleaning and lighting room for ratepayers' meeting to nominate candidates for election to Parish Council.

Printing, &c., of Valuation Roll.

Free vaccination of persons not on the Poor Roll.

When transmitting the books and accounts to the Auditor, a list of the names, addresses, and occupations of the Parish Councillors should be furnished to him.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

*The Clerk of the Parish Council, or
The Clerk of the Landward Committee.*

NO. 11.—CIRCULAR TO PARISH AUDITORS ENCLOSED COPY OF NO. 10.

*Local Government Board,
Edinburgh, 18th April, 1903.*

PARISH AUDIT.

Sir,—I enclose herewith, for your information, copy of Circular, dated 18th April 1903, addressed to Clerks of Parish Councils, and Clerks of Landward Committees.—I am, Sir, your obedient Servant,

G. FALCONAR-STEWART,
Secretary.

To the Parish Auditor.

PUBLIC HEALTH.

No. 12.—CIRCULAR TO COUNTY CLERKS DRAWING ATTENTION TO REVISED REGULATIONS FOR THE DISTRIBUTION OF THE SANITARY OFFICERS' GRANT.

*Local Government Board,
Edinburgh, 20th January, 1903.*

SANITARY OFFICERS' GRANT.

Sir,—I am directed to inform you that the Secretary for Scotland has recently had under consideration the revision of the Regulations for the distribution of the above Grant, and that His Lordship has determined that the Grant for the financial year ending 31st March 1903 and subsequent years shall be distributed as prescribed in the Regulations and Instructions laid down in the form enclosed herewith.

Under these revised Regulations there will rank against the Grant, in addition to the salaries and travelling expenses allowed under the previous Regulations, "*the reasonable travelling expenses of any Medical Officer or Sanitary Inspector of a District of a County who shall, in the opinion of the Local Government Board, devote his whole time to the duties of his office.*"

It is further provided, in addition to previous requirements, that, in order to entitle a County Council, District Committee, or other Local Authority to participate in the Grant, the arrangements made for carrying out the provisions of the Public Health or Local Government Acts, as regards the "*duties and respective relations to each other*" of the Officers, shall be approved by the Secretary for Scotland, upon the recommendation of the Local Government Board for Scotland.

This condition will be held to have been fulfilled in all those cases in which Regulations for the duties of the Officers have been approved by the Local Government Board in terms of Section 15 of the Public Health (Scotland) Act, 1897.

Where such Regulations have not been approved, no time should be lost in submitting suitable Regulations to the Board, so that they may be approved before 15th May 1903.

The "Instructions to be observed in filling up the Claim" have been revised to meet the requirements of the new Regulations.

I am to direct your attention to the enclosed form, in which the new Regulations and Instructions are fully set forth, and to request that these may be kept in view in the preparation of your Claims on the Grant in future.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The County Clerk.

COUNTIES.

REGULATIONS FRAMED BY THE SECRETARY FOR SCOTLAND FOR THE DISTRIBUTION OF THE CONTRIBUTION FROM THE LOCAL TAXATION ACCOUNT.

"CONTRIBUTION from the Local Taxation (Scotland) Account, to the Cost of Medical Officers and Sanitary Inspectors :

"I, the Right Honourable Alexander Hugh Bruce, Lord Balfour of Burleigh, His Majesty's Secretary for Scotland, hereby determine that the sum of £15,000, mentioned in the Second Section of the Local Taxation (Customs and Excise) Act, 1890, Sub-Section (III.) (a), be distributed as prescribed in the following conditions and instructions, viz. :—

"(1.) That the contribution shall, subject to the provisions contained in Section 2, Sub-Section (III.) of the Local Taxation

(Customs and Excise) Act, 1890, and until otherwise prescribed, be divided and distributed at such rate per £ on the cost of Medical Officers and Sanitary Inspectors appointed by County Councils, District Committees, and Burgh Local Authorities under the Public Health or Local Government Acts, as will exhaust, or as nearly as may be exhaust, the whole amount of the contribution.

"In addition to the salary of a Medical Officer or Sanitary Inspector duly appointed under the Public Health or Local Government Acts,

- (i.) the reasonable Travelling Expenses of a Medical Officer or Sanitary Inspector of a County (including his Travelling Expenses as Medical Officer or Sanitary Inspector of any or all of the Districts within a County), and also
 - (ii.) the reasonable Travelling Expenses of any Medical Officer or Sanitary Inspector of a District of a County, who shall in the opinion of the Local Government Board devote his whole time to the duties of his office,
- shall be held to be part of the cost of said Officers, in terms of the Local Taxation (Customs and Excise) Act, 1890, Section 2 (III.) (a).
- "The contribution will be payable from the Office of the Secretary for Scotland, upon the Certificate of the Local Government Board for Scotland.
- "(2.) That in order to entitle a County Council, District Committee, or other Local Authority to participate in the contribu-

tion, it is necessary that the arrangements made by the County Council, District Committee, or other Local Authority for carrying out the provisions of the Public Health or Local Government Acts, as regards the amount of the salaries and qualification of the Officers and their duties and respective relations to each other, shall be approved by the Secretary for Scotland, upon the recommendation of the Local Government Board for Scotland.

"No alteration of the approved salary of a Medical Officer or Sanitary Inspector shall be made without the consent of the Local Government Board for Scotland to the alteration being first obtained.

"The County Clerk or Clerk to the Local Authority shall, immediately after its occurrence, intimate to the Local Government Board for Scotland the appointment, resignation, or death of a Medical Officer or Sanitary Inspector."

(Signed) BALFOUR OF BURLEIGH.

INSTRUCTIONS TO BE OBSERVED IN FILLING UP THE CLAIM.

1. All claims must be made in the subjoined Form.*
2. The period to which the claim refers is the Year ending 15th May 19 .
No claim is to be made in respect of any period not included within the Year.
3. The claim will be made by the County Council in respect of the expenditure both by the County Council and by the District Committees in the County ; but the expenditure by the County under the Local Government Act must be stated separately from the expenditure by the District Committees under the Public Health Act.
4. In column 3 shall be entered any other office, employment, or occupation of the Medical Officer or Sanitary Inspector, apart from the office of Medical Officer or Sanitary Inspector of a County or District. The words "Private Practice" or "Consulting Practice" are to be entered when the Medical Officer engages in such practice. No claim will be made in respect of the cost of the Medical Officer of a County appointed subsequent to 26th December 1901 who engages in general private practice, or, unless in exceptional circumstances, in consulting practice, in terms of Circular of the Local Government Board for Scotland, dated 26th December 1901.
5. In column 4 of table (B) it will be specifically stated whether or not the Officer's whole time is devoted to the duties of the office.
6. The amount to be entered in column 4 of table (A) and column 5 of table (B) shall be the approved salary of the Medical Officer or the Sanitary Inspector under the Public Health or Local Government Acts, exclusive of any salary or remuneration such Officer may receive in respect of any other office or employment.
7. The Salaries paid to the Medical Officers or Sanitary Inspectors transferred from former Local Authorities are to be entered ; but no claim is to be made in respect of compensation paid to any such Officer for loss of office.
8. The Travelling Expenses to be entered shall be the amounts paid by the County Council and District Committees to the County Medical Officer and

* It was not thought necessary to print the Form.

County Sanitary Inspector, and to District Medical Officers and District Sanitary Inspectors, whose whole time is devoted to the duties of the office, in respect of travelling and subsistence when necessarily absent from home in the execution of their duty. No payment in excess of the following Rates will be allowed, viz. :—(a) For *Travelling*—the actual disbursements; (b) For *Subsistence*—7s. 6d. per day when absent during the day for not less than 10 hours, and 15s. when absent overnight. No claim is to be made in respect of the expenses of a Medical Officer or Sanitary Inspector of a District unless he is the Medical Officer or Sanitary Inspector of the County, or unless his whole time is devoted to the duties of the office.

9. The amount received from the contribution in respect of payments made by a District Committee must be placed to the credit of that District Committee. When any part of the salary or expenses of a County Officer is paid by a District Committee out of the Public Health Assessment, the amount received from the contribution in respect of such part must be placed to the credit of that District Committee.

10. The names of the Officers of each District should be entered in successive lines, beginning with the chief Officer of the District, after whose name the words "*Chief M.O.*" or "*Chief S.I.*" should be written.

11. Claims must be accompanied by a voucher or vouchers in support of each payment entered in the Claim.

I, The Right Honourable Alexander Hugh Bruce, Lord Balfour of Burleigh, His Majesty's Secretary for Scotland, hereby determine that the sum of £15,000, mentioned in the Second Section of the Local Taxation (Customs and Excise) Act, 1890, Sub-Section (III.) (a), be distributed in respect of the Grants for the financial year ending 31st March 1903 and subsequent years, as prescribed in the foregoing Regulations and Instructions.

(Signed) BALFOUR OF BURLEIGH.

Office of the Secretary for Scotland,
Whitehall, 11th November 1902.

NO. 13.—CIRCULAR TO TOWN CLERKS DRAWING ATTENTION TO REVISED REGULATIONS FOR THE DISTRIBUTION OF THE SANITARY OFFICERS' GRANT.

*Local Government Board,
Edinburgh, 20th January 1903.*

SANITARY OFFICERS' GRANT.

Sir,—I am directed to inform you that the Secretary for Scotland has recently had under consideration the revision of the Regulations for the distribution of the above Grant, and that His Lordship has determined that the Grant for the financial year ending 31st March 1903 and subsequent years shall be distributed as prescribed in the Regulations* and Instructions laid down in the Form enclosed herewith.

Under these revised Regulations, in addition to previous requirements, it is provided that, in order to entitle a County Council, District Committee, or other Local Authority to participate in the Grant, the arrangements made for carrying out the provisions of the Public Health or Local Government Acts, as regards the "*duties and respective relations to each other*" of the Officers, shall be approved by the Secretary for Scotland, upon the recommendation of the Local Government Board for Scotland.

This condition will be held to have been fulfilled in all those cases in which Regulations for the duties of the Officers have been approved by the Local Government Board in terms of Section 15 of the Public Health (Scotland) Act, 1897.

Where such Regulations have not been approved, no time should be lost in submitting suitable Regulations to the Board, so that they may be approved before 15th May 1903.

*For Regulations, see p. 37.

I am to direct your attention to the enclosed Form, in which the new Regulations are fully set forth.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Town Clerk.

INSTRUCTIONS TO BE OBSERVED IN FILLING UP THE CLAIM.

1. All claims must be made in the subjoined Form.*
2. The period to which the claim refers is the Year ending 15th May 19 .
No claim is to be made in respect of any period not included within the year.
3. In column 2 shall be entered any other office, employment, or occupation of the Medical Officer or Sanitary Inspector, apart from the office of Medical Officer or Sanitary Inspector under the Public Health Act. The words "Private Practice" or "Consulting Practice" are to be entered when the Medical Officer engages in such practice.
4. The amount to be entered in column 3 shall be the approved salary of the Medical Officer or the Sanitary Inspector under the Public Health Act (whose salary when he is Inspector of Dairies shall also be included), exclusive of any salary or remuneration such Officer may receive in respect of any other office or employment.
5. The claim must be accompanied by a voucher for each payment entered in the claim, and by a certified Extract Minute† of the appointment of each Officer, showing the amount of his salary. These documents will be returned.
6. The Certificate annexed to the claim must be signed by the Chairman, or Treasurer, or other Member of the Local Authority.

I, The Right Honourable Alexander Hugh Bruce, Lord Balfour of Burleigh, His Majesty's Secretary for Scotland, hereby determine that the sum of £15,000, mentioned in the Second Section of the Local Taxation (Customs and Excise) Act, 1890, Sub-Section (III.) (a), be distributed in respect of the Grants for the financial year ending 31st March 1903 and subsequent years, as prescribed in the foregoing Regulations and Instructions.

No. 14.—CIRCULAR TO BURGH MEDICAL OFFICERS OF HEALTH AS TO THE ORDER AND ARRANGEMENT OF THE SUBJECT-MATTER OF THEIR ANNUAL REPORTS.

*Local Government Board,
Edinburgh, 10th February 1903.*

ANNUAL REPORTS FOR 1902.

Sir,—It appears from certain of the Annual Reports for 1902 already received, as well as from last year's correspondence regarding the Reports for 1901, that sufficient attention is not given to the requirements prescribed by the Board in their Circular of 18th January 1900, relative to the order and arrangement of the subject-matter of these Annual Reports.

The following extract from the above-cited Circular clearly indicates the form in which these Annual Reports should be prepared, and the Board request that the sequence of headings therein set forth be carefully adhered to:—

"REPORTS TO BE MADE BY MEDICAL OFFICERS OF HEALTH.

"In virtue of their powers under Sec. 15 of the Public Health (Scotland) Act, 1897, the Board hereby call upon every Medical Officer of Health of a Burgh to prepare annually a Report for the year ending 31st December, which Report shall contain—

- "a. A general account of the sanitary state of the burgh, and of any measures which in his opinion should be adopted for its improvement.
- "b. A statement of the general inquiries he has made during the year, and of any special inquiries as to sanitary matters.
- "c. A general statement of any matters as to which he has given advice or granted certificates, including any action as to offensive trades and the sanitary condition of factories and workshops.
- "d. An account of his inspection of the bakehouses in the burgh, and of any proceedings taken with regard to them.
- "e. An account of the house accommodation of the labouring classes in the burgh, and of any proceedings under the Housing of the Working Classes Acts, or otherwise.
- "f. An account of any action taken under the Rivers Pollution Prevention Acts.
- "g. An account of any proceedings under the Burgh Police Act, including the substance of his half-yearly Reports on slaughter-houses (Section 280).
- "h. An account of the available means of isolation of persons suffering from infectious disease, of houses of reception, and of apparatus for disinfection.
- "i. Observations on the condition and adequacy of the apparatus provided for disinfection, and of the hospitals belonging to the Local Authority, or to which the Local Authority are entitled to send patients.
- "j. A summary of the action taken to prevent the outbreak and spread of infectious disease.
- "k. A statement as to the causes, origin, and distribution of diseases within the burgh, and the extent to which the same have depended on or been influenced by conditions capable of removal or mitigation.
- "l. A tabular statement, in such form as the Local Government Board may from time to time direct, of the sickness and mortality within the burgh.

"The Medical Officer of Health shall transmit a copy of the aforesaid Report to the Local Government Board and to the Local Authority *not later than the 31st March* immediately following the year to which such Report refers.

"Where in any burgh there is a chief Medical Officer of Health with one or more assistants or subordinates, it will not be necessary for each assistant or subordinate Medical Officer of Health to furnish a report to the Board. The chief Medical Officer of Health will report on the whole burgh."

—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

To the Medical Officer of Health.

NO. 15.—CIRCULAR TO BURGH SANITARY INSPECTORS AS TO THE ORDER AND ARRANGEMENT OF THE SUBJECT-MATTER OF THEIR ANNUAL REPORTS.

*Local Government Board,
Edinburgh, 10th February 1903.*

ANNUAL REPORTS FOR 1902.

Sir,—It appears from certain of the Annual Reports for 1902 already received, as well as from last year's correspondence regarding the Reports for

1901, that sufficient attention is not given to the requirements prescribed by the Board in their Circular of 18th January 1900, relative to the order and arrangement of the subject-matter of these Annual Reports.

The following extract from the above-cited Circular clearly indicates the form in which these Annual Reports should be prepared, and the Board request that the sequence of headings therein set forth be carefully adhered to:—

“REPORTS TO BE MADE BY SANITARY INSPECTORS.

“The Board also call upon every Sanitary Inspector of a Burgh to prepare annually a Report for the year ending 31st December, which Report shall contain—

“a. A general account of the sanitary state of the burgh as regards water supply, drainage, scavenging, nuisances, etc., together with any suggestions for its improvement.

“b. An account of his general inspections, and of any special inspections or inquiries, including the supervision of slaughter-houses and other offensive trades, and the sanitary condition of schools and of factories and workshops.

“c. An account of the condition of the common lodging-houses.

“d. An account of the condition of the dairies, cowsheds, and milkshops.

“e. An account of the condition of the burial-grounds.

“f. An account of his proceedings under the Burgh Police Act.

“g. A statement, in such form as the Local Government Board may from time to time direct, of his proceedings during the year.

“He shall transmit a copy of the aforesaid Report to the Local Government Board and to the Local Authority *not later than the 31st March* immediately following the year to which such Report refers.

“When in any burgh there is a chief Sanitary Inspector with one or more assistants or subordinates, it will not be necessary for each assistant or subordinate Sanitary Inspector to furnish a report to the Board. The chief Sanitary Inspector will report on the whole burgh.”

—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

To the Sanitary Inspector.

NO. 16.—CIRCULAR TO CLERKS TO BURGHAL LOCAL AUTHORITIES AS TO THE ANNUAL REPORTS BY SANITARY OFFICERS AND AS TO THE DUTY LAID ON MEDICAL OFFICERS OF HEALTH BY SECTION 132 OF THE FACTORY AND WORKSHOP ACT, 1901.

BURGHES.

*Local Government Board,
Edinburgh, 12th November 1903.*

ANNUAL REPORTS BY SANITARY OFFICERS.

Report to Home Secretary as to Administration of Factory and Workshop Act.

Sir,—The Local Government Board desire to remind Medical Officers of Health of the duty laid upon them by Section 132 of the Factory and Workshop Act, 1901, which requires that:—

“The Medical Officer of Health of every District Council* shall, in his annual report to them, report specifically on the administration of this Act in workshops and workplaces, and he shall send a copy of his annual report, or so much of it as deals with this subject, to the Secretary of State.”

The Medical Officer of Health is required to report on administration of the Factory and Workshop Act, 1901, only in so far as this administration is in the hands of the Local Authority. In reporting on the sanitary administration of workshops and workplaces, he should include an account of

* In the application of the Act to Scotland the expression “District Council” means the Local Authority under the Public Health Act.

the action with respect to factories, workshops, and workplaces taken under the Public Health Acts as well as under the Factory and Workshop Act.

The duties of Local Authorities in regard to workshops and workplaces are fully set forth in a Memorandum,* dated February, 1903 (B. 37268), issued by the Home Office, of which a copy is sent herewith. In respect of these duties the chief points to be reported on by the Medical Officer of Health may be thus classified:—

- (1) Sanitary condition of workshops and workplaces, including—
 - (a) cleanliness;
 - (b) air space;
 - (c) ventilation;
 - (d) drainage of floors on which wet processes are carried on;
 - (e) provision of suitable and sufficient sanitary conveniences;
- (2) Special sanitary regulations for bakehouses.
- (3) Home work. Under this heading comes the prevention of home work being carried on in dwellings that are injurious or dangerous to the health of the workers through overcrowding, want of ventilation, or other sanitary defect, or in dwellings in which infectious disease exists.
- (4) The keeping of the lists of outworkers in certain branches of industry which are to be furnished by employers, and the transmission of the name and place of employment of any such outworker who does not reside in the district to the Council of the district in which he works.
- (5) The keeping of a register of workshops.

Revised Instructions as to Annual Report by Medical Officer of Health.

With reference to Section 132 of the Factory and Workshop Act, 1901, the Board have deemed it advisable to modify headings *c* and *d* of their instructions as to the contents of the Annual Report to be made to them by Medical Officers of Health. They have at the same time taken the opportunity of revising headings *a*, *h*, and *i*. They accordingly revoke the instructions contained in their Circular of 18th January, 1900, and in virtue of their powers under Section 15 of the Public Health (Scotland) Act, 1897, they hereby call upon every Medical Officer of Health of a Burgh to prepare annually a Report for the year ending 31st December, which Report shall contain—

- a.* A general account of influences and conditions injurious or dangerous to the health of the burgh, and of the measures that in his opinion should be adopted for its improvement.
- b.* A statement of the general inquiries he has made during the year, and of any special inquiries as to sanitary matters.
- c.* A general statement of any matters as to which he has given advice or granted certificates, including any action as to offensive trades.
- d.* A specific account of the administration of the Factory and Workshop Act, 1901, in workshops and workplaces, in terms of Section 132 of that Act.
- e.* An account of the house accommodation of the labouring classes in the burgh, and of any proceedings under the Housing of the Working Classes Acts, or otherwise.
- f.* An account of any action taken under the Rivers Pollution Prevention Acts.
- g.* An account of any proceedings under the Burgh Police Act, including the substance of his half-yearly Reports on slaughter-houses (Section 280).
- h.* An account of the hospital accommodation available for persons suffering from infectious disease (including the means provided for the conveyance of such persons), and of the houses of reception, with observations on the furnishing, maintenance, administration, and adequacy of such accommodation, &c.
- i.* An account of the premises with necessary apparatus and attendance available for the destruction or disinfection of infected articles (including the means for the conveyance of such articles), also of other processes of disinfection in use, with observations on the adequacy of such arrangements and processes.

* See p. 47.

- j. An account of the action taken to prevent the outbreak and spread of infectious disease.
- k. A statement as to the causes, origin, and distribution of diseases within the burgh, and the extent to which the same have depended on or been influenced by conditions capable of removal or mitigation.
- l. A tabular statement, in such form as the Local Government Board may from time to time direct, of the sickness and mortality within the burgh.

The Medical Officer of Health shall transmit a copy of the aforesaid Report to the Local Government Board and to the Local Authority not later than the 31st March immediately following the year to which such Report refers.

Where in any burgh there is a chief Medical Officer of Health with one or more assistants or subordinates, it will not be necessary for each assistant or subordinate Medical Officer of Health to furnish a Report to the Board. Each will report to the chief Medical Officer of Health, who will report on the whole burgh.

Annual Report by Sanitary Inspector.

The Board do not propose in the meantime to make any change in their instructions as to the Annual Report by the Sanitary Inspector, which will remain as set forth in their Circular of 18th January, 1900, viz:—

The Board also call upon every Sanitary Inspector of a Burgh to prepare annually a Report for the year ending 31st December, which Report shall contain—

- a. A general account of the sanitary state of the burgh as regards water supply, drainage, scavenging, nuisances, etc., together with any suggestions for its improvement.
- b. An account of his general inspections, and of any special inspections or inquiries, including the supervision of slaughter-houses and other offensive trades, and the sanitary condition of schools and of factories and workshops.
- c. An account of the condition of the common lodging-houses.
- d. An account of the condition of the dairies, cowsheds, and milkshops.
- e. An account of the condition of the burial-grounds.
- f. An account of his proceedings under the Burgh Police Act.
- g. A statement, in such form as the Local Government Board may from time to time direct, of his proceedings during the year.

He shall transmit a copy of the aforesaid Report to the Local Government Board and to the Local Authority not later than the 31st March immediately following the year to which such Report refers.

Where in any burgh there is a chief Sanitary Inspector with one or more assistants or subordinates, it will not be necessary for each assistant or subordinate Sanitary Inspector to furnish a Report to the Board. Each will report to the chief Sanitary Inspector, who will report on the whole burgh.

Date for Furnishing Reports.

The Board have fixed the 31st March as the latest date for forwarding the Reports by the Medical Officer of Health and Sanitary Inspector. In many cases, however, it will be possible for these officers to complete their Reports at an earlier date, and the Board desire them to understand that the Reports should be forwarded as soon as they can be completed. When the Reports are printed, it is not necessary to forward the original or a manuscript copy; a printed copy will suffice, provided that no undue delay is caused by the printing.

The requirements as to the date of transmission of the Report to the Board will apply to the copy for the Home Office. That copy should be addressed to the Secretary of State, Home Office, Whitehall, London, S.W.

A copy of this Circular has been forwarded to all Medical Officers of Health and Sanitary Inspectors for their information.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Clerk to the Local Authority.

NO. 17.—CIRCULAR TO CLERKS TO RURAL LOCAL AUTHORITIES AS TO THE ANNUAL REPORTS BY SANITARY OFFICERS, AND AS TO THE DUTY LAID ON MEDICAL OFFICERS OF HEALTH BY SECTION 132 OF THE FACTORY AND WORKSHOP ACT, 1901.

COUNTIES.

*Local Government Board,
Edinburgh, 12th November 1903.*

ANNUAL REPORTS BY SANITARY OFFICERS.

Report to Home Secretary as to Administration of Factory and Workshop Act.

Sir,—The Local Government Board desire to remind Medical Officers of Health of the duty laid upon them by Section 132 of the Factory and Workshop Act, 1901, which requires that :—

“The Medical Officer of Health of every District Council* shall in his annual report to them, report specifically on the administration of this Act in workshops and workplaces, and he shall send a copy of his annual report, or so much of it as deals with this subject, to the Secretary of State.”

The Medical Officer of Health is required to report on the administration of the Factory and Workshop Act, 1901, only in so far as this administration is in the hands of the Local Authority. In reporting on the sanitary administration of workshops and workplaces, he should include an account of the action with respect to factories, workshops, and workplaces taken under the Public Health Acts as well as under the Factory and Workshop Act.

The duties of Local Authorities in regard to workshops and workplaces are fully set forth in a Memorandum,† dated February, 1903 (B. 37268), issued by the Home Office, of which a copy is sent herewith. In respect of these duties the chief points to be reported on by the Medical Officer of Health may be thus classified :—

- (1.) Sanitary condition of workshops and workplaces, including—
 - (a) cleanliness ;
 - (b) air space ;
 - (c) ventilation ;
 - (d) drainage of floors on which wet processes are carried on ;
 - (e) provision of suitable and sufficient sanitary conveniences.
- (2.) Special sanitary regulations for bakehouses.
- (3.) Home work. Under this heading comes the prevention of home work being carried on in dwellings that are injurious or dangerous to the Health of the workers through overcrowding, want of ventilation, or other sanitary defect, or in dwellings in which infectious disease exists.
- (4.) The keeping of the lists of outworkers in certain branches of industry which are to be furnished by employers, and the transmission of the name and place of employment of any such outworker who does not reside in the district to the Council of the district in which he works.
- (5.) The keeping of a register of workshops.

Revised Instructions as to Annual Report by Medical Officer of Health.

With reference to Section 132 of the Factory and Workshop Act, 1901, the Board have deemed it advisable to modify headings c and d of their instructions as to the contents of the Annual Report to be made to them by Medical Officers of Health. They have at the same time taken the opportunity of revising headings a, g, and h. They accordingly revoke the instructions contained in their Circular of 18th January, 1900, and, in virtue of their powers under Section 15 of the Public Health (Scotland) Act, 1897, they hereby call upon every Medical Officer of Health of a District of a County, or of any part thereof, to prepare annually a Report with regard to his district for the year ending 31st December, which Report shall contain—

- a. A general account of influences and conditions injurious or dangerous to the health of the district and of the measures that in his opinion should be adopted for its improvement.

*In the application of the Act to Scotland the expression “District Council” means the Local Authority under the Public Health Act.

† See p. 47.

- b. A statement of the general enquiries he has made during the year, and of any special enquiries as to sanitary matters.
- c. A general statement of any matters as to which he has given advice or granted certificates, including any action as to offensive trades.
- d. A specific account of the administration of the Factory and Workshop Act, 1901, in workshops and workplaces, in terms of Section 132 of that Act.
- e. An account of the house accommodation of the labouring classes in the district, and of any proceedings under the Housing of the Working Classes Acts, or otherwise.
- f. An account of any action taken under the Rivers Pollution Prevention Acts.
- g. An account of the hospital accommodation available for persons suffering from infectious disease (including the means provided for the conveyance of such persons), and of the houses of reception, with observations on the furnishing, maintenance, administration, and adequacy of such accommodation, &c.
- h. An account of the premises with necessary apparatus and attendance available for the destruction or disinfection of infected articles (including the means for the conveyance of such articles), also of other processes of disinfection in use, with observations on the adequacy of such arrangements and processes.
- i. An account of the action taken to prevent the outbreak and spread of infectious disease.
- j. A statement as to the causes, origin, and distribution of diseases within the district, and the extent to which the same have depended on or been influenced by conditions capable of removal or mitigation.
- k. A tabular statement, in such form as the Local Government Board may from time to time direct, of the sickness and mortality within the district.

The Medical Officer of Health shall transmit a copy of the aforesaid Report to the Local Government Board and to the Local Authority not later than the 31st March immediately following the year to which such Report refers.

Where in any district there is a chief Medical Officer of Health with one or more assistants or subordinates, it will not be necessary for each assistant or subordinate Medical Officer of Health to furnish a Report to the Board. Each will report to the chief Medical Officer of Health, who will report on the whole district.

Where the County Medical Officer is Medical Officer of Health for each of the districts in the county, the Board will hold the foregoing instructions to be complied with if the County Medical Officer furnishes a Report for the whole county, provided that in such Report each district is separately dealt with.

Annual Report by Sanitary Inspector.

The Board do not propose in the meantime to make any change in their instructions as to the Annual Report by the Sanitary Inspector, which will remain as set forth in their Circular of 18th January, 1900, viz. :—

The Board also call upon every Sanitary Inspector of a District of a County, or of any part thereof, to prepare annually a Report with regard to his district for the year ending 31st December, which Report shall contain—

- a. A general account of the sanitary state of the district as regards water-supply, drainage, scavenging, nuisances, etc., together with any suggestions for its improvement.
- b. An account of his general inspections, and of any special inspections or inquiries, including the supervision of slaughter-houses and other offensive trades, and the sanitary condition of schools and of factories and workshops.
- c. An account of the condition of the common lodging-houses.
- d. An account of the condition of the dairies, cowsheds, and milkshops.
- e. An account of the condition of the burial-grounds.
- f. A statement, in such form as the Local Government Board may from time to time direct, of his proceedings during the year.

He shall transmit a copy of the aforesaid Report to the Local Government Board and to the Local Authority not later than the 31st March immediately following the year to which such Report refers.

Where in any district there is a chief Sanitary Inspector with one or more assistants or subordinates, it will not be necessary for each assistant or subordinate Sanitary Inspector to furnish a report to the Board. Each will report to the chief Sanitary Inspector, who will report on the whole district.

Where the County Sanitary Inspector is Sanitary Inspector for each of the districts in the county, the Board will hold the foregoing instructions to be complied with if the County Sanitary Inspector furnishes a Report for the whole county, provided that in such Report each district is separately dealt with.

Date for furnishing Reports.

The Board have fixed the 31st March as the latest date for forwarding the Reports by the Medical Officer of Health and Sanitary Inspector. In many cases, however, it will be possible for these officers to complete their Reports at an earlier date, and the Board desire them to understand that the Reports should be forwarded as soon as they can be completed. When the Reports are printed it is not necessary to forward the original or a manuscript copy; a printed copy will suffice, provided that no undue delay is caused by the printing.

The requirements as to the date of transmission of the Report to the Board will apply to the copy for the Home Office. That copy should be addressed to the Secretary of State, Home Office, Whitehall, London, S.W.

A copy of this Circular has been forwarded to all Medical Officers of Health and Sanitary Inspectors for their information.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Clerk to the Local Authority.

MEMORANDUM BY HOME OFFICE REFERRED TO IN PRECEDING CIRCULAR.

FACTORY AND WORKSHOP ACT, 1901.

DUTIES OF LOCAL AUTHORITIES.

England and Wales.

The Factory and Workshop Act, 1901, which consolidated with amendments all previous Acts relating to factories and workshops, made considerable alterations in and additions to the duties of District Councils in regard to factories, workshops and workplaces. The present memorandum describes the duties of District Councils as extended by that Act.

“District Council” includes for the purposes of the Act—

- (i.) Councils of municipal boroughs, including county boroughs.
- (ii.) Councils of urban districts.
- (iii.) Councils of rural districts.

In London, subject to certain exceptions,* “District Council” means the Court of Common Council and the Councils of the Metropolitan Boroughs.

District Councils have duties in regard to each class of places named above, factories, workshops and workplaces. It will be useful therefore at the outset to state briefly what is included in these terms by the Act.

DEFINITIONS.

Factories include (1) all places in which mechanical power is used in aid of the manufacturing processes; and (2) all places, whether mechanical power is used or not, in which the industries specified in Part I. of Schedule VI. to the Act are carried on (that is, print works, bleaching and dyeing works, earthenware works, lucifer match works, percussion cap works, cartridge works, paper staining works, fustian cutting works, blast furnaces, copper mills, iron mills, foundries, metal and india rubber works, paper mills, glass

* See p. 55.

works, tobacco factories, letterpress printing works, bookbinding works, flax scutch mills, electrical stations).*

Workshops include—

(1) The places specified in Part II. of Schedule VI. (that is, hatworks, ropeworks, bakehouses, lace warehouses, ship-building yards, quarries, pit banks of metalliferous mines, dry cleaning works, carpet beating works, and bottle washing works), unless mechanical power is used and they are in consequence factories within the meaning of the Act.

(2) Any other premises (not being factories) in which manual labour is exercised by way of trade or for purposes of gain in or incidental to the making, altering, repairing, ornamenting, finishing or adapting for sale of any article and to or over which the employer of the persons working there has the right of access or control.

(3) Any workplace (termed in the Act "tenement workshop") in which "with the permission of or under agreement with the owner or occupier two or more persons carry on any work which would constitute the work-place a workshop if the persons working therein were in the employment of the owner or occupier." These were included for the first time by the Act of 1901. Previously they were partially or wholly excluded because some or all of the persons working there were not employed but worked on their own account. Instances of tenement workshops are (a) the Sheffield file-cutting shops where file cutters work on their own account, with or without other persons to help them, at stocks hired by them from the owner or occupier of the shop: (b) journeymen tailors' workshops where journeymen tailors work on their own account, with or without other persons to help them, each hiring a separate "sitting" or place to work at from the owner or occupier of the workshop. These are now deemed to be workshops within the meaning of the Factory Act.

Laundries† do not come within the definitions of "factory" and "workshop"; but under Section 103 of the Act, they are so far as sanitation and means of escape from fire are concerned to be treated as factories if mechanical power is used; if mechanical power is not used, as workshops. Laundries however which are worked by inmates of a prison, reformatory school, industrial school or any institution subject to Government inspection under other Acts or by inmates of a *bond fide* religious or charitable institution, or by members of the same family dwelling on the premises, are excluded from the Act, if the inmates of the prison, &c., or the members of the family work the laundry by themselves or with the assistance of not more than two persons from outside.

Factories and workshops belonging to or in the occupation of the Crown are excluded from the jurisdiction of the District Council; the powers which in other factories and workshops belong to the Council are in them exercised by the Inspector of Factories (sec. 150).

"*Workplace*" is not defined in the Factory Act, but the term is used in the several Public Health Acts, and in a case under Section 38 of the Public Health (London) Act, 1891 (*Bennett v. Harding*, 1900, Q.B. 397), where the phrase "factory, workshop, and workplace" occurs, it was held that the word "workplace" is not to be limited to places where something is being manufactured or made, but includes any "place where work is done permanently, and where people assemble together to do work permanently of some kind or other." It is therefore a word of wider signification than the word "workshop." In the case in question a stable and stable yard where men were employed as cab cleaners and horse keepers was held to be a workplace. Similarly the Secretary of State has been advised that the kitchens of restaurants, &c., though they are not workshops, come within the meaning of the term "workplace."

FACTORIES.

In the case of factories the duties of a District Council are few. The Council is charged with the duty of seeing that every factory in its district is provided with means of escape in case of fire; and also has special duties in regard to bakehouses and domestic factories. These duties, which apply also

* The definitions of these places in the schedule should be consulted.

† Laundries on factory or workshop premises form part of the factory or workshop and are subject to all the provisions of the Act.

in the case of workshops, will be further referred to below. Another duty in regard to factories, though not arising under the Factory and Workshop Act, is (in districts where Part III. of the Public Health Acts Amendment Act, 1890, is in force) the enforcement of the requirement in Section 22 of that Act as to the provision of suitable and sufficient sanitary conveniences, and (elsewhere) the enforcement of Section 38 of the Public Health Act, 1875.

WORKSHOPS AND WORKPLACES.

In regard to workshops and workplaces, District Councils have important duties, which may be classified under four heads: (1) the sanitary condition of workshops and workplaces generally; (2) provision of means of escape from fire in workshops; (3) special sanitary regulations for bakehouses; (4) home work.

Sanitation (Secs. 2, 3, 7 and 8).

The District Council is made the authority responsible for the sanitary condition of the workshops and workplaces in its district, while the Factory Inspector is responsible for the sanitary condition of factories. "Sanitary conditions" include (a) cleanliness, (b) air space, (c) ventilation, and (d) drainage of the floors. For these purposes the provisions of Section 91 of the Public Health Act, 1875, apply to all workshops and workplaces and are supplemented by certain additional provisions in the Factory Act. It should be noted that the other sanitary provisions in Part I. of the Act, viz., with regard to temperature and sanitary conveniences (Sections 6 and 9), are not brought under the law relating to public health, and will therefore be enforced by the Factory Inspectors.

The requirements of the Act in the matters above-mentioned, which it is the duty of a District Council to enforce, are as follows:—

(a) *Cleanliness* (Section 2).—Every *workshop and workplace* must be kept in a cleanly state and free from effluvia, and if not so kept may be dealt with by the Council as a nuisance under Section 91 of the Public Health Act, 1875.

If the Medical Officer of Health, or the Inspector of Nuisances, certifies that it is necessary for the health of the persons employed that a *workshop*,* or any part of a workshop, should be limewashed, cleansed or purified, the District Council may give notice to the owner or occupier of the workshop to carry out such limewashing, cleansing or purifying as the case may require, within a time specified in the notice. If the person to whom the notice is addressed fails to comply with it in the time specified, he will be liable to a penalty of 10s. for each day during which the default continues, and the Council may themselves undertake the work and recover the expense from him in a summary manner.

(b) *Air space* (Sections 2, 3).—*Workshops and workplaces* must not be overcrowded while work is carried on so as to be dangerous or injurious to the health of the persons employed, and a workshop or workplace which is overcrowded may be dealt with as a nuisance under Section 91 of the Public Health Act. A *workshop* is deemed to be overcrowded unless in each room at least 250† cubic feet of air space (or during overtime‡ 400) are allowed for each person employed in the room, and the Act requires a notice to be affixed in the workshop specifying the number of persons who may be employed in each room of the workshop.

(c) *Ventilation* (Sections 2, 7).—Every *workshop and workplace* must be ventilated in such a manner as to render harmless as far as practicable any gases, vapours, dust or other impurities generated in the course of the work that are a nuisance or injurious to health. Any workshop or workplace not so ventilated may be dealt with as a nuisance under Section 91 of the Public Health Act.

* In London, this power extends also to domestic factories and to workplaces:—Public Health (London) Act, 1891, Section 25.

† Under Section 3 (3) of the Act the Secretary of State has power to alter this amount in the case of a workshop, not being a domestic workshop, which is occupied by night as a sleeping apartment. By his Order of 17th January, 1902, the amount in such cases is increased to 400 cubic feet.

‡ "Overtime" here means overtime under Sections 49 to 53 and Sections 103 (2) of the Factory Act.

This general provision is supplemented in the case of *workshops* by a special requirement introduced for the first time by the Act of 1901, that in every room in a workshop sufficient means of ventilation must be provided and sufficient ventilation maintained, and where a standard of sufficient ventilation has been prescribed by the Secretary of State (as he has now power to do) for any class of workshops, that standard must be observed. Workshops, however, where men only are employed are excluded from the operation of this requirement. Any workshop where this requirement is contravened may be dealt with as a nuisance.

In *workshops* where dust, gas, or other impurities are generated and inhaled by the workers to an injurious extent, the Factory Inspector has power to require the provision of a fan or other mechanical means for preventing such inhalation. If in any case the Council are of opinion that this power could be usefully employed, they should refer it to the Inspector of the district.

(d) *Drainage of floors* (Section 8).—A provision introduced for the first time by the Act of 1901, requires that in every *workshop* or *part of a workshop* in which any process is carried on which renders the floor liable to be wet to such an extent that the wet is capable of being removed by drainage, adequate means shall be provided for draining off the wet. A workshop not so drained may be dealt with as a nuisance under Section 91 of the Public Health Act. This provision, however, does not apply to workshops in which men only are employed.

(e) *Sanitary accommodation*.—In districts where Part III. of the Public Health Amendment Act, 1890, is in force, every building used as a *workshop* or *manufactory*, or where persons are employed or intended to be employed in any trade or business, must be provided with sufficient and suitable accommodation in the way of sanitary conveniences (Section 22). On a report from their surveyor that this requirement is not observed in the case of any building, the Council may serve a written notice on the owner or occupier requiring him to make such alterations or additions as may be necessary for the purpose.

In districts where Part III. is not in force, the Council may deal with the matter under Section 38 of the Public Health Act, 1875, subject to the observance of the requirements of any Order made by the Secretary of State under Section 9 of the Factory Act.

(ii.) *Safety from fire* (Sections 14 and 15).

It is the duty of a District Council to see that every factory and workshop in its district is provided with sufficient means of escape in case of fire.

Briefly, the provisions which are to be enforced by District Councils are now as follows:—

(1) Every factory of which the construction was commenced after 1st January, 1892, and every workshop of which the construction was commenced on or after 1st January, 1896, must, if more than 40 persons are employed, be furnished with a certificate from the District Council that it is provided with such means of escape in case of fire for the persons employed therein as can reasonably be required in the circumstances of the case. (The provision in the previous Acts which limited the requirements to the storeys above the ground floor is now repealed.) Before giving the certificate the Council must have the factory or workshop examined, and must satisfy itself that means of escape are provided as required by the Act. Any such factory or workshop not furnished with a certificate will be deemed not to be kept in conformity* with the Act. If a case comes to the knowledge of the Council in which any such factory or workshop is being used as a factory or workshop without the Council's certificate, it will be open to the Council either to take proceedings itself against the occupier or to report the matter to the District Inspector of Factories with a view to proceedings being taken by him.

As questions sometimes arose under the previous Acts as to what were the means of escape which had been passed by a Council as satisfactory, the Act now requires that the certificate given by the Council must specify in detail

* The penalty in the case of a factory or workshop not kept in conformity with the Act is a fine not exceeding £10, and in the case of a second or subsequent offence within two years from the last conviction for the same offence, not less than £1. The Court may order means to be adopted to bring the factory or workshop into conformity with the Act.

the means of escape provided. It also requires that the means of escape provided shall be maintained in good condition and free from obstruction.

It will doubtless be convenient for the Council when considering the plans of any new building which is intended to be used as a factory or workshop, to examine the means of escape proposed to be provided, and also to see that doors are made to open outwards, where required by Section 16 (2).

(2) In the case of all other factories and workshops in which more than 40 persons are employed, the District Council is charged with the duty of ascertaining from time to time whether they are provided with such means of escape from fire as can reasonably be required. In the case of a factory or workshop not so provided, the Council is required to serve on the owner* a notice specifying the measures necessary to be taken for providing such means of escape, and requiring him to carry them out within a specified time. If the owner disagrees with the Council as to the measures required, the dispute is to be determined by arbitration in the manner provided by the Act (sec. 14 (3); Sch. I.).

For the purposes of the fire provisions the whole of a tenement factory† or workshop is to be counted as a single factory or workshop, and the owner is to be substituted for the occupier.

(3) In addition to these powers, a new and important power is given to District Councils by Section 15 of the Act to make byelaws providing for means of escape from fire in the case of any factory or workshop. The provisions of the Public Health Act, 1875, with regard to the making of byelaws are to apply to the making of these byelaws, and they will accordingly require to be confirmed by the Local Government Board before they can come into operation.

(iii.) *Bakehouse.* (Sections 97-102.)

Bakehouses are either factories or workshops within the meaning of the Act according as mechanical power is or is not used in aid of the processes carried on. They are, therefore, subject to the general provisions of the Act; and the same powers will be exercised by District Councils in regard to bakehouses that are exercised by them in regard to factories and workshops.

A general power is also given (Section 98) to the Council in the case of any bakehouse which is in such a state as to be on sanitary grounds unfit for use or occupation as a bakehouse to bring the case before a court of summary jurisdiction; and the Court may thereupon impose a fine and order means to be adopted for the purpose of removing the ground of complaint.

In addition to the general regulations of the Act, special sanitary regulations for bakehouses are contained in the Act. These regulations require that—

(1) A bakehouse must not contain or communicate directly with a water closet, earth closet, privy or ashpit; a cistern supplying water to a bakehouse must be separate from any cistern supplying water to a water closet; and a sewage pipe or drain must not have any opening in the bakehouse.

(2) All inside walls and ceilings of rooms and all passages and staircases must be limewashed every six months, or coated with 3 coats of paint or varnish every seven years and washed with hot water and soap every six months.

(3) Places on the same level with a bakehouse and forming part of the same building must not be used as sleeping places unless effectually separated from the bakehouse by a partition from floor to ceiling and provided with an external glazed window 9 square feet, of which 4½ feet must be made to open.

These regulations will in the case of all *retail* bakehouses‡ be enforced by the District Council (Section 102); a "retail bakehouse" meaning any bakehouse or place in which no mechanical power is used and the bread, biscuits, or confectionery baked in which are sold not wholesale, but by retail, in some shop or place occupied with the bakehouse. The medical officer of health is, for the purpose, given all the powers of entry, inspection, taking legal proceedings, and otherwise of a Factory Inspector.

* "Owner" has the same meaning as under the Public Health Act, 1875, sec. 4.

† Where several factories are situated in the same building and are supplied with power by the owner, they constitute a "tenement factory."

‡ In London these provisions will be enforced by the Borough Councils in every bakehouse (whether retail or not) which is a workshop:—Public Health (London) Act, 1891, sec. 26.

Further, new duties of great importance are placed by Section 101 of the Act on District Councils in regard to *underground bakehouses* :—

(i.) The Act provides generally that no underground bakehouse (whether factory or workshop) shall be used as such unless it was so used on the 17th August, 1901.

(ii.) Moreover, after the 1st January, 1904, it will not be lawful to use any underground bakehouse (whenever established) unless the Council are satisfied that it is suitable for the purpose in regard to construction, light, ventilation, and in all other respects, and have given it a certificate of suitability. This provision will apply to all bakehouses, whether factories or workshops and whether wholesale or retail. Every bakehouse will be deemed an underground bakehouse if any room used for baking, or for any process incidental thereto, is so situated that the surface of the floor is more than 3 feet below the surface of the footway of the adjoining street, or of the ground adjoining or nearest to the room. An underground bakehouse used in contravention of these provisions will be deemed to be not kept in conformity with the Act.

In cases of contravention of the provisions of Section 101, it will be the duty of the Council to take proceedings when the place is a retail* bakehouse. In other cases it will be open to them either to take proceedings themselves or to report the matter to the District Inspector with a view to proceedings being taken by him ; but, as the duty of certification under the section rests with the Council, it will probably be most convenient that they should take proceedings themselves in all cases of contravention which come within their knowledge.

(iv.) *Home Work.* (Sections 107–115.)

Very important powers of controlling the conditions under which certain classes of work are done in the homes of the workers were for the first time given to District Councils by the Act of 1901. These powers aim at the prevention of home work being done (1) in dwellings which are injurious or dangerous to the health of the workers themselves, *e.g.*, through overcrowding, want of ventilation, or other insanitary conditions ; (2) in premises where there is dangerous infectious disease.

The provisions of the Act are as follows :—

(1) *Unwholesome dwellings* :—If any place in which home work is being done in connection with the business of a factory or workshop is injurious or dangerous to the health of the persons working there, the Council may, by notice to the occupier of the factory or workshop, or to any contractor employed by such occupier, prohibit him from giving out work to be done in that place.

The power may be exercised also in the case of work given out from places other than factories or workshops, *e.g.*, laundries, warehouses, shops, &c.

The power does not apply to all classes of home work, but only to those which may be specified by orders of the Secretary of State. Two Orders have been made (the “Home Work Orders of 11th December, 1901, and 14th July, 1902,”†) applying the power to the following classes of work :—

The making, cleaning, washing, altering, ornamenting, finishing, and repairing of wearing apparel, and any work incidental thereto ;

The making, ornamenting, mending, and finishing of lace, and of lace curtains and nets ;

Cabinet and furniture making, and upholstery work ;

The making of electro-plate ;

The making of files ;

Fur-pulling ;

The making of iron and steel cables and chains ;

The making of iron and steel anchors and grapnels ;

The making of cart gear, including swivels, rings, loops, gear buckles, mullin bits, hooks, and attachments of all kinds ;

The making of locks, latches, and keys.

* In London the duty belongs to the Borough Councils in the case of every bakehouse (whether retail or not) which is a workshop :—Public Health (London) Act, 1891, sec. 26.

† Copies of these Orders and of other Orders of the Secretary of State may be obtained from the Agents for H.M. Stationery Office Publications.

Infected dwellings.—If any inmate of a house in which home work is done is suffering from any infectious disease which is required by law to be notified to the local authority, the Council may, whether such inmate has been removed from the house or not, by order served on the occupier of any factory, workshop, or other place from which work is given out, or on any contractor employed by such occupier, prohibit him from giving out such work to any person living or working in the house, or a specified part of a house, during such time as the Council may fix. In an emergency, the power may be exercised by any two or more members of the Council acting on the advice of the Medical Officer of Health.

This power, like the last, does not apply to all classes of work, but only to such as the Secretary of State may fix. The classes of work in regard to which the power may be exercised have been fixed as follows :—

The making, cleaning, washing, altering, ornamenting, finishing, and repairing of wearing apparel, and any work incidental thereto ;

The making, ornamenting, mending, and finishing of lace, and of lace curtains and nets ;

Upholstery work ; and

Fur-pulling.

(3.) *Outworkers' lists.*—In order that the Council may be kept fully informed as to the places in its district in which home work is being done, occupiers of factories, workshops, or any place from which work is given out, and contractors employed by such occupiers are required, in regard to such classes of work as may be fixed by the Secretary of State, to keep lists showing the names and addresses of all persons employed by them, either as workmen or as contractors outside such factory, workshop or place, and the place where they are employed, and to send to the Council twice a year (*viz.*, on or before the 1st February and the 1st August) copies of such lists. The form in which the lists are to be kept is prescribed by the Secretary of State in his Home Work Order of 11th December, 1901. Forms may be obtained from the Government printers.

In the event of any occupier failing to keep or to send such lists he will be liable to a fine of £2 for the first offence, and to a fine of £5 for a second or subsequent offence. Proceedings to recover the fine may be taken by the Council.

It will be the duty of the Council to have the lists so sent to them examined, and if the place of employment of any outworker included in the list is in another district, to furnish his name and place of employment to the Council of that District.

The list required to be kept by the occupier or contractor will be open to inspection by any duly authorised officer of the Council ; and the copies sent to the Council, and any particulars furnished to it by another Council, will be open to inspection by any of the Inspectors of Factories and Workshops.

The classes of work to which these provisions have been applied by the Secretary of State are the same as those enumerated above under the heading "*unwholesome dwellings.*"

DOMESTIC FACTORIES AND WORKSHOPS.

In some cases it will be found that dwellings in which home work is done constitute a factory or workshop, in consequence of the employment by the occupier of the dwelling, or some part of it, of persons on work which comes within the definitions in the Act. Such places will be subject to the ordinary provisions of the Act with regard to factories and workshops. An important exception, however, is made for dwellings in which no mechanical power is used and the only persons employed are members of the same family dwelling there. These places (termed in the Act "*Domestic Factories*" and "*Domestic Workshops*") are exempted from many of the provisions of the Act.*

Domestic Factories are exempted from the provisions in the Act as to the sanitation of factories, and are made subject, so far as sanitary conditions are concerned, only to the provisions in Section 2 (1) and Section 3 ; *i.e.*, if not kept in a cleanly state, or not ventilated in such a manner as to render harmless, as far as practicable, any gases, vapours, dust or other impurities generated in

* The only classes of factories which can come within the definition of "*Domestic Factory*" are those specified in Part 1. of the Sixth Schedule to the Act. *See p. 47.*

the course of the work that are a nuisance or injurious to health, or so overcrowded while work is carried on as to be dangerous or injurious to the health of the workers, it is liable to be dealt with as a nuisance under Section 91 of the Public Health Act, 1875. A domestic factory will, for the purpose of this provision, be deemed to be overcrowded unless in each room at least 250 cubic feet of air-space (or during overtime 400) are allowed for each person employed in the room. These provisions will be enforced by the Council.

Domestic workshops are exempted from the special provisions as to means of ventilation and the drainage of floors, but are otherwise, so far as sanitary conditions are concerned, to be treated as ordinary workshops.*

Any domestic factory and workshop, however, in which any work is carried on that has been certified by the Secretary of State as dangerous, is subject to all the provisions of the Act as though it were an ordinary factory or workshop.

ADMINISTRATION.

Powers of District Council.—For the purposes of their duty with respect to workshops and workplaces under the Act, and under the Public Health Acts, the District Council and their officers are given the same powers of entry, inspection, taking legal proceeding, or otherwise as a Factory Inspector possesses. The powers of an Inspector are contained in Section 119 of the Act, and include the power to enter, inspect, and examine, to take a constable in cases in which there is reason to apprehend any serious obstruction, to examine the persons found therein, to require the production of documents, &c. In cases where proceedings are taken under the Factory Act, and not under the Public Health Acts, special attention should be paid to the provisions of Section 146 of the Act with respect to legal proceedings.

Register of Workshops.—The Act placed the new duty on every District Council to keep a register of all workshops situate within its district (Section 131). To assist the Council in preparing such a register, instructions were given, after the passing of the Act, to the Factory Inspectors to allow the District Council to make copies of the register of workshops kept by the Inspector, and the Council will also continue to receive (Section 127) from the Inspector any notices of occupation of a workshop which may be sent to him. The Council should not, however, depend exclusively on these sources of information for compiling their register, but should take steps, through their own officers, to ascertain what workshops are situate in their district, with a view to making the register as complete as possible.

Duties of Medical Officer of Health.—Under Section 132 of the Act, the Council's Medical Officer of Health is required for the future in his annual report to the Council to report specifically on the administration of the Act in workshops and workplaces so far as the matters under the charge of the Council are concerned, and to send a copy of his report, or of so much of it as deals with this subject, to the Secretary of State. The matters which the report should specially deal with are indicated in the instructions issued by the Local Government Board to Medical Officers of Health in England and Wales.

It is also the duty of the Medical Officer, if he finds any woman, young person, or child employed in a workshop in which no abstract of the Act is posted up, to inform the District Inspector of Factories in writing.

Matters referred to Council by Factory Inspectors.—The Factory Inspector will, on finding in a factory or workshop, any act, neglect, or default in relation to a drain, water-closet, earth-closet, privy, ashpit, water supply, nuisance, or other matter which is punishable or remediable under the Public Health Acts but not under the Factory Act, give notice to the Council of such Act, &c. ; and it will then be the duty of the Council to make inquiry into the matter, take such action as may seem proper, and inform the Inspector of the proceedings taken. If proceedings are not taken by the Council within one month, the Inspector is authorised to take the same proceedings as the Council might have taken, and to recover from the Council the expenses incurred by

* Domestic workshops in which the work is only done at irregular intervals and does not furnish the whole or principal means of living to the family, or in which certain classes of work of a light character (viz., straw-plaiting, pillow-lace making and glove making) are carried on are wholly exempt, except so far as they come within the term "workplace." See sec. 114.

him which have not been recovered from any other person, and have not been incurred in any unsuccessful proceedings (Section 5).

The Inspector may take similar action for the purpose of enforcing in a factory or workshop the provision of means of escape in case of fire.

In the event of a District Council failing generally to carry out the provisions of the Act and the Public Health Acts with regard to factories, workshops, and workplaces, the Secretary of State may authorise a Factory Inspector during such time as he may fix to enforce those provisions. An Inspector so authorised will be entitled to recover from the Council any expenses incurred by him which are not recovered from any other person (Section 4).

General.—It is provided that the powers conferred by the Act on District Councils shall be in addition to and not in substitution for any other power which they may possess.

APPLICATION TO LONDON.

The duties of District Councils as described above will be discharged in London by the Metropolitan Borough Councils, and, in the City, by the Court of Common Council, with the following exceptions :—

- (1.) The Duties in regard to the provision of means of escape in case of fire will be discharged by the London County Council.
- (2.) For the references to Section 91 of the Public Health Act, 1875, should be substituted references to Section 2 of the Public Health (London) Act, 1891.
- (3.) For the references on pp. 49 and 50 to Section 22 of the Public Health Acts Amendment Act, 1890, should be substituted a reference to Section 38 of the Public Health (London) Act, 1891, which applies throughout the County of London, and requires that every factory, workshop, or workplace shall be provided with sufficient and suitable accommodation in the way of sanitary conveniences. The Metropolitan Borough Councils are charged with the duty of enforcing this provision.
- (4.) The Metropolitan Borough Councils have special powers under Sections 25 and 26 of the Public Health (London) Act, 1891. See notes on pp. 49, 51, and 52.

Scotland.

The foregoing memorandum will apply in all particulars to Scotland, subject to the following modifications :—

- (1) For the references to the Public Health Act, 1875, should be substituted references to the Public Health (Scotland) Act, 1897, and in particular for references to Section 91 of the former Act, references to Section 16 of the latter Act. It should be noted that the word "factory" in Sub-section 8 of the latter section includes "workshop" and "workplace". (See definition of "factory" in Section 3 of the Act.)
- (2) For "District Council" should be substituted "Local Authority," as defined in Section 12 of the Act of 1897.
- (3) For "Medical Officer of Health" and "Inspector of Nuisances" should be substituted "Medical Officer" under the Act of 1897, and "Sanitary Inspector," as defined in Section 3 of that Act.
- (4) For "Local Government Board" should be substituted "Local Government Board for Scotland."
- (5) For the references to Section 38 of the Public Health Act, 1875, should be substituted a reference to Section 29 of the Public Health (Scotland) Act, 1897.

Ireland.

The memorandum will apply in all particulars to Ireland, subject to the following modifications :—

- (1) For the references to the Public Health Act, 1875, should be substituted references to the Public Health (Ireland) Act, 1878, and in particular for references to Section 91 of the former Act, references to Section 107 of the latter Act.

(2) The expression "Medical Officer of Health" includes "Medical Superintendent of Health."

(3) For "Local Government Board" should be substituted "Local Government Board for Ireland."

February, 1903.

NO. 18.—CONTAMINATION OF SHELL-FISH BY SEWAGE—LETTER FROM FISHERY BOARD FOR SCOTLAND AS TO THE DISTRIBUTION OF OYSTERS, MUSSELS, &C., IN SCOTLAND AND THE QUESTION OF CONTAMINATION, FOR THE INFORMATION OF THE ROYAL COMMISSION ON SEWAGE DISPOSAL.

*"Fishery Board for Scotland,
Edinburgh, 25th February 1903.*

"Sir,—With reference to your letter of 14th instant, No. 35284, and relative enclosure regarding the contamination of shell-fish by sewage, I have to express regret that I am unable to give any very detailed information on the subject, but the following general observations may prove of some use to the Royal Commissioners.

Shell-fish dealt with. "It is presumed that, for the purposes of this enquiry, the term 'shell-fish' is limited in its application to molluscs having comparatively little power of locomotion, such as oysters, mussels, clams, cockles, periwinkles, limpets, &c. Of these, from the point of view of the food supply, oysters are the most important. They are landed in practically only three of the fishery districts in Scotland, viz., Leith, Inveraray, and Ballantrae, a very small quantity being landed in Orkney. The Leith District oysters are obtained from the beds *ex adverso* of Cockenzie, Port Seton, and Prestonpans, but there is now no regular fishing, the whole quantity landed (to the number of 28,237 in 1902) being obtained by the fishermen engaged in dredging for clams. Of course, the sewage of Edinburgh, Leith, and the other coast towns is emptied into the Firth of Forth, but as the clam beds are situated well out in the Firth, at from one to three miles offshore, and tides and currents run strongly, it is not believed that any contamination occurs. The Inveraray District oysters are obtained almost wholly from West Loch Tarbert, where the mollusc is cultivated by a Glasgow firm under powers conferred by the West Loch Tarbert Fishery Order, 1887. A very small quantity is obtained from Loch Sween (an opening off the Sound of Jura). The landings in 1902 were 23,816 oysters, and in this case it may safely be said that no contamination is possible, as practically the only inhabitants on the shores of both lochs are the owners of a few mansion-houses and their dependants. The remaining, and most important, oyster bed is situated in Loch Ryan (in Ballantrae fishery district). The bed belongs (under a Royal Charter) to Mr. Alex. Wallace of Cairnryan, but is worked by a syndicate composed chiefly of English fish merchants; and in 1902 it yielded 235,500 oysters. Here again strong tides and currents prevail, and it is not believed that any contamination occurs from the sewage of Stranraer, which is but a small town of some three thousand inhabitants situated at the southern extremity of the loch. The Orkney oysters are not liable to contamination. It may be added that a number of West Highland lochs—Loch Spelve, Loch Roag, Loch Creran, &c., and the Holy Loch (Clyde)—contain oyster beds, but they are now practically worthless, and are not worked. In any case, there is no risk of contamination.

Oysters.

Leith district.

Question of Contamination

Inveraray District.

Question of Contamination

Ballantrae District.

Question of Contamination

"So far as I am aware, the only cases of 'oyster typhoid' which have occurred in Scotland were those at the Stirlingshire county ball some years ago. The oysters used on that occasion were brought by steamer from Holland to Grangemouth, but it was surmised that the contamination had taken place after the arrival of the oysters at Stirling.

Mussels.

Distribution.

"Mussels are found in greater or less abundance all round the Scottish coasts, but the position of the principal beds will be found in the print herewith enclosed.* The most prolific of these beds are to be found in Anstruther District (at mouth of River Eden, Fife, and at Tayport), in Montrose District (at Dundee and mouth of South Esk), and in Greenock District (River Clyde at Port-Glasgow). These beds produced 71,091 cwts. out of a total for

* A Parliamentary Paper prepared by the Fishery Board containing a List of Mussel or Clam Fisheries or Beds in Scottish Waters."

Scotland of 95,663 cwts. Other fairly productive beds are those in Findhorn (*ex adverso* of Muirtown), Cromarty (Beauly Firth and Cromarty Firth), Helmsdale (Dornoch Firth), Rothesay, and Ballantrae (Loch Ryan and River Cree) Districts, which contributed 17,656 cwts.

"Mussels are used very largely for bait, only a small quantity contributing to the food supply. Contamination in their case is more likely than in the case of oysters, which are usually found in comparatively deep water, while mussel beds frequently lie between high and low water marks. I should think it very likely indeed that the mussels from the Port-Glasgow beds, for example, are in danger of being contaminated by the sewage of Glasgow, Port-Glasgow, &c., while in other cases where the beds are situated remote from large centres of population, *e.g.*, in Beauly or Dornoch Firths, I should imagine the risk of contamination to be comparatively small. It must be remembered, too, that mussels are boiled before being eaten, and I suppose that typhoid germs, which are most to be feared in connection with contaminated shell-fish, are usually thereby rendered innocuous. At the same time, if the cooking were not thorough, that result might not be attained.

"Clams (scallops) are found in comparatively deep water. In Scotland they are landed only in Leith and Anstruther Districts (to the extent of 4320 cwts. in 1902), from the Firth of Forth beds referred to in the second paragraph of this letter. They are used solely for bait, but in any case the remarks as to oysters in that paragraph would here also apply.

"Of the remaining shell-fish periwinkles are the chief. They are found abundantly all round the Scottish coasts, but are gathered principally on the West Coast, that section contributing (roughly speaking, for I have not the actual figures) about two-thirds of the total landings. Periwinkles are used almost solely for food, and, as they are found between high and low water marks, the risk of contamination is considerable in the neighbourhood of large towns, but is small in other cases. Periwinkles, of course, are also boiled before consumption. Cockles are not found in any great quantity round the Scottish coasts. The most important bed is situated in Barra, at a place where there is not the slightest risk of contamination. Cockles are also found in fair abundance at Broad Bay (Lewis), Basta Voe and Mid Yell Voe (Shetland), and at none of these places is there risk of contamination. At other places on the Scottish coasts cockles do not occur in quantities which would repay collection. Cockles are eaten raw in Scotland, but are, I understand, 'cooked' in England by plunging the molluscs into boiling water. Limpets are plentiful round the Scottish coasts, but are used only as bait.

"The only shell-fish imported into Scotland are oysters and mussels, the former for use partly as food and partly for breeding purposes, and the latter for bait. In 1901 oysters to the value of £1115 (about three-quarters of which were for breeding purposes) and mussels to the value of £575 (2284 cwts.) were imported. In 1902 the value of oysters imported (all for use as food) fell to £277, and that of mussels to £311 (1881 cwts.). The quantity of mussels imported has steadily decreased in recent years, coincident with the decline of the line fisheries. The imports, I believe, came chiefly from Holland.

"I regret that I am not in a position to give any figures as to Scottish exports of shell-fish to England. Generally, however, it may be stated that practically all the cockles and all the periwinkles gathered are sent to England, but that practically no mussels or clams go there. Nearly all the oysters produced by the Loch Ryan beds are sent to England, but those from the Loch Tarbert and Firth of Forth beds are consumed in Scotland.

"So far as I am aware, no steps are taken to secure that no shell-fish are placed on the market in a contaminated condition.

"For the information of the Royal Commissioners I enclose, herewith, extract from Appendices to the Annual Report of the Fishery Board for 1902 which will show the general distribution of shell-fish in Scotland. As the report has not yet been published, it would be obliging if the information contained in the extract were, in the meantime, considered confidential.*

"I regret that I am not in possession of any report for Scotland similar to that of Dr. Bulstrode's.—I am, Sir, your obedient servant,

(Signed) "WM. C. ROBERTSON,
Secretary."

NO. 19.—CIRCULAR ISSUED BY THE BOARD OF AGRICULTURE TO LOCAL AUTHORITIES UNDER THE SALE OF FOOD AND DRUGS ACTS, 1875 TO 1899, IN GREAT BRITAIN WITH REGARD TO THE COLLECTION AND RETENTION OF SAMPLES OF BUTTER.

*Board of Agriculture, 4 Whitehall Place,
London, S.W., 13th July, 1903.*

Sir,—I am directed by the Board of Agriculture to draw the attention of your Local Authority to the fact that samples of butter, alleged to contain water in excess of the proportion indicated by the Board in their "Sale of Butter Regulations, 1902," are frequently received at the Government Laboratory after the lapse of one or two months from the time that the samples were taken, and that subsequently to the date of purchase they have been kept by the Inspector in the paper in which they were originally bought. Under these circumstances it is quite impossible for the Government Laboratory to obtain upon analysis figures representing the amount of water present at the time of purchase; and discrepancies between their results and those of the analysts on which the charge is raised are inevitable.

It is very desirable that, so far as may be found practicable, there should be uniformity of procedure in collecting and retaining samples of butter taken under the Sale of Food and Drugs Acts, and the following recommendations have been drawn up for the guidance of the local officials employed in this work :—

(1) The quantity to be purchased should not be less than one pound, except that it may be expedient to purchase only half-a-pound in cases where there is reason to believe that the object of the purchase would be defeated if a greater quantity were demanded.

(2) The division of the sample into three parts should be made as equally as possible, so that the portion reserved by the purchaser may be not less than one-third of the whole. It is desirable that each portion should consist of one piece only.

(3) The portions should *not* be wrapped in paper, but should be placed, without pressure, in dry and clean screw-capped bottles in such manner that the water present may be retained in the butter.

(4) The screw-capped bottle should be provided with a cork-lined metallic lid. The mouth should be as nearly as possible the full width of the bottle, and the cork lining of the lid should be firmly screwed down against the edge of the bottle.

(5) The bottle, labelled with the necessary particulars, should be enclosed in an envelope of stout paper, which should be secured with the official seal.

(6) The reserved portion should be kept in a cool dark place pending its production in Court in the event of proceedings being taken, and if directed by the Court to be referred to the Commissioners of Inland Revenue it should be carefully packed in order to ensure its safe transmission to the Government Laboratory.

The Board would be obliged if you would take steps to bring this Circular under the notice of your Local Authority, and they will be glad to forward you additional copies for distribution amongst the members of your Local Authority and the officers concerned, upon being informed of the number you require.—I am, Sir, your obedient servant,

T. H. ELLIOTT,
Secretary.

CIRCULAR TO LOCAL AUTHORITIES IN GREAT BRITAIN FOR THE PURPOSES OF THE SALE OF FOOD AND DRUGS ACTS, 1875 TO 1899.

*Board of Agriculture, 4 Whitehall Place,
London, S.W., 17th August, 1903.*

*Sale of Food and Drugs Acts, 1875 to 1899
(38 & 39 Vict. c. 63; 62 & 63 Vict. c. 51).*

Sir,—I am directed by the Board of Agriculture to acquaint you, for the

information of your Local Authority, that the fact that samples of milk referred to the Government Laboratory under the provisions of the above Acts are invariably sour when received has occasionally given rise to inquiries, by Magistrates' Clerks and others concerned with the working of the Acts, as to the practicability of making a satisfactory analysis of sour milk with a view of substantiating or disproving an allegation that the milk has been mixed with water, or that fat has been abstracted from it.

It therefore appears desirable that the Board should state that, except in a limited number of exceptional cases to be hereafter referred to, there is no practical difficulty in accurately inferring the composition of the milk when fresh from the analysis of the milk when sour.

The change which takes place in a sample of milk kept from contact with air, as in a bottle nearly full of the sample, and fitted with a good sound cork sealed with wax, is, as a rule, comparatively slight. The causes and nature of this change have been carefully studied by many observers, and they have been found to be perfectly definite in character. Without going into details concerning the fermentative changes to which milk is liable, it may be stated that the changes which affect the analysis, and, therefore, the inference to be drawn from the results, are concerned with the non-fatty solids only, and more particularly with the milk-sugar. The milk-sugar gives rise, either proximately or remotely, to a variety of products, the most important of which are lactic acid, ethyl alcohol, and acetic acid; but it can be shown that the only quantitative determinations which need be made in order to determine the loss in the non-fatty matter by keeping are the proportion of alcohol, reckoned as proof-spirit, and the amount of free volatile acid, together with the ammonia derived from the alteration of the casein, or proteid substance, in the milk. The slight alterations in weight consequent on the hydrolysis and conversion of lactose into lactic acid, and the formation of certain so-called bye-products of alcoholic fermentation, are partly positive and partly negative in direction, but their joint effect is too small to have any appreciable influence on the result.

The entire correction, which, of course, is always additive, in the case of a properly-preserved sample from three to six weeks old is fairly constant, and may be said to range from 0·2 to 0·3 per cent. In a few cases it has been found to be as low as 0·1 per cent., and in very exceptional cases, as in badly-secured samples, or in bottles only partially filled, it has risen to 0·7 or 0·8 per cent.

If the fermentation has passed into the butyric acid stage, the amount of free acid is greatly increased, and owing to the separated casein it is sometimes impossible to get the sample into a proper and uniform condition for analysis. In such cases the Government Laboratory declines to proceed with the examination. Such a result, however, practically never happens in the case of samples which have been properly taken and kept by the inspectors pending the appeal to the Government Laboratory.

The details of the methods of analysis adopted in the Government Laboratory were fully inquired into by the Committee which preceded the issue of the Sale of Milk Regulations in 1901, and are given in Appendix XXIX. to the Minutes of Evidence taken before the Departmental Committee on Milk and Cream Regulations [Cd. 484].

The following tables [Cd. 484, Appendix XXIX.] give the results of the analysis of a series of milks analysed in the fresh state and after the lapse of several weeks. The examination was carried beyond the time at which a milk would be referred to the Government Laboratory under the Food and Drugs Acts, but it will be seen that the changes can be accurately followed and allowed for. The comparison of the corrected non-fatty solids with the solids of the fresh milk shows that the variations are not greater than may occur in duplicate determinations of the constituents of a fresh milk.

The Board would be obliged if you would take steps to bring this Circular under the notice of your Local Authority, and they will be glad to forward you additional copies for distribution amongst the members of your Local Authority and the officers concerned, upon being informed of the number you require.—I am, Sir, your obedient servant,

T. H. ELLIOTT,
Secretary.

No. 20.—CIRCULAR TO COUNTY AND TOWN CLERKS REQUESTING PARTICULARS AS TO TEST SAMPLES TO BE ENTERED IN THE REPORTS MADE BY ANALYSTS UNDER THE SALE OF FOOD AND DRUGS ACTS.

*Local Government Board,
Edinburgh, 30th November 1903.*

SALE OF FOOD AND DRUGS ACTS: ANALYSTS' REPORTS.

Sir,—The Board understand that certain Local Authorities cause Test Samples of Food and Drugs to be taken informally for analysis by the Public Analyst with the view, in cases where such samples are found to be adulterated, of afterwards taking samples with the formalities required by the Act.

It seems to the Board that these samples represent an important part of the work done under the Food and Drugs Acts, and they are desirous of having information with regard to them.

I am accordingly directed to request that, in future, when preparing copies of the Analysts' Reports for transmission to this Department, you will cause the Test Samples, if any, to be entered and shown in Table C,—copies of which are enclosed for use. Such Test Samples will, of course, be excluded from Table A of the Copy Report.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The County Clerk and Town Clerk.

SCHEDULE.
WATER SUPPLIES.

Local Authority of _____ Situated in the County of _____

6. Any Observations the Local Authority may desire to make upon the Recommendation of the Departmental Committee appointed by the Board of Agriculture.

Signed on behalf of the Local Authority of _____

Clerk to the Local Authority.

Copy of Letter addressed to Local Government Board for Scotland by the Board of Agriculture.

BOARD OF AGRICULTURE,
4 WHITEHALL PLACE, LONDON, S.W.,
3rd August 1903.

Sir,—I am directed by the Board of Agriculture to transmit herewith, for the information of the Local Government Board for Scotland, a copy of an extract from the Report of the Departmental Committee on British Forestry, and to state that they would be glad if you could furnish them with a list of the municipalities in Scotland which have acquired the freehold or long leasehold of the catchment areas from which their water supplies are derived, with a statement of the acreage and altitude of the respective areas. I am to explain that it is not a list of municipalities owning their waterworks merely that is required, but a list of those towns which have, usually from sanitary considerations, acquired by purchase or otherwise considerable areas of land from which their waterworks derive their supplies of water, or which exercise full control over such land. So far as the Board are aware, the municipalities of Liverpool, Manchester, Birmingham, Leeds, Bradford, Halifax, and Bury in England, and of Edinburgh and Glasgow in Scotland, would be included partly or entirely in the list, but there are doubtless others.

I am to say that, if no such list is available, the Board would be greatly obliged if the Local Government Board could see their way to have such a return prepared.—I am, Sir, your obedient servant,

(Signed) A. W. ANSTRUTHER,
Assistant Secretary.

*The Secretary,
Local Government Board for Scotland,
Edinburgh.*

Extract from the Report of the Departmental Committee appointed by the Board of Agriculture to enquire into and report upon British Forestry, 1902.

35. We have received valuable evidence as to the work undertaken by the Municipal Corporation of Liverpool to afforest the catchment area, around Lake Vyrnwy, of the water supply of that city, and some other municipalities have also had similar schemes placed before them. We are of opinion that this is a direction in which a considerable amount of afforestation may usefully be done. To prevent all risk of contamination of the water supply it is at the present day the policy to remove, as far as possible, all human habitations and farm buildings, as well as live stock, from such areas. These areas, therefore, however well suited they may otherwise be for the production of crops or the maintenance of live stock, are practically derelict, and yield no return, beyond that obtained from the sale of the water, upon what is usually a very heavy capital expenditure on the part of the Corporation. We desire, therefore, to draw the attention of Corporations to the advantages and profits to be derived from planting their catchment areas with trees, which ultimately will not only contribute materially to the retention of the rain that falls over the area, and thus assist in regulating the water supply and in preventing floods and water-famines, but will tend to the purification of the water, and should also, properly managed, yield a fair and regular income on the capital expended. Such catchment areas, if they are to be thus utilised, should be placed under the control of a competent forester. And inasmuch as they will be under corporate control, and less subject to changes of management than land owned by private individuals, there is no reason why they should not also ultimately serve as demonstration forests and be available for the instruction of students. For example, the catchment areas of the Liverpool and Birmingham Corporation Waterworks, situated in Wales, within reach of University Colleges possessing agricultural departments, could, with the consent of the Corporations concerned, be used for these purposes.

36. Our conclusions may be summarised as follows:—
We recommend—

(i.) That the attention of Corporations and Municipalities be drawn to the desirability of planting with trees the catchment areas of their water supply.

**NO. 24.—PORT LOCAL AUTHORITY FOR GLASGOW—EXPLANATORY LETTER
ISSUED TO THE VARIOUS LOCAL AUTHORITIES INTERESTED IN THE PROPOSAL
TO CONSTITUTE A PORT LOCAL AUTHORITY.**

*Local Government Board,
Edinburgh, 13th June 1903.*

Sir,—The regulations for the administration of the Public Health Department of Glasgow having now been adjusted and approved by the Board, I send herewith for the observations of your Local Authority, who were represented at the enquiry conducted by the Board's Commissioner, Mr. Andrew Jameson, K.C., a copy of the Draft Order constituting a Port Local Authority for the Customs Port of Glasgow.

The Board have given full consideration to the Report of their Commissioner, and in terms of the conclusion of that Report they are prepared to issue at the end of 21 days from this date the accompanying Order, which is herewith submitted in draft.

It is unnecessary for the Board to enter into any lengthy explanation of the facts of the case or of the reasons which have weighed with their Commissioner and themselves, further than is shortly set forth below.

The limits of the Customs Port of Glasgow were fixed in the Treasury Warrant of 19th April 1859, and it is thought that there can be no question that the jurisdiction of the Port Sanitary Authority should be assimilated to that of the Customs Port. On this point the Commissioner says :—

"I have to report as, in my opinion, the result of the enquiry that the Corporation of Glasgow has clearly established a case for the constitution of a Port Sanitary Authority for the Customs Port of Glasgow, and I may add that the evidence was all one way upon this point."

Further, the Board take the view that the Glasgow Corporation should be the sole Port Local Authority and that no representation should be given to the other burghs—*e.g.*, Govan and Partick—who claim it.

The formation of a Joint Port Local Authority would involve the establishment of a new body which normally would not have enough work to employ a large staff, and it would not be easy to improvise adequate machinery to meet a serious emergency—such as the outbreak of epidemic disease in foreign ports. If, however, the Corporation of Glasgow were made the Port Authority, their large and efficient staff would require little adaptation to cope with such occasions.

It does not appear that Govan and Partick could reasonably complain of not being represented under such an arrangement. Their interests in the matter are the same as those of Glasgow. Moreover, there are several precedents for Glasgow undertaking public services for the burghs, as, *e.g.*, gas, water, and drainage, without prejudice to their interests, and in this case they would, in fact, find the establishment of a Joint Board less economical.

The Board desire to place it on record that they have arrived at this determination on grounds which have no bearing on other questions, such as the union of Govan and Partick with the City of Glasgow.

On the question of the contribution of expenses, the Commissioner says :—

"The Local Authorities which, in my view, ought to contribute to the expenses of the Port Sanitary Authority in addition to Glasgow are Govan, Partick, and the Eastern District of Dumbartonshire in respect of the port or creek at Bowling. Taking the last, as has already been pointed out, there is an average of only 10 foreign vessels berthed at Bowling *per annum*. This makes the interest of the Eastern District Committee of Dumbarton so small that I think a fixed payment of £10 *per annum* would be sufficient for them to contribute, they being relieved of any liability under the Greenock Police Act by the Corporation of Glasgow.

"With regard to Glasgow, Govan, and Partick, I think they should contribute the remainder of the expense in proportion to the valuations of their respective districts. I do not think it would be fair to Govan to take the tonnage of its shipping as the measurement of liability, nor even an average between that and valuation.

"Should Clydebank and Renfrew hereafter have docks at which vessels coming from abroad are berthed, I think they also should contribute to the

expense of the Port Sanitary Authority according to valuation or tonnage as may be thought best."

The Board entirely agree with the views of the Commissioner on this point.

Further, the Board have given effect to the view that Glasgow shall have a Boarding Station at Greenock. It will thus be necessary that arrangements be made with the Customs House Officers; but the Board do not anticipate that this will create any difficulty, especially having in view the evidence which was given at the enquiry by the Customs Authorities from Greenock.

The Board also think it necessary that provision should be made for an audit of the accounts of the Port Sanitary Authority by an independent Auditor to be nominated by the Board, and they have included in the Order a clause to effect that object.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Clerk to the Local Authority.

NO. 25.—CIRCULAR TO LOCAL AUTHORITIES INTERESTED TRANSMITTING AN ORDER OF THE BOARD CONSTITUTING THE LOCAL AUTHORITY OF THE BURGH OF GLASGOW THE PORT LOCAL AUTHORITY OF THE PORT OF GLASGOW.

*Local Government Board,
Edinburgh, 7th August 1903.*

CONSTITUTION OF A PORT LOCAL AUTHORITY.

Sir,—I am directed by the Local Government Board to transmit for the information of the Local Authority the accompanying copy, in duplicate, of an Order issued by the Board in pursuance of their powers under Part X. of the Public Health (Scotland) Act, 1897, constituting the Local Authority of the Burgh of Glasgow the Port Local Authority of the Port of Glasgow.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Clerk to the Local Authority.

Constitution of a Port Local Authority.

ORDER OF THE LOCAL GOVERNMENT BOARD FOR SCOTLAND CONSTITUTING THE LOCAL AUTHORITY OF THE BURGH OF GLASGOW, IN TERMS OF THE PUBLIC HEALTH (SCOTLAND) ACT, 1897, THE PORT LOCAL AUTHORITY OF THE PORT OF GLASGOW.

TO ALL LOCAL AUTHORITIES

Whose district or part of whose district forms part of or abuts on any part of the Port of Glasgow or the waters of such Port;

To all Persons having authority in or over such Port or any part thereof;

To the Local Authority of the Burgh of Greenock;

And to all others whom it may concern;

WHEREAS the Port of Glasgow is a Port established for the purposes of the laws relating to the Customs of the United Kingdom;

AND WHEREAS the district of the Local Authority of the Burgh of Glasgow forms part of or abuts on the said Port;

AND WHEREAS the districts of the after-mentioned Local Authorities under the Public Health (Scotland) Act, 1897, also form part of or abut on the said Port, viz. :—

The Local Authority of the Burgh of Rutherglen,
The Local Authority of the Burgh of Govan,
The Local Authority of the Burgh of Partick,
The Local Authority of the Burgh of Renfrew,
The Local Authority of the Burgh of Clydebank,
The Local Authority of the Burgh of Dumbarton,

The Local Authority of the Burgh of Kirkintilloch,
 The Local Authority of the Lower Ward District of the County of Lanark,
 The Local Authority of the Upper District of the County of Renfrew,
 The Local Authority of the Lower District of the County of Renfrew,
 The Local Authority of the Western District of the County of Dumbarton,
 The Local Authority of the Eastern District of the County of Dumbarton;

AND WHEREAS it is expedient that a Port Local Authority should be constituted for the said Port, and that the expenses incurred by such Port Local Authority shall be apportioned as hereinafter mentioned;

NOW, THEREFORE, We, the Local Government Board for Scotland, in pursuance of the powers given to Us by the Public Health (Scotland) Act, 1897, in that behalf, hereby Order as follows:—

SECTION I.

CONSTITUTION OF PORT LOCAL AUTHORITY.

Article 1. This Order shall come into operation on the first day of October. One thousand nine hundred and three.

Article 2. The Local Authority under the Public Health (Scotland) Act, 1897, for the Burgh of Glasgow shall be constituted the Port Local Authority for the said Port of Glasgow.

SECTION II.

LIMITS OF JURISDICTION.

Article 3. The jurisdiction of the said Port Local Authority shall, subject to the exceptions hereinafter in this Article mentioned, extend to the whole of the said Port of Glasgow as defined by the Treasury Warrant dated 19th April 1859, and to the place or places for the time being appointed as the Customs Boarding Station or Stations for the said Port, and the place for the time being appointed for the mooring or anchoring of ships for the said Port under any regulation for the prevention of the spread of diseases issued under Part IV. of the Public Health (Scotland) Act, 1897, and to all waters, harbours, and strands belonging to the said Port, and to so much of any district forming part of or abutting on said Port as comprises any dock, basin, quay, wharf, or other place for the embarkation or disembarkation of persons or the lading or unloading, trans-shipment, or removal of goods on or from any ship; but the jurisdiction of the said Port Local Authority shall not extend to or include the harbours of Dumbarton and Renfrew so far as not forming portions of the River Clyde, nor the Forth and Clyde Canal to the east of the creek and harbour of Bowling, and the harbour works connected therewith.

SECTION III.

ASSIGNMENT OF POWERS, &c.

Article 4. For the purposes of this Order the following Parts and Sections of the Public Health (Scotland) Act, 1897, shall apply, and the Port Local Authority shall, within the limits of their jurisdiction, have, exercise, perform, and be subject to, all the powers, rights, duties, capacities, liabilities, and obligations of a Local Authority under these Parts and Sections so far as the same are applicable, namely:—

Preliminary.—Section 4.

Part I.—Sections 6 to 10 inclusive, and Sections 14 and 15.

Part II.—Sections 16 to 27 inclusive, and Sections 29, 30, 36, 37, 40, and 43.

Part III.—Sections 44 to 73 inclusive, Section 77.

Part IV.—Sections 78 to 88 inclusive.

Part VII.—Sections 136, 137, 141, and 142.

Part VIII.—Sections 144 and 145.

Part IX.—Sections 146 to 171 inclusive.

Part X.—Sections 172 to 176 inclusive.

Part XI.—Sections 177 to 188 inclusive.

Part XII.—Sections 189 to 196 inclusive.

Article 5. Nothing in this Order shall affect the provisions of Section 39 of the Greenock Corporation Act, 1893, or the powers and duties of the Local Authority of the Burgh of Greenock to execute the Public Health Acts with respect to any ships coming or being within their jurisdiction and not bound for the Port of Glasgow.

SECTION IV.

EXPENSES, ACCOUNTS, &c.

Article 6. The Local Authority of the Eastern District of the County of Dumbarton shall pay to the said Port Local Authority the sum of Ten Pounds per annum towards the expenses incurred and to be incurred by the said Port Local Authority by virtue of the authority conferred on them by this Order, and the Local Authorities of the Burghs of Glasgow, Govan, and Partick shall pay to the said Port Local Authority the amount of the remainder of the said expenses in proportion to the annual value of the whole lands and heritages within their respective districts.

Article 7. The Accounts of the said Port Local Authority shall at all reasonable times be open to inspection and transcription without payment by any member of any Local Authority contributing as aforesaid, or by any officer of any such Local Authority authorised by them for that purpose.

Article 8. The Accounts of the said Port Local Authority shall be audited in accordance with regulations framed by Us, by an Auditor who shall be appointed by Us and be paid by the Port Local Authority such fee as We may approve. A copy of the Auditor's Report and of the Abstract of the Accounts of the said Port Local Authority when duly audited shall be sent by the Port Local Authority to each of the Local Authorities contributing as aforesaid.

Article 9. If at any time any difference arises between the Port Local Authority on the one hand and any Local Authority or Authorities on the other hand, or between any two or more Local Authorities, respecting any matters arising out of the provisions of this Order, the same may, if all the parties concerned agree, be referred to and be settled by a sole Arbitrator appointed in manner set forth in Sub-section Eleven of Section One hundred and forty-five of the Public Health (Scotland) Act, 1897.

Article 10. The Port Local Authority may, for the purpose of obtaining payment of the sums to be contributed by Local Authorities in terms of this Order, inspect, take copies of, or make extracts from any Valuation Roll in force in the districts of the said Local Authorities or any book relating to the same.

Given under the Seal of Office of the Local Government Board for Scotland, this Seventh day of August, One thousand nine hundred and three years.

(L.S.)

MALCOLM McNEILL, *Vice-President.*
G. FALCONAR-STEWART, *Secretary.*

NO. 26.—CIRCULAR TO LOCAL AUTHORITIES TRANSMITTING AN AMENDING ORDER OF THE BOARD CONTAINING REGULATIONS AS TO CHOLERA, YELLOW FEVER, AND PLAGUE.

*Local Government Board,
Edinburgh, 18th August 1903.*

REGULATIONS AS TO CHOLERA, YELLOW FEVER, AND PLAGUE.

Sir,—I am directed by the Local Government Board for Scotland to transmit, for the information and guidance of the Local Authority, the accompanying copy in duplicate of an Amending Order, dated 18th August 1903, containing Regulations issued by the Board in pursuance of their powers under Part IV. of the Public Health (Scotland) Act, 1897.

These Regulations, subject to certain conditions, grant additional facilities for the mooring or anchoring of ships to which such Order applies, and also provide for the intimation to the Board of the places fixed as mooring places or anchorages.—I am, Sir, your obedient servant,

G. FALCONAR-STEWART,
Secretary.

The Clerk to the Local Authority.

REGULATIONS AS TO CHOLERA, YELLOW FEVER, AND PLAGUE :
SEABOARD LOCAL AUTHORITIES.

AMENDING ORDER.

To all Local Authorities in Scotland, within whose District there is a Port or Harbour :—

To all Officers of Customs ;—

To all Medical Officers of Health of the Local Authorities aforesaid ;—

To all Masters of Ships ;—

To all Pilots ;—

And to all others whom it may concern.

WHEREAS, We, the Local Government Board for Scotland, by an Order dated the 1st day of January 1898, and an Amending Order dated the 24th day of December 1902, in the exercise of the powers conferred upon Us by the Public Health (Scotland) Act, 1897, 60 and 61 Vict., cap. 38, and of every other power enabling Us in that behalf, made certain Regulations (hereinafter referred to as "The Regulations") with a view to the treatment of persons affected with Cholera, Yellow Fever, or Plague, and for the prevention and spread of such diseases;

AND WHEREAS, by Articles 6 and 10 of the Regulations contained in Our Order dated the 1st day of January 1898, it is provided as follows:—

"Art. 6.—Every Local Authority within whose district persons are likely to be landed from ships coming foreign shall, with the approval of the Chief Officer of Customs of the port, fix some place where any ship may be moored or anchored, for the purpose of Article 10; and shall make provision for the reception of patients and persons suffering from Cholera, Yellow Fever, and Plague, and removed under Articles 13 and 14.

"In the case of any Local Authority within whose district or jurisdiction there is, in the opinion of the Local Authority and of the Chief Officer of Customs of the port, no place where a ship can be moored or anchored safely or suitably for the purpose of this Article, such Local Authority may fix some place without such jurisdiction or district, but as near thereto as possible, wherein a ship may be moored or anchored for the purpose of Article 10 hereof. Provided that no such place shall be fixed without the consent of the Local Authority within whose jurisdiction or district the said place is situate, and that in the event of such consent being refused the first-mentioned Local Authority may, in their discretion, refer the matter to Us, whose decision on any or all the points in dispute (without prejudice to any other course provided by law) shall be final; and any expenses incurred by either Local Authority in carrying into effect the provisions of this Article shall be chargeable to the Local Authority for whom such place of anchorage is provided within the terms of this Article.

"Provided also that where, in pursuance of the Order of the Privy Council of the Ninth day of September, One thousand eight hundred and ninety-three, or of any Order by the said Order revoked, or of any Order under the Public Health Act, 1896, places have been fixed for the mooring or anchoring of ships, for the purposes of the Regulations contained in any of such Orders, such places shall be deemed to have been so fixed in pursuance of and for the purposes of this Order."

"Art. 10.—The Master of any ship so certified to be infected shall thereupon moor or anchor such ship at the place fixed for that purpose under Article 6, and such ship shall remain there until the requirements of this Order have been duly fulfilled."

AND WHEREAS doubts have arisen as to the interpretation of Article 6 of Our Order dated the 1st day of January 1898;

AND WHEREAS no provision is made in Article 6 aforesaid for intimating to Us the place fixed for the mooring or anchoring of ships for the purpose of Article 10 of Our Order aforesaid;

NOW THEREFORE, in pursuance of the powers conferred upon Us by the aforesaid Act, and of every power enabling Us in that behalf, We do, by this

Our Order, make the following Regulations, and We declare that the same shall be duly enforced and executed by the Authorities and Officers mentioned in Our Order dated the 1st day of January 1898.

"Art. 1.—In the Regulations contained in Our Order dated the 1st day of January, 1898, the place where any ship may be moored or anchored in terms of Articles 6 and 10 thereof shall include any quay, wharf, pier, or landing-place within the jurisdiction of the Local Authority.

"Art. 2.—A Local Authority shall not fix any quay, wharf, pier, or landing-place as the place where a ship may be moored or anchored as aforesaid except with Our consent and subject to such conditions as We may impose.

"Art. 3.—When a Local Authority under Article 6 of Our Order dated the 1st day of January, 1898, have fixed a place where a ship may be moored or anchored for the purpose of Article 10 of the aforesaid Order, such Local Authority shall forthwith intimate to Us the place so fixed."

Given under the Seal of Office of the Local Government Board for Scotland, this Eighteenth day of August in the Year One Thousand Nine Hundred and Three.

(L.S.)

MALCOLM McNEILL, *Vice-President*.
G. FALCONAR-STEWART, *Secretary*.

NOTICE.—The Public Health (Scotland) Act, 1897, provides by Section 87 that if any person wilfully neglects or refuses to obey or carry out, or obstructs the execution of, any Regulation made under Part IV. of the aforesaid Act, he shall be liable to a penalty not exceeding *One Hundred Pounds*, and in the case of a continuing offence to a further penalty not exceeding *Fifty Pounds* for every day during which the offence continues; and any such penalty shall be recoverable with expenses at the instance of the Lord Advocate on behalf of the Board, or by any Local Authority with the consent of the Board, in any competent Court.

Date of publication in the Edinburgh Gazette,
18th August, 1903.

NO. 27.—FEVER-INFECTED BLANKETS.—COPY OF CIRCULAR LETTER ADDRESSED TO LOCAL AUTHORITIES TO WHOSE DISTRICTS INFECTED BLANKETS HAD BEEN CONSIGNED.

LOCAL GOVERNMENT BOARD,
EDINBURGH, 27th May 1903.

Sir,—I am directed by the Local Government Board to state that they have received information, in connection with an outbreak of enteric fever on board the Training Ship "Cornwall," that a large quantity of blankets lately received in this country from South Africa has been disposed of by certain London firms to persons in various parts of the country, including in the District of your Local Authority, and that bacteriological examination of some of these blankets has shown that many of them which were dirty and stained were probably specifically infected.

The Board are advised that any such blankets suspected of being infected should be efficiently disinfected by steam, and afterwards thoroughly cleansed, preferably by washing. Where this method of treatment is not adopted, the Local Authority should consider the expediency of securing the destruction of the implicated blankets. The destination of any of these blankets already disposed of by the consignees within the district should, if possible, be ascertained and the purchasers warned of the suspicion attaching to the articles.

The Board will be glad to be informed regarding the facts and any steps which it may be found necessary to take in the circumstances.—I am, Sir, your obedient servant,

(Signed) A. MURRAY,
for Secretary.

To Town Clerks or District Clerks,
as case may be.

No. 28.—EXTRACTS FROM REPORTS FOR 1902 BY SANITARY OFFICERS.

(1) POLLUTION OF AYRESHIRE STREAM BY NATURAL DRAINAGE OF A MINE.

The wholesale poisoning of fish in the Girvan was due to the discharge from a disused coal-pit of water which was highly impregnated with metallic salts, especially sulphate of iron (ferrous sulphate). The presence of such a large amount of these salts in the water was probably due to the fact that a number of years ago the coal-pit caught fire, which could not be extinguished, so that the oxidation of the iron pyrites (ferric sulphide) and other ingredients in the shale or clay was evidently the result of the decomposition caused by the fire. The Carrick District Committee took the opinion of Mr. John Rankine, K.C., as to their power for dealing with the matter under the Rivers Pollution Prevention Act of 1876. They were advised, however, that, as the water discharged from the pit was in the same condition as that in which it had been drained or raised from the mine, it did not, according to Section 5 of the Act, constitute an offence under the Rivers Pollution Act. The matter had, therefore, to be taken up by the Fishery Board and interested proprietors.

C. R. MACDONALD, M.D., D.P.H.,
County Medical Officer.

(2) ON THE ESTIMATION OF THE POPULATION FOR INTER-CENSAL YEARS.

In calculating the population for the inter-Census years, I have previously pointed out that it is very fallacious to assume the same growth or diminution year by year in one decennial period as had been experienced in that immediately preceding. This being so, the safest way to ascertain approximately the population in any year appeared to be to find from the Valuation Roll the number of occupied houses and to multiply by the average number of persons per house as given in the Census Report. This method, however, as noted by me in a former report, is subject to a curious fallacy. An "inhabited house" in the Census returns is not the same as an occupied house in the Valuation Roll. According to the Census "a separate house was reckoned—every dwelling (1) with a distinct *outside* entrance from a street, court, lane, road, &c., or (2) with a *door opening directly into a common stair or passage*: but if any such dwelling is subdivided and occupied by different families it must be reckoned as only one house. . . . " It is obvious that under this definition half a dozen occupied houses opening into a common passage are counted as only one house, while in the Valuation Roll they appear as six houses. The factor, therefore, of the average number of persons per house yielded by the Census returns will be incorrect if applied to the Valuation Roll. To get over this difficulty I have ascertained from the Valuation Roll the number of occupied houses in the Census year, and have, for each parish in the county, divided the Census population by the number of houses in the Valuation Roll. The factors thus obtained will be applicable up till 1911, the year of the next Census.

[Dr. M'Vail gives a Table in which the difference between these two factors is shown as applied to the estimation of the population, in 1902, of each parish of the Eastern and Western Districts of Dumbartonshire, of the Districts, and the County. The serious difference may be illustrated by the results for the Districts. The Valuation factor was found to be for the Eastern District 4·808 in place of 5·118 persons per house, for the Western District 4·597 in place of 4·934 persons; so that the result of using the Census factor would be to give an exaggerated estimate of the population in every year, with a consequent under-statement of the death-rates and birth-rates calculated on such populations.]

J. C. M'VAIL, M.D., D.P.H., F.R.S.E.,
County Medical Officer of Dumbarton and Stirling.

(3) HOSPITAL NURSES TO TRAVEL WITH FEVER PATIENTS IN THE AMBULANCE WAGGON.

No arrangements having been made in connection with Dumbarton Joint Hospital for the ambulance waggon to be accompanied by a nurse to attend to patients during their removal to hospital, I brought the matter before the Public Health Committee, and it was afterwards dealt with by the Joint-Hospital Board. My recommendation to the Public Health Committee, forwarded to the Hospital Board, was that a nurse accompany every case. The decision arrived at by the Board was "that a nurse from the hospital be sent to accompany the hospital patients where in special cases that be asked by the medical attendants of the patients." I have sent a copy of this resolution to the practitioners in the Western District, accompanied by the following note :—"I append excerpt from minute of meeting of the Dumbarton Joint-Hospital Board with reference to a nurse accompanying patients in the ambulance waggon to the hospital. In any case in which you require the services of a nurse the course would be to send a note along with the notification certificate. If a written request is not forwarded along with the notification certificate it may be handed to the inspector when he first visits the house, previous to the sending of the ambulance waggon."

It is so far satisfactory that the Hospital Board have agreed that, in certain cases, a nurse shall be sent from the hospital to attend to patients during removal from their homes to the hospital in the ambulance waggon. While sympathising with the Board in their desire to keep down expenditure, I am of opinion that the resolution as to ambulance nurses does not go far enough. It is no doubt the fact that many mild cases of scarlet fever do not actually require the attendance of a nurse in the ambulance waggon, but it is impossible to make a proper distinction beforehand between all cases needing attendance and all cases not needing it. In rural districts, and even in populous places, the medical attendant may not see his patient on the day of removal to hospital, and a patient really needing a nurse may in that way be overlooked. Medical men, it may be noted, have no obligatory duty laid on them to send such notice, and get no fee for it, but in the interests of their patients I have no doubt that they will give intimation where the necessity for it comes before them. Independently of difficulty in giving effect to the minute above quoted, it seems to me that from the moment when, not primarily for its own benefit, but for the protection of the public health, a child is taken out of the hands of its parents, it becomes the duty of the authority undertaking the charge of the child to see that every possible care is used to prevent any harm coming to the patient from the proceedings. Every avoidable risk should be guarded against. On that account a qualified nurse should accompany the patient from the home to the hospital. The presence of a nurse is useful as a protection not merely to a child, but to the public authority itself, for there can be no better means of preventing or rebutting frivolous charges of maladministration with regard to hospital removals. The Hospital Board having so far accepted the principle, there is little doubt in my own mind that when the advantages of the practice are appreciated it will soon come to be a matter of routine, even if no formal advance be made from the terms of the resolution above quoted.

J. C. M'VAIL, M.D., D.P.H., F.R.S.E.,
County Medical Officer of Dumbarton.

(4) AS TO THE ADMISSION OF MOTHERS WITH INFECTED INFANTS TO HOSPITAL.

On 20th November I wrote as follows to the District Clerk:—"Can you tell me whether the Joint Hospital Board have had occasion to come to any definite resolution as to whether mothers under any circumstances should be allowed to reside in hospital with very young children? The practice is not at all a good one, and should be discouraged as much as possible; but occasionally circumstances might justify an exception, as when, for example, a child at the breast suffers from infectious disease and requires hospital isolation and treatment to prevent spread of infection, but at the same time could not be safely weaned in the height of its illness. . . . By instruction of the Public Health Committee the query was forwarded to the

Joint-Hospital Board. After consideration, the Board "agreed to refuse the admission of mothers with very young children suffering from disease to the hospital." I am of opinion that this decision is too rigid. As pointed out in my letter, a child at the breast may require isolation to prevent spread of infectious disease, but may itself be in a condition unsafe for weaning. I quite recognise that mothers should be admitted as seldom as possible, as they are apt to interfere with nurses in the performance of necessary duties, but in some circumstances it would be a less evil to admit the mother than to allow a case of infectious disease to be treated at home.

J. C. M'VAIL, M.D., D.P.H., F.R.S.E.,
County Medical Officer of Dumbarton.

(5) SYSTEM OF REGISTRATION OF WORKSHOPS IN DUMBARTONSHIRE.

The total number of workshops on the registers in the landward part of the county at the end of the year was 257. Of these, 127 were in the Western District, and 130 in the Eastern District.

The lists have been added to during the year, and are no doubt capable of further addition. To save double clerking and the keeping of bulky registers in addition to notebooks for inspections I have had pocket registers printed and well bound in leather so as to be sufficient for all purposes. A folio is devoted to each workshop, the left-hand page of the folio containing the details of the first inspection, and the right-hand page being for notes on subsequent inspections. A copy of the left-hand page is given.

Pocket Register of Workshops.

RECORD OF FIRST INSPECTION.

No. Date of Record.

Business.

Address.

Name.

Is Abstract of Act posted up?

Is any woman, young person, or child employed? If so, how many?

Is any Home Work done?

Cubic capacity of Rooms in feet	(1)	(2)	(3)	
(4)	(5)	and permissible number of Employees.		
(1)	(2)	(3)	(4)	(5)

Walls, how treated.

Ceilings, how treated.

Floors, materials and condition.

Ventilation, means of.

Cleanliness.

Sanitary conveniences.

Remarks.

Each register is sufficient for 100 workshops. Some small workshops have frequent changes of tenant, and a place found in use as a workshop at one visit may by the next visit have become a dwelling-house.

JOHN C. M'VAIL, M.D., D.P.H., F.R.S.E.,
County Medical Officer of Dumbarton and Stirling.

(6) AS TO RECOVERY BY LOCAL AUTHORITIES OF THE COST OF TREATMENT OF PATIENTS IN HOSPITAL.

An interesting question as to recovery by Local Authorities from persons suffering from infectious disease, or from their parents or guardians, of the whole or part of the cost of the treatment and maintenance of such infected persons in hospital was considered by a sub-committee of the Public Health Committee. Their report, which has since been endorsed by the County Councils, is of such importance as to justify its quotation in full.

"We have carefully considered the remit made to us on 15th January, 1902, by the Public Health Committee, following upon minute of the Thornhill District Committee asking advice on the subject in the hope of such advice leading to a uniform policy being followed throughout the districts of the county.

"The difficulties of the question arise largely from incidental points not having been clearly regulated by statute, judicial decision, or even by custom. After referring shortly to the most important of these points, we propose to state generally the policy that we think might properly be followed in the matter by the District Committees of the County as Local Authorities under the Public Health Act.

"While it does not appear to be in the power of any ratepayer or inhabitant suffering from infectious disease to call upon the Local Authority of the district to provide him with accommodation and treatment in hospital, or to provide him with treatment in his own house or lodging, it is clearly in the power of the Local Authority to order or procure the removal to hospital of every such infected person who is without proper lodging or accommodation, or is so lodged that proper precautions cannot be taken for preventing the spread of the disease, or is lodged in a tent or van, or in a room occupied by others besides those necessarily in attendance on such infected person, or is on board a ship, or is in a common lodging-house. Alternatively the Local Authority may procure the removal from the room or house occupied by such infected person of all others not in attendance on him (in which case they are bound to provide suitable accommodation for the persons so removed), and may provide nurses, medicines, and medical attendance for such infected persons in their own houses. The only ground for doubt as to the power of the Local Authority to enforce removal in a particular case is as to whether or not an infected person is without proper lodging or accommodation, or is so lodged that proper precautions cannot be taken for preventing the spread of the disease. We think this point should, as a general rule, be determined by the opinion of the medical officer of health. There does not appear to be any limit upon the power of a Local Authority to remove to, and treat in, hospital all infected persons in their district who are willing to be so removed.

"If a Local Authority removes an infected person to hospital for treatment, or supplies such person with nursing or medical attendance in his own house, they are not empowered to recover the cost. But in the case of a person who is able to provide proper accommodation and treatment desiring for himself or any member of his household removal to and treatment in hospital, the Local Authority might refuse to carry out the removal unless the person undertook to pay the expenses or such proportion thereof as the Local Authority might see fit to exact.

"This leads to the important question whether it is desirable or justifiable to draw a distinction between inhabitants of a district as regards the opening to them of the benefits of hospital treatment. We take it as an axiom that the greater the proportion of infectious cases occurring in a district which are removed to and treated in hospital the less will be (1) the risk of the disease spreading, (2) the interference with the education of the young, (3) the loss to traders, (4) the inconvenience to householders, and (5) the aggregate cost to a community of an outbreak of infectious disease.

“ Opening the hospital without payment only to those regarded as unable to pay for treatment therein would almost inevitably lead to its being regarded as practically a charity, and would foster a very undesirable prejudice against removal to hospital amongst a large section of the community whose infectious cases could not be satisfactorily isolated and treated in their own homes. A hospital is provided and maintained from rates levied equally over the whole district: it cannot in any sense be regarded as a charity; and it seems scarcely equitable that persons able to pay for treatment therein (who would, as a general rule, be the largest contributors in rates towards its cost) should not (so long as there is accommodation available) be allowed to have hospital treatment, without charge, for themselves and the members of their households should they desire it.

“ If, before removal of an infected individual from the the household of a person regarded as able to pay for hospital treatment, an undertaking to pay had to be obtained from such householder, the duty of estimating the means of the householder and deciding whether a guarantee to pay was to be exacted would necessarily have to be devolved on some official. It seems to us that this would be an invidious and undesirable task to impose upon any official or other individual.

“ On the whole, we consider that a Local Authority that encourages the removal to, and treatment in, their hospital, without payment, of as many as possible of the infectious cases occurring in their district is pursuing the policy most effective in preventing the spread of infectious disease, and best calculated to minimise the loss to traders, inconvenience to householders, and interference with the education of the young, as well as the most economical in the end to the community. A Local Authority holding these views might at times find it necessary to modify their policy by reason of the available accommodation proving inadequate. Such a policy should be carried out on the distinct understanding that all persons removed and accommodated at the public expense should receive equal treatment in hospital. Of course, if the accommodation permitted, special accommodation or treatment might be made available to persons desiring such, provided these persons defrayed the full cost thereof.

“ We deemed it well to submit the draft of our report (in above terms) to the Local Government Board for Scotland, and ask their comments upon our conclusions. The Board's reply to that request is appended, and referred to.

“Letter from Local Government Board referred to.

“ Local Government Board,
Edinburgh, 1st April, 1902.

“ Sir,

“ Your letter of the 19th March and accompanying draft report by a sub-committee of the Public Health Committee of the County Council as to the removal of patients to hospital and the recovery of the costs from the patients or their parents or guardians have been under consideration of the Board, and I am directed to say that the Board have read the draft report with great satisfaction. They are gratified to find that the sub-committee recommend a policy in regard to infectious disease which has always appeared to the Board to be the safest and best, and they trust that the report will be endorsed by the County Council and adopted by the various district committees.

“ I am to direct your attention to the following extract from a letter written by the Board to a Local Authority who had asked their advice in the matter and reported in the Board's Report for 1896-7 [see pp. xxxv-xxxvi of Third Annual Report].—I am, Sir, your obedient servant,

“ G. FALCONAR-STEWART,
Secretary.

“ The County Clerk, Dumfries.”

J. MAXWELL ROSS, M.A., M.B.,
County Medical Officer of Dumfries.

(7) LANARK COUNTY BACTERIOLOGICAL LABORATORY.

The Public Health Committee, at their meeting of 30th April, authorised the equipment of a bacteriological laboratory, and the carrying out of the work by one of the assistant medical officers. The necessary arrangements for receiving and examining specimens were completed in October and a circular letter issued to medical practitioners in the following terms :—

“Bacteriological Aids in the Diagnosis of Infectious Disease.

“DEAR SIR,—“The County Council having provided and equipped a bacteriological laboratory, I am authorised to make known to medical practitioners in the Upper, Middle, and Lower Ward Districts of the county that specimens taken in connection with the diagnosis of infectious diseases, such as typhoid, diphtheria, and pulmonary tuberculosis, will now be examined free of charge. Outfits will be forwarded on application, and the printed forms enclosed explain the procedure to be adopted.

“In offering these facilities the County Council realise the immense importance to the district committees, as local authorities under the Public Health Act, of prompt recognition and notification of infectious illnesses, and hope that full advantage will be taken of the laboratory.

“JOHN T. WILSON,
County Medical Officer.”

I would call special attention to the fact that the bacteriological examination of specimens is only looked upon as an aid to the diagnosis of disease, and that it is only helpful to the medical practitioner when the result of examination affords corroborative evidence, or a result not at variance with the clinical symptoms. The great value of these laboratory results may be learned from the account given of the work done.

It was suggested that the laboratory might also be useful to veterinary surgeons in connection with the recognition of diseases notifiable under the Contagious Diseases (Animals) Acts. The matter was brought before the Executive Committee, with the result that the following circular letter was issued :—

“SIR,—I have been instructed by this local authority to invite the co-operation of the veterinary surgeons practising in the county in detecting contagious diseases amongst animals and preventing the spread of such diseases. With this object they have arranged with Dr. Wilson, the county medical officer, that veterinary surgeons should be granted the privilege of having specimens taken from animals affected or suspected of being affected with disease examined in the county bacteriological laboratory at Hamilton free of charge, and I am to express the hope that full advantage will be taken of the facilities offered. The sending of such specimens, however, must not be taken to relieve the owner or other person or persons of any obligation which rests upon them under the Diseases of Animals Acts or the Orders of the Board of Agriculture to report cases of disease or suspected disease to the local authority.

“I am also directed to say that, although the object is primarily to detect and prevent the spread of those diseases which are dealt with under the Diseases of Animals Acts and Orders of the Board of Agriculture, specimens taken from animals suffering or suspected to be suffering from other diseases may be transmitted.

“The greatest care should be exercised in the taking of specimens, and these should be carefully enclosed in bottles, and forwarded without delay to ‘The County Medical Officer, County Buildings, Hamilton,’ stating at the same time the name and address of the owner of the animal from which the specimens were taken. It is proper, however, to state that, with regard to anthrax, it is provided by the Anthrax Order of 1899 that in no case shall the skin of the carcase be cut, nor shall anything be done to cause the effusion of blood, unless by or under the supervision of a veterinary inspector of the local authority. In the case of anthrax or suspected anthrax, information should therefore at once be sent to the County Veterinary Inspector of the district—that is, to Mr. Daniel Hamilton, V.S., Hamilton, for the Middle and Lower Wards, or to Mr. John Jarvie, V.S., Carlisle, for the Upper Ward, as the

case may be, who would arrange for the taking of a specimen of the blood for the purpose of examination.

" W. ALSTON DYKES,
County Clerk."

In response to both these circular letters, 371 specimens have been received, examined, and reported on during the nine months that have elapsed since the laboratory was opened.

* * * * *

Most of the specimens were forwarded by medical practitioners from cases in general practice, although a few specimens were sent by physicians from cases in the smaller fever hospitals. In the larger county hospitals at Motherwell and at Lightburn, where there are resident physicians, the necessary examinations are made in the hospital laboratory.

From veterinary surgeons six specimens were received.

The general procedure observed is briefly as follows :—Outfits for the transmission of specimens are kept in stock at the laboratory, and are issued upon application, the arrangements being such as to give as little trouble as possible to the persons sending the specimens. These specimens are examined on receipt without delay, and the result despatched by post, but in cases of urgency by telegram.

JOHN T. WILSON, M.D., D.P.H.,
County Medical Officer.

(8) ON THE MILK STANDARD FIXED BY THE BOARD OF AGRICULTURE.

My opinion is still the same as in last year's Report, that the standard for sweet milk should be imperative, and that dairymen who sell milk under the given standard should be convicted of a contravention under the Act, and they ought to be compelled to keep and feed their cows so that they may give the required liquid. We have found out in our experience this last year that the appeal to the cow is played out. Dairymen who adulterate are fully alive to that fact, and when you go to the byres they make a pretence of milking the cows, but instead of milking them outright they only milk them about half. Then you get your sample with about 2·50 or so of butter fat, and what is left in the cows is in some cases above 5 per cent. So that now I am convinced that before a satisfactory sample can be got from the byre some independent party must be told off to milk them. As it is at present it is a waste of public money to prosecute where the difficulties are so great and the law so ambiguous.

JOHN FREW,
County Sanitary Inspector of Linlithgow.

(9) MEASURES TAKEN FOR THE IMPROVEMENT OF THE SOURCES OF THE ANCRUM WATER SUPPLY.

The supply of water for Ancrum Special District was ample during the year. Extensive alterations were made at the fountain-head of this supply last spring. The supply is derived from two separate sources situated on the farms of Woodhead and Palacehill, about a mile and a half from the village. Both sources are in the centre of arable fields, which are in a high state of cultivation and heavily manured. In each case the water is issuing from deep-seated springs in the upper Old Red Sandstones, and at the sources is of excellent quality, but, unfortunately, when the supply was first taken to the village the protection of the springs from pollution from the surrounding lands had been entirely neglected. When I visited the ground, one of the fields, that on Palacehill, had just been heavily coated with farmyard manure, the washings of which were gaining direct access to the water by means of the field drains and defects in the gathering tank. At Woodhead the field was in turnips, which were being eaten by sheep. Here the water was carried from the springs to a small gathering tank by means of land tiles and stone drains. In wet weather the washings from the surface of the field had ready access to the water by means of rat and mole holes to the drains. The state of matters can be better imagined than described, and the Local Committee at once set about putting matters right. I personally superintended the carrying out of

the improvements. In each case the subsoil was removed from round the orifice of the spring to a depth of six feet, well into the impervious substratum. Eighteen-inch spigot-and-socket fireclay pipes were then placed vertically over the springs and carried up two feet above surface level and fitted with lock-fast lids, the space between the pipes and the soil being carefully filled with good tenacious clay puddle to exclude the surface and subsoil water. The land tiles and stone drains were replaced with close-jointed pipes, the field drainage cut off and taken to another outlet. At Woodhead a new gathering tank was provided, and that at Palacehill was repaired. In order to make the supply absolutely safe I advised the Committee to arrange with the proprietor of the land for a patch of permanent pasture to be laid out around the springs, which has now been done at Palacehill. In the case of Woodhead the field is now in grass, and it is intended to have the fountain-head protected in the same manner previous to the field being again broken up.

JOHN SMITH,

County Sanitary Inspector of Roxburgh.

(10) GRADUAL EXTINCTION OF ENTERIC FEVER BY IMPROVEMENT OF WATER SUPPLIES IN WIGTOWNSHIRE.

A great deal of work is done annually in improving the water supplies of the county, and there is much evidence to show that the work has been effective. Although, of course, it is too much to claim that finality has been reached, still it is within sight. Complaints of bad water are becoming fewer each year, and the record of the county in recent years as regards typhoid fever is a remarkable one. This disease, the older practitioners tell me, was exceedingly prevalent in the county in pre-sanitation days. It now appears to be well-nigh extinct. A very large proportion of the population are supplied from surface wells, and the moral to be drawn from this fact is that these wells with reasonable care can be made to supply perfectly wholesome water. A good deal yet remains to be done to further improve the water supplies of cot-houses.

R. W. D. MACMARTIN CAMERON, M.D., D.Sc.,
County Medical Officer.

(11) DISCONTINUANCE OF THE COMPULSORY NOTIFICATION OF MEASLES AND WHOOPING-COUGH IN ABERDEEN.

The question of continuing the notification of these two diseases was raised in the Public Health Committee in the autumn of last year, and I was requested to prepare a report on the subject. Although the report was not before the Town Council until after the close of the year, I may refer here to the action taken. The report consisted of an analysis of the cases of these and other zymotic diseases notified since the commencement of notification, and of a statement of the efforts made to control their spread. It also embraced a summary of the practice in other parts of the United Kingdom with regard to the notification of measles and whooping-cough, and gave the views of several medical officers of health where such notification had been in force. The main points may be briefly stated thus :—

1. The number of reported cases of measles and of whooping-cough in Aberdeen, after making due allowance for growth of population, has greatly increased since the commencement of notification.

2. A zymotic census which was made of young persons of from 10 to 20 years of age in the University and certain schools gives ground for believing that this increase was, for both diseases, more apparent than real, owing to a fuller notification of cases in more recent years ; but, even after taking this into account, it could not be maintained that either disease had diminished in prevalence.

3. Notwithstanding that each notified case had been visited by an inspector and all practicable and reasonable means used short of extensive hospital isolation, for preventing the spread of the disease by isolation and otherwise, it was apparent that notification had not reduced the prevalence of measles and whooping-cough.

4. There was no conclusive evidence that the experience of other places where these diseases are notified differed from that of Aberdeen.

5. With regard to the mortality from these diseases, it appeared from the returns for the various years as if the case-mortality had fallen, in the latter years of notification, slightly in measles and very considerably in whooping-cough; but almost the whole of this fall in measles was probably attributable to a fuller notification of sicknesses. In whooping-cough, the fall in the case-mortality was too great to be wholly accounted for in this way, and might, therefore, have been in some measure due to the greater care exercised by the parents in the management of cases owing to the visits of the inspectors and the information conveyed in the printed set of instructions left with each case.

6. On the other hand, it had to be admitted, from an examination of the mortality rates from whooping-cough in other towns where notification of this disease was not in force, that the mortality from this disease in relation to population had undergone a greater reduction than in Aberdeen, from which it is to be inferred that whooping-cough, like some other zymotics—for example, scarlet fever—exhibits cyclical changes in degree of case-mortality dependent on conditions which are not at present properly understood, and which may not be in large measure “sanitary,” as the term is usually understood.

7. At the same time it was difficult to believe that the greater attention given to measles and whooping-cough cases through their inclusion among the notifiable diseases had not in some degree, however small, contributed to the saving of some lives, if not to any reduction in the prevalence of the diseases.

8. Moreover, there was the question of enabling parents and teachers to comply with the school-attendance section (Section 57) of the Public Health Act, which requires that no child from an infected household shall be permitted to attend school without a certificate that the child is free from infection and that the house has been disinfected. This certificate has almost invariably been granted by the Medical Officer of Health based upon information from the medical attendant and on the disinfection of the house and clothing by the sanitary staff.

9. The conclusion of the whole inquiry, therefore, was that, while the proved results of the notification of measles and whooping-cough were probably not such as to justify the continuance of compulsory and paid notification—the fees for which had amounted on an annual average during the last ten years to £486—it was desirable to obtain, as far as possible, information, by voluntary and unpaid means, of cases, especially among children in attendance at school or in families with school members, and it was believed that such information could be obtained in part directly from the parents themselves, and in part through the attendance officers of the School Board, whose principal duty it is to inquire into the cause of absence of children from school.

The report, of which the above is a summary, was considered by the Town Council in January of the present year, when it resolved, with the sanction of the Local Government Board, to discontinue the compulsory notification of measles and whooping-cough. The sanction of the Board having been immediately afterwards obtained, compulsory notification ceased early in February. I was, however, authorised by the Public Health Committee to take such steps as I might think practicable for keeping in touch with cases of these diseases for the purpose especially of seeing to disinfection before the return of an infected child to school. I took advantage accordingly of the circular which was being issued to all householders informing them of the discontinuance of compulsory notification to say that I would welcome voluntary notification. This request has been freely responded to, supported as it has been by the private advice of the medical attendant. Indeed, the notifications from parents have increased more than tenfold since compulsory notification ceased. I also arranged with the attendant officers of the School Board, whose daily duty it is to ascertain the reason for any absence from school, to inform me of such cases of measles or whooping-cough as they might discover. This arrangement has also worked admirably, and the officers not only send an intimation of the case, but supply the chief particulars on a form provided by me, noting at the same time if the case requires a visit from a sanitary officer. Every case, however, in one or two roomed houses is visited by a sanitary officer. With each case visited by a sanitary officer there is left the usual printed instruction as to the hygienic care of the case and the precautions necessary to prevent the spread of the disease, together with, in school-

children cases, a circular regarding school attendance, to which is attached a post-card having a printed form suitable for intimating to me the termination of the case, when the house and clothing are disinfected prior to the child returning to school. When the case has not been visited by a sanitary officer—usually a case in the house of three rooms or upwards—copies of these instructions with card are sent by post. These arrangements for securing disinfection have also worked excellently and smoothly, there being scarcely a failure in the return of the cards. On receiving the card the house is disinfected by the sanitary staff, and the usual clearance certificate for school purposes is then granted by me. So far as I can judge, we have under the new arrangements been kept informed of the great bulk of the cases of measles and whooping-cough, and practically of every case where school attendance was concerned, and the school arrangements have worked with as much smoothness and completeness as before the stoppage of compulsory notification although we had for nearly two months to deal with about 130 to 150 cases weekly.

MATTHEW HAY, M.D.,
Medical Officer of Health, Burgh of Aberdeen.

(12) DRINKING OF METHYLATED SPIRITS.

I feel it to be my duty to direct attention to the growing use of methylated spirits as an intoxicant.

As is generally known, methylated spirits is ordinary spirits of wine, with one-tenth of wood spirits added to it. Within recent years a small proportion of petroleum oil (3 to 800) has also been added. These additions have been authorised by the Government in order to enable persons engaged in certain industries to obtain an alcoholic spirit for industrial purposes which, because of its being rendered nauseous and unpalatable, might be sold and used practically free from the heavy duty applicable to ordinary spirits of wine, without, it was believed, any one being tempted to use it for intoxicating purposes. Unfortunately these nauseous additions are not deterring the poorer and more degraded class of drinkers from using methylated spirits as an intoxicant, and I have good reasons for believing that such a use of it is gradually increasing. Methylated spirits can be retailed, I believe, at 4s. a gallon, or 4d. a pint bottle, and if diluted to the same strength, in respect of alcohol, as cheap whisky, could be sold at, say, 3s. a gallon, or 3d. a pint bottle, or less than a half-penny a glass. Even the cheapest genuine whisky costs probably four to five times as much as this. The licence to retail methylated spirits is obtained from the Excise in much the same way as a licence to sell tobacco, and several grocers and others, as also druggists, hold this licence, although not licensed in the usual way to sell ordinary spirits. There are practically no restrictions on the sale of methylated spirits, except that it cannot be sold on Sunday. Any quantity from a gallon down to a halfpenny worth may be sold. The traffic among those who drink it is, I am told, mainly in half-penny and pennyworths; and as much can be got for a penny as would be equivalent to two glasses of whisky. At a certain grocer's shop in the east end where methylated spirits is freely retailed in small quantities, as many as 70 men have been seen to enter the shop within one to two hours in a morning for the purchase of the spirits. Each carries the necessary bottle, and after leaving the shop proceeds to a neighbouring water-tap to dilute the spirits and then drink it. The effects are much worse than those of ordinary spirits. Not only is there the ordinary intoxication, but there is also a form of stupor, somewhat similar to what is observed after taking a soporific drug like opium, and the person is usually unable to work for the rest of the forenoon. If a considerable quantity of methylated spirits has been consumed, I have several times seen so deep a stupor that it was impossible by any method of stimulation to induce conscious response. In ordinary alcoholic intoxication such a response is practically always obtained. The general moral effect of the methylated spirits is bad. When a man takes to drinking methylated spirits he goes rapidly from bad to worse, becomes exceedingly irregular in his work, neglects his family, and loses all moral sense. His health also rapidly deteriorates, and more quickly than under the excessive use of ordinary spirits. The methylated spirits is so cheap that a man,

however poor or broken-down, is scarcely ever without the necessary half-penny or penny, though it should have to be borrowed from a fellow-workman; and I am informed that such borrowings are frequent. Thus, apart from the deleterious effects of the spirits, a man can obtain a larger supply of alcohol and continue his debauch for a longer time than if he were dependent solely on ordinary spirits.

So far as I can ascertain, the drinker of methylated spirits does not acquire a preference for it to ordinary spirits. Its sole attraction is its cheapness. He is usually a man who has previously been accustomed to indulge a little too freely in ordinary spirits, without, however, necessarily becoming an irregular worker. His degradation is greatly accelerated by the change to methylated spirits.

I am indebted for much of this information to the Labourers' Federation in Aberdeen, who are seriously apprehensive of the great evils arising from the growing addiction to the use of methylated spirits among men in their own ranks. I am told that the practice is as prevalent in other large towns as in Aberdeen. If this is so, it is plain that the materials added to methylated spirits to prevent its use as an intoxicant are not adequate, and that the Inland Revenue Department should again consider what further steps may be taken to put an end to a serious evil, whether by a different and more disagreeable sophistication of the spirits, or by some restriction of the sale of the spirits.

I would suggest that the Town Council should inquire into the existence of this dangerous practice, and if satisfied of it, should make a representation to the Government.

MATTHEW HAY, M.D.,

Medical Officer of Health, Burgh of Aberdeen.

(13) METHOD OF DEALING WITH SMALLPOX IN A MODEL LODGING-HOUSE IN AIRDRIE.

Early in the year an outbreak of Smallpox occurred in a Model Lodging-House with accommodation for 331 inmates, and which at the time of the outbreak accommodated nearly 300 persons. This outbreak gave us much anxiety, and necessitated a great deal of attention and adoption of every means to check the spread of, and stamp out, the disease, in which, fortunately, we were very successful, as the disease was prevented from spreading to any other houses in the Burgh. It was known that a person, who was at the time in Hospital suffering from a modified form of Smallpox had left the Model Lodging-House on the 10th of January: twelve days thereafter (22nd January) the outbreak occurred. There were 13 cases in all, and by the 10th of February the Model-Lodging House was proclaimed free of Smallpox. . . . At the time of the outbreak there were four unvaccinated persons in the Lodging-House. One left hurriedly when the disease was named, another was vaccinated and did not contract the disease, the other two took Smallpox and both died (one of malignant Smallpox). The difficulty . . . was how to instruct or advise so many inmates so as to obtain their confidence and co-operation, and be able to regulate their movements. Some were working by day, others by night: they were never all in the house at the same time till late on Saturday night, and at that time they were not in a condition to receive instruction. The lesson that I learned was to gather them as a congregation on Sunday, which I did on the afternoon of that day, and gave an address on Smallpox and all that they should know regarding it. Thereafter, I found that I had the confidence and co-operation of every inmate. The Model was treated much on the same lines as a Reception House, and the epidemic was stamped out.

HUGH ARTHUR, M.D.,

Medical Officer of Health, Burgh of Airdrie.

(14) WORKING OF THE SMALL DWELLINGS ACQUISITION ACT, 1899, IN BO'NESS.

Closely allied with the Improvement Scheme was the endeavour of the Town Council to provide dwellings under the Small Dwellings Acquisition Act (62 & 63 Vict. cap. 44). So far as we are aware this is the first attempt

made for the adoption of the provisions of this Act in Scotland, and many enquiries have been received for particulars of the scheme.

The Town Council carefully considered the whole question, and eight *bond-fide* working men having indicated their intention to become proprietors under the conditions specified in the above Act, decided to build a block of dwelling-houses. The property consists of eight room-and-kitchen houses, each provided with sink and water supply, as also one W.C. for the use of each household. Two washing-houses with all necessary appliances were also provided. The building was completed and occupied during the month of October last, and the entire cost amounted to a little over £1200. The Town Council procured the first cost, and each proprietor pays £30 on occupancy, the remaining amount being payable annually over a period not exceeding 30 years, or he may purchase outright (and this has been done in one instance), or at any shorter period if he so desires it.

This scheme may be classified as a side issue of the housing problem, and, through the agency of this Act, an inducement is given to working men to become their own proprietors. The Town Council built the property for them, they taking possession when all is completed, and by practically paying an ordinary rental the property becomes their own after thirty annual payments. The Town Council lose nothing by the transaction, and as this first venture has been enthusiastically taken up, application from other eight individuals has been received, and plans are in preparation for another block of houses.

J. P. LAWRIE,
Sanitary Inspector, Burgh of Bo'ness.

(15) APPEAL IN CONNECTION WITH THE INTRODUCTION OF WATER-CLOSETS
INTO A TENEMENT PROPERTY IN DUMFRIES.

Note.—This appeal arose out of a notice given by the Town Council under Section 246 of the Burgh Police Act, 1892, which, *inter alia*, provides that :—

“ Within one month after notice given by the Commissioners in writing for that purpose, the owner of every house or part of a house occupied by a separate family . . . shall . . . provide for such house or part of a house occupied by a separate family, wherever practicable a sufficient W.C. : Provided always, that if, in the opinion of the Commissioners, it is not advisable to introduce W.C.'s. into each house, or part of a house, they, after a like notice, may . . . require the owners of a tenement to construct on each flat, or in some convenient place or places adjacent to such tenement, a sufficient number of W.C.'s. for the separate use of each sex of the inmates and occupiers of the said tenements.”

An important Appeal against an Order of the Commissioners requiring the introduction of water-closets into tenement property was decided in the Sheriff Court in favour of the Commissioners. The Order was served upon the owner of property at 171 High Street, requiring him to construct, on the first landing of each of the two tenements, two water-closets, being one for the separate use of each sex of the inmates and occupiers of each of the said tenements, within one month. The Proprietor had offered to provide W.C. accommodation outside the tenements which the Commissioners did not consider satisfactory. As stated, this Order was appealed against. Sheriff-Substitute Campion refused the Note of Appeal, and found the Commissioners entitled to expenses, being of opinion that there was no sufficient ground for interference with the respondents' judgment and did not consider it a case for granting either a proof or remit.

This decision was appealed against, but was refused by Sheriff-Principal Fleming, and the appellant found liable to the respondents in their expenses on the higher scale. In his Note, Sheriff Fleming says :—“ The Legislature “ has given the Commissioners absolute power to order the introduction of “ water and water-closets into every dwelling, and the *proviso* must be read “ with some relation to that wide power. I look upon the jurisdiction given “ to the Court as limited to cases where it is averred that the Commissioners “ are abusing the power and the discretion which has been conferred upon “ them, and acting unfairly or with gross extravagance. I find no such aver- “ ment in this appeal.”

JOHN BARKER,
Sanitary Inspector, Burgh of Dumfries.

No. 99.—STATEMENT OF REPORTS AND INQUIRIES BY THE MEDICAL INSPECTOR DURING THE YEAR ENDED 31ST DECEMBER, 1903.

1. *Huntly*—Burgh. Re-inspection of alterations of fever wards of Cottage Hospital.
2. *Keith District*—Combination Hospital. Revisited site at Dufftown.
3. *Dufftown*—Burgh. Inquiry into progress of ash-pit inspection.
4. *Musselburgh*—Burgh. Report on proposed hospital site at Sweet-hope Farm, with special reference to disposal of sewage.
5. *Coupar-Angus*—Burgh. Report on nuisance at Drill Hall.
6. *Coupar-Angus*—Burgh. Report on general sanitary condition of burgh.
7. *Port-Gordon*—Banff District. Report on drainage of special district.
8. *Inverness Poorhouse*—Report on adequacy of trained nursing staff.
9. *Stranraer*—Burgh. Report on hospital isolation of cases of diphtheria, scarlet fever, and enteric fever.
10. *Partick*—Burgh. Report on reception-house accommodation.
11. *Kilcayth*—Burgh. Inquiry in connection with a case removed to hospital.
12. *Dumbarton*—Burgh. Report on condition of ash-pits and water-closets in connection with 218 houses at Dennystown.
13. *Ayr County*—Northern District and Burgh of Kilwinning. Report on sites proposed for combination small-pox hospital.
14. *Stranraer*—Burgh. Report on pollution of Town Burn with Creamery refuse.
15. *Fife County*—Kirkcaldy District. Report on the condition of Auchtertool Burn.
16. *Pollokshaws*—Burgh. Report on condition of certain houses.
17. *Ladybank*—Burgh. Report on water-supply and drainage.
18. *Millport*—Burgh. Report on its water-supply.
19. *Forfar County*—Dundee District. Joint report, along with Mr. Curphey from Scottish Office, on pollution of Dighty Burn by effluents from bleaching works.
20. *Dumfries*—Burgh. Report on proposed site for small-pox hospital.
21. *Govan*—Burgh. Shieldhall Combination Hospital. Report on small-pox accommodation.
22. *Glasgow*—City. Report on small-pox accommodation at Belvidere Hospital.
23. *Departmental Committee on Poor Law Medical Relief*—Attended about 26 meetings. Visited following poorhouses, &c.:—*Scotland*,—Inverness, Easter Ross, Black Isle, Dalkeith, Dumbarton Combination, East Lothian Combination, Dundee, Glasgow (City), Glasgow (Barnhill), Govan Combination, Craiglockhart, Craigleith, Stonehaven Combination, Wigtownshire Combination; *England*,—Whitechapel Workhouse, Whitechapel Infirmary, Marylebone Workhouse, Marylebone Infirmary, St. George's (Fulham) Infirmary, Maidenhead Workhouse and Infirmary, Bradford Workhouse and Infirmary; *Ireland*,—Belfast Union Workhouse and Infirmary, Downpatrick Workhouse and Infirmary, Dublin North Union Workhouse and Infirmary, Dublin South Union Workhouse and Infirmary, Clifden Workhouse (Connemara), Galway Workhouse.
24. *National Vaccine Institution* and Lymph Laboratories, London; *National Vaccine Institute*, Dublin. Visited. Memoranda for Board.
25. Visited poorhouses of Edinburgh (Craiglockhart), Edinburgh (Craigleith), Glasgow (City), Glasgow (Barnhill), Govan, Dundee, Stonehaven, to arrange for weighing and measuring of inmates.
26. *Memoranda*—various.

W. LESLIE MACKENZIE, M.A., M.D.,
Medical Inspector.

January, 1904.

VACCINATION.

No. 30.—REPORT BY SUPERINTENDENT OF CENTRAL VACCINE INSTITUTION
FOR SCOTLAND FOR YEAR ENDED 31ST DECEMBER 1903.

LOCAL GOVERNMENT BOARD,
Edinburgh, 27th January 1904.

*The Secretary,
Local Government Board,
Edinburgh.*

Sir,—I have the honour to submit to the Board the following report on the work of the Central Vaccine Institution for Scotland for the year ended 31st December, 1903.

FIRST.—THE AMOUNT OF LYMPH SUPPLIED.

The total number of tubes supplied during 1903 was—(a) Glycerinated calf-lymph, 1901; (b) Humanised lymph, 124; as against 2639 and 312 for 1902. There was a distinct decrease in the demand both for glycerinated calf-lymph and for humanised lymph. The decrease was probably due to the general decrease in smallpox cases. Only 9 parishes applied for humanised lymph in 1903, as against 20 in 1902. In almost every instance, the reason given for requesting humanised lymph was that it kept its potency for a longer period than glycerinated calf-lymph. As, however, is shown in Table III., this condition is not entirely borne out by the results. As in 1902, so in 1903, the percentage of successes with glycerinated calf-lymph was distinctly higher than the percentage of successes with humanised lymph. But since the demand for humanised lymph still persists, a small supply is always kept ready for use. Of glycerinated calf-lymph, I have, as formerly, promptly received from the Government Laboratories, London, all the tubes asked for. The high percentage of successes with this lymph shows that it was potent at the time of use. In Table VI., I have shown that the longer the lymph is kept by the medical practitioner before use, the lower, on the whole, is the percentage of its successes.

TABLE I.

Showing number of Tubes supplied in each month of the year 1903.

Lymph.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total Year 1903.	Total Year 1902.
Calf, . .	15	68	99	266	290	190	90	105	192	312	288	46	1,901	639
Human,	8	12	16	16	8	21	..	6	36	..	6	124	312

SECOND.—PARISHES SUPPLIED.

In Table II. I have enumerated the Parishes that applied for lymph. The number is considerably less than in 1902.

On account of sudden outbreaks of smallpox, I supplied some lymph to two Poorhouses and one Local Authority.

TABLE II

Summary of the number of persons employed in the year 1900, with the number of persons employed in each.

THIRD.—RESULTS OF LYMPH AS USED.

In Table III., it is shown that from 943 tubes 1,112 primary vaccinations and 13 re-vaccinations were performed; 1,057 cases, or 93·95 per cent., being successful. The number of insertions for application of the lymph was 2,953. From these there resulted 2,708 vesicles. This yields an insertion-success of 91·8 per cent. In cases where the scarifications were made in two groups,

the resulting vesicles were reckoned as two; but in several cases the number of distinct vesicles was reported as much more than two.

For humanised lymph, the corresponding figures are:—Primary vaccinations, 68; successful 61, or 89·7 per cent.; insertions 197, vesicles 175, or 88 per cent. It is legitimate to infer from this that, on the whole, the humanised lymph was somewhat less potent at the time of use than the glycerinated calf-lymph; but the difference indicated by the figures is not considerable.

It will be observed that, although 2,025 tubes were issued, the Returns have been obtained only for 1,005. This is in part accounted for (a) by the unreturned schedules issued with the issues of the last quarter of the year; (b) by the wastage of tubes due to the fact that, in one or two localities, owing to epidemics of measles or whooping-cough, large numbers of vaccinations were postponed, the tubes thus becoming useless; (c) by the fact that, in a few cases, the number of tubes issued was not ultimately required, the defaulters concerned having previously been vaccinated.

With glycerinated calf-lymph, the case-success was 93·95 per cent., the insertion-success was 91·8 per cent. In his Report for 1901-1902 Dr. Blaxall records that, in 943,839 cases vaccinated, there was a case-success of 98·1 per cent. and an insertion-success of 93·3 per cent. "The primary vaccinations number 510,661, giving a case-success of 98·6 per cent. and insertion-success of 93·5 per cent." (Supplement to 31st Annual Report of English Local Government Board, 1901-1902.) It is, therefore, obvious that the results for Scotland are less satisfactory than for England. The numbers, however, differ so greatly in the two countries that a reliable comparison is not possible. In the English returns, the insertion-success is 5·1 per cent. less than the case-success. This seems to indicate that the habit of making five distinct insertions increases the probability of a successful result. In Scotland, the great majority of the cases are vaccinated with only two insertions. Between the case-success and the insertion-success there is a difference of only 2·1 per cent., but it is probable that, owing to the smaller number of insertions, the total case-success has been seriously reduced. It is a common enough experience that, of two insertions, one may fail to produce a vesicle, while the other is successful. This liability to failure is a sound practical reason for increasing the number of insertions.

TABLE III.

Showing results obtained in cases vaccinated with (a) Calf lymph, (b) Human lymph.

(a) Calf lymph.

Number of Tubes, results of which are known, at date.	Primary Cases.	Successful.	Re-vaccinations.	Successful.	Number of Insertions to which Lymph was applied.	Number of Vesicles obtained.	Percentage success.	
							Case.	Insertion.
943	1112	1046	13	11	2963	2708	93·95	91·80

(b) Human lymph.

Number of Tubes, results of which are known, at date.	Primary Cases.	Successful.	Re-vaccinations.	Successful.	Number of Insertions to which Lymph was applied.	Number of Vesicles obtained.	Percentage success.	
							Case.	Insertion.
62	66	61	197	175	89·70	88·83

Table IV. shows the number of cases vaccinated with 1, 2, 3, &c., insertions. Of the 1,191 cases vaccinated, 150 were vaccinated with only one insertion; 578 with 2 insertions; 200 with 3 insertions; 185 with 4 insertions; 2 with 5 insertions; 19 with 6 insertions; 11 with 7 insertions; 48 with 8 or more insertions.

TABLE IV.

Showing the numbers of cases vaccinated with 1, 2, &c., insertions.

Lymph.	CASES VACCINATED.								Total cases.
	With 1 insertion.	With 2 insertions.	With 3 insertions.	With 4 insertions.	With 5 insertions.	With 6 insertions.	With 7 insertions.	With 8 or more insertions.	
Calf, . .	147	557	176	165	2	19	11	48	1,125
Human, .	3	21	24	20	68

Table V. shows the length of time that elapsed after the lymph was issued from this Department before the vaccinations were performed, the number of vaccinations performed with the lymph, and the number and percentage of successes. In 759 cases, vaccination was performed within the first two weeks after issue of the lymph, the case-success being 94.59, insertion-success 93.15 per cent. In 161 cases, vaccination was performed between the second and fourth weeks after issue of the lymph; the case-success was still maintained at 94.41 per cent., but the insertion-success dropped to 86.59. In 71 cases vaccinated between the fourth to sixth weeks after issue of lymph, the case-success fell to 90.14, the insertion-success being 88.81 per cent. In 51 cases vaccinated between the sixth and eighth weeks after issue of lymph, the case-success was again 94.19 per cent., but the insertion-success was 87.38. In 56 cases vaccinated over eight weeks after issue of lymph, the case-success fell to 91.07 per cent., the insertion-success to 87.42 per cent. In 27 cases, no dates were given, but the case-success and insertion-success were each 88.89 per cent. These figures indicate that, with the lapse of time, there is some falling off in the potency of glycerinated calf-lymph. But probably the lymph is rarely kept in the dark and in a cool place as recommended. If it were so kept, it would probably retain its full potency for at least several months. All the parochial vaccinators that use the lymph are systematically advised to apply only for as many tubes as they are likely to use immediately; but it is not always possible to comply with this condition.

Table V. also shows the corresponding facts for the humanised lymph. The total number of tubes, however, is so small that no reliable inference can be drawn.

TABLE V.

Showing length of time that elapsed after the lymph was issued before the vaccinations were performed, with the number of vaccinations performed, and the number and percentage of successes.

Lymph.	Length of time elapsed after Lymph was issued and before Vaccinations were performed.	Number of Cases vaccinated.	Number of Cases successful.	Number of Insertions to which Lymph was applied.	Number of Vesicles obtained.	Percentage of successes.

Per-cent age to total.	84	3.43	4.53	7.54	10.48	8.80	11.74	9.05	7.04	5.87	20.03	5.36	2.77	.04	.008	1.43	.06	..

Table VI. shows the ages of the children at the time of vaccination. 195 were vaccinated before the age of six months. 239, or 20 per cent. of the total, were not vaccinated until the age of one year. 622, or about 53 per cent., were vaccinated between the ages of 6 months and 12 months. As these returns have been obtained only from a small number of parishes, it is impossible to infer from them the general practice as to the ages of defaulters at the time of vaccination. But in the parishes supplied with lymph during 1903, at least 30 per cent. of the children remained unvaccinated until the age of one year.

I am,

Sir,

Your obedient Servant,

W. LESLIE MACKENZIE, M.A., M.D.,
Med. Sup. Cent. Vacc. Inst.

In Parishes (marked O) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* Includes Registration Rate of about ½d. on Owners and ¼d. on Occupiers.

† Includes Registration Rate of about ½d. on Owners and ¼d. on Occupiers.

‡ These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).								Cost of Collection of Poor Rate (included in Management).	Expenditure on Lunatic Poor (included in preceding Columns).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	Assessable Rental in Assessed Parishes.		No.
Election Expenses.	Law.	Payments to other Parishes in consequence of determinations as to Boundaries.	Upkeep, etc., of Buildings.	LOANS.		Miscellaneous.	Total.					In respect of Ownership.	*In respect of Occupancy.

In Parishes (marked O) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

† This sum was received by the Parish Council too late to be included in the accounts of the year. It is brought in here to make the receipts and payments under this head balance.

EXPENDITURE (out of Ordinary Receipts).							Total.	Cost of Collection of Poor Rate (included in Management).	Expenditure on Lamentic Poor (included in preceding Columns). In Parishes (marked O) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of assessment collected from Occupiers by the Occupiers' Assessable Rental.

* These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

† There is now no separate Parish of Duddington, it having been amalgamated with the Parish of Edinburgh as at 15th May 1900. The following were the Rates levied in the Duddington portion of the Parish:—Owners, 2½d.; Occupiers, 3½d.

EXPENDITURE (out of Ordinary Receipts).								Cost of Collection of Poor Rate (included in Management).	Expenditure on Lunatic Poor (included in preceding Column).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	Assessable Rental in Assessed Parishes.		No.
Election Expenses.	Law.	Payments to other Parishes in consequence of determinations as to Boundaries.	Upkeep, etc., of Buildings.	LOANS.		Miscellaneous.	Total.					In respect of Ownership.	*In respect of Occupancy.

In Parishes (marked C) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).								Cost of Collection of Poor Rate (included in Management).	Expenditure on Lunatic Poor (included in preceding Columns).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	Assessable Rental in Assessed Parishes.		No.
Election Expenses.	Law.	Payments to other Parishes in consequence of determinations as to Boundaries.	Upkeep, etc., of Buildings.	LOANS.		Miscellaneous.	Total.					In respect of Ownership.	*In respect of Occupancy.

In Parishes (marked C) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* Figures for year ended 15th May, 1902.

† These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).														Assessable Rental in Assessed Parishes.	No.
Election Expenses.	Law.	Payments to other Parishes in consequence of determinations as to Boundaries.	Upkeep, etc., of Buildings.	LOANS.		Miscellaneous.	Total.	Cost of Collection of Poor Rate (included in Management).	Expenditure on Lunatic Poor (included in preceding Columns).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	In respect of Ownership.	*In respect of Occupancy.

* The difference between Owners' and Occupiers' Assessable Rental is due to deductions to Occupiers of Agricultural sub-jects under the Agricultural Rates (Scotland) Act 1896.

† The Assessable Rental in respect of Ownership is less than the Assessable Rental in respect of Occupancy, because certain subjects belonging to the Crown (minerals under the sea) are exempt from Owners' Rates, but, being let to a private company, are assessed for Occupier's Rates. The Crown, however, grant a contribution in lieu of their share of the Rates.

In Parishes (marked C) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* Figures for the year ended 15th May, 1902.

† These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).								Cost of Collection of Poor Rate (included in Management).	Expenditure on Lunatic Poor (included in preceding Columns).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	Assessable Rental in Assessed Parishes.		No.
Election Expenses.	Law.	Payments to other persons in consequence of the boundaries as to boundaries.	Ukceap, etc., of Buildings.	LOANS.		Miscellaneous.	Total.					In respect of Ownership.	*In respect of Occupancy.

In Parishes (marked C) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).								Cost of Collection of Poor Rates (included in Management).	Expenditure on Lunatic Poor (included in preceding Columns).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	Assessable Rental in Assessed Parishes.		No.
Election Expenses.	Law.	Payments to other Parishes in consequence of determinations as to Boundaries.	Upkeep, etc., of Buildings.	LOANS.		Miscellaneous.	Total.					In respect of Ownership.	*In respect of Occupancy.

In Parishes (marked O) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).								Cost of Collection of Poor Rate (included in Management).	Expenditure on Lunatic Poor (included in preceding Columns).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	Assessable Rental in Assessed Parishes.		No.
Election Expenses.	Law.	Payments to other Parishes in consequence of determinations as to Boundaries.	Upkeep, etc., of Buildings.	LOANS.		Miscellaneous.	Total.					In respect of Ownership.	*In respect of Occupancy.

In Parishes (marked C) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of Assessment collected from Occupiers by the Occupiers' Assessable Rental.

* These are average Rates. The Owners' Rate is obtained by dividing the amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).								Cost of Collection of Poor Rate (included in Management).	Expenditure on Lunatic Poor (included in preceding Columns).	Bonded or Mortgage Loans outstanding at the close of the Year.	Gross Rental as in Valuation Roll.	Assessable Rental in Assessed Parishes.		No.	
Election Expenses.	Law.	Payments to other Parishes in consequence of determinations as to Boundaries.	Upten, etc., of Buildings.	LOANS.		Miscellaneous.	Total.					In respect of Ownership.	*In respect of Occupancy.

In Parishes (marked C) having a Classification of Occupants, the Occupiers' Rate is an Average Rate, ascertained by dividing the amount of assessment collected from Occupiers by the Occupiers' Assessable Rental.

* These are Average Rates. The Owners' Rate is obtained by dividing the Amount of Rates collected from Owners by the Owners' Assessable Rental, and the Occupiers' Rate by dividing the amount of Rates collected from Occupiers by the Occupiers' Assessable Rental.

EXPENDITURE (out of Ordinary Receipts).

* The difference between Owners' and Occupiers' Assessable Rental is due to deductions to Occupiers of Agricultural subjects under the Agricultural Rates (Scotland) Act 1894.

† Includes £209 paid into Sinking Fund.

‡ There was a Sinking Fund of £262 at the close of the year.

APPENDIX (B.)—No. 6.

Abstract of Capital Receipts under the Poor Law Acts, and
Expenditure out of the same, during the Year ended
15th May, 1903.

PARISH.	CAPITAL RECEIPTS DURING THE YEAR.		EXPENDITURE OUT OF CAPITAL RECEIPTS DURING THE YEAR.
	FROM LOANS.	OTHER CAPITAL RECEIPTS.

APPENDIX (B).—No. 10.

GENERAL ABSTRACT of RECEIPT and EXPENDITURE of MONIES arising from CHURCH COLLECTIONS in ASSESSED PARISHES, for the Year ended 15th May 1903.

Note.—Fractions of a £ are omitted in the tabulation. An asterisk (*) denotes that in these Parishes the sum stated to be expended on the Relief of the Poor, or part thereof, was handed by the Kirk-Session to the Parish Council for that purpose.

* Maintenance includes all expenditure on account of food and clothing of every description, fuel, light, water, stimulants, and all other necessities actually used and consumed by, and furniture, furnishings, and bedding required for the comfort and subsistence of the pauper inmates, under deduction of profits derived from the sale of surplus produce, live stock, and refuse, etc., also from industries carried on in the Poorhouse.

** The Sanctioned Accommodation was increased during the year from 118 to 140. The calculations of the Average Weekly Cost for Management, House Accommodation and Medical Relief have been based on the Average Sanctioned Accommodation during the year.

†† Includes 2s. 4d. in respect of extraordinary expenditure on Clothing, Furniture, and Furnishings.

‡‡ Includes 1s. 10d. in respect of extraordinary expenditure incurred in connection with altering and fitting up.

§§ Includes 4s. 2d. in respect of extraordinary expenditure.

|| The Return for Stobhill Hospital is applicable to the period from 16th November, 1902, to 15th May, 1903. The calculations of the Average Weekly Cost for Management, House Accommodation and Medical Relief are based on the Average Sanctioned Accommodation for that period:—viz. 223.

Management includes the cost of books, stationery, etc., and all expenditure on account of the establishment, viz.—salaries and wages of officers, untrained nurses, probationer nurses, and house servants; also the rations, fuel, light, etc., required for non-pauper persons who are employed in the care and management of the Poorhouse, omitting the Medical Relief and Teaching Departments.

House Accommodation is valued at the rate of 3 per cent. on the actual indebtedness outstanding on capital account at 15th May 1902, the cost incurred during the year to 15th May 1903 for upkeep of the house in ordinary repairs and alterations, rates, taxes, insurance, duties, etc.

Medical Relief includes the salaries of medical officers, trained sick nurses, and the estimated value of their rations, also the cost of medicines or drugs, and such medical and surgical appliances as are admissible as medical relief under the rules of the Local Government act, without deduction of sums received from the Medical Relief Grant.

Education includes salaries, rations, etc., of teachers, books and other teaching requisites when the children are taught in the Poor-house, and books, etc., when the children are taught in outdoor schools.

¶ This poorhouse was formerly known as "Cambusnethan Combination."
